## PLATINUMPLAY - JT862 V2 MODULE

Bring adventure, imagination, and active play together with the JT862 V2, a feature-packed multi-play unit designed to keep children engaged for hours. With two connected play towers, exciting climbing challenges, interactive activity panels, and dual slides, this versatile playground encourages children to climb, crawl, balance, explore, and create their own adventures. The elevated rope bridge, clatter bridge, steel mesh rock wall, crawl tunnel, and horizontal ladder help develop strength, coordination, and confidence, while imaginative features such as the Shop Front, Meeting House Windows, Vroom panel, and interactive activity panels inspire social interaction and creative role play. Designed to accommodate multiple children at once, this module promotes cooperative play, physical development, and endless fun in schools, parks, and community spaces. Combining durable construction with a wide variety of play experiences, it's an eye-catching centrepiece that delivers exceptional play value for children of all abilities.

* *Includes two Interactive Play Panels as standard, with the final selection to be discussed with the client.*

## PLATINUMPLAY, 2 BAY ACE SWING

SWA231 - 2.4M H, 1 Basket, 1 x Belt and You and Me Seat

### Includes full powdercoated frame

Bring more variety, excitement and inclusive play to your playground with our 2 Bay Ace Swing! Featuring a combination of a basket swing, traditional belt seat and baby seat, this versatile design offers something for children of different ages and abilities. The spacious basket swing encourages shared play, allowing multiple children to swing together while developing balance, coordination and social skills. The traditional belt seat delivers classic swinging fun, while the baby seat provides a secure option for younger adventurers. Built with a robust, hot-dip galvanised steel frame and distinctive curved legs, this durable swing set is designed to withstand the demands of busy playground environments. A fantastic addition to any play space, bringing children together for endless swinging fun!

## KOMPAN - TIPI CAROUSEL WITH TOP BRACE

ELE400065

The whimsical shapes of the TIPI carousel with top brace attracts children in its own right. And they will play here again and again, thanks to the multifunctionality of the slick TIPI. Responsive to children's movements, the TIPI spins when pushed or pulled. Apart from being a fun negotiation and turn-taking game, the pushing and pulling build muscles and cardio. In the TIPI children can lie, sit or stand with the support of the side bars or the top frame. This welcomes children with mobility disabilities to be part of the play, too. The spinning movement trains the sense of space and balance. The sense of balance is fundamental to all other motor skills and is important for motor control, for instance being able to sit still or cycle securely, without falling.

## KOMPAN - CRAZY DAISY

M128

Big fun for little adventurers! The Crazy Daisy brings a playful twist to traditional seesawing, allowing up to four toddlers to rock, bounce and play together. Its colourful, compact design encourages children to cooperate, communicate and discover the excitement of movement. As they push, pull and rock, little ones develop essential balance, coordination and spatial awareness while building confidence and social skills. Perfect for early childhood playgrounds, this engaging little seesaw delivers endless fun and valuable developmental benefits in one space-saving design

PLAY PANELS

## TRIANGLE PLAYSTATION - INTERACTIVE PLAY PANELS

The Triangle PlayStation brings hands-on discovery and shared play together in a compact, three-sided design. Interactive panels invite children to explore textures, colours and games while developing fine motor skills, coordination and problem-solving. With activities on each side, children can play alongside friends or enjoy moments of independent exploration. A welcoming addition to any playground, encouraging curiosity, conversation and learning through play.

*Panels are selected by the client, with final pricing subject to the options chosen.*

A, Activity Hex Tower 8206

C. Swing timber - 2 bay basket

B. Inclusive Spinning Bucket

D. Ultra Tuff Panels x 4

**Inclusive & Accessible**
To ensure everyone can access and be included in play, regardless of their ability, age, cultural or social background, and to ensure shade, seating, rest and gathering areas are available and accessible.

**Sensory Stimulation**
To build neural pathways, support language development, strengthen gross and fine motor skills, promote communication skills, manage stress and anxiety, and develop focus.

**Social Interaction**
To encourage positive experiences with others such as showing empathy, group participation, generosity, helpfulness, effective communication, negotiation, and problem-solving.

**Confidence Challenge**
To get the body moving in different ways and providing challenges to boost capabilities and self-confidence.

**Fitness & Agility**
To ensure physical activities are incorporated within the playground for better health and wellbeing, and prevention of disease.
