HIBISCUS AND BAYS LOCAL BOARD			
3	I support the proposed change		The birds need protection
29	I do not support the proposed change	No change to current Policy (dog access) rules	as always you will have the non Compliant people ruining it for all of us who value the ability to control and respect the environment. Stop wasting our rates on the unnecessary changes.
89	I do not support the proposed change	Other (please explain below)	I think the 'summer' rules should be followed year-round on the beach, allowing for a period of time when people can use the beach confidently, knowing dogs will not be present. I think this is particularly important for those with small children.
95	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs off leash and under control should be allowed on these beaches at all times. Dogs on leash should be allowed at all times
319	I support the proposed change		While I am pro dog access, the dotterels are more important. There is excellent beach access for dog walkers at Stanmore Bay, it should also be promoted as a dog access beach to encourage dog walkers to choose that beach instead of Big Manly or Tindalls.
518	I support the proposed change		I support the change to have the dogs leashed but not banned
528	I don't know		I am interested in Orewa Beach, it is a frightening place to go for a walk, dozens of dogs running all over the beach in the morning and evening, people not picking up their poo. It is chaos and extends to many people leaving their dog off lead when and where they shouldn't. Orewa Beach is really a dog beach not a people's beach. I live nearby but have had so many bad experiences I no longer walk near the beach despite walking every day. You are going to get someone hurt.
559	I support the proposed change		Dogs should be on a leash at all times. Also on Orewa and Red Beach. Too many children can not go to the beaches as they are terrified of dogs off leashes.
566	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	Manly is a small beach so when allowed access Dogs should be on leash at all times to preserve the environment. They could be allowed off leash at the grassed area behind the beach
573	I support the proposed change		To protect birds and dogs that need controlling
579	I do not support the proposed change	Other (please explain below)	Dogs off lease are not guaranteed to be under control. Should be on lead in evenings throughout summer

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
607	I support the proposed change		I support on leash as a way to minimise impact on wildlife. I do not support denying dog access to beaches because of dotterals, but providing total access for dogs as long as they are on leash is a good solution.
686	I do not support the proposed change	Other (please explain below)	The proposed change should include the full length of Big Manly beach and apply all year round. The present bylaw does not work for other beach users (including birdlife)as most dogs 'off-leash ' ARE NOT UNDER CONTROL. Dogs 'off-leash' are the source of the 'dogs on the beach' problem. Why not just one simple by-law - DOGS ON THE BEACH MUST BE ON A LEASH AT ALL TIMES. This would also eliminate the problems caused by the dangerous practice of 'OUT OF CONTROL' dogs wildly chasing balls thrown by 'catapult throwing sticks'. It would largely also eliminate the problems of dog 'poo' not being picked up and dogs wandering onto private property etc. to 'relieve' themselves. A by-law of DOGS ON A LEASH AT ALL TIMES" would greatly simplify policing of the by-law. dogs under control on lease at all times. reason - very few dogs are under control off leash on leash would minimize dog poo not picked up Also would restrict annoyance to other beach users and the use of the dangerous ball throwing catapults
732	I support the proposed change		People currently do not control their dogs from racing up to young children, people accessing the beach and other dogs (who maybe on a leash) Owners in this area seem to think just because they have a small dog the rules don't apply. All dogs should be on a leash at all times in public. I am a dog owner and I sick and tired of dogs running up to my dog who is on a leash at all times
745	I support the proposed change		We avoid our local beach because there are so many out of control off leash dogs and owners not paying attention having a leisurely walk up and down the beach gas bagging. They have no idea if their dog is being aggressive towards another dog or running through a dotteral nesting site.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
814	I do not support the proposed change	No change to current Policy (dog access) rules	It is getting more and more restrictive to walk dogs. Dogs that are not walked become a social problem for everyone, not just dog owners. For Hibiscus & Bays Local Board - Big Manly & Tindalls Beach I OPPOSE the proposed Dog access rule change on BIG MANLY BEACH to restrict dogs to being UNDER CONTROL ON A LEASH AT ALL TIMES from Cross Street, Big Manly Beach to Hardley Avenue, Tindalls Beach (Schedule 1(4)(a)). I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on BIG MANLY BEACH & TINDALLS BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season. (as agreed with Hibiscus Coast Forest & Bird). Reason: There are currently only 2 nesting pairs of dotterels on these beaches and based on past behaviours of these birds there is no guarantee they will nest in the zone that Council are proposing for restrictions. It could end up where the dotterels nest outside of the restriction area and have no protection and that dogs are restricted for no reason. Dog Friends and HBC Forest and Bird's proposal should give the birds the protection they need when they are nesting.
826	I do not support the proposed change	Other (please explain below)	They don't breed past Beach Road, you only need to apply it from Beach Road to Tindalls. So remain the same up to Beach Road, and then on a leash past Beach Road to Tindalls.
860	I support the proposed change		This sounds like a place for dogs in our community. Dogs are valued by their families and are their needs should be considered. Beaches are not just for people. Dogs probably use the beach more than any other users. They go there every day for play and exercise and to socialize. Happy dogs= happy communities.
915	I support the proposed change		We need to protect the endangered Dotterells
1008	I support the proposed change		On-leash dog walking should be encouraged as it protects everyone and their dogs
1009	I support the proposed change		Completely agree there is a need to protect the dotterels that nest in the area. This also means allows people to enjoy family time without worrying about dogs roaming around. I might sound repetitive, and I love dogs (dog owner myself) but there are far too many posts on the Gulf Harbour Facebook page about dogs that are not under control, approaching and attacking other dogs, and even children. Unfortunately, some dog owners fail to control their dogs.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
1026	I do not support the proposed change	No change to current Policy (dog access) rules	I recently moved up here from Christchurch which is fairly dog friendly and I'm surprised at the lack of fenced of dog parks with utilities like bins for dog poo and drinking stations. Don't you think creating spaces for dogs and owners is a positive thing for communities? I live in gulf Harbour and we have no where to take them up here other than parks and beaches. Do you expect them to live in a backyard their whole life? If dogs are a problem on beaches create a fenced off dog park as an alternative.
1034	I do not support the proposed change	No change to current Policy (dog access) rules	Limiting green spaces available for dog walking
1059	I do not support the proposed change	No change to current Policy (dog access) rules	The Dotterells do not only nest in this area. They are sometimes at the other end of Manly Beach and I heard they were up at the Fire Station last year. Most dogs are well-behaved on Manly Beach, and not many walk further than Beach Road as that is where their owners park. This is a beneficial place to park as there are no Pohutakawa roots like by Cross Road. If there is to be a cut off it should be Beach Road as the Dotterells have never nested between Beach and Cross Roads. Also what about the cats and the rats and the people? The area where the Dotterells nest in Manly is right by the toilets and picnic area. Are you going to stop all people from going there? I do not know about Tindalls. I have never seen any sign of Dotterells there and the headland gets swamped at high tide so it is unlikely they are there. It is sad if the Dotterells cannot nest, but from what I have heard their nests are more often disturbed by High Tides and storms. Are you prepared to build a sea wall?
1108	I support the proposed change		This will help protect the Dotterels
1109	I do not support the proposed change	No change to current Policy (dog access) rules	This is ridiculous! You are proposing to close down most of Big Manly Beach to protect a few birds. This is a massively important exercise area for hundreds of dogs. Why would you prioritise a few birds over hundreds of dogs that use this beach as an off-leash exercise area. If a dog is unable to run and use excess energy, wouldn't this create a community filled with more problematic dogs? We pay dog registration fees to maintain areas like this for our dogs and every year, there is less and less available. If the dotterels are that important and require protection they shouldn't be at a public beach, they should be moved to a secluded breeding area such as Shakespeare Park.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
1138	I do not support the proposed change	No change to current Policy (dog access) rules	We have a well behaved dog and should not have to have her on the lead because of the birds.
1154	I do not support the proposed change	No change to current Policy (dog access) rules	I object to your proposed changes. Dogs need to run and smell and swim. They cannot do that on a leash. I rely on the few precious months we have where it is still warm and sunny after 6pm for both myself and my dogs to sun, swim and play. Manly is my local and has been for 44 years. I understand that some people don't like dogs but that is tough. As long as a dog is not dangerous and owners pick up after them then, we should not be ruled by someone else's fear! Walking off lead before 10am only works on a weekend if one is trying to enjoy a safe time in the sun while walking our dogs.
1217	I do not support the proposed change	No change to current Policy (dog access) rules	It's up to the owner to be responsible
1229	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m
1231	I support the proposed change		Good to have a beach in Whangaparaoa that isn't time restricted for dogs.
1242	I do not support the proposed change	No change to current Policy (dog access) rules	I do not support this change because it unnecessarily restricts the rights of dogs and their owners to enjoy Big Manly Beach. Dogs, as part of our community, deserve spaces where they can exercise, socialise, and experience freedom in a safe and controlled manner. The current policy strikes a fair balance by allowing dogs to be off-leash during non-peak times, ensuring that their needs are met while respecting other beach users. The proposed amendment imposes stricter leash requirements in the eastern section of the beach, reducing opportunities for dogs to roam freely without any clear justification. This overregulation diminishes the shared enjoyment of public spaces and unfairly limits the rights of responsible dog owners and their pets.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
1272	I support the proposed change		Protect the dotterels
1333	I do not support the proposed change	No change to current Policy (dog access) rules	We recently moved to the Manly area, with the main attraction of being able to walk our dog off leash at the beach. Hundreds of residents across Manly and the wider community use this beach to exercise their dogs daily and it seems very unreasonable to restrict access to the beach and punish all the dogs owners due to a few possible neglectful dog owners. If the Dotterels are seemingly high risk and need to be protected, then this shouldn't be at a public beach that also hosts many activities such as sailing racing etc each year. They should be moved to a more secluded and protected area away from any public if they are at significant risk. The bird breeding season runs also across the entire of summer which is also the busiest time people are taking their dogs to the beach for walks and swims.
1348	I do not support the proposed change	No change to current Policy (dog access) rules	I am one of MANY local dog owners that walk Big Manly and we are actually well aware of the bird breeding areas and happy to police each other and/or anybody else we feel the need to reprimand. We are a responsible community, do not treat us like children or idiots, it will become a minefield of confrontation.
1356	I do not support the proposed change	No change to current Policy (dog access) rules	There are no suitable dog parks within walking distance and having a large dog we often walk along the water line. the majority of the year there is almost no one on the beach and dogs are under control
1358	I do not support the proposed change	Other (please explain below)	Dogs should be allowed on leash in all park areas. Provision for off leash play should be made in all parks.
1360	I do not support the proposed change		As dotterels do not always nest in the same part of the
1405	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. - During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
1428	I do not support the proposed change	Other (please explain below)	I am a local resident at Big Manly Beach and myself or my wife are present on the beach most days, we have a small dog ourselves. I also have 2 young children who frequent the beach. Over the past couple of years, the behaviour and control of off leash dogs has deteriorated on the beach, as has compliance with existing rules. As per normal, the rule breakers often have the largest and most intimidating dogs and little regard for the rules. I myself have had a dog rush me and lunge at my face on the beach, only for the owner to yell "watch out" instead of any actual re-call over the dog. My dog itself has been attacked by an off leash dog on once occasion. My primary concern is the number of dogs walked off leash at any time of year, often 50+ metres away from their owners, annoying other on leash dogs and individuals enjoying the beach. It's become clear that it is no longer a small minority of dog owners who flaunt the rules and/or walk uncontrolled dogs off leash, this is a daily occurrence now. We cannot and should not put the needs of dogs ahead of people and children utilizing the beach. Big Manly Beach (and other populated beaches for that matter), ~~shouldn't have the current rules but if it does~~
1438	I support the proposed change		I believe that dog owners should have more freedom to walk their dogs at any time, especially allowing for them to be on a leash instead of not at all
1492	I do not support the proposed change	No change to current Policy (dog access) rules	Hundreds of dogs are happily walked off leash throughout the year, following the current rules. There is no need for a change.
1498	I support the proposed change		This is not worded clearly. I initially thought dogs were no longer to be off lead on Big Manly beach at all. I'm fine with the Tindalls end of the beach being on lead only.
1532	I support the proposed change		This will help birds thrive

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
1581	I do not support the proposed change		As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m Sent from my Galaxy
1621	I do not support the proposed change	No change to current Policy (dog access) rules	Over the years I've seen the birds nest all over the beach and grassy area. Trying to control one area could open a can of worms. Most people use common sense and change is not necessary
1634	I support the proposed change		It is vital to protect the dotterels from dogs
1682	I support the proposed change		To protect the dotterells. There are often dogs running off leash among the nests
1690	I do not support the proposed change	Other (please explain below)	s dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
1698	I support the proposed change		Presence of dotterels and nests that need protection from dogs

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
1714	I do not support the proposed change	Other (please explain below)	Way too many uncontrolled dogs off lead, have witnessed several dog altercations, matter of time before a child or adult is bitten. Too many bad dog owners. Too hard to police part of the beach as proposed, should be dogs on lead year round. This will stop any confusion and be safer for everyone, dotterils included.
1783	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
1819	I do not support the proposed change	No change to current Policy (dog access) rules	As a dog owner in this area I think the existing rules work fine . Leave all the beach for other users to enjoy on summer until 5pm. The beach is very busy in summer. At high tide there is not much room on the beach and even dogs on leash could create issues
1823	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
1827	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is:--The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
1890	I support the proposed change		When it's not busy it's nice to take dogs by the water
1893	I support the proposed change		Dotterils need their slave but dogs should be prohibited from this area. People do not give the birds slave and will not put their dogs in leash as nobody is ever around to enforce it so people do what they like knowing there are zero consequences
1894	I do not support the proposed change	No change to current Policy (dog access) rules	Big Manly Beach is my local, it is known fir being a community minded beach where hundreds of locals meet up to walk thier dogs and chat. These new laws will change the community.
1974	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
2007	I do not support the proposed change	No change to current Policy (dog access) rules	Unfair to existing dog owners who have their dogs under control. Spend rates money on policing the issue that a few irresponsible people create, rather than penalizing all.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2050	I do not support the proposed change	No change to current Policy (dog access) rules	Dear Sirs, Whilst I am sympathetic to the plight of the Manly dotterels and the efforts being made by The Big Manly and Tindalls Dotterel Group Volunteers, it seems unreasonable to impose a far reaching condition on a public access area. I make this statement based on the following points - 1. The majority of local dog owners in the Manly and Tindalls area are respectful and careful owners, maintaining good levels of registration (paid to Auckland Council) and high levels of vaccination (check with local vets), whilst abiding by the current seasonal dog beach policy. (It would be interesting to compare the number of dog incidents reported in this area with other areas of Auckland.) I would also add that it is this same group of local dog owners who put a considerable amount of effort into the general upkeep of the beach. Often clearing debris and litter from the beach, dunes and grass areas throughout the year, as well notifying authorities of unacceptable behavior on our beaches, overflowing bins etc. Furthermore, this group is active throughout the year, even in the darkest and coldest months. 2. Threats - I would refer you to the document - THREATENED SPECIES RECOVERY PLAN SERIES NO.10, section 4.6 Known and
2084	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	Because we need to protect the birdlife too

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2144	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is:-- The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. Dogs are prohibited from entering the 50m cordoned off zone around the nest itself
2162	I do not support the proposed change	Other (please explain below)	The current time and season rule (a total ban of dogs on the beaches between 10 am and 5 pm from 1 December to 1 March) should remain. During bird nesting season (1 September to 31 March): - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
2175	I support the proposed change		to protect the birds but still allow dog access
2270	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2274	I support the proposed change		It is a change to protect an protected species. However grave concern exists over the concept that if you give an inch they'll take a mile. We most certainly would not support the extension of this bylaw zone in the future which would lead to a significant reduction in the way we utilize the community asset which is the beach. How does this impact home owners who may have dogs in this area? I am aware a family member in a beachfront property had a dotterals nest on thier land last year, how would this bylaw effect private land.
2318	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	I think dogs should be on leads on this beach Will the registration stop if you stop more access for dogs and responsible dog owners? Will you replace bins that have been taken away from areas ???
2523	I support the proposed change		We support protecting the local birds. We do this anyway at the moment to stop our dog going into the dunes.
2598	I do not support the proposed change	No change to current Policy (dog access) rules	The current rules are adequate when properly enforced. They ensure that dog walkers—professional or otherwise—are responsible for keeping dogs under control, without imposing arbitrary and restrictive limits. Professional dog walkers already operate within these rules, providing essential services such as exercise, socialization, and training for dogs, which benefit the wider community. Adding further restrictions will do little to address the main problems in the dog community, such as roaming dogs and owners/walkers with no control over their dogs. Instead, resources should focus on enforcing existing bylaws and addressing these larger concerns. The current system works when applied effectively, and no changes are needed.
2648	I support the proposed change		so as to protect wild life etc..

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2669	I do not support the proposed change	Other (please explain below)	As Dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the Dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and Leaving eggs vulnerable to predation and the elements also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain During bird nesting season 1st September- 31st March: Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
2679	I support the proposed change		I have seen too many large dogs off leash running too far ahead of their owners not in control so I think it's a good idea
2759	I do not support the proposed change	No change to current Policy (dog access) rules	Massive beach which the main one which people walk their dogs on daily. Off leash allow for more exercise in a safe environment and for dogs to swim.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2798	I do not support the proposed change	No change to current Policy (dog access) rules	I support dogs on leash for the headlands section itself, but not the requirement for on leash for the beach itself (I do support the current season rules though). This proposal will limit the amount of beach exercise area for my dog, and other dogs of responsible owners. The problem is lack of enforcement and clarity for the current rules. Making a line in the sand (as it were) makes for a grey area, and the rules unclear. It makes things harder for the responsible owners to follow. You will get a lot of "oh ha ha I didn't realize" and people taking the mickey and not actually protecting the wildlife. Because the current rules are not enforced by the council, its left up to us, the responsible owners, to say something, which is often met with aggression from the idiot owners. I find the rope barriers on the dunes very useful for training. As a dog owner, I've been able to use these to train my dog that he is not allowed past the rope on the dunes. Even when playing with other dogs, he does not cross the rope because he has been trained not to. We also do training to not chase birds at all times. I believe the following would work better to protect wildlife, be clear and enforceable: 1. Build rope barriers along the dunes for the whole beach (both beaches). 2. Clear signage no dogs allowed on dunes past the ropes. 3. The rope barriers will limit the number of access points onto the beach. Plus, if the responsible owners made themselves
2801	I support the proposed change		Currently dotterels and their nests are under danger of attack or intrusion by dogs. Many people allow their dogs off leash in these areas despite signs and obvious nesting areas
2816	I support the proposed change		Lots of out of control dogs on the beach, dog poo not being picked up.
2820	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	Yes I support bird life and think this is a reasonable compromise. Just need clear signage.
2824	I support the proposed change		The proposed change leaves plenty of room on Big Manly beach for off-leash exercise whilst still protecting the dotterals and other birds. I am a dog owner and I think this proposal strikes a good balance.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2832	I do not support the proposed change	No change to current Policy (dog access) rules	The only reason we live in Manly is to be able to walk our small dogs (off leash) on Big Manly Beach. This proposed change would be devastating.
2841	I do not support the proposed change	No change to current Policy (dog access) rules	The current law works well
2846	I do not support the proposed change	No change to current Policy (dog access) rules	I feel there needs to be better signage with regards to the birds, barricade that area if need be, it's not just dogs that hurt them. I walk Big Manly every night and couldn't tell you where the birds are. One little sign (where I enter beach) giving info. Please don't punish the dogs,
2847	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	as these beaches are not policed they need to be., i believe that no dogs on manly east or tindalls during dotteral season and people season, ive sat on Tindalls bay several times and there are loose dogs coming from manly to Tindalls nearly every day during the 10 am to 5 pm times, Some are dog walkers and general public, they dont pick up after their dogs either, time things changed, they say cats are roaming the beaches maybe its time also ,like australia, thats catarariams are also put in place so cats can not harm the dotterals.Things need to change , to many dogs roaming now and entitled humans.....
2848	I don't know		I would prefer a rule that allows off leash over winter but I support the idea of keeping dogs on leash near dotterels during their breeding season.
2852	I do not support the proposed change	No change to current Policy (dog access) rules	Most dogs have no interest in the birdlife at anytime of the year and are more interested in playing in the water or the waters edge. Limiting the majority of law abiding dog owners and the majority of well trained and behaved dogs is typical of a bleeding heart approach to often seen by councillors who have a personal axe to grind. Maybe enforcing the no camping rules directly around the birdlife would be a better use of the councils time .please no change to the current rules
2862	I do not support the proposed change	No change to current Policy (dog access) rules	Most birds are killed by cats so this policy will not do anything to help the birds only allows more cats to attack them as there will be no dogs to go after the cats
2865	I do not support the proposed change	No change to current Policy (dog access) rules	The birds might be there for a limited time. This is not sure. It is not dogs that cause troubles. It is also the tide and heavy rain. The good dog owners will suffer due to 1 bad dog owner.
2869	I support the proposed change		The amount of people that don't control their dogs on the beach is huge, the current hours don't work and there is always dogs loose outside the hours. Animals and young children in fact any human should be protected from dogs off leads and currently they are not protected.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2887	I do not support the proposed change	No change to current Policy (dog access) rules	It seems incredibly unjust to put such drastic restrictions in place for all dogs at Big Manly Beach. These restrictions will devalue the community and area. Big Manly Beach is an incredibly popular spot for people to gather and provide their furry friends with some much needed off leash exercise. Shakespeare Regional Park is already a bird sanctuary, it seems more reasonable to move the dotterels there, than to put in place such harsh restrictions on Big Manly Beach that affect so many people and dogs.
2931	I support the proposed change		I support this as we need to protect current wildlife. My other concern is that we are starting to lose areas where we can walk our dogs off leash. Why do we not have one dog park (fenced) area where dogs can be off leash?
3011	I support the proposed change		I think dogs should be on a leash at all times and anywhere apart from their own property full stop. Dogs may seem to be under control, but it only takes a second for it to run off chase a cat or birds and the owner can't stop it in time. I don't like walking anywhere anymore incase dogs are about.
3162	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	strongly against the proposed rule change but open to a seasonal leash rule that covers the (smaller) areas in which the dotterels nest in that season.
3170	I support the proposed change		I fully support dogs being on leashes at all times in public spaces for the protection of wildlife and people.
3328	I do not support the proposed change	No change to current Policy (dog access) rules	This beach is a popular dog walking beach to locals. I strongly disagree with the decision to change the laws as it only leaves a tiny portion of the beach available. The birds should be taken away from the beach rather than banning all dogs on the beach.
3332	I support the proposed change		Not everyone can walk there dogs before 10 or after 5 due to working. There should be beaches where people can walk there dogs at tall times

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
3337	I do not support the proposed change	Other (please explain below)	I do not support the current changes as changing access for 2 dotterillls who mother poorly is ridiculous. Taking away the rights of the people who pay their rates and want to enjoy the beach in a civilised way is punitive and reductive. Please stop interfering with the simple enjoyments we have. I have walked this beach for 39 years, most with a dog. The residents who want the rules relaxed around dog walking hours are in the majority. 11 am to 4.30pm is adequate time for dog free hours on the beaches.
3416	I do not support the proposed change	Other (please explain below)	The east end you are proposing be dog friendly is the wrong end. That is where the dotterels breed. I am coming to this beach since I was a baby. Make the west end dog friendly year round and the east end dog free. That is to protect the dotterels. Sometimes you get sandpipers breeding and also oyster catchers, always down the east end dunes. So your idea is good but you chose the wrong end. To summarize: East end no dogs, west end always dogs year round.
3443	I do not support the proposed change	Other (please explain below)	This proposal does not allow people who walk at low tide to access the headland and beaches via the sea side. There are a great deal of people who do this walk every day to extend the walk, especially from Tindals side to Manly. It would be ok to limit the area for walking on lead to 100m either side of a dotterell nest, however creating these prohibiting areas when dotterells are a wild animal that may not even nest in these areas is ridiculous. This would also allow dotterells the space they need when they choose to nest further up the beach which, is not unheard of. Dog walkers will have the respect of rules are not ridiculous. Closing a whole right of way off to them in preference for a bird that may or may not breed will cause bad feeling. Often these birds nest below the high tide line and lose their nest that way too. The most successful action would be to relocate the birds to a sanctuary and above the high tide to give them the best chance.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
3522	I do not support the proposed change	No change to current Policy (dog access) rules	Has a dotterel ever been killed by a dog here? As a long time resident - Not to my knowledge. All the residents love the dotterels. What you are dealing with here is nature. Nature of the tide and the sea and very likely rats and cats about which nothing is being done. The proposed change takes out a huge amount of the beach, it might say "only 300m" but Tindalls beach is only 500 long, so the prohibit dogs from over half the beach when in all likelihood they do not have anything to do with the dotterels. The dog owners of Tindalls beach are a sensible, rule abiding, middle to late age crowd who use the daily walk to Manly as a social and connection opportunity. The walks are a big part of our community. We can all walk there, barely anyone comes by car. Come and observe us. With the proposal, Dotterels eggs will still get washed out to sea, the chicks and birds will still be attacked and killed by rats and cats and we will all be driving our dogs somewhere else, where there is no community, no one knows you. It is vital that dogs are socialised. It is unsocialised dogs that cause problems and which the proposal is suggesting is best. That is incorrect.
3551	I support the proposed change		It gives more options for me walking my dog in summer as I am older person with some difficulties in getting up and ready for walking my boy before 10am
3562	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	A complete ban is the only way to ensure the birds are protected. Dog owners will claim they don't know what 1.3k looks like. It is unlikely to be enforced.
3637	I do not support the proposed change	No change to current Policy (dog access) rules	having dogs prohibited from the beach from 1st September to 31 March is absolutely crazy. all you have to do is correctly fence off the area the dotterels breed in then there won't be any issues or have dogs on leads for that small section of grass the dotterels breed/live we walk our dog along that part of the beach every day for fitness and mental health reasons

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
3658	I do not support the proposed change	No change to current Policy (dog access) rules	This proposal is total nonsense driven by the hysteria of the dotterel group, who have next to no evidence that dogs have harmed the dotterels. This proposal is totally discriminatory towards the residents of this area and I do not believe the Forest and Bird people have provided solid evidence that it is dogs harming the birds, if that is the case why have they put rat traps all along the trees? This proposal will leave us with no where at all to let our dogs off the leash at all, there are many elderly people here who have the right to enjoy freedom of movement with their companions next to them. It is a breach of the Bill of Rights Act. If this goes ahead I will be seeking all evidence under the OIA provided by Forest and Bird that dogs are responsible for damage to dotterels and nests, and not cats, stoats and rats. There are hundreds of people here who have the right to enjoy quiet and responsible freedom of movement with their dogs without this being severely curtailed by a hysterical group of bird lovers who have very limited, if none at all evidence that dogs are responsible.
3817	I do not support the proposed change	Other (please explain below)	The owners are seldom controlling their dogs. Dogs should be on leash at all times on the beach. This will also eliminate some of their effluent being left on the sand for our children to play in. Also they need to be on leash as they rush at people and children. They also urinate on peoples towels and belongings.
3819	I do not support the proposed change	No change to current Policy (dog access) rules	This involves balancing the needs of the birds vs that of locals and their ability to enjoy the beach with their pets. Options are somewhat limited to properly socialise/exercise dogs off-leash especially when combined with the changes to Tindalls. I dont support the alternative option around the breeding season either as half the year is an excessive amount of time as to make little difference between the two options
3820	I support the proposed change		There are too many dogs off leash, it's scary and makes me constantly nervous visiting my local beach! The majority of people DO NOT have their dogs under control off leash. It is only a matter of time before someone or other animals are seriously hurt.
3824	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs are fine on Manly beach within the rules.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
3842	I do not support the proposed change	No change to current Policy (dog access) rules	The council want to take away the few areas where people can walk their dogs. Dog ownership is up 5.4% in the last year, yet the council are taking away spaces where owners can walk. The council say that many of these restrictions are to protect the public. However, I think that dogs that are not allowed suitable socialisation with people and suitable exercise are likely to be more aggressive. This proposal will cause the issues that it is hoping to solve. I might support some of these proposals IF the council actually provided dedicated dog parks. However, they do not. In this area, the council are planning to take away dog right at four beaches without providing any alternatives. To get to a dog beach I will have to drive. Does the council not support environmental reduction of car usage? Until the council provide suitable alternatives close to where I live, I will not support any of these proposals. You must do better for the tens of thousands for dog owners who pay not just their normal rates, but also the dog licence.
3856	I support the proposed change		People who don't abide by this rule (and I know people who won't cos they think they're just frigging birds) should face large automatic fines - similar to those walking a dog in a protected bird sanctuary area like Shakespear Open Sanctuary. \$10K-\$20K. Large seasonal signs should be erected to warn of this and that registered bird watchers can provide proof. Similar to voluntary fisheries officers.
3867	I do not support the proposed change	Other (please explain below)	I OPPOSE the proposed Dog access rule change on BIG MANLY BEACH & TINDALLS BEACH to restrict dogs to being UNDER CONTROL ON A LEASH AT ALL TIMES from Cross Street to Hardley Avenue (including the headland between) (Schedule 1(4)(a)). I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on BIG MANLY BEACH & TINDALLS BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season.
3904	I do not support the proposed change	No change to current Policy (dog access) rules	I am a responsible dog owner and can control my dog. It is visitors with dogs that do not respect the bird life.
3918	I do not support the proposed change	No change to current Policy (dog access) rules	Current rules work well for the majority of users. When well sign posted the majority of owners are respectful of the dotterals and put dogs on a lead. There is no need to change existing rules. I love birds but realise that these birds are a definite minority here and see no reason why existing rules should be changed for a minority of users!

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
3934	I do not support the proposed change	No change to current Policy (dog access) rules	The existing rules work well and are complied with by the vast majority of dog owners. I'd dog access for free running and swimming under the current roles are changed you will adversely affect several hundred families and dogs on both beaches. I believe this heavy handed by law will result in unhappy and unreasonable people taking actions that could harm the existing dotterel operation and have completely the opposite effect that is intended under this proposed change. It is working well now and there is no need to change.
3937	I do not support the proposed change	Other (please explain below)	I LIKE dogs and love to see them down on the beach BUT I would love to see them on a leash at ALL times. Alternatively, instead of Cross Street make it from the Manly Sailing Club to west end that they have to be on a leash. For the birds, the elderly (me) and little children (especilly those that are not used to dogs).
3956	I do not support the proposed change	No change to current Policy (dog access) rules	It currently works well. Dog owners are respectful of dotterels and put dogs on a leash, this rule is too restrictive for the many dogs who use the beach.
4005	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	This is one of the few local beaches that the rare NZ dotterels use and try to nest on. There are alternative beaches for people to use to walk their dogs - the dotterels have no option. I've witnessed dogs off leash not under control chasing these birds plus their owners not caring. having just a small area of the beach with no dogs will not be enough. It seems only legal rules work for dog owners so let's apply them. Give the birds a chance instead of humans and dogs
4023	I do not support the proposed change		I agree with the solution proposed by HBC Forest & Bird and Dog Friends Auckland, dogs on lead within 200 metres of a MARKED dotterel nest during the breeding season. So if there is no nest, then is no need for the restrictions.
4046	I support the proposed change		Much better protection for the birds when the dogs are on leashes.
4054	I do not support the proposed change	No change to current Policy (dog access) rules	Manly is well used by local dog users, predation of dotterel and other sea birds nesting by dogs is unsubstantiated. Stoats, rats, hrdgehogs, blackback gulls all predated sea birds chicks and eggs. Dont penalize your community of dog walkers by limiting access. This group of local community is by far the largest user group averaged across a calender year, many who pay rates and chose to live here as the HBC for the lifestyle, which includes dog access to our beaches.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
4071	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
4107	I do not support the proposed change	Other (please explain below)	I support the proposal put forward by Hibiscus Coast Forest and Bird and Dog Friends Auckland.
4114	I do not support the proposed change	Other (please explain below)	I would support this if it was just during the breeding season.
4121	I do not support the proposed change	No change to current Policy (dog access) rules	Humans and cats are more dangerous to birds than dogs. This limit will not protect the birds from the most dangerous risks. As someone who walks the length of Manly beach 4 days a week throughout the year, the birds are not consistently living on the and appear to more visit.
4165	I support the proposed change		This will assist in the protection of the Dotterels that nest in these areas. However more protection is still required.
4169	I support the proposed change		The proposal is a step in the right direction but needs to be a total ban. Enforcement of the rules needs serious consideration. Currently dog owners know they risk zero chance of being penalised for breaching the rules and many take no notice of them.
4174	I do not support the proposed change	No change to current Policy (dog access) rules	Most people who use this beach with dogs understand about the birds. To change the rules for the very rare owner who may not be aware seems to be overkill. Perhaps clearer signage or other barriers during the relevant season might be more appropriate measures?

4429	I support the proposed change		it seems a fair compromise. the age-old problem though, the responsible owners wouldn't be allowing their dogs around wildlife anyway and would be following current rules. these new rules if put in place need to be enforced, to many owners are so entitled with their dogs and the freedom they allow, 'my dog would never' at least the dotterel have half a chance with a dog on a lead.
4518	I do not support the proposed change	No change to current Policy (dog access) rules	The current dog policy rules do not need amending and in their current state are adhered to by the wider Manly dog community. To my knowledge, there has been no instances to suggest these rules need changing.
4532	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	Easier to monitor

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
4589	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
4613	I support the		Protecting the Dotteral nesting area is a great idea. It is also good
4730	I do not support the proposed change	Other (please explain below)	Put better protections around the birds, get volunteers to assist with the protection and awareness to the dog owners. What is the point of taking a dog to the beach and keeping it on leash. They need to run, play and swim and enjoy. We currently can't take our dogs anywhere without you wanting them on leash and this is unreasonable. If you want a compromise give us a Okoromei 100% all day every day as a designated dog beach and restrict Manly Beach as is. Give us a fenced in dog park or woodland area (maybe take a leaf from Rotorua district). Auckland council and government does not do enough for responsible dog owners in this area. If you want to remove us from the general beach and parks then GIVE US SOMETHING ELSE.
4745	I do not support the proposed change	Other (please explain below)	As dotterils do not always nest in the same part of the beach, this option does not sufficiently reduce the risk to dotterils. It does not prevent people from getting too close to the nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking dogs directly up to the nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest and Birds and Dog friends Auckland is - -The current time and season rule (a total ban of dogs between 10am and 5 pm from 1st December to 1st March) should remain. During bird nesting season 1st September to 31st March - -Dogs must be on a lead at all times within a zone of 200 metres around a marked dotteril nest. -Dogs are prohibited from entering the 50 meter cordoned off zone around the nest itself.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
4780	I support the proposed change		People with dogs don't follow the rules at the moment and dogs are frequently off leash when they are meant to be kept under control.
4795	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	You can't use the beach without dogs coming up to you touching and sniffing you at present. Dog faeces are seen on the beach. One out of control dog could destroy a nesting ground birds nest. I have experience the wrath of dog owners being asked to control a dog on a number of occasions. and seen dog out of control dog. Rules are not always followed now, not all dog owners are responsible.
4809	I do not support the proposed change	Other (please explain below)	This option doesn't sufficiently reduce risk to the dotterels. People can still get too close to nests scaring the birds off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest! The year round option in particular causes conflict with many dog owners. The alternative option I support, is the one agreed to by Hibiscus Coast Forest & Bird and Dog Friends Auckland: The current time and season rule should remain but during bird nesting season 1 September – 31 March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
4835	I do not support the proposed change	No change to current Policy (dog access) rules	I do not support the proposed change requiring dogs to be on-leash at Big Manly Beach, Tindalls Beach, and the headland to protect the dotterels. While I understand the importance of protecting wildlife and supporting conservation efforts, I believe this proposed rule may be too restrictive for responsible dog owners. Many dogs are well-trained and pose little to no risk to wildlife when off-leash, especially if they are kept under control by their owners. It's important to remember that nature is often co-managed by both people and wildlife. If we weren't here to care for and manage our pets, dogs would roam freely in many natural environments. In that case, wildlife like the dotterels could face even more harm, as wild animals wouldn't be able to rely on human intervention or control. Dogs, when properly trained and managed, are an integral part of our environment, and responsible dog ownership plays a role in keeping the balance between human activities and nature.

4868	I don't know		I feel like there is not a big enough problem to incur a change to this current policy. I feel like the restrictions for summer hours are enough. I don't feel that cutting the section for some on leash and some off leash, is going to make any difference to a non-existent issue?
4882	I support the proposed change		Wildlife needs to be protected. Dotterels need protection
4995	I support the proposed change		This rule allows dog owners to still have an off-leash area but also provides more protection to the nesting dotterels
5030	I do not support the proposed change	Other (please explain below)	The limited season being proposed by some of the dog walking groups (and agreed by Forest and Bird etc) makes more sense rather than the blanket ban in the proposal or the six month on above when the breeding season is much shorter than that. For those of us who run reasonable distances (6-10km) with our dogs, the ban will block the coastal running route. There are very few off-lead dog areas so to cut one up into small sections is removing the option to run somewhere. The alternative would be to run around in circles on half of either Manly or Tindalls beaches which is not what runners do. Running with dogs on leads is tricky, awkward and dangerous even on the rocks, so we need to be able to run with our dogs running along side.
5048	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year-round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.

5221	I support the proposed change		It is important to protect the dotterels. Dogs should be on leash at all times. Owners are often not watching their dogs and /or are unable to control off leash dogs.
5288	I support the proposed change		Nobody takes notice of lead requirements anymore
5479	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	People abuse the rules already endangering the birds and making it less safe and pleasant for others
5602	I support the proposed change		I would also like to add, while I support this change, if the reason for this is to protect birdlife, humans can cause just as much disruption to the birds as dogs, so I'd be more supportive of all foot traffic in the area being banned - banning dogs and allowing badly behaved humans to walk through isn't comprehensive protection for the birds
5604	I do not support the proposed change	No change to current Policy (dog access) rules	Not all dogs chase birds or are a problem to the species. I walk my dog off and on leash every day without any engagement with birds. Etc. no need to change the current rules. I have not seen any dogs have an impact on the birds in my time on the beach

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
5707	I do not support the proposed change	No change to current Policy (dog access) rules	I understand the need to protect the birds, but there has to be other ways to do this, than again , removing dog access ! Place protections around the areas, call for volunteers to patrol the area and educate people. Stop attacking our dogs and owners. Deal with the ones who are not responsible! We are surrounded by beaches up here, we have to be able to use them for recreation with our dogs.
5782	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. Dogs are prohibited from entering the 50m cordoned off zone around the nest itself. See attached
5916	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	I don't want dogs on the beach over summer at all but I do realise this might not be practical and does not restrict dog owners from approaching nests outside of the times indicated so I also support the option put forward by Forest and Bird, the Dotterel minders and Dog friends as below. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is:--The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. Dogs are prohibited from entering the 50m cordoned off zone around the nest itself. In my interaction with some dog owners it is only a total dog ban that they will actually listen to, so if we are actually going to protect the dotterels, oyster catchers and other birds, and let people who don't like dogs enjoy the beach over summer then a total ban on certain areas would be great.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
5946	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	Target irresponsible owners when you start focusing on the problem and fixing it from the ground up all this will change for the better. Stop penalising responsible owners!
5962	I do not support the proposed change	Other (please explain below)	No dogs at any time.
6081	I do not support the proposed change	No change to current Policy (dog access) rules	Is there information regarding disruption to bird breeding due to dogs off leash? If so, I would support a bird breeding restriction for dogs.
6210	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	There are far too many dogs on the beach not in control of the owners. Have been around the nesting bird grounds when dogs have run straight through nesting area So many people do not follow no dogs on beach between 10 and 5 between December and end of February. Need dogs rangers for the Hibiscus Coast area. Plus sick of finding dog poo on beach! Most people pick up but some don't
6355	I support the proposed change		Too hard to protect dotterels from dogs unless on the leash as no permanent fences can be put up to protect them and they move around. Have seen the damage on Whangamata beach from dogs that run ahead of owners.
6377	I do not support the proposed change	No change to current Policy (dog access) rules	Current rules are adequate and do not need changing.
6396	I do not support the proposed change	No change to current Policy (dog access) rules	Instead of making these changes please provide signage advising of the dotterells. Are you going to put limitations on small children using the beach as they present equal danger to nesting birds and parents have less control than dog owners
6411	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs to be kept on leash within 200 meters of nesting birds during season

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
6422	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
6485	I do not support the proposed change	Other (please explain below)	I would support either the proposed changes or the proposed bird breeding season rules for this beach from Beach Road eastward, rather than Cross Street. I would also support better roping off and signage for the tūturiwhatu nesting area.
6494	I do not support the proposed change		that cross over from Big Manly to Tindalls is not travelled enough by humans and dogs to warrant this change and once again where is the evidence that dogs create all this destruction our beloved dotterals.
6558	I do not support the proposed change	Other (please explain below)	Dotterels don't always nest in the same part of the Beach therefore this option is insufficient for protecting dotterels and their chicks in the future. This year round proposal is also in conflict with the interest of dog owners and irresponsible of council to propose as a viable option. I support the alternative option proposed by Hibiscus Coast Forest & Bird and Dog Friends Auckland, which includes: - Seasonal restrictions as per current rules, so a total ban of dogs on beaches between 10 am and 5 pm during summer months. - During bird breeding season of 1st September to 31st March, dogs should be on a leash within 200 of a marked dotterel nest. And dogs should be prohibited from entering the cordoned area 50 m around a dotterel nest.
6590	I do not support the proposed change	No change to current Policy (dog access) rules	The dotterills are not ALWAYS. at that end of the beach. Strangely, they move! I have seen them at the other end of Manly Beach. Relocate the birds!!
6600	I do not support the proposed change	Other (please explain below)	Maintain the current set of rules unless there is a nest in which case the under control on-leash can be applied to within 100 m of the nest.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
6616	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	Guess what--people who like dogs also like birds! It is a little disappointing to have restricted access when the dotterals are nesting but we put up with it. In part because at the moment there are OTHER places to go instead. Very worried about not being able to take my dog anywhere for a non-urban walk.
6665	I support the proposed change		Fair to all mainly protect Doterals
6676	I support the proposed change		To protect the dotterels
6752	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year-round option in particular causes conflict with many dog owners. alternative option we support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is:-- The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
6762	I do not support the proposed change	Other (please explain below)	I oppose the proposed Dog access rule change on Big Manly Beach to restrict dogs to being under control on a leash at all times from Cross Street, Big Manly Beach to Hardley Avenue, Tindalls Beach. I strongly request that on BIG MANLY BEACH & TINDALLS BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season. (as I understand has been agreed with Hibiscus Coast Forest & Bird). There are currently only 2 nesting pairs of dotterels on these beaches and based on past behaviours of these birds, there is no guarantee they will nest in the zone that Council are proposing for restrictions. The situation could easily arise where the dotterels nest outside of the restriction area and have no protection and that dogs are restricted for no reason. The Dog Friends and HBC Forest and Bird's proposal should give the dotterals the protection they need when they are nesting.
6797	I do not support the proposed change	Other (please explain below)	As the birds nest in different spots every year, surely it is better to have dogs on a leash up to 200m from nest in nesting season. And have dogs under control at all other spots. I do not support the extended timeframe from beach use.
6867	I do not support the proposed change	Other (please explain below)	Dogs should be ON LEASH on all beaches and public spaces We should be protecting both wildlife and people. To achieve this dogs must be ON LEASH at all times
6971	I do not support the proposed change	Other (please explain below)	I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on BIG MANLY BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season. (as agreed with Hibiscus Coast Forest & Bird).
6972	I do not support the proposed change	Other (please explain below)	I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on BIG MANLY BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season. (as agreed with Hibiscus Coast Forest & Bird).

OUTSIDE HIBISCUS AND BAYS LOCAL BOARD			
304	I support the proposed change		Makes better sense.
417	I do not support the proposed change	No change to current Policy (dog access) rules	I advocate for being allowed dogs under control and on leash in more of aucklands regional parks and within more areas of aucklands regional parks. Walking and hiking in Aucklands regional parks is a perfect activity for having canine companionship. There is plenty of space for everyone and when dogs are under control on leash there is little room for that to be problematic to anyone. Currently the options for getting fresh air and exercise for dog owners in Auckland are already incredibly limited. I do not support limiting this further. Again, the emphasis should be on policing and preventing nad dog ownership, not making it impossible le for good dogs and owners to enjoy wholesome, healthy activities in our own neighborhoods.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
480	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	The sheer number of dogs on manly and tindalls in summer before ten and after 5 is enormous. It is uncomfortable at those times for non dog people. I oppose any increase in dog access to these public areas. Particularly off leash.
523	I do not support the proposed change		Dogs should be allowed on all public areas under control at all times unless there is a non kauri die back conservation need
783	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	Dotterel
898	I support the proposed change		I walk my well-behaved dog off leash there but have seen the dotterels being harassed by dogs there and understand that one was recently killed. I would gladly give up the right to walk my dog off leash there if it helps to protect the dotterels.
926	I support the proposed change		Save dotterels but allow dogs
1379	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	Protection of native birds is important.
1755	I support the proposed change		Makes up for owners who walk ahead of their dogs and let them run around and back and forth unsupervised. I want the rule in place to support the conservation of the dotterel.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
1761	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
1821	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
1833	I support the proposed change		Enforcing the on leash dog rule at my local beach (bethells) has been great for nesting dotterals. I'm surprised that this beach doesn't already require dogs to be on leash in the area they're nesting
1849	I do not support the proposed change	No change to current Policy (dog access) rules	Lessening of amenity
1854	I don't know		Same for all areas - we should have a section for owners and dogs to be off leash during summer.
1906	I support the proposed change		Does this mean dogs can still be off leash outside this season. I support dogs off leash at other times.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2086	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	Never had issues before, punishing everyone for a small handful of irresponsible owners isn't fair. The less our dogs are out in society the more harmful to their behavior moving forward
2107	I do not support the proposed change	No change to current Policy (dog access) rules	We always steer clear of the birds, it is not necessary to change this rule.
2129	I support the proposed change		I support protecting the dotterels but I think dogs on leashes should be permitted to walk through these areas
2139	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs are family members it is already difficult to find activities you can do with your dog. Banning them from beaches and parks will be a step back as a society. In fact more and more people is opting for not having kids and having dogs instead. This will new proposed policy will definitely have a huge negative impact on the wellbeing of NZ dog owners. We should promote healthier, active lifestyle. What other alternatives we have as dog owners is the equivalent of banning kids in parks. that does not make sense.
2159	I do not support the proposed change	Other (please explain below)	Dotterels do not always nest in the same part of the beach, so this option does not reduce the risk to them. It needs to stop people and dogs getting too close to nesting birds, disturbing them and leaving eggs vulnerable to predators. The year round option in particular causes conflict with dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule should remain (ban dogs on beaches 10am to 5pm, 1st Dec to 1st March) During bird nesting season 1st September to 31st March: - Dogs must be on a lead at all times within a marked 200m zone of a dotterel nest - Dogs are prohibited from entering the 50m cordoned off zone around a nest.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2183	I do not support the proposed change	No change to current Policy (dog access) rules	We share this land - with all living things. We cannot prohibit access because it might cause issue with a few biased individuals. This doesn't solve an issue it creates disconnect and segregation between demographics. Focus on educating dog owners as well as non- dog owners and simplifying regulations. If people get used to dogs everywhere, the less of an issue it will become. Dogs bring joy to peoples' lives. Stop trying to take away their rights to play. That's all they ask...we have people that treat them horrifically, people who hit them, beat them and try to kill them and yet they stay loyal to their owners and only ever ask for love and a good walk in return. Just let them be part of the community.
2184	I do not support the proposed change	No change to current Policy (dog access) rules	What is this
2185	I don't know		Please provide as many opportunities as possible for on-lead walking.
2343	I do not support the proposed change	No change to current Policy (dog access) rules	Responsible dog owners are already highly restricted on area and times if access. Increasing those limitations is unfair and discriminating. The majority should not be penalized for the minority who are not responsible dog owners.
2416	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
2483	I do not support the proposed change	Other (please explain below)	No restrictions other than on leash
2488	I do not support the proposed change	No change to current Policy (dog access) rules	It's already to minum the parks and areas that you currently can walk with your dog, and to keep a healthy and balanced dog at least the dog need to be walked once a day.
2627	I support the proposed change		There is no dog problem on this beach. Dog owners here a very compliant and considerate. They are also well aware of birds breeding.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2692	I do not support the proposed change	Other (please explain below)	No limitations for responsible dog owners
2713	I do not support the proposed change	No change to current Policy (dog access) rules	We should be allowed to have access to these places as well
2768	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is:--The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
2807	I do not support the proposed change	No change to current Policy (dog access) rules	The right people keep their dogs under control on the beach. This area is a massively important part for the dog walking community
2837	I support the proposed change		Dotterels don't obey a 10-5 rule so removing it is good.
2871	I do not support the proposed change	No change to current Policy (dog access) rules	Fair

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
2903	I do not support the proposed change	No change to current Policy (dog access) rules	I am writing to express my concerns regarding the proposed changes to dog access rules that would require dogs to be on-leash year-round along approximately 1.3 km of the combined area of Big Manly Beach, Tindalls Beach, and the headland, and the potential prohibition during nesting season. Currently, a time-and-season rule applies, and I believe this approach remains effective and appropriate. As a responsible dog owner and regular user of this area, I walk from one end of Big Manly Beach through to Tindalls Beach and back. This proposed change would significantly impact the enjoyment of this space for many dog owners without clear evidence that it would better protect dotterels. There are already clear seasonal signs and barriers in place during the nesting period, which effectively notify the public about the presence of dotterels. Most dog owners respect these measures and leash their dogs accordingly. Additionally, there is a strong community of beachgoers, including dog owners, who actively monitor and protect the dotterels during their nesting season. This collaborative effort has proven successful in balancing the needs of wildlife and the local community. It is important to recognise that dotterels choose to nest in this area despite the presence of potential predators such as dogs. Introducing a year-round leash rule would likely not deter those individuals who are already inclined to disregard existing rules. Instead, it would penalize responsible dog owners who comply
3263	I support the proposed change		Make it stricter, please.
3526	I do not support the proposed change	No change to current Policy (dog access) rules	All good to protect birds. Just have dogs on leashes
4013	I do not support the proposed change	No change to current Policy (dog access) rules	If the dogs are under control whilst they walk there's no reason to change the rules
4153	I do not support the proposed change	No change to current Policy (dog access) rules	Locals need a place to regularly walk their dogs, no matter the time of year. I am ok with the bird breeding season having on-leash rules, but to say dogs are prohibited at all times is not realistic and will likely create a neighbourhood of under-exercised dogs that leads to increased barking and poor behaviours.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
4163	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	Under control dogs have never been proven to be of concern or a problem in these areas
4204	I do not support the proposed change	No change to current Policy (dog access) rules	Most responsible dog owners are aware of keeping their dog away from birds.
4234	I do not support the proposed change	No change to current Policy (dog access) rules	https://docs.google.com/document/d/1_7Mf-NLyc86fB6oJ1qwXlfTyBHZSdDPsXK4mA8MegwA/edit?tab=t.0
4278	I support the proposed change		Can't you just make all beaches on leash in summer, and off leash in winter? Would make everything so much easier
4341	I support the proposed change		I think if you give an inch with SOME dog owners they take a mile. Dogs & cats should be staying on owners properties at all times & on lead when they are anywhere in public..Too many people don't follow rules & dog attacks are happening too often.if we keep them all on leads at all times injuries will be reduced. Maybe open some dog parks where dogs are fenced in a safe area away from public who don't own dogs.
4352	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September - 31st March: Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
4489	I do not support the proposed change	No change to current Policy (dog access) rules	I want less restrictions not more
4592	I do not support the proposed change	No change to current Policy (dog access) rules	The proposed changes are adding unnecessary restrictions

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
4719	I support the proposed change		More in line with other areas
4735	I support the proposed change		yes
4768	I do not support the proposed change		As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
4821	I do not support the proposed change	No change to current Policy (dog access) rules	If dogs are under control there is no problem.
4879	I support the proposed change		Personal safety
4942	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs are not just pets, they are family members and a way of life. Limiting the access areas, times and off leash areas will dramatically impact the wellbeing of the dogs. Dogs need to be able to run free - this is important to their mental and physical wellbeing. In a society impacted by obesity why would the council make it more difficult for people to exercise with their dogs? Why in a society where we are wanting to get people out of their vehicles would you force people into cars so they can drive their dogs to outdoor areas to walk their dogs. Look around the world and you will see sophisticated societies increasing access to dogs not reducing. Do not impact the social interaction of the dogs, the exercise and fresh air opportunities of their owners. Beaches and parks need to be for all New Zealanders not just those without a dog as part of their family. The areas and hours they can be walked are already restricted enough. I would support an option to reduce dog access at all times during bird breeding season but for dogs to be allowed off leash outside those times as per current rules.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
4950	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs should be allowed to be walked on all beaches, at all times provided they are on leash and controlled.
5016	I do not support the proposed change	No change to current Policy (dog access) rules	I also support continuing to allow dogs in public spaces like dog parks and beaches- there are limited places available for dogs to be at and to take these away would be a travesty. These are safe spaces for me with my dog.
5023	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2). Apply the current time and season restrictions on remaining areas of the beach.	I think it's important for people to know why you're restricting the access and the moment I learnt it was for birds, I changed my opinion. If birds are breeding, dogs should be prohibited. But in all other cases, the beach should be available to dogs.
5103	I do not support the proposed change	No change to current Policy (dog access) rules	There is no reason for the change, it is an attack on dog owners
5165	I support the proposed change		More protection is needed, please see previous points
5184	I do not support the proposed change	Other (please explain below)	Dotterels do not always nest in the same part of the beach, so this option doesn't reduce risk to the dotterels. People would be able to get too close to nests, and the birds react by running away, leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird, and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
5260	I don't know		God this is confusing. Lol. Seriously??
5333	I do not support the proposed change	No change to current Policy (dog access) rules	Residents and tourists need spaces to exercise their animals - it's an animal welfare issue Access to the ocean on hot summer days gives everyone an opportunity to cool off safely
5522	I do not support the proposed change	Other (please explain below)	Dogs under control have great owners, owners that have trust with their dog will only take them off leash. Stop taking places away from us, we already have a lack of options
5642	I support the proposed change		I think this is a reasonable change to protect the safety of native species.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
5661	I do not support the proposed change	No change to current Policy (dog access) rules	Responsible dog owners should be able to walk their dogs here. Stop limiting the good owners and restricting them. It is not fair on them or the dogs.
5752	I do not support the proposed change	Other (please explain below)	For Hibiscus & Bays Local Board - Big Manly & Tindalls Beach I OPPOSE the proposed Dog access rule change on BIG MANLY BEACH to restrict dogs to being UNDER CONTROL ON A LEASH AT ALL TIMES from Cross Street, Big Manly Beach to Hardley Avenue, Tindalls Beach (Schedule 1(4)(a)). I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on BIG MANLY BEACH & TINDALLS BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season. (as agreed with Hibiscus Coast Forest & Bird). Reason: There are currently only 2 nesting pairs of dotterels on these beaches and based on past behaviours of these birds there is no guarantee they will nest in the zone that Council are proposing for restrictions. It could end up where the dotterels nest outside of the restriction area and have no protection and that dogs are restricted for no reason. Dog Friends and HBC Forest and Bird's proposal should give the birds the protection they need when they are nesting.

5822	I do not support the proposed change	No change to current Policy (dog access) rules	Stop taking away the enjoyment of going to the beach with your dog
5918	I do not support the proposed change		Current Rules clear.
5960	I support the proposed change		Protect the birds
6201	I do not support the proposed change	Other (please explain below)	Under control or on-leash at all times should be enough?
6417	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs enjoy Manly beach. There haven't been many incidents of dogs attacking the birds as the locals are very good at keeping their dogs controlled and locals aware. Dogs should be kept on a leash when within 200m of nesting birds as per forest and birds suggestion. This change would be better.
6447	I do not support the proposed change	Other (please explain below)	Expand areas and times that dog owners can access with their companions
6478	I support the proposed change		There are very few places already where we can take our dogs; parks and waterways provide enrichment and socialization opportunities. Council should aim to increase the areas where dogs are allowed, instead of reducing them.
6537	I do not support the proposed change	Other (please explain below)	Dotterels do not always nest in the same part of the beach so this option doesn't sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: The current time and season rule (a total ban of dogs on the beaches between 10am and 17.00pm from December 1st to March 1st) should remain During bird nesting season 1st September - 31st March: Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest Dogs are prohibited from entering the 50cm cordoned off zone round the nest itself.
6682	I support the proposed change		The proposed change makes the area more accessible for dogs and dog owners.
6765	I support the proposed change		Opportunities for dog walking during summer on the North Shore are extremely restricted, with even Long Bay under threat. There is ample space for both dog walkers and others on Big Manly Beach, and the proposed changes makes sense.

6940	I do not support the proposed change	Other (please explain below)	Dogs should always be on-leash on the beach, at all times of the year. Children are more important to protect than birds. Please see attached submission.

Sub #	Q4 HB-A-1 Big Manly Beach	Q4 HB-A-2	Q4 HB-A Comment
6945	I do not support the proposed change	Other (please explain below)	To whom it may concern, I am making an email submission with regards to the suggested changes to dog bylaws in my area: Hibiscus and Bays Local Board • Big Manly Beach • Tindalls Beach I have had a brief review of the suggested amendments to the current bylaws between the 2 beaches. I frequent both beaches with my dog. Firstly, I understand the proposals are in relation to the nesting dotterels. Over the past 5 plus years I have walked via the headland between beaches at low tide often. There are sporadic nests. The nest on the Tindell's side is not very viable for the birds as it often is within the tide line and the success of the nest is more determined by tides than man/dog. I have never in my time seen a dog or human interfere with the nesting birds. I have not seen them chased, harassed or harmed. The locals are aware of the nesting birds and sensibly take a "wide berth" providing space. I do have concerns that this has even been proposed. I would like to know if there have been any dog attacks on the birds in the area? It seems that rather than encouraging a sensible approach to these birds a hard and fast approach of creating bylaws has been tabled.
6973	I do not support the proposed change	Other (please explain below)	I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on BIG MANLY BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season. Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
HIBISCUS AND BAYS LOCAL BOARD			
29	I do not support the proposed change	No change to current Policy (dog access) rules	As in previous comments
89	I do not support the proposed change	Other (please explain below)	I think the 'summer' rules should be applied year-round. There should be periods of time where the beach can be used confidently, knowing dogs are not present.
95	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs under control should be allowed on the beach at all times not face further restrictions
319	I support the proposed change		I support protection of the dotterels.
518	I support the proposed change		I would rather on leash rules for that area then banning... Important to keep the dotterals safe
559	I support the proposed change		Same reason
566	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	I do not support increased dog access to these areas due to social and environmental concerns
573	I support the proposed change		To protect the birds
579	I do not support the proposed change		Dogs should not be off leash at any time during summer months. The are prone to spoil lovely evenings in summer, in particular once kids are back at school and can only use beaches in the evenings.
607	I support the proposed change		I support on leash as a way to minimise impact on wildlife. I do not support denying dog access to beachs because of dotterals, but providing total access for dogs as long as they are on leash is a good solution.
732	I support the proposed change		All dogs on leash are all times in all public areas. It's a safety concern and protects both the dog owner and the public (from dogs running up to them). Our dog is on a leash at all times and loose dogs have caused us endless problems as they approach and of course the leashed dog feels threatened

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
814	I do not support the proposed change	No change to current Policy (dog access) rules	see reasons in previous question For Hibiscus & Bays Local Board - Big Manly & Tindalls Beach I OPPOSE the proposed Dog access rule change on BIG MANLY BEACH to restrict dogs to being UNDER CONTROL ON A LEASH AT ALL TIMES from Cross Street, Big Manly Beach to Hardley Avenue, Tindalls Beach (Schedule 1(4)(a)). I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on BIG MANLY BEACH & TINDALLS BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season. (as agreed with Hibiscus Coast Forest & Bird). Reason: There are currently only 2 nesting pairs of dotterels on these beaches and based on past behaviours of these birds there is no guarantee they will nest in the zone that Council are proposing for restrictions. It could end up where the dotterels nest outside of the restriction area and have no protection and that dogs are restricted for no reason. Dog Friends and HBC Forest and Bird's proposal should give the birds the protection they need when they are nesting.
915	I support the proposed change		We need to protect the Dotterells
1008	I support the proposed change		Most dogs off leash still run up to other dogs but owners aren't bothered by it and don't accept that this behaviour actually means their dog is not under control. On leash walking protects everyone
1009	I support the proposed change		Please refer to my previous comment
1026			I recently moved up here from Christchurch which is fairly dog friendly and I'm surprised at the lack of fenced off dog parks with utilities like bins for dog poo and drinking stations. Don't you think creating spaces for dogs and owners is a positive thing for communities? I live in gulf Harbour and we have no where to take them up here other than parks and beaches. Do you expect them to live in a backyard their whole life? If dogs are a problem on beaches create a fenced off dog park as an alternative.
1034	I do not support the proposed change	No change to current Policy (dog access) rules	Limiting green spaces available for dog walking

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
1059	I do not support the proposed change	No change to current Policy (dog access) rules	The Dotterrells move their nests, sometimes to the other end of Manly Beach and even the Fire Station last year. Most of the time, it is not dogs but high tides that disturb their nests. Are you going to build a seawall to protect them? Also, this area is a picnic area with toilets. Are you going to ban the people? Also the cats and rats... If this is put in place the area is too large. From the Headlands at Manly Beach to Beach Road is sufficient as not many dog owners walk past Beach Road. Another reason for this is that this is where they park their cars and it saves them from parking up near Cross Road on the Pohutakawa tree roots. As far as Tndalls Beach is concerned I have not seen Dotterrells there, but have not walked there as often. I walk my dog on this beach quite often and 99% of the dogs are well-behaved. It is one of the few beaches in the area where you can walk at all tides and the dogs.
1093	I do not support the proposed change	Other (please explain below)	Apply a bird breeding season to eastern end of Big Manly beach from Beach Road to headlands connecting to Tindalls beach
1109	I do not support the proposed change	No change to current Policy (dog access) rules	This is ridiculous! You are proposing to close down most of Big Manly Beach to protect a few birds. This is a massively important exercise area for hundreds of dogs. Why would you prioritise a few birds over hundreds of dogs that use this beach as an off-leash exercise area. If a dog is unable to run and use excess energy, wouldn't this create a community filled with more problematic dogs? We pay dog registration fees to maintain areas like this for our dogs and every year, there is less and less available. If the dotterels are that important and require protection they shouldn't be at a public beach, they should be moved to a secluded breeding area such as Shakespeare Park.
1221	I do not support the proposed change	No change to current Policy (dog access) rules	The area from the end of Tindall bay beach around to Manly is a lovely work at low tide for dogs and As long as on lease around nesting area should be allowed off around rocks

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
1229	I do not support the proposed change		As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m
1231	I support the proposed change		Great for well controlled dogs to be allowed on a beach
1242	I do not support the proposed change	No change to current Policy (dog access) rules	A key issue with this proposed change is the lack of alternative spaces where dogs can exercise freely during the summer months. Our community does not have dedicated off-leash facilities or open areas where dogs can roam and play unrestricted, making beaches vital for their well-being. For example, other animals like cats face little to no restrictions despite their significant impact on wildlife and the environment. This raises the question: why are dogs, which are often supervised and under control, subjected to stricter regulations than cats, which roam freely without oversight? Dogs, much like humans, deserve freedom and the ability to enjoy open spaces, not to be confined to a leash at all times.
1272	I support the proposed change		Protect the dotterels
1348	I do not support the proposed change		We are not children
1356	I do not support the proposed change	No change to current Policy (dog access) rules	the restrictions are harsh enough already during the summer months particularly whne the beach is vacant
1358	I do not support the proposed change	Other (please explain below)	Dogs should be allowed on leash in all park areas. Provision for off leash play should be made in all parks.
1360	I do not support the		As dotterels do not always nest in the same part of the

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
2679	I support the proposed change		Too many dogs without proper supervision and I support trying to save the dotterals
2741	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	The only way to protect the dotters is to prohibit dogs. This will also help with the problem of dog mess on Tindalls beach.
2798	I do not support the proposed change	No change to current Policy (dog access) rules	same feedback as for Big Manly Beach - support having on leash for the headlands area, but not on leash requirement for beach areas. Enforce the current rules.
2801	I support the proposed change		As previously ; dog owners disregard the rules or are unaware of them and dotterel nests and bird are endangered. All eggs disappeared this year.
2816	I support the proposed change		Dogs will be under control and owners accountable for their dogs
2820	I do not support the proposed change	No change to current Policy (dog access) rules	I have seen the bird breeding sites at Manly but not at Tindalls. Would you consider banning cats too? Because should there be a lack of dogs, there could be an increase in cats and then you might need to start this while process again.
2832	I do not support the proposed change	No change to current Policy (dog access) rules	The only reason we live in Manly is to be able to walk our small dogs (off leash) on Big Manly Beach. This proposed change would be devastating.
2841	I do not support the proposed change	No change to current Policy (dog access) rules	The current law works well.
2847	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	no more dogs thanks, none during the human summer hours and def not during the dotteral breeding season, people are taking liberties and do not care . we humans need to think of the native birds,,am totally dissapointed these beaches have not been monitored by bylaws officers, havnt seen one at tindalls bay in years
2848	I don't know		Same as the reason for big manly.
2853	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	The only way to protect the doteralls is to prohibit dogs, when dogs are allowed so many fail to adhere to the 'on leash' rules.
2865	I do not support the proposed change	No change to current Policy (dog access) rules	I don't want to be able to walk my dog off leash outside if summer time. The birds are nog guaranteed to be there and it is not dogs that are the biggest risk. Leave it as is but do enforce better when the birds are around
2869	I support the proposed change		The current rules don't work as dogs are loose all the time this should include arkles and little manly beaches as well.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
2887	I do not support the proposed change	No change to current Policy (dog access) rules	It seems incredibly unjust to put such drastic restrictions in place for all dogs at Big Manly Beach. These restrictions will devalue the community and area. Big Manly Beach is an incredibly popular spot for people to gather and provide their furry friends with some much needed off leash exercise. Shakespeare Regional Park is already a bird sanctuary, it seems more reasonable to move the dotterels there, than to put in place such harsh restrictions on Big Manly Beach that affect so many people and dogs.
2931	I support the proposed change		As per previous
3011	I support the proposed change		Same as my previous answer. I also think people need to be held accountable a lot more than they are for the damage their dogs can do like all the lambs just killed. We had it at our place too. Just not good enough, some dog owners just don't care.
3162	I do not support the proposed change	No change to current Policy (dog access) rules	strongly against the proposed rule change but open to a seasonal leash rule that covers the (smaller) areas that the dotterels are nesting in that season.
3170	I support the proposed change		I fully support increased restrictions for the protection of vulnerable wildlife and people.
3332	I support the proposed change		As a family with kids it is easier to walk the dog at times suitable to the family rather than rules on paper. We should be allowed to walk our dog at any time
3337	I do not support the proposed change	Other (please explain below)	I do not support the current changes as changing access for 2 dotterills who mother poorly is ridiculous. Taking away the rights of the people who pay their rates and want to enjoy the beach in a civilised way is punitive and reductive. Please stop interfering with the simple enjoyments we have. I have walked this beach for 39 years, most with a dog. The residents who want the rules relaxed around dog walking hours are in the majority. 11 am to 4.30pm is adequate time for dog free hours on the beaches.
3434	I support the proposed change		People don't respect the rules! Taking dogs off the leash when is prohibited from 10am to 5pm. And when the dotterels are on the beach they leave dogs freely walking to the nests and chasing the dotterels. Saw this on daily basis.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
3443	I do not support the proposed change	Other (please explain below)	These new rules will not allow dog walkers to go from one beach to the other via the headland. This is ridiculous as many man people do this at low tide. The restrictions are based on wild birds nesting in a certain area. They may not nest, they may nest below the high tide line, or they may nest in another part of the beach. Hence they don't get the protection anyway. The rules need to apply to specific nests as and when these birds choose to nest. 100m circumference for on leash walking will be respected by dog walkers, help the dotterells and also allow people free access to both beaches all year round. The dog rules are already working well and giving people dog free access hours in the summer. These changes will not prevent cats, high tides orless sympathetic and reckless people from attacking the nests. This dog rule is therefore far too extreme and targeted to dog walkers.
3522	I do not support the proposed change	No change to current Policy (dog access) rules	The proposal does not cover the real root of the dotterel problem which is the sea, rats and cats. As a long time resident and dog walker I have never seen a dog attack a dotterel or run through its breeding ground. We are all law abiding, intelligent people in Tindalls Beach. Come and observe us. The dog walking benefits the community as it is social and encourages connection. It is unsocialised dogs and ignorant owners that potentially cause problems. The proposal is for "only 300m" of beach but the Tindalls beach is only 500m long. Removing over half the beach and not doing anything about the real culprits - cats and rats- is totally unfair and penalises the great community that we have here at Tindalls
3637	I do not support the proposed change	No change to current Policy (dog access) rules	I'm curious as to the need driving the proposed change. Have there been any dotterels killed or harmed by dogs in the breeding area? I have observed dog owners ensuring dogs are under control near the breeding area and would be extremely surprised to learn that the dotterels were endangered by dogs. More likely the tides or the rodents in the area that could damage the nesting area.
3658	I do not support the proposed change	No change to current Policy (dog access) rules	As previously discussed. This proposal is a breach of the NZ Bill of Rights Act and is driven with very little evidence that dogs are responsible for killing and damaging dotterel nests.
3817	I do not support the proposed change	Other (please explain below)	Same as previous comment.
3824	I do not support the proposed change	No change to current Policy (dog access) rules	It is ridiculous to place such an enormous ban in this area. The birds are only there for such a short time and also already cost the ratepayers a fortune.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
3842	I do not support the proposed change	No change to current Policy (dog access) rules	The council want to take away the few areas where people can walk their dogs. Dog ownership is up 5.4% in the last year, yet the council are taking away spaces where owners can walk. The council say that many of these restrictions are to protect the public. However, I think that dogs that are not allowed suitable socialisation with people and suitable exercise are likely to be more aggressive. This proposal will cause the issues that it is hoping to solve. I might support some of these proposals IF the council actually provided dedicated dog parks. However, they do not. I live at Gulf Harbour and the council are proposing to effectively close all the beach walks near me without providing any alternatives. To get to a dog beach I will have to drive. Does the council not support environmental reduction of car usage? Until the council provide suitable alternatives close to where I live, I will not support any of these proposals. You must do better for the tens of thousands for dog owners who pay not just their normal rates, but also the dog licence.
3856	I support the proposed change		As per my notes on the Manly beach page
3867	I do not support the proposed change		I OPPOSE the proposed Dog access rule change on BIG MANLY BEACH & TINDALLS BEACH to restrict dogs to being UNDER CONTROL ON A LEASH AT ALL TIMES from Cross Street to Hardley Avenue (including the headland between) (Schedule 1(4)(a)). I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on BIG MANLY BEACH & TINDALLS BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season.
3918	I do not support the proposed change	No change to current Policy (dog access) rules	The current rules work well for the majority of beach users.
3934	I do not support the proposed change	No change to current Policy (dog access) rules	As stated the heavy handed restrictions in the change will adversely affect many hundreds of families and I believe could have completely the opposite outcome creating even more potential harm to the birds
3956	I do not support the proposed change	No change to current Policy (dog access) rules	This rule is too restrictive
4005	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	See my comments for Manly Beach - the same applies here
4023	I do not support the proposed change		As previous reply, on lead within 200m of nest, if no nest, no restrictions.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
4026	I support the proposed change		In recent years there has been a dog-population boom in this area that has coincided with dotterel wanting to breed. While I think the proposed change is a step in the right direction I think it would be better to have it extended to: Dogs allowed under control on a leash from 10am to 5pm with NO time and season rule from the beach from the headland connecting to Big Manly Beach to Hardley Avenue (Schedule 1(4)(a)).
4046	I support the proposed change		Same reason as for Big Manly. Dogs on leashes are less likely to be able to harm birds.
4047	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	Because I think the more protection for the dotterels, the better and I also like that it is a dog free beach for swimming and for kids to play freely.
4054	I do not support the proposed change	No change to current Policy (dog access) rules	Tindall beach is well used by local dog users, predation of dotterel and other sea birds nesting by dogs is unsubstantiated. Stoats, rats, hrdgehogs, blackback gulls all predated sea birds chicks and eggs. Dont penalize your community of dog walkers by limiting access. This group of local community is by far the largest user group averaged across a calender year, many who pay rates and chose to live here as the HBC for the lifestyle, which includes dog access to our beaches.
4071	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
4081	I do not support the proposed change	No change to current Policy (dog access) rules	This rule is working does not need to be changed
4107	I do not support the proposed change	Other (please explain below)	I support the proposal put forward by Hibiscus Coast Forest and Bird and Dog Friends Auckland.
4121	I do not support the proposed change	No change to current Policy (dog access) rules	Same reasons as for Manly beach. There have been many years where birds have nested on the beach and successfully raised baby birds.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
4165	I support the proposed change		There are plenty of other areas that dogs can run around away from nesting birds.
4179	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. I would hope to see some effort to publicise and to enforce the by-laws. Dotterel nests need 24/7 protection from dogs and people using the beaches. Nesting success has been poor and the success of this species is recognised as 'conservation dependent'. Without our help they would still be in decline.
4429	I support the proposed change		to many entitled owners let the rest of us dog owners down, I think a dog on leash at these places is a good compromise
4435	I do not support the proposed change	Other (please explain below)	Northern New Zealand dotterels are classified as at risk by the Department of Conservation and are legally protected under the Wildlife Act, Set a rule prohibiting dogs from entering a 50m marked area around a nest, and requiring them to be on a lead within 200m of a nest.
4589	I do not support the proposed change	Other (please explain below)	There is a severe lack of enforcement of the existing by-law, especially when it comes to the lack of patrols and proper signage and I therefore kindly request a more adequate solution that protects dotterels.
4613	I support the		I support protecting the nesting area of the endangered
4730	I do not support the proposed change		As mentioned in the previous sections dogs need to run and play. They cannot be on leash at all times. Beaches are empty majority of the time and mainly get busy when everyone turns up at 5pm with their dogs. Restrictions should only be weekends, school & public holidays. All other times should be dog under control off leash at all times.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
4835	I do not support the proposed change	No change to current Policy (dog access) rules	I do not support the proposed change requiring dogs to be on-leash at Big Manly Beach, Tindalls Beach, and the headland to protect the dotterels. While I understand the importance of protecting wildlife and supporting conservation efforts, I believe this proposed rule may be too restrictive for responsible dog owners. Many dogs are well-trained and pose little to no risk to wildlife when off-leash, especially if they are kept under control by their owners. It's important to remember that nature is often co-managed by both people and wildlife. If we weren't here to care for and manage our pets, dogs would roam freely in many natural environments. In that case, wildlife like the dotterels could face even more harm, as wild animals wouldn't be able to rely on human intervention or control. Dogs, when properly trained and managed, are an integral part of our environment, and responsible dog ownership plays a role in keeping the balance between human activities and nature.
4882	I support the proposed change		Dotterels need to be protected. Some Dog owners show no responsibility for their dogs behaviour
4992	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	I support dogs prohibited during bird breeding months of 1 September to 31 March, but want the beach extended to the Eastern headland as the native dotterels and Oyster Catchers feed at low tide at the Eastern end of Tindalls Beach as there is a sandy flat that contains their food.
4995	I support the proposed change		The proposal provides balance between still allowing an off-leash area for dogs whilst providing more protection for the nesting dotterels
5015	I support the proposed change		It is as stated in the reasons for the change
5030	I do not support the proposed change	Other (please explain below)	The limited season being proposed by some of the dog walking groups (and agreed by Forest and Bird etc) makes more sense rather than the blanket ban in the proposal or the six month on above when the breeding season is much shorter than that. For those of us who run reasonable distances (6-10km) with our dogs, the ban will block the coastal running route. There are very few off-lead dog areas so to cut one up into small sections is removing the option to run somewhere. The alternative would be to run around in circles on half of either Manly or Tindalls beaches which is not what runners do. Running with dogs on leads is tricky, awkward and dangerous even on the rocks, so we need to be able to run with our dogs running along side.

Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
5916	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	As for Manly, I don't want dogs on the beach at all over summer but realise this may be difficult to swallow for some people so I also support the alternative put forward by Forest and Bird, the Dotterel minders, and Dog friends as below. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is:--The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. Dogs are prohibited from entering the 50m cordoned off zone around the nest itself. In my interactions with dog owners who don't obey the rules, only a total ban will actually see them off the beach as there can be no misunderstanding and this is really the only way to protect native wildlife. There are so many other options for dog walkers on the Hibiscus coast that these two beaches been dog free over summer would be amazing.
5946	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	Target irresponsible owners when you start focusing on the problem and fixing it from the ground up all this will change for the better. Stop penalising responsible owners!
5962	I do not support the proposed change		No dogs at any time.
6355	I support the proposed change		Same reasons as with Big Manly beach! Would like the same rules applied to Stanmore beach as well!

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
6396	I support the proposed change		dog walkers need to. respect the wildlife and control. their. dogs accordingly
6411	I support the proposed change		I would support dogs on leash within 200 mtres of dotteral nesting
6422	I do not support the proposed change	Other (please explain below)	The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. - During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
6485	I do not support the proposed change	No change to current Policy (dog access) rules	I think this blocks off too much of the beach and would prefer rules (and/or roping off and signage) to apply to smaller areas where nesting sites actually are. I think the current proposal only uses Hardley Ave as it's the only street to hit the beach, and there are other more precise ways to divide up the usable beach.
6558	I do not support the proposed change	Other (please explain below)	Dotterels don't always nest in the same part of the Beach therefore this option is insufficient for protecting dotterels and their chicks in the future. This year round proposal is also in conflict with the interest of dog owners and is irresponsible of council to propose as a viable option. I support the alternative option proposed by Hibiscus Coast Forest & Bird and Dog Friends Auckland, which includes: - Seasonal restrictions as per current rules, so a total ban of dogs on beaches between 10 am and 5 pm during summer months. - During bird breeding season of 1st September to 31st March, dogs should be on a leash within 200 of a marked dotterel nest. And dogs should be prohibited from entering the cordoned area 50 m around a dotterel nest
6600	I do not support the proposed change	Other (please explain below)	Maintain the current rules except if a nest is there in which case apply a dog under control on-leash during that period within 100m of the nest.
6616	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	On leash during bird season. Off leash other times. Bit difficult to mange dog on leash on rocks.
6665	I support the proposed change		dotterels fair to all
6676	I support the proposed change		To protect the dotterels. We need to have the rules enforced. Every day there are dogs on the beach that should not be there this time of the year

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
6752	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year-round option in particular causes conflict with many dog owners. alternative option we support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is:-- The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
6762	I do not support the proposed change	Other (please explain below)	I OPPOSE the proposed Dog access rule change on BIG MANLY BEACH to restrict dogs to being UNDER CONTROL ON A LEASH AT ALL TIMES from Cross Street, Big Manly Beach to Hardley Avenue, Tindalls Beach (Schedule 1(4)(a)). I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on BIG MANLY BEACH & TINDALLS BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season. (as I understand has been agreed with Hibiscus Coast Forest & Bird). There are currently only 2 nesting pairs of dotterels on these beaches and based on past behaviours of these birds there is no guarantee they will nest in the zone that Council are proposing for restrictions. The situation could arise where the dotterels nest outside of the restriction area and have no protection and that dogs are restricted for no reason. The Dog Friends and HBC Forest and Bird's proposal should give the birds the protection they need when they are nesting.
6797	I do not support the proposed change	Other (please explain below)	As per previous comment. As the birds nest in different places each year it is better to have a moveable rule that dogs are required to be leashed from 200m of a nesting site. If dogs could be allowed on the beach leashed at all times this would still protect the birds but allow walking to alternate areas for offleash play.

304	I support the proposed change		Common sense.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
417	I do not support the proposed change	No change to current Policy (dog access) rules	I advocate for being allowed dogs under control and on leash in more of aucklands regional parks and within more areas of aucklands regional parks. Walking and hiking in Aucklands regional parks is a perfect activity for having canine companionship. There is plenty of space for everyone and when dogs are under control on leash there is little room for that to be problematic to anyone. Currently the options for getting fresh air and exercise for dog owners in Auckland are already incredibly limited. I do not support limiting this further. Again, the emphasis should be on policing and preventing nad dog ownership, not making it impossible le for good dogs and owners to enjoy wholesome, healthy activities in our own neighborhoods.
480	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	As above. Massive numbers of dogs make the area uncomfortable for non dog people. I oppose any losening of their access to vital public spaces.
523	I do not support the proposed change		Dogs should be allowed on all publics areas under control at all times unless there is a non kauri die back conservation need
557	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	Avoids thw sowcific risk without being overly restrictive all year. Maintains the current rules for ither areas.
926	I support the proposed change		Save fottterels but still allo dogs to exercise
1379	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	Protection of native species is important.
1755	I support the proposed change		Reasonable timeframe to get to beach. Plenty of time to exercise dogs and balances protecting wildlife.
1761	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
1821	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. 1849	I do not support the proposed change	No change to current Policy (dog access) rules	Lessening of amenity
1854	I don't know		Same for all areas - we should have a section for owners and dogs to be off leash during summer.
2086	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	Never had issues before, punishing everyone for a small handful of irresponsible owners isn't fair. The less our dogs are out in society the more harmful to their behavior moving forward
2129	I support the proposed change		There are so few places for dogs to be taken on walks. Responsible owners (that's most of us) have no problem with a "dogs on leash" rule.
2139	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs are family members it is already difficult to find activities you can do with your dog. Banning them from beaches and parks will be a step back as a society. In fact more and more people is opting for not having kids and having dogs instead. This will new proposed policy will definitively have a huge negative impact on the wellbeing of NZ dog owners. We should promote healthier, active lifestyle. What other alternatives we have as dog owners is the equivalent of banning kids in parks. that does not make sense.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
2159	I do not support the proposed change	Other (please explain below)	As Dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to them. It does not prevent people or their dogs from getting too close to nests, causing the birds to be flushed off, leaving eggs vulnerable to predation and the elements. It also does not stop them walking directly up to a nest. The year round option also causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is : - The current time and season rule should remain (dogs banned on beaches 10am to 5pm, 1st December to 1st March) - During bird nesting season 1st September to 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
2183	I do not support the proposed change	No change to current Policy (dog access) rules	We share this land - with all living things. We cannot prohibit access because it might cause issue with a few biased individuals. This doesn't solve an issue it creates disconnect and segregation between demographics. Focus on educating dog owners as well as non- dog owners and simplifying regulations. If people get used to dogs everywhere, the less of an issue it will become. Dogs bring joy to peoples' lives. Stop trying to take away their rights to play. That's all they ask...we have people that treat them horrifically, people who hit them, beat them and try to kill them and yet they stay loyal to their owners and only ever ask for love and a good walk in return. Just let them be part of the community.
2184	I do not support the proposed change	No change to current Policy (dog access) rules	Keep current
2185	I don't know		Please provide as many opportunities as possible for on-lead walking.
2343	I do not support the proposed change	No change to current Policy (dog access) rules	Responsible dog owners are already highly restricted on area and times if access. Increasing those limitations is unfair and discriminating. The majority should not be penalized for the minority who are not responsible dog owners.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
2416	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. It also does not prevent people walking their dogs directly up to a nest. The year round option in particular causes conflict with many dog owners. The alternative option I support, agreed by Hibiscus Coast Forest & Bird and Dog Friends Auckland is: - The current time and season rule (a total ban of dogs on the beaches between 10.00am and 17.00pm from December 1st to March 1st) should remain. During bird nesting season 1st September – 31st March: - Dogs must be on a lead at all times within a zone of 200m around a marked dotterel nest. - Dogs are prohibited from entering the 50m cordoned off zone around the nest itself.
2488	I do not support the proposed change	No change to current Policy (dog access) rules	It's already to minum the parks and areas that you currently can walk with your dog, and to keep a healthy and balanced dog at least the dog need to be walked once a day.
2627	I do not support the proposed change	No change to current Policy (dog access) rules	Locals are well aware of the birds and breeding areas. There are signs around. People should be able to walk dogs on the beach and other public places. The public pay for these areas through their taxes and rates. They have the right to enjoy these areas with their children and animals. There is a high level of public compliance in this area without council making more rules. And how do they police these rules? More people and more cost. Not good changes.
2692	I do not support the proposed change	Other (please explain below)	No limitations for responsible owners
2713	I do not support the proposed change	No change to current Policy (dog access) rules	We should be allowed to have access to these places as well

2807	I do not support the proposed change	No change to current Policy (dog access) rules	Such an important area for the dog walking community
2871	I do not support the proposed change	No change to current Policy (dog access) rules	Fair

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
2903	I do not support the proposed change	No change to current Policy (dog access) rules	I am writing to express my concerns regarding the proposed changes to dog access rules that would require dogs to be on-leash year-round along approximately 1.3 km of the combined area of Big Manly Beach, Tindalls Beach, and the headland, and the potential prohibition during nesting season. Currently, a time-and-season rule applies, and I believe this approach remains effective and appropriate. As a responsible dog owner and regular user of this area, I walk from one end of Big Manly Beach through to Tindalls Beach and back. This proposed change would significantly impact the enjoyment of this space for many dog owners without clear evidence that it would better protect dotterels. There are already clear seasonal signs and barriers in place during the nesting period, which effectively notify the public about the presence of dotterels. Most dog owners respect these measures and leash their dogs accordingly. Additionally, there is a strong community of beachgoers, including dog owners, who actively monitor and protect the dotterels during their nesting season. This collaborative effort has proven successful in balancing the needs of wildlife and the local community. It is important to recognise that dotterels choose to nest in this area despite the presence of potential predators such as dogs. Introducing a year-round leash rule would likely not deter those individuals who are already inclined to disregard existing rules. Instead, it would penalize responsible dog owners who comply with seasonal restrictions and actively contribute to protecting
2949	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs that live in the area should be allowed to run and play free and off leash. Limiting the time is OK, but making it at all times is cruel and unfair for the local dogs and locals who enjoy those beaches the most.
3526	I do not support the proposed change	No change to current Policy (dog access) rules	Leave as is
4013	I do not support the proposed change	No change to current Policy (dog access) rules	Dogs under control off leach before 10 after 4 pm should be the rules
4153	I do not support the proposed change	No change to current Policy (dog access) rules	Whangaporoa is full of households with dogs as members of the family. Putting these restrictions in place will significantly limit how local families can enjoy their environment and the lifestyle that they moved there for. Dogs need to be exercised, including off-leash to reduce boredom and anxiety which can lead to far greater behavioural problems for the neighbourhood. I am ok for there to be on-leash restrictions during bird breeding season but to say dogs are prohibited from Sep-end of March is extreme.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
4204	I do not support the proposed change		Most responsible dog owners know to keep their dog away from breeding birds.
4352	I do not support the proposed change	Other (please explain below)	As dotterels do not always nest in the same part of the beach, this option does not sufficiently reduce risk to the dotterels. It does not prevent people from getting too close to nests causing the birds to be flushed off and leaving eggs vulnerable to predation and the elements. 4821	I do not support the proposed change	No change to current Policy (dog access) rules	If dogs are under control there is no problem.
4879	I support the proposed change		Personal safety

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
4942	I do not support the proposed change		Dogs are not just pets, they are family members and a way of life. Limiting the access areas, times and off leash areas will dramatically impact the wellbeing of the dogs. Dogs need to be able to run free - this is important to their mental and physical wellbeing. In a society impacted by obesity why would the council make it more difficult for people to exercise with their dogs? Why in a society where we are wanting to get people out of their vehicles would you force people into cars so they can drive their dogs to outdoor areas to walk their dogs. Look around the world and you will see sophisticated societies increasing access to dogs not reducing. Do not impact the social interaction of the dogs, the exercise and fresh air opportunities of their owners. Beaches and parks need to be for all New Zealanders not just those without a dog as part of their family. The areas and hours they can be walked are already restricted enough.
4950	I support the proposed change		Dogs should be allowed to be walked on all beaches, at all times provided they are on leash and controlled.
5016	I do not support the proposed change	Other (please explain below)	I also support continuing to allow dogs in public spaces like dog parks and beaches- there are limited places available for dogs to be at and to take these away would be a travesty. These are safe spaces for me with my dog.
5023	I do not support the proposed change	Apply a bird breeding season rule (Schedule 2).	I agree if you let people know why. It's important for people for some reason and for me it changed my opinion the moment I learnt it was for bird safety and breeding.
5103	I do not support the proposed change	No change to current Policy (dog access) rules	There is no reason for the change, it is an attack on dog owners
5165	I support the proposed change		More protection is needed for resting, nesting, roosting and foraging birds, please see precious points
5184	I do not support the proposed change	Other (please explain below)	For exactly the same reasons as for Big Manly Beach above
5260	I don't know		How confusing.
5333	I do not support the proposed change	No change to current Policy (dog access) rules	As previous - dog owners need access
5522	I do not support the proposed change	Other (please explain below)	Dogs under control have great owners, owners that have trust with their dog will only take them off leash. Stop taking places away from us, we already have a lack of options
5642	I support the proposed change		I fully support the protection of native wildlife and believe the proposed change is a reasonable step toward achieving this goal.
5661	I do not support the proposed change	No change to current Policy (dog access) rules	Responsible dog owners should be able to walk their dogs here. Stop limiting the good owners and restricting them. It is not fair on them or the dogs.

Sub #	Q4 HB-B-1 Tindalls Beach	Q4 HB-B-2	Q4 HB-B Comment
5752	I do not support the proposed change	Other (please explain below)	For Hibiscus & Bays Local Board - Big Manly & Tindalls Beach I OPPOSE the proposed Dog access rule change on BIG MANLY BEACH to restrict dogs to being UNDER CONTROL ON A LEASH AT ALL TIMES from Cross Street, Big Manly Beach to Hardley Avenue, Tindalls Beach (Schedule 1(4)(a)). I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on BIG MANLY BEACH & TINDALLS BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season. (as agreed with Hibiscus Coast Forest & Bird). Reason: There are currently only 2 nesting pairs of dotterels on these beaches and based on past behaviours of these birds there is no guarantee they will nest in the zone that Council are proposing for restrictions. It could end up where the dotterels nest outside of the restriction area and have no protection and that dogs are restricted for no reason. Dog Friends and HBC Forest and Bird's proposal should give the birds the protection they need when they are nesting.
5779	I do not support the proposed change	Other (please explain below)	For Hibiscus & Bays Local Board - Big Manly & Tindalls Beach I OPPOSE the proposed Dog access rule change on BIG MANLY BEACH to restrict dogs to being UNDER CONTROL ON A LEASH AT ALL TIMES from Cross Street, Big Manly Beach to Hardley Avenue, Tindalls Beach (Schedule 1(4)(a)). 6945	I do not support the proposed change	Other (please explain below)	To whom it may concern, I am making an email submission with regards to the suggested changes to dog bylaws in my area: Hibiscus and Bays Local Board • Big Manly Beach • Tindalls Beach I have had a brief review of the suggested amendments to the current bylaws between the 2 beaches. I frequent both beaches with my dog. Firstly, I understand the proposals are in relation to the nesting dotterels. Over the past 5 plus years I have walked via the headland between beaches at low tide often. There are sporadic nests. The nest on the Tindell's side is not very viable for the birds as it often is within the tide line and the success of the nest is more determined by tides than man/dog. I have never in my time seen a dog or human interfere with the nesting birds. I have not seen them chased, harassed or harmed. The locals are aware of the nesting birds and sensibly take a "wide berth" providing space. I do have concerns that this has even been proposed. I would like to know if there have been any dog attacks on the birds in the area? It seems that rather than encouraging a sensible approach to these birds a hard and fast approach of creating bylaws has been tabled.
6973	I do not support the proposed change	Other (please explain below)	I WISH TO SEE THE FOLLOWING CHANGE: I strongly request that on TINDALLS BEACH the current time and season rule remains but that, where a Dotterel nest is identified and marked, dogs must be on a lead within 200 metres of the nest and prohibited from entering a 50 metre zone, to be cordoned off around the nest itself during the nesting season.
