Speedway should be kept at Western Springs, It is part of our cultural heritage and has been there far longer than any resident. It was operating when the purchased in the area. We do not need more household debt because of your grandiose plans that very few, except developers, want. You have already saddled us with wheelie bins, an expensive food scraps recycling system that few use. The last thing this city needs is another rugby, soccer or cricket ground. You are responsible for multiple venues throughout the region, you need to focus on their proper and correct use. Do not destroy a history that was established in 1929 - it is part of my heritage and a famous part if this city's heritage.

Western Springs Speedway should not be forced to close due to demands by other sports or cultural activities, nor should the community around Western Springs be allowed to exert undue influence to shut this sport down (they moved into an area with a speedway, they do not get to complain about the noise when speedway are already under extensive noise regulations). It is one of the best speedway facilities in NZ, and it's location means it can have a lot of exposure to continue the sport onwards. The nearest site (Waikaraka Park) is in a location that will exclude many fans of the sport as travel and distance will become a large issue, where Western Springs as

a location is central and enables fans from all over the region to travel similar distances to attend these events together and create a solid community around a shared passion.

If the site is allowed to continue being revamped, then the due process that supports sport will not be followed, and it will reduce the cultural diversity of the area. As it stands, Speedway operates only a few nights a year overall, and draws in crowds from all over Auckland to a communal place to enjoy their sport at a site that has been there longer than many of the houses, businesses and other cultural features of the community have been. It is a taonga that should be treasured and maintained to celebrate diverse interests, not forced to move for yet ANOTHER venue for sports or concerts in the region, which we already have more than a few of ready that are not used to their full potential. If sports or concerts are so valuable, develop a site for their usage as needed, one that is already serving those sporting communities but could do with a significant upgrade to bring it up to standards aligned with 2025 and beyond.

Keep speedway at western springs. Longer term contracts allow investment and mean profit will be achievable. Allowing speedway to thrive will lead to profit for the city. Provides entertainment for thousands, internatiol coverage through livestreams. Also avoid disingenuous polls meant to mislead :)

Western Springs is the heart of open-wheel racing in New Zealand and holds an iconic status on the world stage. For nearly a century - 96 years to be exact - it has been a historic motorsport landmark, drawing drivers from across Australia, the United States, and Canada, all eager to race on its legendary track.

This venue isn't just a speedway—it's a cultural treasure and a beloved home for generations of fans and racers. In recent years, our ability to welcome crowds has been hampered by Covid-19

restrictions and flood damage. Despite these challenges, the spirit of Western Springs remains strong.

However, ongoing limitations imposed by the Auckland Council - particularly on event numbers - continue to threaten the future of this legacy. It is time for the Council to consider a new promotion that brings together speedway, the Ponsonby Rugby Club, and a concert promoter - as was successfully done in the past which could breathe new life into Western Springs and unlock its full potential as a vibrant multi-use venue.

This is more than a call to support motorsport - it's a call to preserve a national icon.

I have spent my entire adult life going to speedway, my sons ashes are scattered on the track and I live for the sport so much that I consider it to be a religious experience and a sacred site.

My heart will be torn out if the sport moves from Western Springs

I have been attending Speedway for over 60yrs & several generations of my family also, Keep speedway at the springs, as Waikaraka park will NEVER be able to support Speedway fully as the premises are to small with no options to expand as proposed,

After reviewing the information provided I believe the venue should remain as it has previously run. Speedway has proven it can manage the facility even with difficult hurdles thrown at it. If council were do provide a speedway operator with long term certainty I feel the sport will grow immensely from what is has in the past.

Option 1 - Private invested Facilty stadium.

This options appears to be a wolf in sheep's clothing. Large events still being held at Go Media Stadium or Eden Park. Will this be a council owned stadium? Will profits be going back to council?

Long term will the Auckland rate payer be left with a run down stadium if Auckland FC don't survive (see Auckland Tuatara Baseball) it appears the intent here is for a Billionaire to use a public venue for their own private Soccer practise venue and members clubs. The current carpark which is full when speedway operates with 7,000+ attendance gets wiped out which adds to the weight of this option just being a Billionaires practise ground not a public venue.

Option 2 - This appears to be a reasonable option however the previous arrangement with Speedway and Ponsonby rugby appear to be better suited financially as there will be limited concerts to make this option financially viable. Eden Park has resource consent for up to 12 concerts a year and with Auckland growing this is the future of concerts.

Option 3B seems the most viable. Which I believe should be a minimum of a 10+10 year lease for speedway operations / Ponsonby rugby.

This is a financially positive position for Auckland (not the 1.1million fabricated loss of income from concerts figure) with a 10+10 lease it will give a speedway promoter certainty to improve the facility and Auckland Council enough time to adequately find a solution to the Stadiums issue. North Harbour outer practise fields would be perfect given the investment in the Hockey centre in Rosedale.

I am voting because I want speedway to be reinstated to its rightful home of 100 years, I am a third generation racing fan, have attended speedway hundreds of times and my two sons are scheduled to race in the kiwikids class this upcoming season, we have enough soccer and basketball facilities yet only ONE speedway, the onehunga site is for stockcars and other low grade racing, the two different worlds would never be able to work together, leave both as is and stop wasting rate payers hard earned money.

Western Springs stadium has been home to speedway since 1928. There is no other motor racing venue in the world that provides an environment and experience that comes close to what western springs provides the community. It's because of these attributes unique to western springs that generations of families have gone to enjoy the environment and experience in a multi-generational way that caters for kids as well as parents and grandparents. This genuine connection to the location is due to the nature of the topography of the stadium that allows the audience the unique ability to look into the bowl and feel as well as see the action. Losing this connection for the thousands of enthusiasts that have gone to western springs will result in an

irretrievable loss to the community that will no longer have this venue to share with their families the excitement generated by this unique location. Speedway racing should continue at Western Springs stadium.

Open wheel Speedway should remain as a main user during summer. Gate fees should be reduced to allow more people to attend, more people means more revenue. Foorball can stay at Mt Smart where they have higher capacity for numbers, or shift to North Harbour Stadium which The council have under utilized since taking it over from The North Shore City Council. Eden park has also been given funds for many of the things the other options proposed for Western Springs,which would end up being a waste of money if it can't host them.

AFC have more than 15,000 attending now and 25k people attended a few times this year. Any stadium for afc needs to be at least 25k capacity, the current proposal is too small. Community hub and grounds makes sense but not a sports stadium that's big. Afc or any sports hub should be next to central transport hubs so traffic is mimimised.away from residents unless high rise central.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Auckland does not have the population base to support yet another stadium when the ones we have struggle financially currently. Attendance at concerts and music events during the summer dovetails nicely with the sports events that can be held during winter especially for the Ponsonby club in option 2.

We do not need another eyesore that cannot be used to its full potential and will need to be propped up by council money when ratepayers are currently struggling

I see no reason that wetern Springs speedway cannot stay after 96 years .The stadium can be shared with concerts and sports as it is now on the inner field.Speedway does not take up to 365 days and nights of the year.I now live in Waikato but still travel up for every meeting. The history of speedway must not be lost for the benefit of those that are only selfish to their own own intrests.My fathers brothers and sons ashes are scattered on the finish line, so I consider family before money. I am 71 years old,

I have attended many concerts there, it needs improvement and having the permanent Bowl will be great. Sitting for 50,000 great. Ponsonby RC having its home, so positive. Ratepayers already support this and an improvement to today's standards is a positive. It needs fo stay "community ", not for those with money. This comment sealed if for me: "basketball, netball and touch. The installation of the new facilities would create an opportunity for a 5,000-8,000-seat boutique stadium, allowing the facility to deliver a broad range of community and semi-professional sport." No more to say. COMMUNITY AND RATEPAYERS RULE.

I would like to see North Harbour Stadium resurrected. Auckland Council has purposely pulled use away from here to now claim it's not used, therefore not required. NZ Football should play its major games here, as should Auckland FC. The Shore has always been the dominant fanbase for football in Auckland. Always. Having to drag young kids across the city to watch live football that suits TV audiences is appalling. We just don't and I know many who won't. Think about future audiences and keep football on the shore as a dedicated stadium. Football Kings and FIFA have all been there, as with NZ Football. Western Springs is great for PRC and live gigs, keep it. Flatten EP

and move the other major stadium to Auckland waterfront which is far more accessible but develop North Harbour - used to be amazing.

Its a fantastic speedway track that's easily accessible and creates a fantastic atmosphere, with so much history and nostalgia. It also is a versatile Space that can be used for multiple events, a great concert and sport arena. It would be a waste of money to go changing such a wonderful place.

Return the speedway back to its home. The speedway is apart of the history of the area, brings in revenue and is a huge part of many people's lives. Bring the speedway as it is and slow the rugby club to stay. Use the venue for concerts and other events when the racing is not on.

Western springs speedway is iconic with a world wide representation as a great venue. It needs to stay. Attendance figures are more than any other option allows. With a better and honest promoter returns to the council can be much better making it a better option for all ratepayers. Speedway is great family entertainment for generations. It needs to stay where it is.

Option one restricts use and lowers numbers who can use as does option two and three. Option 3B should allow Speedway to return. An event that is attending by huge numbers over the last 97 years. A great family event and atmosphere. We have 3 generations attending every meeting for 50 years now. With a honest and better promoter than the last one and more meetings a season being allowed this would return funds to the council with little capital investment. Ponsonby rugby could stay as they have done in the past and concerts could still be held. A win for a lot more people than option one which is restricted to a much smaller number. Speedway contributes and supports lots of Auckland businesses with parts, service, sign writing etc. don't throw out the history of western springs.

The facilities are there and currently being used by a community club - it would appear silly to give this location to a private organization who would build another facility that would compete with North Harbour Stadium, Eden Park (less than 5km away) and Mt Smart. The proposed operators back a football team that fills Mt Smart Stadium regularly and they propose to build a stadium that can't hold their current crowds, let alone any increase in demand. Option 2 if built could actually entertain hosting Auckland Rugby for NPC games which currently under utilise Eden Park or are looking for an alternate location.

We currently have 3 stadia in Auckland that are under utilised, why build another comparable one?

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

A new purpose built facility of the proposed size is exactly what the city needs. We are sorely missing a more intimate sports stadium of approx 15k seating. Private investment to achieve this and lowering the cost burden on rate players in general is a very smart way for council to get new facilities, without blanket rates. This option allows those that will use it, will pay to it and not just a communal forced payment

Prefer to retain speedway at Western Springs. It's a great venue, easy to get to and from, great parking, excellent facilities. I dont see the value in changing the current set up and use arrangements. Not sure Auckland would benefit from either of the other two proposed options as better options to the current use of Western Springs.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Keepingit similar to what it is, can still incorporate Auckland FC and Ponsonby Rugby clubs, but only re-purposing for a sports facility would be silly and write off the entertainment and great central venue (with relatively good public transport and parking connectivity)

A stadium offering only 15,000 for Auckland FC isn't nearly big enough, especially given the proposed cost. Having a concert venue that can hold 50,000 people would be a huge draw for big names to come to NZ and maybe be more attractive for marquee names.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Although I think that Option 2 is the better of the two options outlined, I don't think either one is particularly strong. In fact, both seem to really only benefit the groups behind the proposals.

In that sense, I think exploring other options is the best course at the moment.

I feel that Auckland struggles with too many venues, at the same time as, not enough venues - mostly meaning sub-par venues. To be frank, North Harbour stadium is terrible and should be completely redeveloped, whilst Go Media stadium is in poor location for anyone not in the

immediate vincinity. Eden Park is a ridiculous, privately-owned cash-sink that should have been retired years ago and redeveloped as dense housing and park.

So, there are no easy answers. But I don't see how benefiting consortiums of billionaires and concert promoters with public money or resources really benefits Auckland.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Because Western Springs is the heart of Speedway. Council let NIMBIS move in and complain about something that has always been there. If you bent over for them in the past they will continue to complain about noise in the future if you put a stadium in and hold concerts.

GROW a BACK BONE and keep the speedway at western springs.

It is a shame and anything you do subsequent to the speedway will be detrimental to the suburb.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Option 1 has more appeal to me as it supports wider public use of this iconic open space. Limiting its use to concerts and to what the Ponsonby Rugby Club decides is right for the area does not sound as if it would have the interests or wishes of the wider community of Auckland in mind. I also like the private sector investment of capital and a commitment to meet ongoing maintenance costs. Some will claim this will just make "richer people richer", but in reality it will bring a professional approach to the provision, management, and operation of the facilities. Auckland Councils does a great job in the face of multiple competing demands, but is not well placed to operate a successful multi-purpose venue such as proposed by Option 1.

That it could reduce public money by $18.1 million.

Be great combining a multi-purpose venue.

Maybe easier for public to get to, not having to be in Auckland CBD.ie; Spark Arena.etc;

Travel and parking always presents difficulty with all the existing venue's in the City.

Another venue of this size is required I believe for multi-purpose and especially for the population growth of Auckland and surroundings in the future.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Please reinstate the use of western springs for the purpose of motorsport - Western Springs speedway was a much loved activity in my youth and i have not yet had the pleasure of introducing this to my children. Western springs held a very unique style of racing that should be enjoyed in its own right and not shoved onto some other grounds. It should be maintained and upgraded for speedway and used and enjoyed by others in the off season.

Western Springs should be upgraded and conserved as an open community event space for sports teams, sports and cultural events. Creating a locked down commercial arena goes against the intent, ethos and affection we have for Western Springs. Let's invest and build on that.

Western Springs is an amazing public space. To 'develop' it only results in it becoming a more profit driven venue thereby removing it from general public accessibility.

I am one of many grandparents who travel all over the Auckland boundaries from our home in Whangaparaoa in support of our grandchildren playing sports, from Manurewa to Mahurangi, Henderson To Albany and everywhere in between. Our children and now our grandchildren au waterpolo and netball the whole City is woefully short of waterpolo facilities. Owen Glenn Pool at The Milennium Centre Albany is about the best and that wasn't built for waterpolo. A few of the private schools have pools that double for waterpolo there are no dedicated waterpolo pools, our

local Pool Stanmore Bay Leisure Centre does its very best but is way overdue for renewal the population this centre now supports must have tripled at the very lest since it was built.

Netball similarly so! Look at North Harbour Netball Centre at Northcote, huge numbers use this long outdated facility with its associated parking which is a danger to life and limb the tiny carpark fills in seconds and you are left with having to cross the exceedingly busy Northcote Road to use the golf club car park or further afield at Takapuna Rugby Club and then side roads and walk often in the dark before you ever get to the netball courts. Surely North Shore Albany Silverdale areas through to Warkworth with its now huge population deserve some proper sporting facility, perhaps it is not too late for Auckland Council to join together with John Kirwan who is about to develop a wonderful water sports area in Dairy Flat how wo derful would that be for your Ridney ratepayers long neglected??

I like the design and it make Auckland more modern. However transport to the venue will be a major concern. Plus seating is too limited for Auckland FC who regularly draw much larger crowds.

Auckland, by far the biggest population concentration in NZ has no proper Cricket Oval. A dedicated cricket ground could be multi use - for concerts etc. There are plenty of rectangular fields suitable for rugby, league. That was previously notified as the intent when Council proposed moving the speedway.

Option 1 chosen for the following reasons:. 1. Reduces overlapping uses and provides a much clearer separation between the various stadia competing to host events. 2. Provides important new facilities and infrastructure to the city. 3. Does NOT involve the poor ratepayers stumping up yet more money for another council white elephant.

I want western springs to remain with some council (ratepayers) Ownership. I do not want this historic place to be privately owner. I have lived nearby when I was younger, attended events there, and had no problem with speedway using it. I want it to be a place that all people can afford to attend events, sporting games, etc. if it goes into private hands it will be never be able to be retained for all the public.

Your feedback

What is your connection to Western Springs Stadium? (tick one or all that apply)

I attend events at the stadium or its sports fields

There are three options to consider

Which option do you prefer? Select one option only.

Option 2: Western Springs Bowl

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

I would love it to be a concert venue, a sports venue...how it was in the past, in my teenage years. It's a fabulous, natural bowl.

What we have is well patronised.

There is very little motorsport in Auckland.

We are short of smaller not larger venues.

We need to be budget conscious, we are broke.

A century long lease needs very careful consideration- a small step from privatisation and loss for ever.

Western Springs has been the home of Speedway and some really great concerts in my lifetime since the early 70s. It contained crowds of 30,000+ at times far more that 12,500. Speedway lost half of it's great events to that cold horrible Waikaraka Park years ago, sadly.

Auckland has Eden Park, Mt Smart Stadium, Spark Arena plus various other venues used to promote music and live shows to smaller audiences.

Auckland should have built a really good sensible stadium around where the Spark Arena (trains, buses and ferries)is but left it too late. We have almost 2 million people in Auckland, most with dwindling disposable incomes so why do we need another stadium to compete with the others? It

is not accessible by ferry or train. We already have the Eden Park facitilty that is constantly in debt so do we need another one. Eden park was fine years ago but passed it's use by date and the area is not suitable for increasing crowd numbers.

This planned Western Springs folly will become a big white elephant only getting by with rates subsidies we don't want. Too many noisy concerts will cause neighbourhood complaints.

The sensible option would have been to leave well enough alone and look at any upgrades of Mt Smart or a new downton venue

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Western Springs Speedway has been a heart of the area - well, all of Auckland even! Thousands and thousands of people support motorsport, and have enjoyed having it as is for the past 96 years. The final weekend with the amount of people coming was a display of how much people care about this place. I have only been to the speedway maybe 3 or 4 times, but I feel extremely emotional and upset that the speedway is going to be closed down just for some rugby field, or something else, when the current situation is perfect, and there are other places for these sports.

The possible new speedway not only doesn't have enough funding to properly work, but it's in a different area and doesn't have the same magic.

The Speedway at Western Springs is an iconic and internationally renowned facility in our city. We should be proud to have it, and protect it for future generations. I have enjoyed countless enjoyable evenings at the speedway with my son, and his friends. It is a wholesome family activity, with well behaved crowds. The loss of this will hurt a lot to us.

I am a rugby, league, and football fan. However, there are plenty of other facilities for these professional sports bodies.

The alternative at waikaraka park is not suitable, and the investment required to ensure the class of speedway can compete there is substantially more than council have provided.

Please keep our speedway at Western Springs.

Keeping as much green space in parts of Auckland with increasing population density would be my preferred option for the space. At the moment the use as fields for sport and other events meets that brief, but in future it could include dual use of sports facilities and flood prevention - especially as it used to be a wetland

Western Spring s is the home of Speedway for the last 96 years, options need to be explored to make Speedway viable at the venue ie raising the number of meetings allowed per year. Use as Ponsonby Rugby/Speedway/Concerts/Events with a proposal to make it cost neutral to the council.

I am not supportive of what is likely to be the privitization of a Council (RatePayer) owned asset, whether by a sports club or a concert promoter.

I understand that a private, commercial fronted, sports club or music promoter, paying for upgrades, might be desirable, but the ratepayers will ultimately loose out. If Council goes down this route, then they might as well sell the asset and wipe their hands of it.

Sport stadium, will evetually want concerts anyway as stadiums don't seem to make money unless there is another finance opportunity. So Option 1 & 2 are the same thing, just one only has occastional rugby played on it, with mimimal attendance (sorry Ponsoby Rugby Club).

I can't imagine that the local residents are going to be any better off with concerts as they are with motorsport - they'll comlain about the noise in anycase.

Keep exploring ideas, but maybe one that will bring in some meaningful dollars to the Ratepayer coffers each year, whether it's leased or not.

Western springs needs to remain a speedway venue. The football club should use the North Harbour Stadium and not build on a flood plain. It already has the infrastructure they require. Leave Western Springs alone and make a commitment so that we can improve the facility for speedway. Auckland Council needs to look in the mirror and admit they got this wrong.

There is insufficient background information in order to make a proper decision on any of the options for example option 1 no figures/projections provided as to what the rental/lease paymment to TAU will be. I believe that option 1 is well skewered in favour of the consortium rather than the ratepayers.

I support the Ponsonby Rugby club option as it will support the local community needs better and provide the area with a place to use for other fixtures and events. The area is not suitable for the development of the major entertainment by private developers even though council seem to prefer it due to cost to council. Western Springs has a long history of sporting and concert venue, it was a shame speedway was removed.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

The natural bowl lends itself to a music venue however I would want to A: improve public transport (underground or overground) B: ensure that the average Joe/Josephine can afford a ticket to most things or community events. I have felt the power of the bowl myself, being part of the record-breaking David Bowie '83 concert.

I have been attending Speedway events at Western Springs for over two decades. This venue is not just a stadium it's a cornerstone of our community, a hub for motorsport, and a place where countless memories have been made. I've had the privilege of being part of a team supporting local and emerging drivers. It's incredibly rewarding to witness young talent develop in front of enthusiastic, sell-out summer crowds.

The atmosphere at Western Springs during the height of the season is electric. It's more than just entertainment it's a celebration of New Zealand's rich motorsport heritage. Families, fans, and

drivers alike come together to share in this experience. For many, it’s a summer tradition that brings people from across the country to Auckland.

Relocating the Speedway would not only disrupt this long standing tradition, but would also sever the vital community connections and support systems that have flourished around this venue. It would diminish opportunities for aspiring drivers and local supporters, and potentially damage the sport’s growth.

Western Springs is more than just a location it’s the spiritual home of Speedway in New Zealand. I urge decision makers to preserve this historic venue and allow future generations to enjoy the same unforgettable experiences that so many of us have cherished for years.

As much as I am sad to see Western Springs Speedway and Concert area closing, I think it is time to move on and embrace a new forward-thinking concept for the location. Option # 1 provides that forward thinking option at little risk to the public provided the very long-term lease is fair for the Auckland ratepayers. The devil will be in the detail of that long term lease.

As an Auckland FC fan I believe that a move to a stadium there is a bad idea. 12500-15000 is way too small any new stadium needs to be 20000-30000 to accommodate derby and finals crowds. Location is terrible not close to any train lines. Staying at Mt Smart stadium is a better idea.

I have been attending Western Springs speedway for around 55 years and it was always a great experience for me and my children as they grew up. There was a sense of community and a shared interest that is not really catered for in the Auckland area as it is with other sports and activities. I have also attended Concerts there for many years as well and Polyfest events etc and once again the natural ampitheatre and ambience of Western Springs has endured. I understand this has not always been popular with the people that live in the area but if you buy a house in that area with a facility that has been there for many many years then you just need to suck it up. It's not every night there is an event there is a Season .. for both speedway and rugby etc etc. There is off street parking available (not so brilliant in winter) and that is rare these days in the fast growing not so

well developed City that has been my home. I am pleased looking at the options the AKCC has provided that one was not to turn it into an ugly housing estate. Good on you guys.

Speedway should stay at Western Springs. In a city with so little cultural heritage, to stop such an iconic cultural activity in a purpose built arena is a travesty. Not only is the venue unique and world famous for speedway, it reeks of cultural oppression to disregard the distinct and deep ties to the wairua of the place for the generations of Aucklanders who have attended and regard this place as their home. It is a taonga to Auckland city just as it is. We do not need another football stadium - perhaps the council's disgraceful management of North Harbour Stadium could be a stark reminder of why we don't need another one.

We do not need any more arenas or stadiums. We do need and have been missing for sometime a dedicated cricket oval to cater for both tests, ODI and T20 matches. Currently Auckland only gets a minimal number of T20 matches every season and no test or ODI matches. Considering Auckland is NZ largest city and cricket is one, if not our main summer sport it seems stupid to not have a venue to accomodate this.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Cost benefit. Proposal to build another stadium is ridiculous when we already have too many. Proposed new stadium will be too small for Auckland F.C. or Warriors attendances. New speedway location is not central enough.

Future use of Western Springs Stadium

Don't privatize use of the land, which is precisely what option one would effectively do. Option two is the best mix used for benefiting the local community as well as the city as a whole. It'll be a shame of option 1 is allowed to pass because of wealthy parties interested in making a profit.

The most obvious advantage to proposal 1 is no taxpayer funding.

We are getting a similar concert venue to option 2, but with much less investment from council.

I feel the design of option 1 could have some improvements, and allow for a "proper" stadium set up.

I have been attending speedway since I was a 10 year old , I'm now 78.

My son raced there and now both my grandson and granddaughter race there.

It is an icon that gives teenagers somewhere to make their dreams of racing come true

Watched the Harlem Globe trotters there as well , more than once .

A great place for kids to attend and enjoy .

Not to mention the many years it has been there with great success.

Option 2: Western Springs Bowl

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

I support Option 2: Western Springs Bowl as the future direction for the venue.

Ponsonby Rugby Club has a long and valuable history at Western Springs and it's deeply unfair to see them potentially displaced. They have no comparable alternative – Coxes Bay is too small – and it appears little effort has been made to help them find a suitable new home. It's disappointing to see their future threatened by the arrival of Auckland FC, a new football club with significant financial backing. Auckland FC is already attracting large crowds at Mt Smart Stadium, so it's unclear why they need to move. Their current venue is clearly working well for their fanbase.

Option 2 strikes a fair balance. It keeps Ponsonby Rugby Club at Western Springs, supports a broader range of community sports, and enhances the venue’s live music capabilities with a 'Hollywood Bowl'-style upgrade. Sharing the space seasonally between concerts and sport is a smart, inclusive use of the grounds. Yes, it may cost more long term, but it invests in community access, cultural heritage, and sporting equity – something Option 1 does not.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

1. The stadium is too far from the railway stations on the Western Line meaning football and music events will create major congestion. None of the proposals mention how they plan to cater for large numbers of people attending events here regularly.

2. We can do better.

Neither option is optimal for the events involved and the city itself. Option 1 is underestimating football and music popularity in Auckland and NZ, while option 2 is an eyesore at best. Option 3A

is untenable to Auckland ratepayers and the stadium itself as it will see good money wasted on deteriorating facilities that are way past their use by dates.

A better outcome would be 3B. Povide facilities that cater to AFC, Ponsonby RFC and concerts. Make the two parties work together for the betterment of Auckland.

I attend sporting events involving both teams and feel that there is the potential to cater for both with a major stadium for AFC and concerts and a smaller stadium beside it for Ponsonby rugby, touch, youth football/rugby/league etc. Have a look at Millennium Stadium/Cardiff Arms park for how to do it right.

Less direct cost to the ratepayers of Auckland.

Object to Ponsonby Rugby Club being given rate payer funding - no other Rugby club in Auckland would be the benefactors of such a huge amount of public funds for little to no return on investment.

I think the proposed size of the Auckland arena is too small for Auckland FC as they sell out bigger venues and so either it should be like an 18,000 to 20,000 seat stadium that could also be used for blues games as well or do the western springs bowl option and focus on our existing stadium options. There is also not a lot parking around that area so that needs to be addressed for any potential upgrade option

I would like Western Springs to continue as it has for the last 95 years and remain open to the public for whatever events may be held there. As an Auckland rate payer, I understand this will impact on rates paid and am happy with that.

As a ratepayer, it is sensible to use private funding to alleviate the pressure on ratepayers. It also means that we can be sure that facilities and maintenance will be funded privately. The stadium returns to Auckland Council when lease term is up.

I feel there are enough sports areas for soccer clubs already. The soccer teams train at North Harbour yet choose to play out South despite the stadium being good enough for other sports. I grew up in Manurewa/Papatoetoe with brothers playing soccer so am used to their sports facilities

The bowl option is a blend of both old and new and keeps the rugby club right where it should be. Option 1 is too self centred on making private money , not the good of the community.

Imho the current stadium is the perfect base for an evolution/upgrade into a premier (medium size) entertainment venue. Development and enhancement in a contemporary way and with its existing natural amphitheatre style layout it will become a very attractive cultural and sports (outdoor) venue during summer and still serve and provide flexibility for the local Rugby during winter. Anticipated funding seems reasonable and still provides some flexibility for lease and long term use options for the stadium.

I support Options 3 - The Western Springs Stadium is a treasured natural amphitheater that has been enjoyed by generations of our community. Personally, I have attended events such as the Speedway, concerts, and festivals with my family over many years. It is vital to me that this venue remains a shared asset for all of greater Auckland, allowing continued access and enjoyment by the community.

I am concerned that Option 1 effectively privatizes this valuable space for a single special interest group – specifically Football – with only token efforts to include Basketball and Padel courts. This option appears to be managed, run, and ultimately locked away by a commercial enterprise that

would replace the unique natural environment with a soulless concrete stadium. Such a development would undermine the very character of Western Springs and is unnecessary, given the existence of the North Harbour Stadium. If a new stadium is truly needed, it should be built on private land elsewhere, not at the expense of this irreplaceable community asset.

While I find Options 2 and 3 both improvements over Option 1, my preference is for Option 3. This option better balances development with the preservation of the natural amphitheater, but I am particularly concerned about the potential loss of the Speedway. The Speedway is an iconic part of the venue's history, recognized both locally and internationally. It would be a tragic loss if this beloved sport, which has a proud heritage at Western Springs, is displaced by a move to Waikaraka Park or other venues, which will effectively see it die as a sport in Auckland

In summary, I support an approach that maintains Western Springs as a community-focused, multifaceted venue—one that respects its historical significance and natural beauty. I urge decision-makers to favor the options that preserve the Speedway and keep Western Springs accessible for all Aucklanders.

Thank you for considering my perspective.

Keeping speedway at Western Springs. If the council were to extend the season to 12/15 meetings a year it would attract a lot more interest from promoters and spectators.

It can be run in the summer with concerts and rugby in the winter months making it getting use all year round. The stadium is great just needs a little work to bring it back to an excellent venue.

I lived in the area for 45 years before moving 3 years ago and never had a problem with the speedway noise or spectators. Concerts and Rugby attract a different crowd leaving rubbish and empty bottles on your section and roads.

The council needs to look at the whole picture and not just the first 2 options.

I am an avid speedway supporter, have been attending from my infancy. I have and still do attend every meeting. My father introduced me to speedway. He grew up in Western Springs with the speedway consuming much of his childhood. I have since introduced my son to the sport. I would just hate to see this wonderful, world wide recognised facility go by the wayside. I don’t believe it is an asset that should be put into private hands.

The idea of more spending while the Council has huge loans is very concerning. It looks like Council are looking at ways they can spend more on 'nice to have' projects. What kind of financial management is that?

Further more, the North Harbour stadium is under utilised and would have been demolished if TAU had had it's way. Time to freeze unnecessary Council (rates based) spending. The North Shore stadium was supposed to be completely financed by the sports groups that proposed it but after only a few years they couldn't pay the ASB loan and their debt came back to North Shore City Council and the ratespayers.

Start cutting your cloth to your means and not get involved in more debt until the 'must haves' have been addressed and the debt is significantly reduced.

Just because some groups would like to change the use of Western Springs stadium is no reason to bow to their desires. Tell them to use what we have until there is no more capacity.

Spend the money on expanding the Eden Park surrounding properties so that this venue can be enhances with better space around.

Time to spend the limited resources that I pay for in more financially responsible ways.

I get the feeling that every time there is a group set up like TAU all they do is look for ways to increase their wishes and associated budget needs. Time to shut them down and get rid of the opportunity for 'rates beggars'.

With a city growing like Auckland start using the land better for recreation not tied to sports but for casual family use.

Soend the money on common ground and allotments.

SHUT THE COUNCIL WALLET.

I would like the Speedway, Ponsonby Rugby Club and Music events to stay. It is an enjoyable part of Auckland's history. Past events held there are components of what makes or has made Auckland- Auckland and it is also a part of what makes New Zealand- New Zealand as people all over the country have traveled and enjoyed these past events at Western Springs stadium for decades. New Zealands children go to these events. Western Springs Stadium is not about supporters, it's about families.

Western Springs is a part of New Zealand, not just Auckland.

And Aucklands culture needs to be protected.

The Legacy of Ponsonby rugby club and Speedway as an event at Western Springs stadium needs to be respected.

Western Springs is the most picturesque stadium in Auckland. A Hollywood Bowl type concert venue would fit perfectly in that location. Personally I would like to see it used for international cricket games as well, but Eden Park and the old boys won't let that happen.

The idea for a 15,000 seat stadium doesn't make any sense to me as (1)Auckland FC are currently averaging more than that capacity, (2) it would be an eyesore on a beautiful location and (3) we already have Mt Smart Stadium and North Harbour stadium that have bigger capacities - not to mention Eden Park if they want to hold a big final. Why add a 4th football stadium to Auckland when we are having trouble regularly using the ones we have?

How can the Auckland Council let Western Springs Speedway (A Sporting Icon for nearly 100 years) be lost to the community.

A world renowned venue that is recognized as one of the greats.

The Councils remedy of moving Western Springs Speedway to Waikaraka Park confirms their lack of knowledge of the two sports.

Speedway racing cannot run successfully on the same track as Stockcars.

...Waikaraka Park Speedway features " bash and crash " Superstocks, Super Saloons, Midifieds, Mini Sprints and Stock cars

...Western Springs Speedway featured Midgets, Three Quarter Midgets, Kiwi Kids (Drivers under 16yrs) and Sprintcars

Just as

Thorough Bred Race Horses run at Ellerslie, and could Not run at Alexander Park

Trotters run at Alexander Park could Not run at Ellerslie

Horses for Courses

Speedway racing can not run successfully on the same track as stock cars

No matter how much money is diverted to Waikaraka Park the two sports will never be compatible.

Furthermore Western Springs isn't just a track that can be moved...

It's the Heart and Soul of Speedway racing in New Zealand...the entire environment...the lifelong fans...it's world renowned reputation...part of the heartbeat of Auckland

I personally have been a regular at the Springs since 1961

During that time when attending Speedway meetings overseas...whenever asked where I was from...I would say Western Springs...it wasn't necessary to name NZ

That's the Mana it carries

Please, please reconsider

A multi use facility will benefit a greater number of sporting groups an ensure that the facility will always be being used a retractable roof would be of further benefit giving all weather uses

And make live entertainment a far more comfortable environment in which to be a entertained

Most New Zealand major sporting event crowds would be comfortable in an 15000 capacity venue instead of the present large venues that are only half open during most competitions

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

I want Western Springs to remain as a speedway venue. Speedway has been at the venue since 1929 for 96 years. It is a tradition for many families in Auckland to attend the speedway and is part of Auckland culture and it would be shame to lose another part of Auckland's established history and culture. Waikaraka Park is no comparison to Western Springs and will eventually lead to the death of traditional speedway in Auckland. Auckland lost Pukekohe race track several years ago, and now Christchurch and Taupo enjoy the benefits of hosting the Supercars. Auckland continues to lose treasured events (not just motorsport) to other parts of NZ or the world and it needs stop. We have enough grass sports stadiums in Auckland already that are under utilised eg

North Harbour stadium. Let's keep a treasure that has existed for 96 years, and continue to run speedway, concerts, and use of the venue by Ponsonby Rugby club. Let's give the Speedway association a good long lease with more favourable commercial terms, and get a good operator to run it. The previous promotor was a one man band situated in Palmerston North, and did not have the interests of Auckland speedway supporters at heart. The decision making process the council went through to make their decision was based on fabricated documents and is currently going through the courts. Speedway supporters were not adequately consulted and they need to be heard by the council. Please read the attached article about one of the most famous American speedway drivers. He says that Western Springs was "by far the best we ever raced at", and he says that Waikaraka Park ... it’s nice to have a track but speedway will be second fiddle to the stock cars. It’s their place." Excuse my language, but the place is a s***hole. Anyone who has seen Waikaraka Park will agree with him. Let us not lose Western Springs as a Speedway venue - it will be a crying shame that future generations of Kiwis will not be able to experience it the way that I have, and generations before me.

'The best we ever raced': Sleepy Tripp mourns end of Western Springs speedway

By Chris Rattue
Sports Writer · NZ Herald

The demise of Western Springs as a speedway venue is being felt beyond our shores, with an American legend of the sport expressing his dismay at the news.

Visiting Americans played a big part in the success of the now-doomed Western Springs speedway scene from the outset. Midget cars made their Springs debut in 1937 when a troupe of American racers competed on Christmas Day against Aussies and a couple of Kiwis.

No American was bigger news over the years than Ron "Sleepy" Tripp, who told the *Weekend Herald* of his sadness on hearing Western Springs had run its race.

Sleepy Tripp – who is in five motor racing Halls of Fame – was the most famous of the regular American imports. His ratio of big midget car wins at the Springs was incredible, achieved in an era full of local stars led by Barry Butterworth and Ted Tracey. The 71-year-old Californian, who still runs the electrical business his grandfather started, first came here in the 1970s via a handshake contract with the Springs promoters. He kept heading Downunder for nearly two decades, winning 34 feature races at Western Springs — including nine of the glamour 50-lap titles — in a career that brought him more than 250 top-drawer victories in four countries.

With speedway being shunted off to Waikaraka Park after the current season, Tripp reminisces about the sport's heyday when it drew massive crowds and was an iconic part of Auckland life. Tripp – who is married to an Aucklander — recalls the wild racing, parties, his frosty relationship with Barry Butterworth, his admiration for the current Kiwi star, and more.

How did Western Springs rate?

As a facility, it was by far the best we ever raced at ... the crowd, the atmosphere, the changing rooms, the lighting.

We might have got 500 to 1000 people in the stands here (in America). Having 20 to 25,000 people screaming it out at Western Springs, flipping you off ... you get to a different level. The fans used to walk through the pit area – there's no other track in the universe where you can do that.

We would race and then go out to the carpark and party there until three, four or five in the morning.

You had to win the feature race at the track, and you could win the feature in the carpark if you had good stories. I enjoyed that.

How did that atmosphere affect the racing?

There have been times when it got rougher than it should have been.

The crowd had a lot to do with the guys crashing and running hard — it's kind of a rush with all those people yelling and screaming. It's a high.

They'd get us on the back of utes — the Americans in one, the Aussies in another. The crowd would throw shit at us, mainly verbals. It was part of the show. I liked it.

It was good hard racing ... a bit of equipment got torn up though.

Barry Butterworth used to say it was a contact sport, but it's not really. You're not supposed to be running into each other in an open midget car.

I think everyone was jacked up by the big crowds. There was a lot on the line for the Kiwi guys, to beat the Aussies and the Yanks.

Speedway bikes were big back then – how did bikes and cars operate on the same track?

The track was crap. If you have motorbikes and cars you won't have much of a track by the end of the night.

The track couldn't be too sticky because the bikes needed to slide – that's how those guys turn the corners.

It's hard getting it right — the promoters tried hard. There are a lot of variables. But my car was set up for those tracks — I liked slick tracks.

Who were your big Kiwi rivals?

A whole bunch of guys were good but Ted Tracey and Barry Butterworth stood out. With Barry it was a battle every night — we fought hard all the time.

What was it like off the track – were you close to those Kiwi stars?

I don't think anyone was close to Barry, not the overseas guys apart from maybe Gary Patterson, a crazy guy from Sacramento.

Barry didn't have much time for many guys. He had some real fans. He was like a hero to those people.

Ted Tracey was good — hard to race with. He was one of the first guys with decent equipment — he was a car salesman and I guess he sold a lot of cars. I got to know Owen Shaw well.

But I didn't like having a lot of close friends, even when I raced in the US. I didn't like being palsy-walsy. It was racing and I just wanted to go to work.

The great Barry Butterworth passed away aged just 54 ...

His health was kind of trouble for a long time. He smoked and smoked and smoked you know, and if you are a smoker it is just a matter of time. He had emphysema.

What about the famous Kiwi bike riders?

I got to know Ivan Mauger, and Barry Briggs really good. Barry lived close to our house in Costa Mesa — Erin and Junie Briggs would go shopping together on Sundays.

How did racing at Western Springs change over the years?

The cars and drivers got better and it was hard coming from the rear to the front, so they put the fast cars up the front, which is not good. The fast cars needed to be at the rear.

A guy called Bill Kelly, who owned a gas station, did the handicapping. A couple of the American guys would dick around during the night and Bill would put them on grid 10 or 11 for the feature race, whereas the good guys should be on 18 or so.

I'd tell Bill "they're f****** with you". They just figured out the system. They'd only get away with it for one race.

What enabled you to keep returning and winning ...

If you were drinking, carousing, chasing girls, not working on your cars, you would never get back down here. If you raced hard, and they knew you were working on the cars, you would get back here. It was pretty easy just to drink beer — there were a lot of guys who wanted to drink beer with you.

And you could make a few bob in Australia and New Zealand whereas in America, there are no drivers who just run midgets and can eat dinner every night. The money I made in Australia and New Zealand financed a lot of my racing.

You met your wife in Auckland ...

Erin Fletcher ... from Glen Eden.

In California, most guys have three or four marriages. You're somewhat under the radar at just three ... when you get to four or five, people say you must be the problem. But we've been married for 42 years.

6119

Like all marriages there have been ups and downs and race drivers aren't the easiest to be around.

It's been tough for her — I had a motorcycle accident 12 years ago when I flipped a BMW street bike at nearly 90 miles per hour (140km/h). I broke everything in my body — demolished my pelvis, my heart stopped twice. It's been a nightmare and I'm still getting surgeries. But I'm going okay now.

When did you visit New Zealand last?

Erin goes to New Zealand a couple of times every year but flying is tough for me since the crash.

The last time was around 2009 ... Danny Lendich (the Auckland businessman who Tripp raced for) flew us down and rented the Hyatt and had 60 or 70 people there. He put on a kind of roast for me, showing all my racing, with videos. Different guys would go up and say what a clean driver I was — I was sitting at the back laughing of course.

While I was in Auckland I went to watch (10-time national midget car champion) Michael Pickens for the first time and couldn't believe how fast he was.

Pickens has been to my house in California. He's a really nice kid, and super talented. They say he is getting some pretty good racing now after having it his own way for a while.

How do you feel about speedway ending at Western Springs?

We've been hearing that for six or seven years ... but it is serious this time. It's very hard to hear about it.

All those people complaining about the noise ... that facility was there a long time before any of them bought their houses. It's sad to lose a speedway with so much history to it; it really is.

And I don't know about Waikaraka Park ... it's nice to have a track but speedway will be second fiddle to the stock cars. It's their place.

The council is spending $11m on upgrading Waikaraka Park ...

I hope it goes well, but from what I've seen of the place it doesn't look much to me. Excuse my language, but the place is a s***hole.

Any treasured Western Springs mementos?

I gave away all my trophies. First young kid to my car, I'd give them the trophy. About six years ago I called Danny Lendich and asked for a couple of trophies back though.

I have a man cave now with two and a half garages full of photos ... there are photos of Ivan Mauger, Barry Briggs, a big photo of (former motorcycle world champion) Wayne Rainey, who is a good friend of mine. I got the 1994 50-lap trophy from Danny, the last race I ran at Western Springs.

The Sleepy Tripp name has lived on in New Zealand, in various ways ...

I know. There's been a racehorse, a trotter, a greyhound dog and a punk rock band with my name ... that's pretty cool huh? So maybe I was a little bit famous down there. But once you retire, they move on to the next people — it's all in the past.

Speedway can be part of a multi-use situation with concerts, can and have worked with rugby at the stadium. The people were never consulted with before this time and should have been. It has been at Western Springs for 100 years and is the most cost effective use of the land.

I strongly disagree with privatising public space by turning it over to private operators. It's likely to limit access to community events and festivals. Hireage fees will necessarily be high in order to return a profit to investors. That will inevitably mean high ticket prices thereby limiting the number of people who will be able to afford to use the facility. Public space must be kept for public access and community involvement and not turned into yet another money making investment for rich investors. Auckland already has problems with utilising stadiums without creating another one which will just take business away from those the city already owns.

As a current singer/entertainer myself and have been for 50 years, I've watched the stadium grow from a speedway racetrack to a performing venue,. I watched Jose Feliciano, The Rolling Stones, Joe Cocker with the Mad Dogs and Englishmen and Elton John's performances to Capacity crowds. I believe turning it into a Hollywood Bowl design would be of great benefit to Auckland and well worth the investment for future generations to come. Signed Barbie Davidson

Re: Support for the Retention and Continued Operation of Western Springs Speedway

To Whom It May Concern,

I am writing to formally express my strong support for the preservation and continued operation of Western Springs Speedway, a venue that has served as a cornerstone of Auckland's sporting and cultural landscape for the past 96 years. As the Council undertakes its public consultation process regarding the future of this site, I wish to highlight the profound historical, social, and

cultural significance of the Speedway, and to advocate for its protection as an invaluable asset to both the local community and the city as a whole.

Since its establishment in 1929, Western Springs Speedway has been more than just a motorsport venue. It has stood as a living piece of Auckland's history, bringing together generations of families, competitors, and enthusiasts. Its long-standing tradition has woven itself into the social fabric of our city, with many Aucklanders holding fond memories of evenings spent at the Springs. The venue has continually provided an accessible, family-friendly form of entertainment that has endured through social changes, world events, and urban development pressures. Its 96-year legacy deserves recognition and safeguarding as one of the longest-running sporting institutions in New Zealand.

Beyond its primary role as a speedway, Western Springs has also proven itself to be an invaluable multi-use facility. It has hosted internationally acclaimed concerts, bringing world-renowned artists such as Bob Dylan, David Bowie, Elton John, and the Foo Fighters to Auckland. These events have not only enriched the cultural lives of residents but have also significantly contributed to the city's economy by attracting tourism and business to the region. Additionally, the venue has successfully accommodated rugby matches and other community events, demonstrating its capacity to serve diverse purposes. This multi-functionality is especially valuable in a growing city where accessible public event spaces are increasingly limited.

Given the above, I strongly urge Auckland Council to take the following actions:

Grant Speedway a long-term lease to ensure operational certainty and long-term planning for future generations.

Provide commercially viable operating conditions so the Speedway can thrive without unnecessary restrictions or financial burdens.

Amend the Western Springs Stadium Unitary Plan, just as was done for Eden Park, to support speedway and other large-scale entertainment events.

Acknowledge the successful coexistence of speedway with concerts and rugby at the stadium. These uses are not mutually exclusive and have previously complemented one another.

Recognise the lack of prior consultation with speedway stakeholders, fans, and the wider community. It is unacceptable that such an important decision could be considered without engaging those who are most directly impacted.

Allocate ratepayer money more effectively, prioritising treasured community assets like Western Springs Speedway over less impactful initiatives. Many Aucklanders, myself included, believe that retaining and supporting the Speedway represents a far better use of public funds.

Address the growing public disillusionment with how this matter has been handled. I have personally lost confidence in both council staff and many councillors due to what appears to be a lack of transparency and disregard for public sentiment.

The overwhelming majority of Aucklanders I know share my views. They value the Speedway not only for its historical and recreational importance but also as a vital part of our city's identity. The strong community support for retaining this venue should not be ignored.

Western Springs Speedway is a unique and irreplaceable part of Auckland's heritage. It deserves to be celebrated, protected, and supported—not sidelined in favour of short-term or narrowly-focused development agendas. I respectfully request that Auckland Council acts in the best interest of its citizens by ensuring the continued operation and future prosperity of this iconic venue.

Thank you for the opportunity to contribute to this consultation process. I hope my voice, and the voices of thousands of other passionate supporters, will be heard and respected.

Sincerely,

A concerned ratepayer

Speedway should remain at WS and be given the opportunity to flourish instead of being continuously opposed and held back by council through TAU and its predecessors.

Speedway at WS is part of Auckland's heritage, treat it with respect and afford it the assistance given to other sports and the Arts. It is revered world wide and should be celebrated rather than denegrated.

The Unitary Plan states the use of WS Stadium as being maintained for among other activities motorsport ie speedway. To legitimise any changes, a properly notified and publicly debated Plan

change needs to be initiated- first. Council should not be picking and choosing which parts of the UP it adheres to.

I prefer the option of Western Springs Speedway operating at this venue as it has done for almost 100 years. The natural amphitheatre makes it the perfect place for hosting speedway events, with Ponsonby Rugby Club and musical festivals also continuing to access this unique venue. History shows this has worked well in the past attracting generations of families, dedicated fans, overseas competitors and visitors to this world renowned stadium. It would be destructive to interfere with the natural landscape and is a factor that should not be overlooked. It is well appreciated by audiences who attend speedway, and the greater Auckland community and would be a devastating blow to see this wiped out.

Tradition, sentiment and nostalgia should not be overlooked when considering the future of the stadium, as it is what draws audiences and make it a sustainable option.

I prefer the option of Western Springs Speedway operating at this venue as it has done for almost 100 years. The natural amphitheatre makes it the perfect place for hosting speedway events, with Ponsonby Rugby Club and musical festivals also continuing to access this unique venue. History shows this has worked well in the past attracting generations of families, dedicated fans, overseas competitors and visitors to this world renowned stadium. It would be destructive to interfere with the natural landscape and is a factor that should

not be overlooked. It is well appreciated by audiences who attend speedway, and the greater Auckland community and would be a devastating blow to see this wiped out. Tradition, sentiment and nostalgia should not be overlooked when considering the future of the stadium as it is what draws audiences and make it a sustainable option.

Your perspective on the importance of Western Springs Speedway is both heartfelt and well-founded. The venue has indeed been a cornerstone of Auckland's motorsport culture for nearly a century and its closure marks a significant loss for the community.

The decision to relocate speedway events to Waikaraka Park was made after extensive deliberation by the Auckland Council. In October 2024, the council voted 11-8 to invest $11 million I upgrading Waikaraka Park to accommodate both stock and open-wheel racing, consolidating all speedway activities into this venue starting from the 2025-26 season. (NZAutocar)

However, this decision has not been without controversy. Many I the motorsport community, including Speedway New Zealand, expressed surprise and concern over the move, feeling that their input was not adequately considered during the decision-making process. Critics argue that the closure of Western Springs Speedway disregards its rich history and deep connection it holds with fans and participants alike. (NZ Herald)

Advocacy groups like (Save Our Speedway" continue to campaign for the reversal of this decision, emphasizing the cultural and historical significance of Western Springs Speedway. They highlight that the venue's natural amphitheatre and long-standing tradition make it an irreplaceable part of Auckland's sporting landscape. (NZ Autocar)

While the move to Waikaraka Park is intended to provide a more sustainable future for speedway in Auckland, it is clear that the legacy of Western Sprigs Speedway will be deeply missed by many. The community's passion and dedication to preserving this iconic venue reflect the profound impact it has had over the years. (Speedsafe.com)

If you wish to further support the preservation of Western Springs Speedway, consider joining advocacy groups like "Save Our Speedway" or participating in community discussions to ensure that the voices of long-tie supporters are heard in future decisions regarding Auckland's sporting venues.

I support the continued operation of Western Springs Speedway at this venue, where it has successfully run for nearly a century. The

natural amphitheatre provides an ideal setting for speedway events, while still accommodating Ponsonby Rugby Club and music festivals. History shows that this multi-use approach has attracted generations of families, passionate fans, international competitors and visitors to this iconic stadium.

Altering the natural landscape would be both unnecessary and damaging. The unique setting is highly valued by attendees and the wider Auckland community. Preserving the tradition, sentiment, and nostalgia associated with Western Springs is essential to its ongoing appeal and long-term viability.

Western Springs has always been an amazing place for live music, and an important part of the musical culture of our city. I personally went to my very first concert there. Elevating it to a standard that would encourage more live acts to come to NZ, while still maintaining the history of the space would be wonderful both culturally and economically

Give speedway commercially successful operating conditions.

Change the WS Stadium Unitary Plan to help speedway like they did at Eden Park to help concerts.

Speedway can be part of a multi-use situation with concerts can and have worked with rugby at the stadium.

We (stakeholders/fans/the people) were never consulted with before this time and should have been.

I’d rather see my ratepayer money spent to have speedway at Western Springs Stadium than a lot of the things the Council currently spend the people’s money on.

I have seen how this issue has been handled and I don’t agree with it and have lost faith in the council staff and many councillors.

Most Aucklanders I know want the same as me.

Firstly, Auckland FC has brought the whole of New Zealand together. The location of Mount Smart is inconvenient to many individuals, especially when there's no public transport running. The income generated by the A League and Auckland Fc is far superior than what the speedway has to offer. I understand the sentimental value that the speed way has to many Aucklanders however, money makes the world go round. The amount of jobs, partnerships and financial boosts the new stadium could potentially create is significant. Far more than what the speedway way will produce

Auckland city is missing a high quality/world class stadium. As our sports teams are getting high recognition and more games are happening here, it's only fair our stadiums get an upgrade. The amenities proposed for option 1 and the multi purpose will bring about more events and entertainment to a city known to many as 'too quiet'.

this in turn will have social, wellbeing and economics benefits.

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Having another stadium build see illogical. Auckland FC can co-exist at Go Media, seems to work fine alongside the Warriors. There is no need to add another stadium in Auckland other than the removal of Eden Park for a National waterfront version. If they need a new home then why not have injection of life into North Harbour stadium? Wester Springs Speedway, Ponsonby Rugby and Concerts seem to work well, ain't broke don't mess with it

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

I'm a huge fan of football and it's awesome to see the world's game growing in our backyard. This proposal also helps the local community by providing facilities for everyone to use.

It also provides a great venue for concerts that don't necessarily need to be held at Spark Arena or Eden Park (Which is limited in how many it can host).

But perhaps the biggest advantage to this proposal is the savings that it would generate for the Council. That's more money for the Council to put into other areas of Auckland

Keep the speedway.

Auckland FC will be too small, if you're wanting to expand the club.

It's a nightmare to travel to, public transport is terrible there.

Upgrade the fields for the rugby club, possibly upgrade stands/facilities for bigger regional games.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Western Springs is a great outdoor venue for festivals and events. Additionally, it will help Ponsonby Rugby Club keep their home. Auckland has various stadiums and arenas to use for football already. A dedicated arena for AFC is not necessary seeing as Mt Smart has a 25,000 capacity and the new arena has 12,000-15,000.

I think the Auckland arena would be a fantastic multi sport option which will elevate an enthusiastic and growing football community in Auckland. As well as providing a large construction which would support many small/medium nz businesses.

The concerns I would have would be around both parking and adequate public transport

I would love for Auckland FC to have a stadium, but they are getting 20 odd thousand fans in the stadium every game, it doesn't make any logical sense to build a Stadium to house only 12-15 thousand. Where's the sense in that. Besides that, I vote Auckland fc. If it's that small though, I vote keep it how it is

Western Springs is known internationally as the home of New Zealand Speedway, we have enough stadiums in Auckland that are not utilised already which could be improved with more seating, roofs, etc and would be great - jeep Western Springs as it is, we save heritage buildings, why not heritage stadiums. It is nearly 100 years old and needs to be preserved for the future generations of Auckland and New Zealand.

History

Western Springs Stadium was built on land purchased from the Motion family by Auckland City Council in 1875 in order to build the Western Springs reservoir and pump station.[1] Situated in a natural amphitheatre, concrete terracing was constructed. It was designed and modelled on European stadiums which included a banked concrete cycling track, a cinder running track, and a grassed centre area for football and sports. The original design included a covered grandstand which would fill the gap between the concrete terraces, the cycling track finishing straight was designed and built to start and finish in front of the proposed grandstand (where the pit area now is). The stadium was never completed.

In 1929, the stadium built by Relief Labour was opened to serve cycling, athletics and football sports. The cycling track was over 500 yards in circumference as the European tracks were then. The cinder all weather Athletic 440-yard running track was the first of its type in NZ and it with the overall stadium would have easily compared to the famous Wembley Stadium in England. Some conjecture has been made when motorcycle speedway commenced on Western Springs. Saroway Park Newmarket was being used at the time. Previously, the Mt. Albert volcanic crater had been used. It was not until 1935 Motorcycle broadsiding commenced on the cinder running track (as they did on Wembley). On Christmas Day December 1937 midget car racing was introduced at a special international meeting, it included NZ pioneers Ron Roycroft and Geo Smith. The first official season then followed in January 1938. Speedway was still being raced at the previous venue at the Epsom Showgrounds. Athletics disappeared from Western Springs as a result and New Zealand's only all weather Athletics track was replaced by the traditional grass tracks until the late 1960s. When the first of the new style all weather athletics tracks were built Western Springs was already many years ahead of its time with an all weather cinder surface laid in 1929.

The 1950s saw promoters "take over" with the blessing of the Auckland City Council pleased to receive a monetary return. The early promoters combined Cycling, Motorcycle Speedway and Speedway Cars who all raced together on the same programme with a large following. The war intervened and in 1944 Speedway became a huge entertainment and the formula of Cycling, Speedway Bikes and Midgets reached international heights.

Speedway previously had competed on Epsom Showgrounds, Blanford Park on the old cycling track around the soccer field (now under the Grafton Gully motorway) and Olympic Park (Saraway Park) in Newmarket.

Stock car promoters raised the height of the speedway/running track introducing stock cars and forcing speedway motorcycling out, who relocated to Rosebank Road. Speedway cars were affected at this time by a conflict with Stock Car promoters. During the 1960s, cycling was forced out of the stadium as the promoters in tandem with the Auckland City Council made access difficult and later impossible under the requirements of the speedway track. The Auckland City Council had little regard for Amateur sports such as Cycling and Athletics, nor for the stadium itself, never completing the complex and building the Grandstands. Neglect reached its nadir when the main concrete terraces slipped away during the 1960s, almost taking the cycling track with it. It took months to effect repairs; under strong public criticism

they finally did some thing to re-instate the damaged terraces. The surrounding stadium grounds deteriorated into a Council yard with derelict equipment and buildings littering the boundary of the site which spread to the adjoining Lake and Pump House and abandoned relief campsite. Speedway Cars resurged into a new golden era when stock cars went to Gloucester Park and finally Waikaraka Park.

Because cycling was forced out, the cycling track was never able to be used again, so it was removed to widen the new speedway midget race track; at the same time, smaller cycling velodrome track sizes became the International requirement.

The 1960s saw a brief return of what the stadium concept originally was; this was assisted by the Speedway promoter who laid the athletic track. On the success of Peter Snells' Olympic victories an International Athletic and Cycling event was held with the largest crowd recorded for the stadium. It was larger than the 1950 British Empire Games cycling events and Closing Ceremony.

In February 2007, the WWE Road To Wrestlemania 23 Tour came to Western Spring attracting over 12,000 WWE fans.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

The proposal creates a better venue with wider use cases, also catering for the fastest growing sports in NZ.

Music in NZ has lots of available venues, and why should tax payers contribute towards the running costs so that a small minority can play rugby for the club and attend the few music events that will be there?

The only change I would want for option 1 is for more seating to be added, as 15000 isn't big enough town hosting bigger football matches.

What is your connection to Western Springs Stadium? (tick one or all that apply)

I attend events at the stadium or its sports fields,I participate in nearby activities (e.g. community sports, performances, MOTAT, Zoo, Western Springs)

There are three options to consider

Which option do you prefer? Select one option only.

Option 3A: Neither Option 1 or Option 2 - keep things as they are and retain current arrangements

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Western springs speedway is a unique speedway venue in the world - there is no other like it - the natural amphitheatre - the central city location, - the scenery. Overseas drivers rave about this place - it should be considered an asset and promoted as such. There are many other sports and concert venues in Auckland -we don’t need another white elephant - absolute waste of money to redevelop for purposes that already exist

Auckland needs modern sporting infrastructure. We are so far behind comparable international cities when it comes to stadiums. Having an opportunity to have a sports/ concert facility at no cost to ratepayers is an incredible opportunity. Leaving it as status quo (option 2) would be a massive loss of an opportunity to start heading Auckland forward to becoming an international sporting hub.

It would be very small minded to miss out on this opportunity.

I believe Council owned property used for public use should always be kept in council hands. Changing ownership by stealth is a worry. To often land allocated as public can be lost. As someone in my earlier years Concerts and the Speedway were places we went and enjoyed,

I have been a player, manager and coach at Ponsonby Rugby and am now the major sponsor.

I have seen over many years how a community led club like Ponsonby Rugby can change lives for the positive.

As a successful businessman who has grown an international business out of Auckland I believe the city needs more open green spaces, not more private ones. The city already lacks public green spaces and not having access to western springs would be travesty for kids sports in the

city. The lack of green spaces is exactly why it would be such a great commercial venture, as it is a rare asset that commercial interests would control for their gain.

Why would someone start a business like ours in Auckland if you take away the open spaces my staff would use for recreation?

Since childhood, I've been a devoted fan of this one-of-a-kind speedway, and now that my children are old enough, they too have joined in, making it a cherished family tradition. I firmly believe in keeping families connected through great entertainment, and Western Springs Speedway should continue to operate so that all families can enjoy quality time together. There is too much other rubbish out there and Speedway deserves its place.

Your feedback

What is your connection to Western Springs Stadium? (tick one or all that apply)

I attend events at the stadium or its sports fields

There are three options to consider

Which option do you prefer? Select one option only.

Option 3A: Neither Option 1 or Option 2 - keep things as they are and retain current arrangements

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Auckland has enough stadiums and music venues. Western Springs is unique and is well used. Tell the money people to go build their ideas in kumeu, Wiri or Drury

This should be kept as a speedway stadium. It has a huge amount of history and community following, and it’s disrespectful for all those involved to take it away.

This is a classic open air venue which has hosted many a concert, festival and sport events over the decades. We DO NOT need another white elephant of a building like North Harbour Stadium, or an underutilized Eden Park on our hands. The area lends itself to being OPEN with fields, parks and trees adjacent to Motat and the zoo which have minimally sized buildings. To have a multi sized stadium in this area would over shadow both the zoo and Motat. From what I understand from the speedway fraternity, Waikaraka Park does not have the parking capability and many will not attend as it just DOES NOT have what Western Springs has, and always has had to offer.

This is the home of the Ponsonby Rugby Club, one of the oldest in the country. The club has has had this as home for many years and has a collection of paraphernalia going back to 1905

This option will allow the club to renew their lease, giving certainty to the continued existence of the club. It supports:

>Building new clubrooms and shared community spaces

>Keeping the grounds available for concerts and other events in summer

>Preservation of the natural, open character of this iconic site.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

We currently have four major stadiums/venues in Auckland. Two are situated in the middle of Auckland one South and one in the North. What is being proposed is upgrading one of the middle venues to a full stadium. This would put pressure on all three other stadiums which are currently struggling to remain financial. I therefore request that the Governing Body and Tātaki Auckland Unlimited complete their stadium investment plan and wait for their [resolved and supported] development of Eden Park as New Zealand's national stadium and the completion of North Harbour Stadium Stage 2, in order to inform future options and plans for the network.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

I strongly oppose Option 1 and fully support Option 2.

While I support the idea of upgrading and revitalising Western Springs Stadium, turning it into a 12,500–15,000 seat stadium as the new home for Auckland FC is entirely unreasonable. If Auckland Council genuinely wishes to promote and grow football culture and infrastructure in the region, this scale of development is not only insufficient but also unnecessary. Auckland already has multiple venues that can accommodate events of this size or larger.

I believe public investment in stadium development should be based on long-term necessity and strategic growth, not simply to "tick a box" or for the sake of doing something new. That's why

Option 2 feels far more reasonable and necessary. It presents a more thoughtful and balanced approach to the site’s future.

In summary, I am absolutely against Option 1. Let’s invest wisely, not wastefully.

Well Auckland FC has been amazing and that is the main reason why I support this option. However, I feel that it should be a 20k seat stadium as shown by the supporter numbers at Auckland FC this season - 12.5k is simple too small. Secondly, I feel transport is a major issue, Both Eden Park and Mt Smart have train stations close by, making the venues accessible. Either a busway or a train line needs to be built to the proposed stadium to make getting to the stadium viable.

Too valuable a natural asset to change from present multi use stadium for all Aucklanders to a purpose built stadium to benefit a small group. Why don't the Auckland Football Club take over & invest in North Harbour Stadium?

Have you been to a concert there? An experience like nothing else with the sound and atmosphere. The uniqueness of it's location is a massive draw card....having that kind of green space so close to town, I have lived in western springs suburb in the past, and being able to enjoy the space was so important being so close to the city. Hearing people in the distance enjoying life and music was always something that made me smile.

The memories made over the years I hold dear. The history of who has graced the stage is unbelievable for little ol New Zealand. Outdoor events are such a draw card, for artists' too I imagine, it's an experience like no other...! One that the city could hone in on and promote nationally and internationally. Wouldn't that leave the city with no outdoor concert area? The

atmosphere Western Springs provides is irreplaceable. Please keep the special, history filled, unique amphitheatre. It's humble, and a space where people gather, enjoy, and embrace. PS I hope the decision makers read the list of who has come to our country and played there in the last 50 years... Have respect for them and the 100s of 1000s people that have kept it alive up until this point. Keep it local and simple, promote not destroy. Would be a very sad day if the space was to be no longer.

I'm in my sixties and have such great memories of Western Springs as a concert venue , markets etc. I'd love to see some old school type of use of this fantastic venue. People who bought there were well aware of the stadium so can't suddenly be upset over its use. Something less PC would be amazing !!!!

Speedway can be included in a multi use plan. It has successfully been at the Springs for many years. Its part of the fabric of Auckland. The current Mayor has his own agenda, and taken it upon himself to remove speedway. It appears it was underhand, and not all parties were consulted. He talked to the current promoter who has his own agenda for speedway in Auckland running Waikeraka at the same time. He would have rubbed his ands in glee knowing he was getting a cash injection for that rubbish establishment. There are credible options for it to continue at Western Springs, they were ignored. It needs to be reviewed, and fingers crossed overturned. Open wheel speedway in Auckland belongs at Western Springs.

The Western Springs Speedway is an Auckland institution for speedway lovers and the like. Having been around for almost 100 years, it's etched itself into historic moments in New Zealand Motorsport. Losing such an iconic venue would be a travesty to those in the Motorsport community and fans alike. It's clearly all about money, but transforming Western Springs and moving operations to Waikaraka Park would be an incredible waste of money and resources ($12m!). Western Springs isn't harming anyone so keep it as it is and let the legacy live on for many generations to come!

This is a good open air venue for holding concerts, speedway and sports. You already have seating in the form of a concrete terraced embankment that can hold up to 50,000 people. Why tear this down, and then build the same again with a roof over it? There are so many underutilized Stadiums in Auckland at the present (North Harbour. Spark Arena, Mt Eden). There is plenty of parking when the adjacent fields are used and it blends in with adjacent venues Motat and the zoo.

Western Springs Stadium should remain a speedway track. It has been there for 96 years and when it was set up it would have been envisioned that it would remain a speedway track indefinitely. I am 64 years old rate payer (who has been paying rates for 42 yrs) who is passionate about Motorsport and have been attending speedway for 58 years.

Western Springs is a central and safe location(I travel from the North Shore) for speedway to operate with adequate parking.

Please let Speedway should remain at Western Spring indefinitely.

Western Springs Speedway holds a cherished place in Auckland's history, having hosted speedway racing since 1929. I believe there are compelling reasons to consider retaining the sport at Western Springs.

Western Springs is not just a venue; it's a symbol of Auckland's motorsport heritage. The stadium has been a gathering place for generations of fans and drivers, fostering a unique community spirit. Its natural amphitheatre setting and proximity to the city centre make it an iconic location for motorsport events.

While the council argues that Western Springs Speedway is a financial burden, I contend that the venue's underutilization is due to restrictive zoning and limited event opportunities. With the right investments and management, Western Springs could potentially host more events, including concerts and festivals, to generate additional revenue.

Western Springs' location offers easy access for fans from various parts of Auckland. Its proximity to public transport and the central business district makes it an attractive option for event organizers and attendees. In contrast, Waikaraka Park, while receiving upgrades, is situated in a more industrial area, which may not offer the same level of accessibility and is not specifically designed for speedway racing.

The strong community backing for Western Springs Speedway underscores its importance to Aucklanders. Local motorsport enthusiasts and families have expressed their desire to keep the sport at its historic home and this should not be disregarded.

Retaining speedway racing at Western Springs offers an opportunity to honour Auckland's motorsport heritage. I believe it should continue to serve as a vibrant hub for motorsport enthusiasts and the broader Auckland community.

A dedicated soccer stadium for Auckland would be great. And a home for a sport and team that have attracted a lot of attention.

However I would suggest to explore options to continue reusing the natural amphitheater and landscape and provide facilities for recreational and public use when there is not ticketed events happening.

The other suggestion I would have is try keep business local as much as possible, this includes future and any ongoing contractual obligations that the stadium would undergo, during and post construction, so the private investment flows back into communities instead of international conglomerates.

I think speedway should stay where it is. It has been part of Auckland history for 97 years. Speedway has become a family tradition that sees grandparents taking their grandchildren so they can experience an event that is safe. My family have been attending speedway for 60 years and it is noticeable that there is no police presence needed. Where is there an event that doesn't need police attendance? Keep speedway where it is and where it was intended to be.

western springs speedway has been part of my life s interest attending at speedway 54 years 3 generations sit together its getting very expensive for a family would fill the place if price dropped to affordable amounts for a family waikaraka as an alternative will be a back step to the sport which has generated world class drivers hubbard when mayor was for the closure of speedway i stopped eating his breakfast cereal likewise any mayor that passes this option will be voted out no matter how good his intentions keep what youve got think of the disabled who find the venue works for them how many soccer fields do you need only 1 speedway

What is your connection to Western Springs Stadium? (tick one or all that apply)

I attend events at the stadium or its sports fields,I participate in nearby activities (e.g. community sports, performances, MOTAT, Zoo, Western Springs)

There are three options to consider

Which option do you prefer? Select one option only.

Option 2: Western Springs Bowl

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

This has always been an iconic and beautiful place for music concerts. We already have enough sports places. Maybe revamp the north shore one for sports and keep western springs for music.

Speedway at Western Springs is an iconic internationally recognized venue and sport and should not be forced to relocate to a sub standard venue. To do so destroys a part of Aucklands History and Heritage. What other sport or venue, in Auckland, can claim a nearly 100 year continuous operation. And help produce world champions in their sport.

We don’t need another sports stadium, we have three that meet the needs well enough already for professional sports. It’s much better to retain the use for music venues as nothing beats western springs for ambience with music events - six60s first concert was a prime example. It also is a community hub and should the access for community sports should remain. It would be sad to see it replaced with option one

. I support Speedway returning to Western Springs Stadium. With a long-term lease and appropriate changes to the Unitary Plan, Speedway can be a viable and sustainable part of a shared, multi-use venue alongside concerts and Ponsonby Rugby. Speedway at Western Springs holds a unique place in Auckland's diverse cultural and recreational landscape, and it makes sense to continue using this existing facility particularly with the historical significance that spans 96 years. As a ratepayer, I would prefer my contributions go toward maintaining and enhancing a venue that has deep generational ties within the community. Speedway is well known for its family-friendly environment, and that welcoming atmosphere should be encouraged and preserved for future generations. I do not support the venue being passed into Private ownership

for 50 to 100 years. We already have many stadiums around Auckland catering for ball sports - why have another at the expense of Speedway which is world renowned.

I'd like to keep Western Springs speedway as a speedway dirt track for as many events as possible (more than 12) per season. Western Springs has held speedway at this iconic venue for 96 years and has had a positive growth effect on the community through NZ. By its influence on all NZ speedway. Speedway brings in a large amount of money to the economy every year. And I believe it is the second most watched spectator sport in the country. Speedway isn't just dirt racing it's a community. With Western Springs speedway closed Auckland will lose its only open wheel race track since Pukekohe has closed for all Motorsport events. My family loves this place and so do many other kiwis and people who live in other countries and have and do regularly visit.

I attend events at the stadium or its sports fields,I participate in nearby activities (e.g. community sports, performances, MOTAT, Zoo, Western Springs)

There are three options to consider

Which option do you prefer? Select one option only.

Option 3A: Neither Option 1 or Option 2 - keep things as they are and retain current arrangements

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

The speddway is well attended with family audiences that do not cause any bother with the polic at all. The Track at Waikaraka park is not suitable for the classes of cars that race at w springs and parking woeful. Also the capacity is no where near big enough for such large crowds . Wayne Brown showed how much he dosent care and what an Idiot he is by hie comment " more peole go to the corner Dairy " than Speedway at WSpring - What a complete tosser. I love the idea of making the venue mulri functional i can see its use could be expanded with some intelligent thought - please dont ask Wayne for any of that .

Option 2: Western Springs Bowl

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Ponsonby Rugby Club is an absolute icon in the heart of a huge community. People travel far and wide just to play for Ponsonby and to play on the number one field inside the Western Springs Bowl is pretty special with so many past and current greats having played there.

There is a great opportunity to include other sports to the club and to build a multi-sport/multi-use complex that brings even more of the community together. Creating a safe haven for youth and families to come together.

There is no need for another dedicated sports stadium, especially when there is an already existing North Harbour Stadium that is under utilized and investment could go into improving the site and actually completing the stand on the northern side to allow a larger capacity for attendance as well as function rooms, changing rooms and a dedicated high performance gym.

This option would be much cheaper than the proposed 1st option and it could still give AFC a home - although, what's wrong with them currently sharing Go Media? It seems to work well now as it is!

And as for concerts, Westerners Springs has a wonderful history here and again is under utilised (possibly due to the speedway track?) but now that Speedway is no longer there, it now creates a great opportunity to increase capacity & build a permanent stage & green room, which can be used for local and international events.

It is a world famous speedway and concert venue. 100 years of Auckland's history should not be wiped away for the benefit of some egos and crooked council members.

With a 75 year family connection with Western Springs Speedway as competitors,drivers, owners, officials and volunteers I am appalled at the Council's high handed attitude to our sport. Speedway has co-existed with rugby and concerts for many years and I see no reason why this should not continue. Give Speedway a long term lease and the opportunity to operate commercially and let it continue for another 96 years

Auckland desperately needs a decent smaller stadium. NPC games at Eden Park have no atmosphere and are not a good spectator experience. Western Springs has a long history of concerts and the acoustics there are far superior to Mt Smart or Eden Park. The stadium operator partner has strong experience in this.

Speedway at western springs has been a mainstay at the stadium for the last 90+ years and in our largest city reducing speedway venues from 2 to 1 is unacceptable. The council should be setting the speedway to be at western springs for another 50 years so families have the summer entertainment in the best city venue in the world.

The natural amphitheatre as a performance space has worked well & could be enhanced. A home for soccer vs long term connection for rugby - both have merit. There is a significant need for basketball. One thing is clear an upgrade is needed. I think more discussion is needed.

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

The Western Springs Bowl would keep the space in community hands and ensure that it was used for the benefit of Aucklanders, rather than private interests. The Ponsonby Rugby Club has a proud history at the ground and there are no suitable spaces for it to relocate to.

Moreover, it is clear that Auckland has too many stadiums, not too few. Auckland FC can easily play at either Go Media or North Harbour stadium - there is no need for another facility.

I attend events at the stadium or its sports fields

There are three options to consider

Which option do you prefer? Select one option only.

Option 3B: Neither Option 1 or Option 2 - explore other ideas

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Keep speedway there! There are already enough sports grounds. We need diversity and other options for sport not just rugby. Football etc. please leave speedway there. We need to foster diversity of interests in the younger generation having more of the same ie. more sports fields doesn't do this. Speedway is a multigenerational family activity that fosters an interest in not just motorsports but also mechanics and engineering which is needed in our younger generation to create a generation that are innovators.

I support Option 1: Auckland Arena because it’s a future-focused investment in our city that delivers world-class infrastructure without placing unnecessary pressure on ratepayers. This proposal brings together sport, music, and community in a way that reflects the vibrant, diverse Auckland we’re becoming.

It works well as is. Finish North Harbour stadium if you want another sports stadium. Eden park and mt smart are options for sports and other events, Not to mention the trusts arena for multiple events, build Auckland FC there, it's just down the road and would be great for that community.

Western Springs speedway is just about historic, not many speedways in the world are. Plenty of life skills and technical / engineering knowledge is developed here. The current 150 year old rugby club want to stay.

Keep it diverse and leave it as is!

I have been to many Speedway nights over the years with friends and family. I take my own kids there now, too.

There is so much history at Western Springs. Nearly 100 years!! NZ is a relatively young country so our history is not long but here we have a piece of tangible history that has stood the test of time.

Generations of families have and continue to attend Speedway during its season. Speedway has a very loyal following and attracts overseas drivers/teams, too.

The simple question is: Why does it have to change? It has quietly sat there, entertained many for nearly a century then, suddenly, someone with an idea and lots of money decides they want to implement their idea and will do it with little regard to those who have been attending Speedway there for years!!

Auckland is growing at a phenomenal rate, another venue could easily be sort. A piece of land somewhere that has no history attached to it. Build whatever idea it is there but leave the Speedway venue alone please!

I feel there's enough stadiums in Auckland that could be utilised for football, netball, and basketball. The history of concerts at Western Springs are amazing. I attended a concert there with Pavarotti (3 tenors) and attended with David Bowie, with many others like Fleetwood Mac, Bob Marley to name a few. This coming generation would love a purpose built bowl for outdoor concerts. Walking around the natural habitat of Western Springs to arrive to a world class bowl in absolute beautiful surroundings is what large cities need. Indoor venues for the netball and basketball are on the North Shore with huge of amounts of space around them to extend, multi level car parks could be build for 1/4 of the investment proposed in option 1. Football needs to join with the North Shore Stadium or similar it's crying out for something like Auckland Football Team.

To lose an iconic bowl for concerts like Western Springs would be sacrilege, and be regretful for years. This new football team (soccer) that's had one season might not even last, what if in 20 years is bankrupted or falls out of favour, we will regret building a huge complex there that would turn into a white elephant. I'm a sports nut, & will watch anything, played soccer and rugby in my youth & been to most sports grounds in Auckland to participate and watch our children play, there's heaps of places they could use for option 1. On the other hand, how do we replace Western Springs bowl? Impossible, once it's gone nothing will replace this location. I say create a beautiful bowl for mid size outdoor concerts, you never know, the likes of Taylor Swift would definitely use a purpose built outdoor arena, not all artist want to perform on rugby fields. Go somewhere else is my message to option 1 leave the Springs as is. Let's keep the history and build on those memories together to make an amazing Concert Bowl.

Western Springs Speedway has been an Auckland icon for nearly 100 years. If there is no Western Sorings Speedway there is no Speedway in Auckland. Waikaraka Park does not have the infrastructure or capacity to host both stock cars and Speedway. It should never be taken away from what it was lifted for and certainly not by the deceitful and underhanded means that it has been. It would be nice to see the right thing done and the decision not be down to money. It should be kept under the current terms that benefit everyone and not changed to serve the bureaucrats or individuals with big cheque's books and tested interests that suit their own self serving agendas.

The greatest need is indoor courts so this could or should be a priority. If a boutique outdoor stadium occurred, for concerts and sport, does this mean Eden park becomes redundant, which is actually good, as this is the stadium that needs to go. Western springs is also the best venue for a test cricket ground. so a multiuse, and upgarde of a multisport facility in central auckland is required. it just looks like politics had played a role in the decision making instead of a fact based research approach by independent experts, with no agendas, or gains from proposing concepts.

International Articles around future design. Has TAU really done their homework?

The Future of Sports Venues Is About Creating Vibrant, Multiuse Districts

August 01, 2023 | Q&A with Jon Niemuth

While live sports events have rebounded to pre-pandemic levels, these venues are increasingly competing for attention with a proliferation of mobile devices, streaming content, e-sports, and home entertainment. To deepen connections with fans, attract new audiences, and increase ROI, sports organizations are looking for ways to boost year-round engagement. By activating venues and the experiences around them, sports and entertainment districts can generate new forms of revenue and help create 24/7 live-work-play communities.

We sat down with Jon Niemuth, director for Gensler Sports, to discuss what's next for sports and entertainment venue design, and why these facilities should be closely integrated into the cities where they reside.

For many years, the trend with sports arenas has been moving away from single-use, game-day venues toward entertainment districts. How has that approach evolved?

Jon Niemuth: Today, for sports development, it's not always about design. It's design and urban planning. It's design and operations. It's design and revenue generation. It's design and multipurpose flexibility. It's always "design, *and*…." Gensler does commercial real estate and sports; housing and high density residential and sports; and commercial, urban planning, strategy, innovation, and sports. We are better aligned to meet the demands and expectations of our clients' evolving needs.

A great example is what the Chicago Cubs have done in and around Wrigley Field. They made targeted enhancements inside and outside the ballpark with new housing, new commercial spaces, and new amenities. They transformed what has been for years an organic collection and made the idea of "Wrigleyville" an integrated hub within Chicago. It's now a cohesive district, a destination for more than baseball, and a true live-work-play center within the larger city. For years, Cubs fans made the pilgrimage for games but now, even when the stadium is empty, Wrigleyville is a must-see destination for a concert or to have dinner. As we have seen this summer with Taylor Swift's Eras tour, there is as much energy and activity outside of stadiums as inside. Fans flock to just hear the distant sound, and to be part of the larger experience. And because they're part of that experience, they're going to the bars and restaurants.

It's not about sports so much anymore as the experience. It's culture and sports, or sports and food, or sports and music, culture, and housing.

How have sports team owners' approach evolved to focus beyond ticket sales and the venue?

JN: Over the last 40 years, we've had generational owners. Now, you're seeing owners who are businesspeople like Stephen Ross, founder of Related Companies, who owns the Miami Dolphins, or Dan Gilbert, owner of Rocket Mortgage, who owns the Cleveland Cavaliers. They're activating around these sports properties because for them it's about a lifestyle. The basketball arena can activate a transit node, which then activates and increases the development potential of real estate around it. A stadium can be a destination for global events like Formula 1 (F1) or World Tennis Tour.

We're seeing the same thing in colleges now too. At Baylor, a public/private sports program development has boosted the school athletically and academically as they've grown the footprint of their campus with a venue that engages the larger community of Waco as a civic asset.

Stadiums are getting smaller. But it's not necessarily because we're not focused on seats. We're designing the full experience, from the outside in. Can you talk about how, in designing a venue, the city implication comes into play?

JN: Thirty years ago, going to a sporting event was about going to the ballpark, the arena, or the stadium, and that was the end-all, be-all of your experience. Back then, venue owners wanted you to get you in the gate as early as possible and extract as much money from your pockets while you were inside the ticketed zone.

Today, that has shifted. People who are going to a venue like L.A. LIVE to see a Lakers game are going early to have coffee, go to the museum, and then watch the Lakers play, and grab a drink or dinner afterwards. So, it's less about getting people in the arena for a game. The longer they can get people to that district, the more it becomes part of their lifestyle, and they'll go back again.

How can sports venues better appeal to avid fans, as well as casual fans, or not fans?

JN: What's interesting about the role of the designer in the evolving landscape of sports and entertainment and urban revitalization is the push to get cities to rediscover themselves. By activating venues and the experiences around them, we are creating urban neighborhoods that should appeal to every kind of fan or person even if they aren't a fan. Sometimes the focus shouldn't even be on the arena. It might be the public space that the arena opens up to. There's been live music in the plaza at L.A. LIVE. In Sacramento, they do a lot of outdoor concert events, farmer's markets, and art festivals. Petco Park in San Diego is another great example. It's not the sports. It's the "and entertainment, and residential, and urban economics." It's the "*and*…" that will make sports venues more appealing.

What challenges and opportunities are next for the future of sports venues and districts?

JN: Over the last few decades, we have seen teams begin to move away from shared facilities to more dedicated team facilities aligned to the specific qualities of their sport, economics, location, etc. Larger cities and regions have been able to absorb this in part with an expansion in the demand for live entertainment and an ever-more-crowded event calendar.

What will change in the near future is the question, how many sport districts are enough? Is there a saturation point for cities, where these destination developments may begin to intersect?

We are already seeing examples of sprawl as teams seek out locations that are further away from urban centers to create the same quality of experiences. Balancing these lifestyle goals with a need to focus on density and regeneration in our cities will be a challenge for designers and planners.

We see ample opportunity for team owners, developers, and planners to focus on infill concepts in the urban core. Strategic development with targeted adaptive reuse or replacement can allow existing urban assets to remain in place while we reinvigorate the context around them. Los Angeles, Chicago, and Boston are good examples of cities where projects have struck this balance around single entity destinations. Locations such as Cleveland and Detroit, where multiple large-scale venues and owners exist in close proximity, create the opportunity for co-development and collaboration.

Regardless of the location or the situation, the objective is the same. Our goal is to create vibrant but sustainable developments that are supportive of both the interior and exterior goals of our sport and entertainment venues. The challenge for venue designers like us is to strike the right balance across a spectrum of demands.

For media inquiries, email media@gensler.com.

Full Bio

Jon Niemuth
Jon is a veteran sports designer invested in delivering sports and entertainment venues that are integrated into the fabric of their urban context and have a positive impact on their communities. Based in Los Angeles, Jon is a Principal and works as Director of Sports across our sports hub offices to drive new business growth, partnering closely with clients and teams to deliver high performing venues. He has nearly three decades of experience in sports venue design, including arenas, stadiums, and practice and operations facilities for professional and collegiate teams. Contact him at Jon_Niemuth@gensler.com.

10 trends shaping the future of stadiums

Cox Architecture has established a global reputation for its work on stadium projects across Australia and New Zealand. So what do they think the future has in store?

- **SportBusiness Staff**

February 10, 2025

Share:

Link copied to clipboard

With a portfolio that includes Optus Stadium in Perth, Jakarta International Velodrome, Allianz Stadium in Sydney and Rod Laver Arena in Melbourne, Cox Architecture are right

at the forefront of the stadium space. We caught up with directors Alastair Richardson and Richard Coulson to explore 10 trends that are shaping the future.

Trend 1:
Technological innovation and digital transformation

AR: "It's been like a war of the screens in many stadiums, with video boards getting bigger and bigger and LED ribbons appearing on every surface. Integrated networks are also increasingly important so fans are always connected to the game, wherever they are in the stadium, while cashless is more commonplace than ever.

"I think the key with all of this is that the technology is constantly changing, so flexibility is really important. Technology might be out of date in five years' time, so a lot of effort is being put into capacity, Wi-Fi and fibreoptic backbones.

"This enables a completely immersive environment. On the back of that, wearable technology is also growing – and there are opportunities for player performance data to be delivered to fans in a stadium in real time."

RC: "Performance data is already being accessed by the teams, so it is a natural step to make it available to spectators. You can't just expect people to fix their eyes on the field for a whole game anymore. Additionally, any technology that can cut queuing times, such as RFID-based innovations that mean you can just pick up food and drinks from an outlet without stopping to pay, will get increasingly popular."

AR: "We're seeing an enormous uplift in food and beverage (F&B) sales in Australian stadiums due to that technology, from something like $17 to $30 a head."

Trend 2:
Stadium operators need to work harder than ever to attract fans

RC: "It should be remembered that fans still have a passion to be part of a collective and social experience at stadiums, and that is hard to replicate. However, it is important to amplify the social experience and make attending a venue as convenient and flexible as possible."

AR: "Fans in stadiums want more space to linger, dwell and talk about the game, and they want different food options. Here in Melbourne, for example, multiple new restaurants have opened at Marvel Stadium that are all designed to create a unique event experience.

"The F&B element is really interesting. I've seen at outdoor concerts, for instance, ticket-holders getting Uber Eats deliveries to the entrance gate and then collecting them, with obvious implications for catering. How will fans consume food and drink within venues through the gig economy? I think that's a fascinating question."

Trend 3:
Premium experiences are replacing traditional hospitality

RC: "There is a greater variety of hospitality offerings than ever before and, increasingly, such clients do not want their guests to be trapped in a box. Rather than having 10 suites of 16 seats, sometimes it's better if the 160 people are in a space where they could mingle together."

AR: "The traditional corporate suite is exactly that: a tradition. Corporate clients are generally moving away from these and instead investing in high-spec retrofitting, while middle-tier club spaces are increasingly popular. You are also seeing younger fans attending fewer games, but spending more on making it a special occasion when they do attend.

"We can see the development of loyalty programmes transitioning into venues, be it either through membership models that are not based on club membership, to corporate partnerships with he likes of AMEX Centurion Clubs being associated with loyalty programmes. A leader in terms of 'loyalty' products to look at is the airline industry and their tiers of frequent flyers, and we will see the same development in stadia as part of the 'premium' offering."

Trend 4:
The growing importance of the year-round venue

AR: "There is an increasing acceptance that it is not enough to just host 20 or so games a year. From a design perspective, building flexibility into a multi-use, community-focused stadium is essential, and new revenue streams are being opened up. We saw

that at the Adelaide Oval, where we designed the first hotel in Australia to be completely integrated into a stadium's footprint."

RC: "The expectations of the community are really important, and there are practical considerations about how frequently a venue can be used in terms of turnaround times. However, hosting concerts can fundamentally change the revenue performance of a venue. That is why, for instance, the proposed Macquarie Point stadium in Hobart the team are working on is being designed to accommodate concerts as well as sport as part of a multi-purpose offering."

AR: "Macquarie Point is a great example as we have taken steps to design specific elements that will make it more appealing for concert promoters – including a stage pocket and dedicated facilities for performers. Meanwhile, on the sporting side, this will be the first 'indoor' cricket stadium in the world, thanks to a transparent roof. The venue will initially host one-day international and T20 contests and, all being well, it will host Test cricket by 2030.

"More broadly though, the overall challenge we're talking about is to increase the usage of stadiums. One key trend that will contribute towards this is the professionalisation of women's sports, which will eventually lead to more games in front of bigger crowds at established venues. We are seeing the development of specific venues for women's games that tend to be smaller, and between 13,000 and 20,000 seats, but demand will rapidly outgrow capacity.

"The aspiration of women's professional sport has to be equality, and this includes access to the team's home ground and spiritual heart. The notion that the 'men's game' is the pinnacle of professionalism is yesterday's thinking. The fastest growth in professional sport is the female game."

Trend 5:
Accessibility is becoming impossible (and expensive) to ignore

AR: "We are big believers in equality of access, and that needs to be built into a stadium's design. This goes beyond the restrooms, which are increasingly unisex in Australia. For example, a mother should be able to take their kid in a pushchair and rack it up to a platform so they can watch a game together.

"A venue that is a true community stadium should offer access to all. Traditionally, a wheelchair user and a single carer would come to a game. Nowadays, there may be four or five other friends or family members that want to come to a game with the wheelchair user, so there has to be flexibility to allow groups of people to be together."

Trend 6:
Iconic Olympic Games venues are no longer just newbuild

RC: "It was great to see in Paris how iconic and historic locations were used. They broke new ground in terms of reusing venues. We are eight years out from the Olympic and Paralympic Games in Brisbane, which is a completely different animal, with a low-density, suburban landscape.

"But Queensland has a history of focusing on legacy because it has never really had the budgets to support 'trophy' stadiums. So the focus should be on legacy and community use from these venues, but there's also a natural push and pull with some people getting anxious that plans are not ambitious enough to seize a once-in-a-generation opportunity.

"We are blessed in Australia that our legacy sports play in multi-sport venues, our rectangular professional sports in Brisbane – football, rugby league, rugby union – all play from a single venue, Suncorp Stadium. At the same time our oval-based stadiums support two professional sports, cricket and Australian rules football. With this usage profile we are already in a position where the legacy for the primary venues have a lasting outcome for the professional sports that call Brisbane home."

Trend 7:
Stadiums are becoming anchors for major new precincts

AR: "All stadium infrastructure in Australia is essentially delivered through some form of government funding, given that they are community assets. This has led to a rise of public-private partnerships. What is now Marvel Stadium was basically the anchor for the complete redevelopment of the old Melbourne Docklands, but we are also seeing similar models in countries like Japan, as well as the United States of course. It was interesting to see the recent proposal for the revamp of Manchester United's stadium talk about the potential transformation of the area around Old Trafford too."

RC: "With stadium precincts, transport is the big thing here as it can often be a much higher infrastructure spend than the venue itself, and the two pieces have to go hand in hand. So, it takes political strength to get the necessary commitments."

Trend 8:
Sustainability is no longer just a 'nice to have'

RC: "Sustainability is about Legacy and Resources. It must involve considerations of legacy use and continuing flexible occupancy to avoid 'white elephants'. Stadiums tend to be large pieces of infrastructure, so there needs to be focused and appropriate use of resources – and if they are only being used for one day a week, then how can those carbon footprints be justified?"

AR: "There is no question that sustainability is now a 'must have' for new stadiums. Here in Australia, there is legislation around water-harvesting and energy efficiency , for example. The sustainable options really depend on where you are in the world. For

instance, it makes sense to use solar panels on roofs here in Australia due to our climate, but perhaps less so in Northern Norway. In India, we are working with Ahmedabad, which is one of the cities hoping to host the 2036 Olympics, whose aspirations are for a zero-carbon Games.

“We are seeing more and more stadiums designed for longevity – and this is a big focus of ours. For example, our founder Philip Cox designed Sydney Football Stadium, which opened in 1988. Our practice designed the new Sydney Football Stadium, which replaced it in 2022, and it will have the facilities, flexibility and economic sustainability to live for 50-plus years.

“Key to all sustainability issues with stadiums and arenas is usage. The notion that a stadium is only the home ground for the men’s professional team, for example, does not maximise the use of the asset. Professional female sport should change this outlook, but with this there are nuances in the way we design our venues to have a greater life. In Australia our major venues are averaging 60-80 event days per year, amongst the highest anywhere in the world.”

Trend 9:
AI is only getting bigger

RC: “AI is one of many tools that we already use. AI is able to churn through a lot of data and improve efficiency and better outcomes in stadium design. But great venues still need intuition and experience to ensure they reflect the city, the climate and the community they will belong to.”

AR: “AI is great at generating ideas, but it can’t create the essence of what creates a great fan experience in a stadium. Can AI recreate the unique atmosphere of the Anfield Kop, for example?

“Where AI has value is in its ability to harvest, collate and synthesise data led design, improving outcomes for the design from the outset. What it struggles with is an understanding of the interaction between all our senses and how these interact to create a unique venue, atmosphere and experience. These attributes are a innately human experience.”

Trend 10:
The sporting world is getting smaller

AR: “In the stadium space, there has been a commoditisation of design, but we believe strongly that venues should reflect the unique context of the setting, city and community. You look at redevelopments like FC Barcelona’s Camp Nou, which is retaining a strong connection to the city, rather than being a generic venue that could be situated anywhere. Stadiums should be part of the city and directly engage for 365 days a year. For that reason, I think we will shift towards venues having longer lifespans.

“In terms of the sporting world getting smaller, we are fortunate. We are expanding our outlook across Oceania and into Europe and North America, but being based in Australia allows us to observe rather than be immersed in all of these markets. That enables us to fuse the best elements of the various different stadium cultures worldwide to create truly unique venues.”

Top Trends in Sports Architecture: Stadiums and Venues of the Future

Sports architecture has a rich history dating back to ancient civilizations, where stadiums have always been more than just structures—they've served as symbols of community, competition, and spectacle. From the Roman Colosseum to local sports venues today, these architectural marvels reflect society's technological advancements

and cultural priorities.

The term ***stadium*** originates from the Greek word ***stadion***, a unit of measurement. Some of the earliest examples of sports stadiums, like the ancient Olympia Stadium in Greece built in the 8th century BC, were designed to host the ancient Olympic Games. These stadiums often took advantage of natural terrain, using hillsides to create seating for spectators, a rudimentary form of **stadium architecture** that would influence designs for centuries to come.

With the rise of the Roman Empire, sports architecture experienced a significant transformation. The Romans were known for their grand engineering projects, and the Colosseum, constructed in the 1st century AD, remains a pinnacle of architectural and engineering prowess. Its elliptical design, advanced network of vaulted passageways, and capacity to accommodate tens of thousands of spectators set the stage for future innovations in stadium architecture. Roman stadiums, like the Colosseum, served not only as venues for sporting events but also for cultural spectacles, gladiator contests, and other public entertainments, underlining their role as multifunctional community spaces.

The Industrial Revolution and the Rise of Modern Stadiums

In the 19th century, the Industrial Revolution marked a turning point in the evolution of sports architecture. The availability of new construction materials like steel and reinforced concrete, combined with innovations in engineering, allowed architects to build more massive, complex, and functional sports venues. As organized sports became more popular, particularly football (soccer) in Europe, there was an increasing demand for purpose-built stadiums.

During this period, stadiums such as Anfield in Liverpool, England, built in 1884, and Stamford Bridge in London, constructed in 1899, were among the first modern architecture stadiums. These new designs featured designated stands for spectators, alongside other basic amenities such as restrooms and concession areas, reflecting the growing commercial aspect of sports. These stadiums were relatively simple in comparison to the monumental structures we see today, but they laid the groundwork for the future development of sports architecture.

As sports gained international popularity in the 20th century, stadiums became an essential part of cities' infrastructure. Major international events like the Olympic Games and the FIFA World Cup further spurred the need for large, state-of-the-art sports venues. Architects began experimenting with materials and forms to push the boundaries of design. The development of reinforced concrete and structural steel made it possible for architects to create cantilevered stands that provided

unobstructed views, improving the overall fan experience. These innovations represented a shift in focus from simply housing as many spectators as possible to enhancing the comfort and experience of those attending the events.

Architectural Innovation in the 20th Century

By the mid-20th century, sports architecture had evolved beyond its functional origins into a platform for architectural expression and experimentation. The Munich Olympic Stadium, built for the 1972 Summer Olympics, is a key example of how sports and architecture converged in exciting and innovative ways. Its tent-like roof, made of lightweight acrylic glass suspended from cables, was an architectural marvel, capturing the spirit of technological innovation and becoming a symbol of Germany's post-war resurgence.

This period saw sports venue architects using stadiums as canvases to express both cultural identity and technological progress. Host cities and nations began using the design of their sports venues to showcase their ambitions and capabilities on the world stage. For example, the Beijing National Stadium (also known as the Bird's Nest) for the 2008 Olympics symbolized China's rapid modernization and emergence as a global power. This fusion of architecture and national identity turned stadiums into much more than sports venues; they became cultural landmarks that embodied the aspirations of entire nations.

Sustainability and Technology in Modern Sports Architecture

Today, sustainability and technology are at the forefront of sports architecture. Modern stadiums are designed not only to enhance the fan experience but also to be environmentally responsible. Stadium architecture now emphasizes the use of eco-friendly materials, energy-efficient technologies, and design strategies that minimize the environmental impact of these massive structures.

One of the most prominent examples of sustainable sports architecture is Lusail Stadium in Qatar, designed by Foster + Partners for the 2022 FIFA World Cup. Lusail's gleaming golden facade was inspired by the traditional bowls and vessels of the Middle East, but its real innovation lies in its green design. The stadium utilizes advanced cooling systems to maintain comfortable temperatures for players and fans, while also employing water-saving technologies that reduce overall consumption. These efforts are part of a broader trend toward creating architecture stadiums that align with global sustainability goals.

In addition to sustainability, technology plays a pivotal role in shaping the modern fan experience. State-of-the-art sports venues are equipped with high-definition video displays, interactive digital platforms, and even virtual reality elements to engage fans in new and exciting ways. High-speed Wi-Fi, mobile apps for ordering concessions, and integrated multimedia systems have transformed how fans interact with sports architecture. Stadiums today are designed to cater not only to the in-person audience but also to remote viewers, making technology an essential element in modern sports architecture.

The “Third Place” Concept in Stadium Design

Beyond the realm of sustainability and technology, modern sports venue architects are increasingly embracing the “Third Place” concept, a sociological theory introduced by Ray Oldenburg. This concept refers to spaces that serve as community hubs beyond the

home (first place) and the workplace (second place). In sports and architecture, this idea has become especially relevant as stadiums are now seen as year-round destinations for entertainment, leisure, and social interaction, rather than being solely reserved for game days.

Architects are designing sports venues that function as vibrant centers for communities, integrating public parks, retail areas, and entertainment zones into the stadium infrastructure. Tottenham Hotspur Stadium in London is a prime example of this approach. Beyond its use for football matches, the stadium includes restaurants, bars, and event spaces that ensure it remains a lively destination even when no sporting events are taking place. Similarly, Optus Stadium in Perth, Australia, incorporates broad public spaces and breathtaking views of the city skyline, making it a popular community gathering spot.

By integrating the “Third Place” concept into sports architecture, these stadiums foster a sense of community engagement, economic development, and cultural exchange. As a result, modern sports venues are not just places for spectators to watch their favorite teams—they are dynamic environments that serve a variety of social and economic functions, enhancing the overall value of the stadium for the city and its residents.

Conclusion: Partnering with WorldTeams for Sports Architecture Solutions

The ongoing evolution of sports architecture highlights the increasing complexity and importance of stadiums as multifunctional spaces that integrate design, technology, sustainability, and community engagement. As sports venue architects and developers

continue to innovate, there is a growing need for specialized expertise in creating state-of-the-art architecture stadiums.

WorldTeams offers expert outsourcing services in sports and architecture, providing customized solutions for every stage of your stadium project. Whether you're looking to build a cutting-edge, eco-friendly sports venue or need specialists to enhance existing sports venues, our team of highly skilled professionals can help. We understand the unique demands of designing stadiums that balance functionality, aesthetics, and sustainability, and we're here to deliver world-class architectural services tailored to your needs. Partner with WorldTeams to bring your vision of the next great sports venue to life.

Sports facility design is undergoing a significant transformation this year. Gone are the days when the construction of massive sports complexes was the norm. In recent years, and especially looking ahead to 2024, there's been a noticeable shift toward developing smaller, more specialized venues. This evolution is in part caused by the increasing number of massive facilities and the high costs of sports facility construction and operation. For this blog post, I sat down with The Sports Facilities Companies' National Director of Business Development, Jim Arnold. We discussed the trends that he has noticed in the industry along with some of his hopes for where the industry is going. The biggest trend, ironically, is the move away from massive facilities in favor of smaller, experience-driven venues.

Download

The Rise of Next-Generation Mixed-Use Developments

Download

Shifting Priorities in Sports Facilities

The era of constructing colossal sports complexes is gradually giving way to a more strategic approach with smaller, highly specialized venues. This shift is driven by the escalating costs of construction and a crowded market where large facilities are no longer special and won't help a facility stand out in the crowd. Teams and tournament owners now have a much larger number of options when selecting venues, prompting a move towards creating venues that provide memorable experiences for the players, fans, and the community.

Positive Impacts of Smaller Sports Facilities

Smaller sports facilities offer a myriad of benefits, both economically and socially. They can integrate seamlessly into urban settings, foster community engagement, and make sports more accessible for the surrounding community. The smaller venues also demand lower upfront investments and operational costs, enhancing their economic viability. Most importantly, they provide a closer, more personal atmosphere that can significantly enhance fan engagement and enjoyment for both locals and visitors.

Creating Unique Sports Facility Experiences

Technological Integration and Immersive Fan Experiences

Today's sports venues are becoming smart stadiums, equipped with the latest technology to elevate the fan experience. Augmented reality, mobile app integrations, and high-speed internet connectivity are transforming how spectators engage with the sport. These technological advancements not only enhance the viewing experience but also streamline access to amenities, setting new standards in fan engagement.

Multipurpose Spaces and Community Engagement

Similar to the tiny-home movement that has grown in popularity in recent years, new sports facilities need to be designed with versatile spaces that can be used for several different purposes. The trend toward multipurpose spaces reflects a growing recognition of sports facilities as vital community assets for local government meetings, conferences, birthday parties, dinners, graduations, and much more. Designing venues to host a variety of events strengthens the bond between the facility and the local community, maximizing space utility and ensuring year-round engagement.

Luxury and VIP Amenities

An emerging trend in sports facility design is the incorporation of luxury and VIP amenities. Features such as valet parking, team suites, luxury boxes, outdoor "Party

Shacks" with air conditioning, and catering services are becoming increasingly popular. These amenities offer an enhanced, premium experience for fans seeking comfort and exclusivity, further diversifying the appeal of modern sports venues.

Looking Ahead: 2024 and Beyond

As we look towards the future, it's clear that the trend towards smaller, more specialized sports facilities will continue to gain momentum. These venues will prioritize technological integration, community engagement, and luxury or VIP amenities, setting a new benchmark for the design and operation of sports facilities. The focus will increasingly be on creating unique, memorable experiences for guests, ensuring that kids and their families experience much more than just a great sports venue.

I support Option 1 because it just makes more sense long-term — it gives us a modern stadium, community sports access, and concert capability, all without loading ratepayers with the full cost. I like that the land stays publicly owned and the private sector picks up the ongoing maintenance, which feels like a fair deal.

I think the Speedway is an unique facility & gives a lot of pleasure to many people in the Auckland community. If it is kept as a speedway then concerts are still able to be held there & the Ponsonby Rugby Club will still have a home. Once a venue like this goes into private hands, Auckland will loose control of it & any money made goes either off-shore or into private hands

We all ready have under utilised stadiums in Auckland. Adding another is an un necessary cost. As a rate payer it's great to see Mount Smart stands full with both the Warriors and Auckland FC. Sometimes these are back to back. By potentially removing Auckland FC to a new stadium this will increase cost and impact revenue at Mount Smart.

Western springs is a terrible location to get in and out of after a large event. Their is insufficient transport options and can often take several hours to get back. This is not an enjoyable experience.

Western springs losing the speedway will be a huge loss. I think the speedway should stay and other revenue options explored by the owners. The area fits smaller boutique events not l large festivals. We have Eden park and Mount Smart for those.

I strongly object to options one and two. Auckland does not need another stadium!

Absolutely leave Western Springs as the home of speedway and Ponsonby Rugby. Why? Speedway in Auckland for over 90 years, offering a thrilling and family-friendly summer tradition that spans generations. It is more than just a venue — it’s a legacy, woven into the fabric of our city's sporting and cultural identity. Each summer, thousands of families gather under the lights to experience the roar of engines, the excitement of competition, and the vibrant community atmosphere that only Western Springs can provide. Its central location, natural amphitheatre, and long-standing infrastructure make it uniquely suited to host this iconic sport. Relocating speedway would not only dismantle a beloved Auckland tradition, but also erase an irreplaceable chapter of our city's

heritage. Western Springs is speedway — and it must remain its rightful home. My family have been attending Western Springs speedway for over 25 years. In fact, my father's brother in law, raced on the very first Boxing Day raced there, many years ago. Spend the money on Eden Park and Albany Stadium.

Tell us why you made your choice.

Please help us by explaining why you chose the option you did.

If you want other ideas to be explored, let us know if you have any suggestions for the future use of Western Springs Stadium and the outer fields.

Must save Western Springs Speedway, firstly as a speedway venue, as it has been enjoyed by many generations of families, and continues to be,, I've been going for 50 years, my Dad took me every Saturday night, and I took my kids, and now, they now go as adult's, abd are watching their mates race, and I'm sure they'll take their kids.

It's an awesome concert venue too.

AFC can use North Harbour Stadium that is sitting there barely used, and is right by a major a d great transport hub, being the Northern gateway.

AFC say they want Western Springs because it by Zoo and MOTAT, as if families will go to both, no they won't be going to both at same time, AFC does not need to be by a Zoo or Museum, what a load of croc.

Waikaraka is run down and useless for fitting big crowds in, and the pit area is small, no parking for all the big rigs the Western Springs racing teams have etc, at Waikaraka the temporary seats are extremely uncomfortable, and the toilet facilities are **********, one time I went there, and used the toilet block on the far side in the old block building, and the entire floor was covered in an inch of water (or whatever it was)

The Council has run down Waikaraka and spent money on Western Springs, (rightly so) on new entry gates and toilets, yet want to close speedway?? what a waste of money.

Wondeeful venue foe concerts and festivals. Great to get to on public transport. Great sound. Being used in season for rugby would mean year round use. Good for local community and test matches . Locals cane still use as open space when no evens or sport

I believe Western Springs arrangement should stay as it is do Speedway can remain there- it's true and historical home , with an international reputation. Relocating Speedway to an alternative and unsuitable venue, is tantamount to moving Auckland Rugby from Eden Park.
