

Maybury Reserve upgrade

Feedback must be received by 27 May 2026

Glen Innes has grown in recent years, with a young and diverse community and a significant increase in population. As the area continues to grow, we need to upgrade [Maybury Reserve](#) to better serve the community.

We want to design this open space to make sure:

- it lasts a long time
- residents and visitors can enjoy it for years to come.

We are in the early stages of developing a concept plan and want to understand what is important to you.

We will develop the plan in partnership with mana whenua and with community feedback from the public consultation.

We expect the upgrade to include:

- ecological improvements
- shared pathways
- facility upgrades
- a new destination playground
- design elements that reflect mana whenua values and identity.

Alongside the upgrade, Auckland Council's Healthy Waters team is planning three stormwater upgrades across Maybury Reserve:

- the Ōmaru Creek and network upgrade
- the Elstree Avenue culvert upgrade
- the Point England Pond Naturalisation.

This work will:

- restore natural water flow
- improve stream stability
- build long-term resilience for a rapidly growing Tāmaki community.

These projects will be delivered in stages to minimise disruption.

We want to know:

- what activities and features you and your whānau would like to see at Maybury Reserve
- what matters most to you as we plan for its future.

We will review all feedback and use it to help develop a draft concept plan. Your views will play a role in shaping the concept plan.

We will share a summary of what we heard during this consultation and come back to you with the draft concept plan at a later time. The Maungakiekie-Tāmaki Local Board will review and approve the final concept plan.

We encourage you to give feedback online at akhaveyoursay.nz or you can:
