6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Fresh water would be a great opportunity to satisfy Aucklands needs

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Water

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#2261

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#2271

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#2281

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#2310

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#2330

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#2339

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The Water resources we rely on should be taken care of for the present and future generations to use.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Ensures the protection of the Hauraki fresh waterways from contamination.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

It aims to restore the fresh waterways in Kaipara and prevent the locals that could suffer greatly from drought.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

The health of the water ways need to be restored and protected so there's enough water to grow vegetables and provide local water needs during droughts.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

No

Tell us why:

I feel like our water Boarders shouldn't be resilient from hazards. Hazards should be eliminated before they get to degrade out water boarders

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

I think it falls under human contact.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

This should be maintained so they can keep "Preforming" at there outstanding levels.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Keeps our water clean and safe.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Good summaries of the conditions of our freshwater systems.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Worried about human contamination.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If it causes harm to the aquatic life them these materials should be managed and removed.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

It protects the fresh water life and allows them to thrive in better environments.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

I think before improving the good water ways we should improve the worse waterways.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I think it should be a slow process to find a middle ground.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

These are important to think about

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Fish need safe passage and this proposal looks to provide this.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We should always look to fill the potential of our water bodies.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Educating the communities on household methods that can be used to reduce water usage.

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritize drinking water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I think we should do it for our tupuna

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Levels have reversed and plan seems to be working good.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

To sustain our fresh water eco systems.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Because I agree that the founders of this land should have a little recognition.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It seems to be working and looks like a good plan.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

reversed the effect just have to keep looking after.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Other

Tell us why:

dont know if it will work.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

to sustain our waters.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

dont need to have it but cant hurt.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Save our country and waterways for years to come.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

The plan is working.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Other

Tell us why:

Dont understand.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

Yes and no because i still want to swim but protect our natural water bodies.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Good to learn the land we on.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

natural.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It is important that we look after our waterways.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It is important that we look after our waterways.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

letting the people have a say in decision making about community is good.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Culture is very important.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

We need safer and cleaner water for our babies to swim in.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

We need to improve our waterways.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

to be kind to NZ aquatic life and their habitat.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Thinking about all waterbodies not just specific ones.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Very Good.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

We need to protect our aquatic life.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It is important that we all contribute to keeping our waterways clean.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Having safe waterways benefits us all.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

letting the community have a say in what happens in the community will give the best outcomes.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Yes as culture is important to many kiwis.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

If it means stricter standards to reduce contamination in our waterways then i agree.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I think the protection and improvement of our water resources and their health life important as we rely on them

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Leads to the restoration of waterways in Hauraki

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

The restoration of these waterways is important as people reply on them.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

People in Manukau rely on these waterways, and this vision aims to restore their health and add protection.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Should fall under human contact.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

These waterways are valued more so they need special treatment.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

The prevention of contamination and drowning is important.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Good informal assessments of our waterways and their health.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Improvement is still needed

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Protects aquatic life

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Temperature can harm aquatic life so it needs to be managed.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

The poorer water bodies need the most help so they should be a priority.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All points will help contribute to this goal

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Going backwards isn't the solution

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2799

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It helps to maintain and protect the health and quality of our waterways so we can reply on them.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It looks to protect and restore the health of the Hauraki fresh waterways from contamination

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Works together with the local communities

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Clear and valid objectives

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Our waterways need to stay protected as we rely on them

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   This vision looks to restore and improve the Hauraki waterways.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

I agree with the restoration of the Kiapara fresh waterways and I think its great to work together with the local communities

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Has clear objectives and long term thinking

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Should fall under human contact

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Its important

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Mana Whenua knowledge and experience of looking after taonga is key

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Very helpful when trying to understand the situation

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Problems identified with its health

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Will improve the health of aquatic ecosystems

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

This will reduce the harm that the aquatic life will receive due to temperature

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Poorer waterbodies require that most restoration so they need to be protected

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All points work towards achieving ultimate goal

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

These barriers are causing harm to fish

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

National standards shouldn't make us go backwards

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

More community education and resources and reduce water usuage

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2812

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I think it good for the future

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Levels have reversed and plans seems to

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

To protect

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

So we can still see them and protect and preserve them

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Good to understand the history and culture

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Because i would love for our future generations to be able to experience streams and outdoor water life without problems.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

degradation of waterways has halted and reversed and so somethings going right.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

In Auckland we have a lot of water bodies and I think we need to look after them more to sustain.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

Because if Kiwi culture to go swimming but we also want to protect and prolong our water care and life.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

We must protect the land, the culture and people.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Good to stop expanding contamination.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#2827

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I hope this plan will maintain and stop future degradation epeciallythe vision to keep Te Mauri o te wai safe and enhance it.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Needs more population involvement to realize the vision.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

The vision goes into the direction of the collaborative community effort to restore health and kaipara moana.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Very clear goals. Clear limits to long term regional policy vision.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

No

Tell us why:

This word should be fixed in the "human contact" values.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

To keep "the best of the best" safe and sound and amazing.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It is very important to keep human contamination to a minimum.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

It is a good place to start.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Human contact impacts is quite worrying in terms of E.coli

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If it is toxic towards bug/critters it will impact the entire eco-system.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If it is a harm to the fresh water ecosystems then it should be considered.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Focus on balancing the production of food across Aotearoa.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Consideration of looking after our environment vs wealth. Generation of the fear (farming/ Agriculture) should be put in place to ensure or a balance put in place to ensure or a balance put in place for our fresh water to be prioritized over profit.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

repairing the fish passages is important to give connection of waterways.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Taking numbers away from 4% is not going to be a choice.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

I think the council is correct. Reducing water allocation but we need to put investments forward for education and resourcing community to look into household water collection methods.

21. How do you think we should prioritise allocation where or when water is scarce?

Think about human consumption and limits for food producing.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2828

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It aims to improve the quality of our waterways that we depend on

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   The vision looks to restore the waterways that people use and rely on

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Its important for enhancing and maintaining the health at the Kaipara fresh water systems

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

This short term goal shows ambition towards achieving the long term vision set in place

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

It leans towards human contact

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

It leans towards human contact

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

In order to make progress towards clean, healthy and sustainable water bodies and systems we must keep mana whenua taonga at its best

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Benefits people and our waterbody /water system

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

needs to improve

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

It maybe toxic to aquatic life

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

This ca cause aquatic life to receive less harm

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Great focusing points to help achieve goal

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Fish require safe passage across water bodies

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Household methods to save water

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking water should be the top priority

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2829

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We should always protect freshwater resources for our future.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

It looks to restore the health of Kaipara waterways.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Well thought out.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Put in human contact value category.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Put in human contact value category.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Its good to try different ways to find water bodies.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Always remember swim safety and limit human contamination.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Its a good place to start

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

It could be better

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Yes temperature is vital with the waterways.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

I think most of the population is poor so if they become sick our population is going to decrease rapidly.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

You can promote sustainable farming practices. This includes investing in modern technologies. Using organic farming practices and educating and incentivizing local farming communities.

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

Do not decrease from 4% only improve or maintain.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Teach people how to use water in their household properly.

21. How do you think we should prioritise allocation where or when water is scarce?

I dont know.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2830

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Our waterway systems are important to everybody in Auckland and should be maintained

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It aims to restore and enhance the Hauraki waterways in order to decrease dehydration

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Restoring Kaipara's fresh water systems health is aimed towards with this vision

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It has clear objectives and has a long term vision that will improve and maintain water systems

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

This can be considered to go under human contact

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

By identifying these issues with cultural values we can educate ourselves on the value of our waters and culture

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Other

Tell us why:

Will protect people and waterbody health from human contact

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Its harmful to aquatic life so it should be managed

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Managing temperature can protect aquatic life from further harm

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

The poorer bodies need the most help and should be a priority

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Limit food waste to limit food production

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

It will connect the fish population across more water bodies

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Going backwards is not an option

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Priorities drinking water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2831

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It is incredibly important to keep our waterways safe

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

It is a start of an effort to restore the health of kaipara water.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It helps the future.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

It should be added to the human contact values.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

It should be added to the human contact values.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

It attempts to keep people protected which is good.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Don't forget to consider swimming safety precautions and keep human contamination to a minimum.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

It is a good start.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

The health is not good but not bad.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If its toxic and causing harm then the ecosystem should be considered.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If it makes he fresh water wierd then it should be considered.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

It is nice to keep some out resources for our future .

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Focus on the two things at the same time.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

It will bring balance of the water ways which is vital

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Using water for growing croops.

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritize human consumption and growing crops.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The reason i strongly support this proposal is because our water is the most important resources in our lives we cannot survive without it.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It needs more community involvement.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Very clear limits to long term regional policy vision.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

It should go under the human contact values

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It is very ambitous but will great if implemented and actioned.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Would be good if the proposal is implemented well.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Would be good if the proposal is implemented well.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Would be good if the proposal is implemented well.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Definitely especially as Auckland has been faced with adversity this year.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, all our waterways should be added as a valued amenity.

7. Do you have any feedback on the proposed environmental outcomes?

If proposed environmental outcomes are positive and put in place well,

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Keep developing the best of the best. Always consult and deliberate with mana whenua keeping the culture alive and at the forefront.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

All waterways whether beaches, lakes, rivers, streams, waterfalls should use the swim safe processes and be safe for all to enjoy.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Baseline measures are a good level to start but always need to increase from the baseline.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

If our beaches are not 100% then can only presume our rivers, streams and lakes are the same.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Most definitely as we dont want those metals to cause any more damage.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Manage the discharges from concrete and road surfaces. Out water temperature must be managed so do not harm the aquatic life in the waters.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Maintain state of waterbodies, action ambitious targets but also be open to change.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Kai security immediate action. Vege growth to enhance food security.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Reasonable, action be implementing.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Keep positice discussions with private land owners to gain permanent access.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Allocate family and accurately.

21. How do you think we should prioritise allocation where or when water is scarce?

Maximise when levels are up and prioritize when levels are scarce.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2834

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I support the direction as fresh water health is important to everyone and should be protected by degradation

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   To protect the fresh water systems of Hauraki

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

By restoring the health of the fresh water systems within Kaipara, this will in turn help community that use the waterway

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

The long term vision seem to be in sight by accomplishing the short term goal of the vision statement for Manuaku FMU

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Can go under human contact

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Can go under human contact

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

By taking into consideration and acknowledging to keep the mana whenua, it will result in a better future for our waters in Auckland

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

By having these standards we keep people safe as well as keep human contact to a low

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Shows me the area of improvement

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Still has problems we need to improve on

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Its toxic to aquatic life

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

This can help aquatic life and protect them from harm

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Have cut backs of food production by minimizing waste

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Good things to focus on

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Will create connections between water bodies that fish can travel to

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking water is prioritised

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2835

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It look's to protect our water resources that we use and our future generations will use

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Looks to restore the health and quality of the Hauraki waterbodies so they can be used

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Collabs with local communities

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

long term

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Its good to keep that best of the best at the current levels

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We rely on fresh water resources so they need to be protected

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Looks at the restoration of the health of the Hauraki waterways

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

These waterways in Kaipara require restoration as people rely on them

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Looks to restore and improve the health of the Manukau waterways for present and future generations

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Looks fine

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

We should focus on the poor water bodies them move on to the already good water bodies

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Minimise good waste

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritise drinking water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2837

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Because maintaining and improving the health of our fresh water systems is vital for our own health.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   This is a good collaboration effort to further develop the proposed vision.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

i think it looks good ideal for restoring the health of kapara fresh water systems.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It has a straight forward goal and is set in place with long term efforts in mind.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Because it goes towards human contact.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Because it goes towards human contact.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

I think that this approach is ideal to keep manawhenua at its peak and best.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Human contamination should be kept to a minimum.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

I think its a good idea because having a baseline is a good beginning to influence change.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Some water ways are heavily contaminated whilst others are fine.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Because it will help this wild life thrive without any issues caused by those morals.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Could harm aquatic animals of life through heat regulation.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Prioritizing looking after and preserving the health of our fresh ecosystems will result in a better future for our environment.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Food production should be spread throughout the country.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

The consideraion of both farm management and water process is a good approach.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Prioritization of flow of fish will use to measure water way health.

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   This will lead to the protection and enhancement of our water resources which we rely on

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Present and future locals of Hauraki rely on these waterways so they need to be protected

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

This vision looks to restore the unhealthy aspect of the Kaipara waterway with help from the locals

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Present and future locals of Manukau will depend on these waterbodies so they need to be protected

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

should be considered human contact

7. Do you have any feedback on the proposed environmental outcomes?

fine

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Its good to keep the better water bodies at their current levels

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Contamination should always be kept at a minimum

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Good at informing the reader of the state our freshwater bodies are in

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Area that can improve

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Increase the health of the ecosystems

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

You should manage the temperature as it will reduce the harm the aquatic life will receive

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

We should prioritise the poorer water bodies as they need the help the most

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Balance food production across NZ

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All good focusing points for achieving the overall goal

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Fish cannot travel between different water bodies safely

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We shouldn't be going backwards just because of national standards

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Collaboration with communities to find middle ground

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2839

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   These waterbodies that people depend on should be protected and maintained

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Other

   Tell us why:

   Collaboration with local communities is great to achieve vision

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Disagree

    Tell us why, and if you think there are other considerations we should include?

    Doesn't seem worth it

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I support this direction because our fresh water systems are important for our health as well as our ecosystems

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   By collaborating as a community to identify and acknowledge the vision

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

This vision seems to improve and maintain the betterment of health of water systems within Kaipara

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

This long term vision will be seen through progressing with clear tasks in view

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Resilence can be categorised within the already existing value of human contact

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Other

Tell us why:

Amenity can be categorised within another already existing value (human contact)

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

This approach is ideal to maintain manu whenua taonga as good as it can get

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Good at informing me of the health of our waterways

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

still has problems

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Toxic to aquatic life

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If temperature can cause harm to aquatic life then it should be controlled

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Poorer water bodies should be a priority over our already good ones

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

using different sources of water to value plants

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All should be considered to achieve vision

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Don't go backwards

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Every household use methods to save water

21. How do you think we should prioritise allocation where or when water is scarce?

drinking water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2841

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The protection of our fresh water bodies that we rely on and important so present and future generations are able to be there

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   This vision looks to restore and improve the health and quality of fresh waterways in Hauraki that people depend on

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

I think the collaborative efforts of locals is great

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

The health and protection of these waterways is important

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

If these water bodies are the most valued then they should be prioritised

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Still has a lot of problems that need to be fixed

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

It caused harm to the aquatic life

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If it harms aquatic life then it should be managed

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

We should look to improve the poor water bodies before improving the good ones

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Minimise food waste so it doesn't need to be grown more often

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Fish need safe passage

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Going back shouldn't even be an option

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2842

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The proposed vision for freshwater management align with the goals outlined in the NPSFM providing a clear roadmap for the sustainable future of Aucklands water bodies

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   The vision for the FMU recognises the challenge of urbanisation

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Mentioning increased demand for ground water and considering future challenges shows forward thinking

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

This vision shows a unified and comprehensive approach to freshwater management

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

It should be considered under human contact

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

It should be considered under human contact

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

It should be guided by the deep knowledge of the taonga kept by mana whenua

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Stricter standards will allow for safer and cleaner water healthier community

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

It is good to have starting measurement in order to see improvement

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

They are alright but could be improved upon

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

They affect wildlife in our waters

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

It can be considered if it benefits our water systems ecosystems

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Cause the bad areas need more maintenance and improvement . . . more resources first (more people affected/impacted)

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

We should balance the use of water used by people for hard consumption (decrease) to improve the health of our waterways

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

It is good that these options are varied in order to increase the amount of ways to improve health of our water ways

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

it will used as safe passage for fish that is important for their protection

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

If we decrease our standards things will surely get worse as we will care less due to lack of urgency

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Educating and resource households around the limiting of unnecessary under collection and re using water

21. How do you think we should prioritise allocation where or when water is scarce?

prioritise drinking water and limit water usage used on farming

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2843

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The health and safety of our fresh water resource should be maintained as we rely on them

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It contributes to a restoration of the health of Hauraki waterways.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

The collaborative efforts made by the local communities is great

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

People in Manukau need these water ways so they nee to be protected

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

I believe it falls under human contact

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

I believe it falls under human contact

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

More people depend on these water bodes so they need to be protected at all costs

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Contamination should be at a minimum

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Great at informing that reader of the state that our waterways are in

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Still has problems that can be erased

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Its harmful towards aquatic life

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

It protects the aquatic life

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Poorer water bodies need to most help before its to late

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Balance food production across NZ

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Looks fine

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We should never go backwards no matter what

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2852

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Consider cultural and historical aspects.

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Consider emergencies and prioritize quota holders for emergency situations, such as hospitals and fire departments.

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Maintains the health of the water resources we rely on.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Aims to restore the health of the Hauraki waterways and protect it from further contamination.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Other

Tell us why:

I like how your working together with local communities.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Long Term Vision.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Falls under human contact.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We depend on these fresh waterways so they need to to protected.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   aims to restore the health of waterways in Hauraki

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Aims to restore the health of waterways in Kaipara

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Aims to restore the health of waterways in Manukau

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Looks fine

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

More people value these waterways so this needs to be protected.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Worried about human contact

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Protects the aquatic life from harful substances.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

By limiting food waste.

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We should not be going backwards

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Work in the communities to reduce.

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritise drinking water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3293

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We rely on our fresh waterways so they need to be protected and maintained

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Looks to restore to improve the health of Hauraki waterways for present and future generations.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

The collaborate efforts made by the locals is good to try and achieving this vision.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

This vision looks to restore the health of Manukau fresh waterways which people rely on.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Falls under the human contact value.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Should be under human contact.

7. Do you have any feedback on the proposed environmental outcomes?

Looks great.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

People value these water bodies more.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Swim safety is important.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Shows the areas which can be improved in our waterways.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

There is still room for improvement.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Aims to protect our aquatic life.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Temperature should be managed as it comes harm to aquatic life.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

We shouldnt improve our good water bodies but instead help the poorer ones.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Limit food waste to allow for more cut backs.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All methods that contribute to the overall vision.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

If it harms fish then it should be removed.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We should always try to fill the potential of our waterways.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Limit farming water and prioritize drinking supplies.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3294

   The health of our waterways are important as we rely on them to survive.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It looks to restore the health of the Hauraki water bodies so they can be used.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

I like the collaboration between the local communities.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Should fall under human contact.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Falls under human contact.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   As fresh water is an essential it should be maintained and protected.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Collaborative efforts made by each community to realise the vision.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

The vision towards the restoration of the Kaipara fresh water systems.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It has long term vision and has clear objectives.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

This can go under an already existing value (human contact)

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

This can go under an already existing value (human contact)

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Importance goes towards keeping the best shape of mana whenua in order to keep Auckland waters progressing towards better whau.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Minimal human contact with our waters.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Worried of human contamination.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

It will help the aquatic life thrive.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Temperature aquatic life so it should be managed

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

We need to prioritize our water bodies that require more help over the already good water bodies.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All important to look at to achieve goals.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

These barriers need to be removed to provide safe passage.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Work in the community

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritize drinking and limit farming.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3315

Submitter details:

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Our water resources are important as we rely on them, so they must be protected to sustain ourselves.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   The vision looks to restore the health of the water bodies that others use and value.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

It is vital for restoring the Kaipara fresh water system health.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It has a short term goal that alligns with the long term vision.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Good under human contact.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Good under human contact.

7. Do you have any feedback on the proposed environmental outcomes?

Looks good.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Keep manawhenua at its peak is vital for progress towards the long term vision of having healthy and clean waterways.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It will reduce human contamination as well as keep people safe

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Helped us undertand the save our waterways are in.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Has not reached its full potential.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Leads to the harm of aquatic life so it needs to be managed.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

It will lead to the survival of more aquatic life.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

You should help the worse water bodies before focusing on the good ones.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Have people waste less food so there can be cutbacks in food production to improve the water quality

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All contribute to overall goal.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

It will create passage way for fish and bring more connections between other water bodies.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Always look to fulfill the potential of each water bodies.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Educating communities on household methods to save water.

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking water is the top priority.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3317

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Without our water resources we wouldnt be able to survive so they should be protected and maintained.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   This vision aims to restore and reserve the health of the fresh water ways so they can be used for many things.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

This vision aims to restore and enhance the health of the Kaipara waterways so that the communities can be used by the community.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Its straight forward and got in place with long term effects in consideration.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Leans towards human contact.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Leans towards human contact.

7. Do you have any feedback on the proposed environmental outcomes?

Its good.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

It is important to keep manawhenua taonga at its best.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Stricter standards will benefit both the ecosystem and people.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Very informal and helpful

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Still needs to improve.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Helps the aquatic life.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Will lead to more healthier and stronger aquatic life and ecosystem

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

We should level out the health of ever water bodies looking to improve our already stronger ones.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All options can add to the overall goal.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Good as long as it is implemented and actioned

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   As long as visions are implemented and actioned

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

As above

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

As above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Because Aucklanders are resilient - look at the events of 2003

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes because our rivers, lakes, waterfalls are an amenity we need to protect

7. Do you have any feedback on the proposed environmental outcomes?

As long as the proposal are achieved and implemented

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Consult, talk and listen to iwi, mana whenua for positive + respected direction

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Safe swim sites need to be implemented even around our freshwater sites, basically where there is water for recreational activities, however it should be restricted where outside influences will contaminates the waters.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

As long as the starting baseline has movement from there and doesn't stay in one position

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

If our beaches haven't been 100% I can only presume our rivers, streams and lakes are the same - high quality

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

As long as these metals don't become hazardous and harmful

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Definitely - we need to protect and change how the road, concrete discharges effect our streams

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Kai will always be needed for whanau therefore it needs to be slighty higher but SVG is important as marries with kai

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Consult listen discuss respectively and compromise to ensure access is permanent

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Recognise high usage reduce moderately so it is not noticeable and continue to a suitable level

21. How do you think we should prioritise allocation where or when water is scarce?

Again prioritise by where it is being used more and make changes

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3319

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Implement and action

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Visions are implemented and actioned

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Same as above

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Same as above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Aucklanders are resilent especially with the events of 2023

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes our rivers, lakes, waterfalls are an amenity we need to protect

7. Do you have any feedback on the proposed environmental outcomes?

Proposed enviroment are achieved and implement

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Consult, discuss and listen attentively to iwi mana whenua for positive and represented direction

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

All waterways whether beaches, lakes and streams, waterfalls need to have safeswim restrictions

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

As long as baseline has movement from there and doesn't stay in one position

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

Beaches haven't been 100% so can only presume our rivers, streams and lakes are the same - high quality

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Need to manage these metals do not damage our urban streams

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Yes because we don't want our roads/ concrete to increase the damage to our waters

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Food/ Kai security just then build our vege growing to compliment our kai

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Consult listen and discuss respectively with compromise to ensure access is permanent and recorded

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Recognise high usage and reduce moderately at each time so it is not noticeable

21. How do you think we should prioritise allocation where or when water is scarce?

Recognise high usage and readjust when water is source

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3631

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Good for environment

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It works

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Save our waters

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

Why not?

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Other

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Its good to maintain the health of the water and protect it, especially for our future generation to enjoy.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   I agree but also see it could use a way to collaborate approach of the community to reach its good and succeed.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

This vision has clear community effort to restore the health of the Kaipara waters.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

I can see a clear for the long term.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

I feel like this could fall under another value

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

I feel like this could fall under another value

7. Do you have any feedback on the proposed environmental outcomes?

No outcome to reduce the harm from animal farming. Thats important.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Especially agree to keep our mana whenua taonga protected.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Stricter standards are absolutely needed. Keep our waters clean and safe.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

The summaries has contribute to a well informed assesment of our freshwater resources

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Lots of areas have been identified then we can improve but good to know plans are in place.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Including temp as a measure is crucial and we already reconize it has a significant impact on the health of our aquatic life.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

I agree. Recognizing the necessity for robust efforts important in this proposal to address the existing challenges.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

We need a sustainable of agriculture activities and environmental conversation efforts.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Bitg tools and necessary to be effective in managing activities impacting water in rural and urban areas to ensure a holistic and approachable approach.

17. Are there other management options outside of those listed that you think we should consider?

We need to promote sustainable agricultural practices.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Use a balanced and equitable approach when allocating resources and consider the specific needs and priorities.

21. How do you think we should prioritise allocation where or when water is scarce?

Educate the community to be water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3637

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Our wai is the most important resource - we cannot live without it. It should be prioritized and the direction/vision to take care of it is important.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Should include urban community efforts to improve.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Good reference to a collaboraive community approach to improve the mauri of kaipara moana.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Good links o long term Regional policy vision.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Great direction but needs to more from proposal to action

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   As long as visions are implemented and actioned

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Same as above

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Same as above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Aucklanders are resilient so good to add this value

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Our streams, rivers, waterfalls and lakes are our amenity and should be enjoyed by all

7. Do you have any feedback on the proposed environmental outcomes?

As long as the proposed environmental outcomes are achieved

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Consult iwi/mana whenua - such a lack so needs to see more of the talks & action happening more

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Safe swim should be in place for all water areas albeit beaches, streams, lakes, rivers etc

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

As long as the baseline has movement to become better

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

Beaches are not 100% so presume all waterways are the same

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Manage well so they don't become worse

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Manage road concrete discharge so it doesn't increase temp of our waterways

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Food/ kai security first then build the vege growth to compliment kai for whanau

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Always consult and discuss respectively - compromise to gain permanent access in private areas

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

First recognise high usage, moderately reducing water allocations

21. How do you think we should prioritise allocation where or when water is scarce?

Again first recognise high usage and then readjust where water is scares and make necessary allocations to min imum

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3639

   Tell us why:

   Visions are implemented and actioned

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Same as above

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Same as above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Aucklanders are resilient especially with the events of 2023

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes our rivers, lakes, waterfallls are an amenity we need to protect

7. Do you have any feedback on the proposed environmental outcomes?

Proposed environment are achieved and implement

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Always consult, listen and discuss attentively with iwi, mana whenua and communities for positive represented directions

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

All waterways whether beaches, lakes and streams waterfalls need to have safe swim sites

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

As long as baseline movement to become better

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

Beaches are note 100% so can stay only presume our waterways are the same

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

These need to be manage so they don't become worse

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Yes we don't want our roads/ concrete discharge to increase and damage the waterways

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Food/ kai security first then build our vege growth to compliment our kai

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Consult, listen and discuss respectively with compromise to ensure access is permanent where it is recorded

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Recognise high usage and reduce moderately

21. How do you think we should prioritise allocation where or when water is scarce?

Recognise high usage & readjust when water is scare

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3643

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   As long as proposals don't remain as that but action is implemented

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   As long as the proposed vision is implemented where the HFMU is preserved and protected, it will thrive for generations to come

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Same as above plus involve iwi/ communities more

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Same as above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes most definitely - look at events Auckland has endured this year shows we are resilient in the face of adversity therefore it is an important value

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Proposal of environment outcomes are good if achieved and implemented

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Consult and talk to iwi/ cummunities

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

As long as it is adhered to it will be achieved

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

I know the waterways, streams and lakes haven't been 100% healthy so unless its changed to be better it will get worse

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Ensure these metals don't cause more danger to our water streams

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Of course especially if road surfaces and concrete surfaces are causing our streams to get warmer - wont be good for aquatic & habitat quality

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

What does "long term" targets look like? We need to keep and increase the waterbodies that are doing well and keep that level however work to improve areas that are poor

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Kai security is important as that is what is needed immediately but our vege growing will enhance but it needs to work together well

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

As long as it is managed well, kept on top of and not leave to be complicated

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

As long as you consult iwi/ private owners respectively and propose access permits if will wok

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

prioritise and recognise high usage and notify whoever of the reduction - set limits then re-allocate if possible

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritise the importance and need, then always notify whomever and limit/ date or record then allocate

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Directions is important to protect our waterways, freshwater and eco system

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   As long as it is preserved and protected then that is positive in the years to come

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Same as above and involving iwi/ communities

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Same as above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes because we have faced adversity in 2023 and it will become more or a need in years to come

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes because it is part of Auckland & who we are

7. Do you have any feedback on the proposed environmental outcomes?

Proposals are important if it is followed by action and not" only a proposal" that sits unattached

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

More collaboration and consultation with mana whenua, iwi and communities

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

I agree to use the safeswim sites but to make it more prominent and definitely restrict and implement strict standards to manage contamination in these cachments

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

As long as modifications and improvements are achieved immediately to keep our rivers/ streams and lakes healthy for all to enjoy

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

Unsure as we know parts are unsafe so can't fully comment

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Of course but these metals should be managed so it doesn't cause further damage to our urban streams

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Needs to be managed to protect life in our streams, lakes and waterways

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Both areas are vital - Obviously kai is important for whanau therefore that needs to be prioritised but also we need to ensure the vegetable growing areas are managed well & safe

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

As long as it is managed well, kept on top of and become compliant it will be good

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Respectively consulting with mana whenua and areas that are in private lands but also setting a precedent for future catchments & access

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Always prioritise the most important tasks to the least important. Review current consent holders & make changes

21. How do you think we should prioritise allocation where or when water is scarce?

Allocate appropriately & oversee based on the resources at, preserve & limit as necessary

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3654

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It is crucial to protect our fresh water sources and ecosystem

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Preserving and restoring our Hauraki FMU is vital . ensuring its legacy for the next generation

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Its crucial to engage local communities, including iwi and collaborate with mana whenua for active involvement

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

We need to support and keep our FMU thriving for our next generation

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Resilience is important as we have seen in 2023 it is important to keep

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, we should include amenity as a part of our values in the Auckland Unitary Plan

7. Do you have any feedback on the proposed environmental outcomes?

Proposals are welcomed as long as they prioritise positive outcomes rather than serving the interests of power or exclusively benefiting the wealthy

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Needs to be a lot more collaboration with mana whenua iwi, communities and not the ones at the top making decisions when no consultation has taken place

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

They are primary contact site & introduce stricter standards to manage contamination

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Benefits modifications and improvements should be made right away after they are identified

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

Unsure but media has advised waterways are not 100% safe

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

It needs to be managed to a make sure it does not do much damage

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Climate change, there are going to be many more changes so it needs to be managed

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Our standards need to be more important to always not at least

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Both are very important, should be working more together than one more than the other

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

We need to make sure all areas are kept well

17. Are there other management options outside of those listed that you think we should consider?

Join with iwi, mana whenua to ensure access is available respectively especially if sacred ground

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

As long as consultation with mana whenua is adhered to what is important

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

It will function as long as we safeguard, uphold and preserve regional standards

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Prioritise important to least, look over current consent holders, make changes if necessary

21. How do you think we should prioritise allocation where or when water is scarce?

Allocate appropriately and based on the resources at hand, preserve & limit as necessary

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3658

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The restoration and protection of these waterways is important so that our present and future generations are able to live and thrive.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   The health of Hauraki fresh water systems are protected and restored so it can be used for recreation, drinking and by aquatic life.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

It looks to restore and protect the health of the Kaipara waterways so the local communities can thrive.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Water demands are rising in Manukau and the aquaticnight not be able to supply these needs.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

I dont think the water bodies should become resilient. Hazards shouldnt be a threat in the first place and should be eliminated.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

I feel like it falls under human contact

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

The most outstanding water bodies should be protected and be kept the "best of the best"

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

If they aim to protect the health of the water and increase safety of swimmers then Im not against stricter standards.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Well informed assessments of th fresh water resources.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Worried about human contact

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

These materials should not be in our waterways harming the ecosystems with their aquatic life.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If temperature can harm the aquatic life then it should be managed to protect them.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Ive should help those in need before improving our own areas.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Managing food waste so less food is needed to be grown

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All these methods should be considered as they all help the health of the waterways

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

This would allow safe passage of fish.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Our standards should always be maintain even if they are outstanding. We should never go backwards.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Having the community use household methods that help decrease their water usage.

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritise the drinking water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3662

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I think the protection of the water resources we rely on is important and shouldnt be taken for granted

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It restores the aquatic ecosystems in urban and rural rivers and streams in Hauraki.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

It allows the local communities to collaborate to achieve this vision.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

There are a lot of health problems with the fresh water systems and people rely on them.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

It falls under the human contact value

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

People should be able to enjoy these water bodies but also not damaging them

7. Do you have any feedback on the proposed environmental outcomes?

Looks fine.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Outstanding waterbodies should be kept at their levels of health.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

If it decreases the possibility of contamination in the waterways then its great.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

It falls under the Human Contact value

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If it harms the aquatic life and ecosystem of the water then these materials should be removed and managed

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

It would protect and allow more fresh water life to survive and thrivein their ecosystem

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

I think waterways which one more desperate for improvement should recieve help before looking to improve healthier areas.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Try to see the food waste and how much the food supply can cut back.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

These methods are all good ways to help our water ways health and quality

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Safe passage ways for fish are important for thier survival.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

I dont think we should downgrade our waterbody quality just because of the natural standard

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3664

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It should always protect our waterways so it doesnt effect our health negativity.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   I don't know

   Tell us why:

   Get more community involved in this.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

It makes an effect to restore the health of thier water.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It helps the future.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Add it to the human contact values.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

add to the human contact values.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

It keeps the people protected which is amazing.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

I think the sites will help improve the waterways

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Your summarizes really explained what the health state is.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

It is going to get better

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

I think it will help but I dont know.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If it is an issue to the fresh water ecosystem then it should be considered.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

It is good to protect our fresh water resource for our future people.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Balance the production of food all across NZ.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Everything should be considered

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

It will bring connection of waterways.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Absolutely not. We should always to improve our resources in any kind of ways to maintain.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3671

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It looks to protect and enhance the health and quality of our water bodies

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It aims to restore the health of fresh waterways

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Looks to maintain and enhance the water ways of Kaipara with the help of the locals who rely on them for water supply

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

clear and valid points

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

No

Tell us why:

Gulfs under "human contract"

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

Same as above

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Strongly support

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#3672

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Implement and action

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Proposal implement well

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Same as above

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Same as above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Auckland is resilient

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Waterways should be valued

7. Do you have any feedback on the proposed environmental outcomes?

Outcomes put in place

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Keep developing

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

All waterways should be safe swim sites

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Baseline good start but increase from there to be better

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

beaches not 100% presume the same worth other waterways

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

if they cause damage needs to change

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

manage or remove discharge as much as possible. Alternatively reduce

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Kai security is most important

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Keep discussions flowing positively then make or recommend changes for access

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Fairly allocate

21. How do you think we should prioritise allocation where or when water is scarce?

Maximise high levels

Minimise low levels

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3673

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

As long as it benefits all and is positive

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Always collaborate with mana whenua

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Very important and there needs to be strict standards for all to adhere to

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

To ensure these metals don't cause more damage to our urban streams

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    Both are important and could work together without one being more important than the other

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

    Positive and maintain it well

17. **Are there other management options outside of those listed that you think we should consider?**

    Listen to mana whenua

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Other

    Tell us why, and if you think there are other considerations we should include?

    Consult mana whenua

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Have a look at our existing allocations and prioritise as best can be

21. How do you think we should prioritise allocation where or when water is scarce?

Always manage fairly for all to benefit

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3676

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Does seem ambitious but not impossible definitely needs to be implemented if by 2050

   Our freshwater, ecosystem & waterways are thriving

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Important to protect even more now for our next generations

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

important esp acknowledging whakapapa/connections to freshwater, moana, mountains, whenua, mana whenua & communities. Restoration & protection to keep all healthy

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

agree with proposed vision

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

After what we have seen in 2023 people have become resilient so this is important to include as a value in the AUP

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Our lakes, rivers, wetlands & waterfalls should be accessed as part of our recreation activities. We need to value these at all times.

7. Do you have any feedback on the proposed environmental outcomes?

Ensure these proposals are followed through and the outcomes are see and documented accurately

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

We need to recognise mana whenua and ensure Maori cultural values are implemented in decisions to do with all waterways

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

All public areas should be safe sites and visible signage should be installed so public are informed

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Baseline measures are positive but once findings are recognised, action to rectify need to be carried out

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

From what I've heard and seen, it's not 100% healthy

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If these two metals cause damage it definitely needs to be managed

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Yes it's important to manage temperatures in this plan and make sure if it gets worse action needs to be done now

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Always good to maintain but action ambitious targets or start to implement positive changes

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Both are important and more in tandem with each other

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Reasonable

17. Are there other management options outside of those listed that you think we should consider?

Collaborate & listen to mana whenua and iwi, be respectable and listen before action-consultation in all decisions

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

Engage and move together with mana whenua to get best solutions

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Prioritise where its needed

Reduce where needs to

Ensure areas that help all people, environment etc. benefits everyone

21. How do you think we should prioritise allocation where or when water is scarce?

Maximising when levels are high and minimise when low

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3681

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Very important to protect our freshwater & ecosystem

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Very important to protect

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very important to have our local communities involved, engaging with iwi communities and mana whenua

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

We need to support and keep our FMU's thriving for next generation

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Resilience in the face of adversity is important and we have seen that in 2023. Its an important value to keep

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes we should include amenities as part of our values in the AUP

7. Do you have any feedback on the proposed environmental outcomes?

As long as the proposals offered are for positive outcomes and for power or the rich make money off this then it is good

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Need more collaboration with mana whenua, iwi, communities and not those at the top making decisions when no consultation has taken place

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Agree that safeswim sites are primary contact sites and introduce stricter standards to manage contamination

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Positive once identified then improvements and changes should be implemented immediately

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

Unsure but media has advised our water ways are not 100% safe due to the amount of rainfall/ sinkholes that have taken place this year

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Because it needs to be managed well, to ensure it does not do any more damage

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Climate change - there are going to be many more changes so it needs to be managed

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

We need to lift our standards to be more important to "always" not "at least". Everything is changing and our frame of mind needs to as well

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Hard because both are important, should working together rather than one more than the other

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

It is reasonable, we need to ensure all these areas are maintained well

17. Are there other management options outside of those listed that you think we should consider?

Collaborate always with iwi, mana whenua to ensure you have access respectively esp if sacred ground

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

As long as consultation with mana whenua is adhered to that is important - relationship/ collab

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

As long as we protect, maintain and retain regional standards it will work

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Prioritise important to least. Review current consent holders & make changes if necessary

21. How do you think we should prioritise allocation where or when water is scarce?

Allocate accordingly - manage accordingly to what is available & maintain when thriving & restrict where needed

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3683

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It's important to maintain the health of fresh waterways and protect from degradation

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

It helps restore and improve the healthiness of the fresh water in Kaipara

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Includes long term regional policy vision

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

falls under "human contact"

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

keeping these water bodies protected is great as they are the "best of the best"

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Contamination should be at minimal

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

It's a beginning

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Worried about human contamination

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

It harms aquatic life

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Balancing food production across the country

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We should let the health of our water systems decrease

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Growing food and drinking water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3684

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   get more people involved

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

more people are included so it's good

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

very good

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

It's fine

7. Do you have any feedback on the proposed environmental outcomes?

It's great

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Good

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

its good to improve anywhere when possible

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Carry on to make it better please

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

its pretty good, keep ongoing to develop these through please

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

I strongly support because the clean water don't need to be improved even more when there's unhealthy water not getting any attention

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I don't know sorry

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

very good

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

safe passage for fish is good

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

don't go any lower than 4%, that's very bad

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

teach the community more

21. How do you think we should prioritise allocation where or when water is scarce?

I don't know

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3685

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Since its made with stopping anymore degradation, I strongly support

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   involve the community more to the proposal

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

because the community was involved

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

They have many good goals for the future

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

I agree

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

using the ecological approach to protect is important

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

its important for the water and people to be safe

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

I'd like to think this is just a starting point and they need to develop more

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

it's okay but still has room to improve a lot more.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

we could use policies to decrease pollution

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

find a fair/peaceful solution that will balance water health and food production

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

these are good

17. Are there other management options outside of those listed that you think we should consider?

just remember to consider the future generations

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Making safer passages for fish is very important

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

I agree with this but we need to get more people to stop wasting clean water on unimportant things like washing cars, etc

21. How do you think we should prioritise allocation where or when water is scarce?

We should mostly prioritise lots on water for households

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3686

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Very good to see what is proposed in the years ahead - long term goals and vision. It also needs to be flexible with the changes of climate as well

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   As long it is implemented and followed through. Always good to have a proposal but need to see it come to fruition

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

I agree but it need to be implemented and not only a proposal that goes no where

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

As per the Kaipara FMU & Hauraki FMU need to see the proposal come to fruition

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Definitely need to have resilience as a value especially with the hazards and climate change we are experiencing now

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Definitely because we value accessing our rivers, lake and waterfalls - our waterways are extremely important to us

7. Do you have any feedback on the proposed environmental outcomes?

As long as proposals for our environment are positive and all outcomes are for all people no matter who

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Always need more input from mana whenua/ iwi allowing communities to be involved to consider decisions that are beneficial for all

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Keep safeswim sites primary contact sites and those ones that are not safe should have strict access

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Good to have a baseline but need to keep them above baseline and ensure our waterways are thriving

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

I think they need to be improved and kept at a good/great baseline level

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Most definitely - these need to be managed so it doesn't get worse

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If the temperature effects our aquatic life then it does need to be looked after

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

As long as the ambitious targets to improve the health of waterbodies where they are poor are at least achievable

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Both are very important, should role in tandem could boundaries be changed ? this allows growth of our vegetation and improvement of water quality

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

Reasonable as long as maintained well

17. Are there other management options outside of those listed that you think we should consider?

Collaborate, listen and discuss with mana whenua/ iwi and communities ensure integrity is upheld

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

Consult with mana whenua/ iwi and communities listen well and consider all suggestions

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

As long as it protects, maintains regional standards it will involve

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Prioritise the important areas Review current consent holders + make changes

21. How do you think we should prioritise allocation where or when water is scarce?

Allocate accordingly - manage availability and restrict where necessary

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3687

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It seems ambitious but would be great if it is implemented and actioned

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   proposed vision would be positive if implemented

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

same as above

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

same as above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Definitely. Especially with what Auckland has faced this year

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes definitely all our waterways should be added as a value

7. Do you have any feedback on the proposed environmental outcomes?

As long as proposed environmental outcomes are positive and are implemented well

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Keep developing the best of the best and ensure Maori culture is not lost. Always develop. Recognise Mana Whenua and build on the values

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Any waterways should use safe swim and areas that are not should be recognised and changed to implement and include safe swim programmes.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Baseline measures are good however from baseline it needs to increase to ensure our rivers/streams and lakes are healthy

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

Not sure if they are healthy but can only assume that our beaches aren't 100%. That the streams, waterways and lakes aren't.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Most definitely- need to ensure these metals don't do more damage to our urban streams

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Its important to manage the temperature in our waterways and to eliminate or reduce the discharge from the concrete/roads into the waters

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Good to maintain the state of waterbodies but action ambitious targets alternatively start implementing positive changes

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Kai is always important and most needed because its immediate where growing takes time as long as waterways are not affected by the discharge then it will compliment the kai

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Reasonable but needs implementing well

17. Are there other management options outside of those listed that you think we should consider?

Always collaborate and listen to all including mana whenua, iwi and communities

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

As long as there is positive consultation and discussions with those private areas especially mana whenua to find balance and agree on a good and positive way for access

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

As long as its prioritised fairly and advised fully

21. How do you think we should prioritise allocation where or when water is scarce?

Maximise when levels are high and reduce when water is scarce

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3690

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It is needed especially protection of our freshwater/eco systems

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Very important to protect, restore and allow the Hauraki FMYU to thrive especially for the next generations to come

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very important for local communities being engaged in restoring and protecting our Kaipara Moana. Mana Whenua/iwi/communities need to collab together

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

We all need to play our part in supporting the direction for all the FMU's and restoring it to thrive in years to come, for our generations to come

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

2023 saw Auckland become resilient in the face of adversity. Preparation, readiness and put actions in place now so when those times of adversity arise we will be somewhat ready

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

2023 has shown us that our amenities are valuable and we cannot become complacent

7. Do you have any feedback on the proposed environmental outcomes?

As long as proposals offered encapsulate all peoples esp mana whenua, environment, livestock have access where possible without damage.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Mana whenua, values culture, ecology, environment landscape and recreational values should always be adhered to by identifying waterbodies are recognised

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Areas that are open to public should always be safe and if they are not then this should be prioritised

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Baseline measures are positive but once findings are identified then implementing changes + improvements should start immediately

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

Not entirely 100% however since the sinkholes the waters in TM have not been very safe. This needs to be rectified immediately

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

These two metals can be toxic to our urban streams, there needs to be management around these metals so they don't cause even further damage to our streams.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Most definitely- its obvious that if temperatures rises it causes damage so if there are areas where changes can be made to eliminate this then it must be done

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

with now climate change if affecting weather changes that are affecting our waterbodies, there needs to be standards that are heightened to more than "at least" we need to life the standard both plans and action

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I believe both are important and can work in tandem with each other because both are extremely important to Aucklanders. Balance is needed to ensure it can work in tandem

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Proposal is reasonable to ensure our land, waterways and freshwater are maintain to the highest standard esp for generations to come

17. Are there other management options outside of those listed that you think we should consider?

Collaborate with mana whenua and iwi to ensure we tread respectably on sacred and cultural land

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

It is important but engaging and working together with mana whenua/ iwi to come up with best solutions to remediate existing barriers and implement more effective barriers where needed

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Protect, maintain and retain existing regional standard at a higher level. Very important

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Prioritising water allocations - most important to least review current consent holders where necessary and reduce once the review identifies areas that can be fairly reduced

21. How do you think we should prioritise allocation where or when water is scarce?

'When water is scarce due to the dryer periods

Allocation needs to occur before that happens or at least reduce damage before it gets worse.

How

- prioiritising

- masimising when our levels are high

- minimising when scarce

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Improve on keeping our freshwater clear from human behaviours that have impact on our waterways.

Restrictions - limited access - seasonal educating not only Aucklanders but international tourists when they visit to abide by the laws and regulations - keeping our waterways clear of toxic behaviour

#3691

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The focus on Te Muri o te wai in the vision from the Auckland water strategy sets a strong foundation for giving effect to the more ambitous Te Mana o te Wai demonstrating a commitment to cultural and ecological well-being.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   The vision address poo ecosystem health in urban and rural areas.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

The inclusion of community engagement in the restoration and protection of water bodies reflect commitment and ensures that local communities contribute to the restoration of Kaipara water bodies.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

By addressing water demand exceeding sustainable limits the vision recognizes the need for balance between human needs and health of waterways.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

It can be put under as human contact with the waterways/water bodies.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Other

Tell us why:

It can be put under as human contact with the waterways/water bodies.

7. Do you have any feedback on the proposed environmental outcomes?

The outcomes an ideal as they address critical aspects of freshwater arrangement in Auckland.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Protecting ecological processes

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

being more strict with standards means that our waterways and waterbodies will be safer and cleaner.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

This will allow for better assessment for progress of the journey

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Areas have been highlighted in order to improve our waterways as some places are better than others.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

They could harm our waterways

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If the temperature benefits the aquatic ecosystem then it should be considered.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Prioritizing most affected areas first will show most progress/restoration.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Are good ways to improve waterway conditions.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Can be used as a way of measure the quality of waterways and progress

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Standards should remain high in order to hire as improved future.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3692

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I want to stop future degradation and protect the Te Mauri e te iwi

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Need more urban community inclusion/collaboration efforts to realize the vision.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

The vision leans towards in collaboration community effort to restore the health and Mauri of kaipara moana.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Its a very clear vision with good objectives. And takes into account of long term regional policy vision.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

It can be considered as human contact/contamination

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

The aquatic wildlife could be influenced by temperature

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

It will show more progress as it has more work needed to be done.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Slowly limit back water supply used for food until water quality in improved to a certain point then slowly increase water intake.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

This method can be used to measure progress and cleanliness of our waterways.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Increasing standards = Increasing chances for a better future.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I think its a priority to protect fresh water resources as its essential to everyone.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   I think it needs more reference to the urban community collaborative efforts to realize the vision.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Its good that it leans towards restoring and improving the health of Kaipara Moana

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Its a very clear vision and thinks long term.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I support this plan because it is going to protect our waterways.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   I don't know

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

It moves an effort to restore the health of Kaipara water.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It thinks about the future generation.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   get more people into it

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

good because lots of people are involved

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Very good goal so rescue whanau

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Outcomes are good

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Protection with ecologic approaches is good

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Keep water clean and safe for people to swim in safe is good

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Its at a strong point so far

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Areas definitely need improving but algoods

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

We need to make less pollution through policies.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Yes. If you guys are aware of it

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Keep the good water clean but focus more on the poor water.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Find something where everyone can meet in the middle.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

good

17. Are there other management options outside of those listed that you think we should consider?

Prioritise the future outcome over the profit from agriculture.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Prioritizing safe passages for fish is very important

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Stay above 4%

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

I agree but we still need to do more about it.

21. How do you think we should prioritise allocation where or when water is scarce?

Use grey water for farming and animal production instead of clean water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3712

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   preserving our fresh water sources and ecosystem is imperative

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Ensuring the preservation and restoration of our Hauraki FMU secures it heritage for future generations

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Active involvement and collaboration with the local communities, including iwi and mana whenua are essential for meaningful engagement

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Our FMU's must be maintained and supported in order for the next generation to succeed

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

We have seen in 2023 how crucial it is to be resilient in the face of difficulty. Maintaining this is crucial.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

As long as suggestions made are to benefit results than to give power.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Work with mana whenua - need more collabs

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Mostly do not support

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    Difficult since both are significant and out to collaborate rather than favor one over the other

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

    Good

17. **Are there other management options outside of those listed that you think we should consider?**

    Collaborate always with communities

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Other

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

As long as we protect it will work out

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Examine our current allotments and determine the best possible priority

21. How do you think we should prioritise allocation where or when water is scarce?

Manage accordingly to what is available

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3719

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It is critical that we protect our freshwater ecosystems

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Vital to preserve and repair our Hauraki FMU. It is about saving for the coming years

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Incredibly vital that our communities participate and interact with iwis, communities and mana whenua

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

for the next generation, we must continue to sustain and grow our FMU's

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

2023 has demonstrated the importance of resilience in the face of adversity. This is a valuable principle to uphold.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

We should include amenities in our AUP as one of our values

7. Do you have any feedback on the proposed environmental outcomes?

Is is good as long as the suggestions made lead to beneficial results

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Co-operate with mana whenua at all times

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Vital and everyone needs to abide by any strict guidelines

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

To make sure the metals don't harm our urban stream anymore

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Each being significant and capable of co-operating without taking precedence over the other

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Hear the mana whenua

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

Consult mana whenua

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Examine current allocations and set the highest priority

21. How do you think we should prioritise allocation where or when water is scarce?

Always manage for all to benefit

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3720

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Stop further degradation

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   We need to involve more of the people in our community into the proposal

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

better than the first

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

amazing

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

I dont think so .

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

outcomes are agreeable

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Keep everyone clean and safe

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

still needs to improve

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

needs improving but its good so far

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

pollution should be decreased through polincg

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

focus more on the bad waterbodies rather than still tryna upgrade the good ones.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

find a fair solution for farmers and you guys to meet in the middle

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Really important to think about

17. Are there other management options outside of those listed that you think we should consider?

I don't know

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

safe passages for the fresh water to salt water fish is super important

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

going lower than 4% should be unthinkable

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

teach people how to save healthy water

21. How do you think we should prioritise allocation where or when water is scarce?

just priorities healthy water for essential needs.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It's important to protect and improve our fresh water as we depend on them

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

Looks to improve & restore the health of kaipara moana

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

clear links to long term regional policy vision.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Contamination can cause damage to these sites and should be minimised.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

A little worried of human contact

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If it's toxic to bugs it can impact the ecosystem as well.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If its harmful to the freshwater ecosystem then it should be considered.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Causing more degradation is not an option for future generations

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We need to always maintain and enhance those standard for our future.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

priorities for human drinking water and watering crops.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

   Agree

   Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Agree

   Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Agree

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Needs a bit more reference to urban community collaborative efforts to realize vision.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Very clear objective.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Keeping mana whenua protected in lovely

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It is important to consider the swim safety

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

If it is a nice start

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I see the vision has involved community engagement and adds different perspectives

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   I think its specific to the areas which is good

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

I think it has good vision for the future

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

The values make the approach robust and contribute to a more meaning and culturally sensitive approach.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Should be considered

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Agree

Tell us why, and if you think there are other considerations we should include?

Much needed for the overall health of aquatic ecosystems we need to prioritize this.

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Yes

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   I see it in away that it protects the fresh water systems.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It has a vision that can go into the future.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

It goes in human contact values

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

ways to do that but always.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Its a start

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Just needs to improve a bit

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Balance food production across the region.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#3760

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I think the protection and enhancement of the health of our fresh water supplies is important we rely on it

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It restoring the health of the Hauraki Gulf so it can be used by the present and the future generations

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Aims to restore the health of the Kaipara waterways and collaborates with the communities fresh waterways as resources

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Ambitious and aims for long term positive changes in the Manukau waterways

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Resilience falls under the human contrast value

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Amenity should fall under the human contact value

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

I feel like the best waterways should be kept a priority to keep them this way

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

If these protect the health and safety of both the swimmers and waters then stricter standards should be put in place

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Informs the reader of the health and condition of the waterways and when it can improve

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Human contact with the water ways is worrying

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Aquatic life and their ecosystems should be protected

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If the meaning of temperature helps the fresh water life then it should be considered

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

I think we should help improve the areas where they are struggling more before improving other areas

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Have people waste less food so cut backs can be made to improve the water quality

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All these methods help protect and enhance our water ways

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Fish should have safe passage across water bodies

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

I think we should always maintain the standards we are at now

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Household methods that help everyone decrease their water usage

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking water is the biggest priority

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3761

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Poor areas need more help meaning that they need more prioritization.

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

    There is no need to make the standards backwards unless we want things to get worse.

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It protects the fresh water systems

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

It tries to restore the health of Kaiparas

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Add it to the human contact values

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Other

Tell us why:

Add it to the human contact values

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

It a start which is good

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Just a little bit of improvement and it would be great

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If it infects the fresh water ecosystem then consider it

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Focus on food production.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

   Tell us why:

   Without these waterways we would have our we would have our ways of life so their health should be protected

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Protects the health of Hauraki's fresh waterways that the locals reply on

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Looks to protect and restore the health of the Kaipara waterways so they can thrive and sustain the locals

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Its important as the droughts cut back peoples water usage to ensure the water ecosystems survive

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

I think resilience falls under the human contact value

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Its good to enjoy the water bodies without damaging them

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

These waterways are important and are the "best of the best" which means they need to be protected and maintained

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It decreases the contamination of water bodies and looks to protect swimmers

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Good for informing reader of the state of our fresh water system

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Room for improvement

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Its toxic to the aquatic life and the fresh water ecosystem

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If the managing of the temperature will help the aquatic life then it should be considered

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

I think water bodies that require more help than others should receive aid first

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Finding a middle ground but slowly to not harm people

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All these methods will be improving and protecting the health of our waterways

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

This change will protect fish and their ecosystems that they are apart of

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We should always try and have the potential of our waterways filled

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Teach families methods to reduce water usage in their home

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritise drinking water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3772

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It helps the waterbodies that we rely on improve and maintain their health.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It looks to protect the waterbodies that people use and value from contamination.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

I think the collaborative efforts of the local about the use of these waterways is good to achieve this vision.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Resilience could go under the human contact value

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

amenity could go under an existing value.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Its vital to have starting points so we can measure the progress of the water journey

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Some areas have been outlined that they need improvement already.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

They should be considered if they harm the health of our waterbodies and their ecosystems.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If they should affect our waterbodies and their ecosystems health then they should be considered.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

It allows us to measure progress and also provide the fish with protection.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We should not reduce the % because that long too much downside rather than benefits.

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Make sure more of the community join

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

Very nice

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

great

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Nah it's all good.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Protection of endangered species is good.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Its very good goal to keep water clean

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Keep improving

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

we are on the right path, keep improving though

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Just do it

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Strongly support

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    Find a good solution

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

    stop chasing profit from agriculture over the future generations

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

    Increase the 4%

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

i dont know

21. How do you think we should prioritise allocation where or when water is scarce?

prioritize clean water for essential needs.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3774

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I support this plan because it is important to preserve our freshwater bodies and ecosystems and help our already polluted waters.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It protects the water bodies within Hauraki of which people use.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

This vision on long term affects alligns with the short term goals being accomplished.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

It could be put under as another value

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

The answer is the same as above

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Is vital for keeping mana whenua taonga at its best

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Will keep human contact with the waterbodies as how as it can get.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Areas of improvement have been identified and need some improvement

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

These elements could affect the wildlife within the aquatic ecosystem of the waterbodies.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Biggest areas of improvement should be targeted first.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

It provides fish safe passage and protection.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#3775

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I support the plan to maintain and stop further degradation - most importantly the vision to protect and enhance Te Mauri o te wai.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Needs more reference to urban population/community collaborative efforts to realise the vision.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

The vision leans towards a collaborative community effort to restore the health and mauri of Kaipara Moana.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Very clear vision and objectives. Clear links to long term regional policy vision.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

This should fall under human contact.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

This should fall under human contact.

7. Do you have any feedback on the proposed environmental outcomes?

There is no mention of proposed outcomes to reduce the harm from pastoral farming.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Approach to keep mana whenua taonga best of the best protected is great.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It is importance to consider swim safety as well as keeping human contamination to a minimum

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

It is a starting point.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If it has been identified as a harm to fresh water eco-system then it should be considered.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

We should restore te mauri o te iwi causing further degradation is not an option for future generations.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Look to balance the production of food across Aotearoa 26% concentration in Pukekohe is harming our freshwater.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Restoration of fish passage is vital to bring balance and connection of waterways

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I want to maintain the fresh waterways of Auckland. To not only improve the water quality but the fresh water ecosystem too.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Good reference to the wider population efforts to realise the vision

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

It helps restore the health of the kaipara fresh water ways.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

links to long term vision

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

It should be considered a human contact value

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

I should call under human contact

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

It aims to keep mana whenua protected

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Swim safely is important and also keeping contamination to a minimum.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

It's a start

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Human contact is worrying in terms of E.coli

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If its toxic to aquatic life than it should be removed.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If its an issue to freshwater ecosystem then it should be managed accordingly

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Its good to protect our fresh water resourced for future generations from degradation to preserve it.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

It will bring balance and connection of waterways.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Ofcourse! we should always aim to improve in the protection and quality of our resources

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

By teaching household water collection methods

21. How do you think we should prioritise allocation where or when water is scarce?

human consumption and food production.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3777

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I want to maintain the fresh waterways of Auckland to not only improve the quality but the fresh water ecosystems too.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

It help restore the health of the kaipara fresh water ways.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Links to long term vision.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

I should fall under human contact.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

The water bodies should be protected as they are the "best of the best"

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Contamination should be made as small as possible

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Somewhat worried about human contact with water bodies.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

it harms aquatic life.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

It harm aquatic nature and life in fresh water.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Minimising food waste and balancing food production across NZ

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking water and farming

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It is essential that we try to protect our freswater ecosystems

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Safeguarding or Hauraku FMU is cruicial

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

It is crucial to be resilient

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Jut to be positive

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Always work in conjunction with manawhenua

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Everyone must follow standards.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

To ensure these metals don't threat our urban streams.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Without one being more significant than the other, bot are significant and can work with eachother.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Productive & keep it well

17. Are there other management options outside of those listed that you think we should consider?

Talk to community

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Examine and make the best possible list.

21. How do you think we should prioritise allocation where or when water is scarce?

Manage justly

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Looking after our wai is important for health and wellbeing now and for future generations.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Clear objectives and links to longterm vision

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Not necessary. It can be referred to in Human contact

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

This can fall under human contact.

7. Do you have any feedback on the proposed environmental outcomes?

There should be reduction of pastoral farming

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Mana whenua understand how to be kaitiki of taonga that have veen looked after by iwi for generations.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

it is good that areas of focus have been identified.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If it is toxic for insects then it will impact the eco-system.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Yes because it affects the habitat

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

It is not an option to go backwards.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

The production of food should be spread across the country if it affects the water quality of Pukekohe

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Profits are valued higher than the preservation and revitalization of our water. The farming community should offer resources to offset the damage bein made to our water.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Importand to prioritise the flow of fish to measure th health of wterways.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Yes, reducing 4% is not good. We should aim to increase.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Yes, reduce water allocation, resource community water collection vessels and more education around the collection of gray water to use for washing and gardening.

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritize human consumption over profit making businesses (agricultural businesses)

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3780

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protection of our freshwater is important for mana whenua our ecowater systems ensuring these are always maintain to the hightest standards-it what comes out of our taps it needs to implemented for us to sustain and be healthy for all humans.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   We need to protect, restore and continue to allow the Hauraki FMU to thrive for all to enjoy especially the next generation.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Agree

Tell us why:

I'm all for the local communities being engaged in restoring + protectin Kaipara moana- we need to work together to enure our freshwater is healing, thriving, being mana whenua, iwi communitions together.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Same as the Hauraki & KaiparaFMU- we all need to involve we play our part in keeping our FMU's timing, protectng and restoring them for all generations to enjoy and learn why we need this.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

As we have seen 2023 climate change can occur at anytime when we least respect it so we need to not only be resilient we need to prepare+ be already as possible for hazards, climate change as much as possible.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

If me don't add amenities as a 'valu' then these places we love to visit and admire will be ruinied. these places to visit is great for our wellbeing so homely it valued adn extremely important.

7. Do you have any feedback on the proposed environmental outcomes?

Only that as long as iti si positive proposals fo all peoples animals, environment and we all have access i'm all for it.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

I think this is extremely important to identify the water bodies and ensure Maori cultural values, ecological, landscape and reacreational values are adhered to for our next generation to see, learn _ to enjoy. If it is not mantained, looked after it will be non solvable in years to come.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Very important to ensure these areas are safe for swimming but also to ensure they are kept o the highest standard so also restricting the summary is a very good way to keep these areas clean and less health issues.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Other

Tell us why:

Once there is identification, establishment, tough act limits set methods identified in water quality + quantity it then needs implementing- where does that come in?

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

Im not 1--% sure but dolrow river had some disasters from the flooding, single houses bursting into our waterways can only take whats in this document so not really knowledgeble around our rivers, lakes streams but hope they are healthy

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If these two metals which are cuasing negative impacts on our freswter are left off it will definetly cause more damage and become more in years ahead, therefore we need to ensure this is managed and reminded as much as possible from our urban streams.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

I the warm temperature of the water creates a negative impact to our waterways where it is harmful to our fish/insects then it is important to include + manage this as best as possible.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

I would like to see improvement to maintain the waterbodies raised becuase just the "least" for areas that are good if we can raise the standards here to be higher then the areas that need improvement can be worked or more. Basically we shouldn't become complacent because some areas are good we need to raise the bar on areas that are good _ increase the areas that are no to be good.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Both areas are extremely important and vital to all of Auckland. Better & safer fertilizers needed for growing- is there one that is safe for growing + waterways?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

I think the options layed/proposed in the draft management are reasonable to ensure our land/ waterways is maintained for generations to come.

17. Are there other management options outside of those listed that you think we should consider?

Continue to collaborate with mana whenua/iwi to ensure you are not treading or sacred land.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

I do think it's important however you need to engage well with mana whenua/iwi to ensure you collaborate and not dictate what is needed.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

If it will keep + maintain our wetlands areas, then we should retain our existing regional standard.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Prioritising fialy +idenify where the current consent holderss and their usage, then make adjusments and changes.

21. How do you think we should prioritise allocation where or when water is scarce?

Adjust usage according to the season

Maximise the levels that are high

minimise when levels are low

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Reduce or restirct access to foot traffic keeping and foreign bodies equipment, petrol based equipment our of our waters.

#3781

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I only support this preprosition to stop further degradation

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   We need to involve the community more into this preprositon

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

I really agree with this statement cause I can see that the community was involved

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

I can see this preprosition has many goals that links to the future

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

I agree with all outcome

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Protecting the endangered species under the ecological approach is great

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Its good to keep the people swimming and the water clean and safe

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

It needs to be developed further

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Some areas definetly need to be improved but I also see that they'd probably end up improving in the future

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

We should decrease pollution through policies so I really agree with this

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

If you guys know its harming water then yes

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Find a middle ground solution that can balance food production and water health

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

These are important to think about

17. Are there other management options outside of those listed that you think we should consider?

Consider the future generations rather than increase in profit with agriculture

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Safe passage for fish from fresh to salt water is important so I agree with this proposal

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

I strongly agree cause going lower then 4% is unacceptable. We need to do what we can for future generations and increase that percentage

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

I agree with this but we need more time into teaching the community why this will happen and how to use grey water for not very essential stuff instead of wasting healthy and clean water

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritise drinking water and waterfall households over animal and farming production

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3782

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   good

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   could be better

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

using the ecological approach is good

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

prioritising the poor water bodies over the good healthy ones is good

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I don't know

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

very good idea

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

keeping fish passages safe is very important

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

teach the community more about this topic

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3783

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Its a priority to protect fresh water

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   has good collaboration efforts to realise the vision

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

It looks restore the health of Kaipara fresh waterways

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

has clear vision and objectives with long term effects in thought

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Its more towards human contact

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

same answer from above

7. Do you have any feedback on the proposed environmental outcomes?

no proposed outcomes to reduce harm from pastoral farming

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

This approach looks to keep mana whenua taonga at its best and protected

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

swimsafe and minimum human contamination is important to consider

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

its a starting point

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

human contact is slightly worrying

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If its harmful to bugs/ ecosystem, then it should be considered

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

if it harms the ecosystems in fresh water then it should be considered

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Its a priority to look after and pressure the health, our fresh waterways and ecosystems

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

its vital to bring balance and connection to water ways

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

we need to maintain and improve standards for future generations

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Investment in educating communities of way to collect at every house hold

21. How do you think we should prioritise allocation where or when water is scarce?

prioritise for human consumption along with production of food

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3784

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   its important to keep protected our water ways

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

it restores the health of Kaipara fresh waterways

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

it has clear objectives

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

falls under human contact value

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

falls under human contact

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

contamination should be minimised from catchments to increase its health

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Its a starting point

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

its fine

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

it harms fresh water aquatic life

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

it harms fresh water ecosystems and aquatic life

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Managing food waste

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

we should always keep waterways protected

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   get more of the community into it

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Very nice outcomes

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

protection of endangered species is extremely important

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

keeping the people that swim in the waters safe and important

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

keep developing

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    balance the problem out

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

    agriculture industry care to much about profit and not enough about the future

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

    safe passage for fish = good

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

    stay at 4% or more no less

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Maintaining hydration for our waterways and water systems is very important

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   restoring hydration and health to the Hauraki gulf will8 help future people

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

restoring the health of the Kaipara and the people who depend on them is good for the future

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It is to make a goal that leads to long term improvement

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Its human contamination

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

same as above

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

that approach seems good as it keeps as on the aspect listed above

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

swimming safely is important

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

having a standard to keep up to with code is good because we can see which rivers need the most help

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

could be better because of the variety of the serious health these water bodies are in

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

it interferes with the marine life in the water bodies

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

it impacts the marine life in the water bodies

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

keep these really good ones safe and healthy is good as it keeps those dependant on it healthy but maintaining less healthy ones would help more as it is already negatively affecting people

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

limit food consumption leading to less food waste by giving out in certain proportion rations

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

because it looks to improve certain areas

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

seeing how healthy the water is by fish populations and health you a good measurement for seeing how healthy a water body is

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

because we should always aim to get better

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

prioritise community and farming health over water used for carious other activities

21. How do you think we should prioritise allocation where or when water is scarce?

prioritise community health (hydration) and farming

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3787

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   its important to maintain and stop further dehydration to our fresh water ways

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

it aim to revitalise the health of Kaipara moana

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

it shows long term regional vision

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

it should fall under human contact

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

its good to keep the "best of the best" water bodies protected

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

swim safety and minimal contamination are both important to consider

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

worried about human contact

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

if it harms aquatic life then it should be considered

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

if it causes harm to the fresh water ecosystem then it should be considered

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

minimising food waste and having balance of food production across NZ

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

we should always try to strive for improvement

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

drinking and farming water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3788

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   important should be placed on maintaining our water systems to prevent further damage to our fresh water systems

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   so that future generations will have better health and lives

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

it looks to restore the health of Kaipara waterways

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

it shows that the goal is ambitious and wants to accomplish the long term vision

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

because it counts as human contact

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

it also counts as human contact

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

its good to keep the best waterways systems/ foodies protected

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

minimal human contact/ contamination is important to take into account

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

it is good to keep a standard to work towards

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

focus areas work made clear

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

if they can harm the aquatic animals then it will impact the enviroment

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

if it impacts wild life them yes

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

degrading our water bodies isn't an option for a greater future

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

decreasing food waste across NZ

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

we should try to improve our standards

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

reduce the amount of water being allocated to washing and farming

21. How do you think we should prioritise allocation where or when water is scarce?

making sure that human health (hydration and consumption) are put first

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#1

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Other

Tell us why:

Amenity is important for many, but it should not be placed as highly as restoring freshwater values and riparian habitat. Amenity is not the same as cultural connection. Elevating amenity as a key attribute puts too much subjectivity in to safeguarding resilience and restoration. Must ensure the priority is focused on healthy waterways and robust vibrant / diverse riparian margins. The proposal is of primary contact sites, so amenity is a focus in specific areas. For others, consult if they are needed and where / why, otherwise it can become arbitrary.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Urban streams appear filthy and full or rubbish. Northshore is mostly a collection of concrete lined channels.

Developers are allowed to build hard up against streams with little or no thought to providing riparian set backs (important not just for the stream, but wildlife habitat).

Farmers get a bad press, they doing a better job, but support isn't necessarily there and they can't afford to do what's right on their own. How about some form of TRSS in conjunction with a certified farm plan, as long as they meet minimum bottom lines?

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Improved riparian margins would be a start. Getting better setbacks and planted margins would help. However they need incentives to provide for that. How about some form of TRSS in conjunction with a certified farm plan?

Preventing urban expansion would help with the argument of the rest needs to be intensified and more nitrates applied.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Provide for stronger standards to protect and enhance all freshwater and wetland values in all subdivisions (noting the NES-F as it relates to urban development), but especially in TRSS receiver sites

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We need to protect them better than we currently do, but the AUP is extremely weak on appropriate standards in Urban zones. Development set backs are mostly aspirational in urban zones, currently.

Unfortunately Auckland Council has a long history of allowing non-complying activities to be granted, which undermines the integrity of the AUP. No point in having NC activities if you just allow them anyway. The Ob's and Pol's need to be much stronger as to why avoidance is necessary

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The Draft vision sets the high level outcomes and realistic targets have been specified to be achieved by certain dates. This breakdown is key as not everything can be achieved at once and some goals require time and/or new technology to be developed which does not exist yet.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Ecosystems with higher levels of resilience are those which are better situated for future unforeseen impacts.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Adding amenity as a value implies that there is a sense of guardianship over these areas and people will want to see the waterbodies improve as opposed to being indifferent to them.

7. Do you have any feedback on the proposed environmental outcomes?

Specifically for the Waitakere and Hunua areas there needs to be emphasis on not just the protection but the preservation of ecosystems and safeguarding threatened aquatic species given the conservation value of these areas.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

I agree with setting baselines however why would a baseline of 2017 be selected when we have already had substantial declines in freshwater before that date? Setting a degraded state as a baseline is going to set everything up for failure, especially areas that are already at or beyond tipping points at that time. Essentially sating that we will ensure the freshwater ecosystem is maintained at it's tipping point and there is no mandate to improve it beyond what it was in 2017.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

Rivers, lakes and streams in general are in a poor state and there is not the investment or infrastructure to improve urban streams. Rural streams are at risk from nutrient overloading, these impacts will be felt for decades to come as groundwater is contaminated, especially in high horticultural areas. Even some representative streams where our highest species and ecosystem values are found are at risk from climate impacts.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

I support maintaining A and B bands, however I think a review of what the thresholds of each of these bands are. A band should be pristine, B minor issues, C and D bands substantially worse. Where waterbodies are in the B band focus should be to get them to an A band as opposed to maintaining them at B. This is likely a longer term outcome but over the next 60 years it should be achievable. Lets set hard to reach targets as opposed to always going for the low hanging fruit.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Food producers should be responsible for ensuring they are not further degrading the environment, this can be by using minimum fertilisers and having adequate sediment controls in place. Without good water quality there could be food scarcity or water scarcity if it is too polluted to consume.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

I agree all of those should be mandated. Riparian areas especially provide lots of value in terms of biodiversity, water quality and amenity value. Citizen science and community group funding can go a long way towards energising communities.

17. Are there other management options outside of those listed that you think we should consider?

Stormwater management for contaminants, green rooves and infrastructure.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

I agree with prioritising catchments however we explore setting up some co-funding or public-private partnerships to drive the upgrade of these fish passage barriers.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We need to push the bar, national standards are a balance across the country. Auckland as the largest city has the high pressure of urban intensification and urban sprawl. Additionally many of Auckland's streams are small which make it easy for developers to just pipe as opposed to developing around them. We could offer incentives to keeping streams and developing around them as opposed to developers piping them for maximum benefit. One option could be rates relief for people with conservation covenants on their land.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Investment in desalination plants may be an option to ensure that we maintain water quantity without over allocating current resources.

21. How do you think we should prioritise allocation where or when water is scarce?

I don't know

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Other than a reference to one image, Aotea seems to be missing from this proposal.

#73

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It is so sad to see fouled streams where once clear water flowed.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Climate change is a threat to our freshwater system hence the need to processes that let water find its natural path and create infrastructure that "goes with the flow"

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

I think this is lower down the list than actually cleaning up our dirty streams

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Other

Tell us why:

I'd like a higher aspiration than 2017

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

The streams in my area have tons of sediment from development and the stormwater pons are full of invasive weeds and some smell foul

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

I'm really worried about the effect of warming on our streams and ponds

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Imperative

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    Maybe different farming practices

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

    Riparian planting is useful and attractive. It's very upsetting to see stock in waterways

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

    At only 4 % remaining we need to take drastic action

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

Human use important - encourage homeowners to save rainwater etc and re-use water from for example washing machines

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#74

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

That is already captured in the other measures, so unnecessary. Better to keep the measures directly as per the national standard.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

That is already captured in the other measures, so unnecessary. Better to keep the measures directly as per the national standard.

7. Do you have any feedback on the proposed environmental outcomes?

Will need to carefully consider how to many streams while ensuring the capacity is there to deal with climate change. Natural streams have much lower flow capacity than those regularly cleared of debris etc. With the included defn of resilience you now have a direct conflict between keeping streams natural, and keeping them clean.

Some rivers and streams may need to have flow capacity as their primary objective to protect life and property.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

Some of the maps don't make sense. You have measured results of say grade D, but that then flows into grade C, then back to D, all within the same general land use.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

The figures actually are quite reassuring. With the exception of the Pukekohe area, and urban Akld, the rest of the streams are actually doing well (grades A and B) for everything apart from e.coli. So that says that focused solutions should be identified, rather than blanket changes for all.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

My observations (grew up on a farm, swimming in dams and rivers) and now living in urban Auckland for past 20+yrs, is that urban waterways are far worse that rural ones. So anything that improves urban river health would be good.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

Highly variable, and largely beyond the control of land users or council to influence. If it is a dry year and there is less flow, then water temps go up. Lots of rain and water temps go down. Really all you are measuring is the weather patterns and nothing to do with how good your actions are.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Main concern is that council will go to some blanket rules to apply everywhere, rather than focus on the quality of the water and what is then necessary in that area. And what is the cost to all this? Who will pay for potentially taking productive land out of action? Council has no money, the govt has no money, and if you lump it on farmers the cost of food goes up. So some thought about the cost of achieving the proposed targets should be made. We see that in other Council planning docs where aspirational goals are set with no context of budgets - such as with getting people out of cars and onto PT, but no funding set aside to do that. So before asking people to agree to the targets, you should be making it clear what the cost (direct to ratepayers, and indirect via increased food or living costs) the changes would make.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Longer term it should be possible to capture much of the run off and reuse back on the crops. Fertiliser is expensive, so I am guessing that the growers are not wanting it washed away. Perhaps encouraging dams on the rivers and streams leading away from the areas and encouraging growers to extract water from that source would create more of a 'closed loop' solution.

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

I wouldn't be going beyond the national requirements on stock exclusions. It is just another burden and in many cases the farmers already have the fences and planting in place, and it

would be cost prohibitive to shift them again. All those costs just get added to our food bills at the end of the day.

The big issue for the rural streams is ecoli. It would have been good to have some clear suggestions as to what are practical solutions to addressing this. Planting around streams slows runoff and lets sediment settle, but from what I read would make little impact on ecoli levels. So are there practical solutions to this issue?

17. Are there other management options outside of those listed that you think we should consider?

Need to get the right balance in the document between the focus on outcomes, and being overly prescriptive on land use rules. Ideally there should be a range of solutions for each outcome, and then the land owners can adopt those that best work for them and their particular situation.

Planting around streams may sound great, but it significantly lowers the flow capacity and will add to flooding in high rainfall events.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

As you note, many are on private land. I would think that you need to be providing a very long lead time to address these - as in decades, not years. I also suspect that many of these obstacles have been in place for so many years that historic breeding areas have long been lost. So initially I would focus on not making it worse.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

National standards have gone through scientific review and debate, if 10m is deemed appropriate then that should be the case.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

As noted, the document needs some costs associated with it and who is paying. Without that it is just an aspirational item that is very hard to get meaningful feedback on - if you tell me I can have everything in the document and it will cost me $1 I will have it all, if it is $1m then my view is different. The other item is to not go applying cookie cutter solutions everywhere, when the data doesn't indicate they are necessary.

For most of the rural Kaipara area, the one issue is ecoli - so what are the solutions to that? Keeping stock out of streams appears to make little difference to this, with some NIWA reports indicating that 95% of ecoli from stock occurs during high rainfall events (that account for less than 25% of rainfall events) where paddock based stock effluent runs across the paddocks, through any planting and into the streams. The solutions in the document appear to be focussed on reducing the 5% of ecoli from stock depositing matter directly into the streams, and ignores the other 95%. So that is a lot of cost for very little reward.

    There is general mention of meeting Te Tiriti o Waitangi obligations and partnership at governance and operational levels. This needs to be spelt out, is this proposing a co governance structure like 3 Waters. If so it shouldn't be outlined more clearly

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   I totally object to the point number 1 in 2030 objectives. Mana whenua should have the same concerns as all other citizens and should not have a special role - a totally racist view which I do not support.

   The document would be more useful if all those Maori words were replaced with English. I have no idea what some of them mean. Council must realise that the majority of Aucklanders don't understand Maori. If it was concerned about what the majority of its citizens think about its plans and strategies, it would express them in English.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

The Hauraki Gulf is the jewel in the crown that is Auckland. It must be cleaned up and bottom trawling banned. But it must be available for recreational activties by all citizens and Maori should not have different rights from non-maoris.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    In Gulf Harbour the coastal ponds formed by canals to Hobbs Bay have not been managed by the Gulf Harbour Country Club under the terms of its resource consent. Their has been damage as a result if lack of maintenance and the fresh water is being compromised and there

has also been flooding during extreme weather events. Council is ultimately responsible for maintaining this water resource, which also impacts on the Hobbs Bay environment.

Local residents need to be engaged by Council to establish community working groups who are prepared to be involved ion managing this water resource.

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

    We need to help our ecosystems as well.

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

    We need more wetlands for native animals to survive.

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

I support all the initiatives as we need to start somewhere to help our ecosystems and communities.

#454

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Freshwater resources are essential for human survival, so long-term scientific protection and management of water resources is self-care and self-protection. Preventing water pollution and waste should be a consensus among all citizens.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Agree

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Implement strict long-term, midterm, and short-term measures to protect water resources, gradually control the use of fertilizers and pesticides.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Priority is to ensure the basic need of clean water for people.

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#465

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Tamsui's vision planning requires a long period of planning, plans, measures, a dedicated management team, and leaders must pay attention to it.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Agree

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Important freshwater sources should not be accessible to humans or should be protected within limits to prevent human contamination.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Agree

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Agree

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Yes

Tell us why:

The standards must be high, and the management of wetlands and streams should be viewed from a developmental perspective and a scientific perspective, and management should start from the source.

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#492

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Resilience should take into account possible alterations to current situation, eg: climate change.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Auckland's many connections to the water is one reason it is such a great place to live, especially in a sub-tropical climate. While I understand why you include: "without necessarily going into the water", I personally think that Aucklander's should be encouraged to get in the water at every opportunity, and that water quality should make this safe.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Identifying all the 'outstanding waterbodies' and writing big reports is all very well, but ratepayers would get more 'bang for buck' if the council focussed on the low-hanging fruit where environmental degradation is obvious and on-going.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

2017 is a pretty low bar. There should be an intention to do better than this in the future.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

I like to swim regularly.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

I want to see eels, kōkopu, etc.

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

Stream banks should be planted where possible in any case, so it is not clear what other actions would result from monitoring, which would presumably have an ongoing cost.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I encourage Council to keep working with vegetable growers on this issue. It is good that you acknowledge the current economic importance of this area (26% of vegetables), but the Council also has a duty to ensure that that production can continue sustainably into the future.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

I believe the most serious problem impacting Auckland's freshwater is sediment run-off from construction sites. In every major rain event we see plumes of suspended clay fanning out from our local streams into the Hauraki Gulf. As council appear not to enforce these discharges, developers naturally take a "Whoops, sorry" approach when their minimal sediment control systems inevitably fail. It would only take a few high-profile prosecutions to change this attitude.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Auckland needs more large wetland areas that can flood in big rain events (possibly where existing houses built in flood plains need to be removed), and smaller areas that can act as a "sponge", and reduce the impact on storm water outflows.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Although I would prefer not to drink it myself, there is heaps of water in the Waikato that could be used for irrigation in Pukekohe. Perhaps a separate scheme from the current pipe to Papakura?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

No special rights or privileges for Maori. Water falls from the sky and is for all, not just one race.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

   Seems a reasonable way forward

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

we dont need 3 bodies at extra cost.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises

one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Disagree

   Tell us why:

   Looking for a problem that for the vast majority isnt there.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

There is far more contaminated water run off from roading & construction than what you think you are trying to fix.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   There should be no focus on anything race based in regard to water management. Keep it equal for all.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Too many times we can't use the water due to poo etc. Also, let's call it Auckland, not some other name.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

The council is doing a poor job managing water as it without worrying about even more metrics to manage.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

The council is doing a poor job managing water as it without worrying about even more metrics to manage.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Sure, aim high!

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Support the growers!

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Just focus on Auckland. Don't worry about that other region.

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

By managing supply better & requiring all housing & even business to install water tanks for gardening, toilets, washing machines & even showering.

Water storage seems to be the issue.

If you stopped trying to make $$money off of water & required water tanks that may even be turned on only when a drought is imminent this would stop the loss of water at site.

21. How do you think we should prioritise allocation where or when water is scarce?

By managing supply better & requiring all housing & even business to install water tanks for gardening, toilets, washing machines & even showering.

Water storage seems to be the issue.

If you stopped trying to make $$money off of water & required water tanks that may even be turned on only when a drought is imminent this would stop the loss of water at site.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I support Council plans for ensuring appropriately healthy freshwater wherever it may be found.

   However, I strongly oppose any suggestion that mana whenua or urban Māori should have a greater say in the decision-making, monitoring, management or allocation of the region's freshwater than any other group or individual Aucklander.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

All local residents need to be consulted, and their views accommodated without any racial preference.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Because you haven't provided a clear definition of what this means, or could mean to Aucklanders. We all need to know that the values are not racial/ethnically discriminatory. Any such value, with related policies or rules must have measurable objectives and benefits to Auckland and all Aucklanders. All those in positions of authority implementing monitoring these values must be appropriately qualified in science, technology and/or the delivery of public infrastructure and services. They must not be racially biased.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Because you haven't provided a clear definition of what this means, or could mean to Aucklanders. We all need to know that the values are not racial/ethnically discriminatory. Any such value, with related policies or rules must have measurable objectives and benefits to Auckland and all Aucklanders. All those in positions of authority implementing monitoring these values must be appropriately qualified in science, technology and/or the delivery of public infrastructure and services. They must not be racially biased.

7. Do you have any feedback on the proposed environmental outcomes?

These outcomes must be measurable and will benefit all Aucklanders. All those in positions of authority implementing or monitoring these values must be appropriately qualified in science, technology and/or the delivery of public infrastructure and services. They must not be racially biased.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Water is the essence of ALL life, so we all have an interest in healthy water. Auckland Counci seems to have a weird idea that it means more to one ethnicity than to all others. Auckland's 19 tribes (mana whenua) and urban Māori do not have a special relationship with water that is not shared by the rest of the community. They certainly do not have "stronger ambitions to improve our waterways".

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

The concept may be a satisfactory one but experience suggests that the Council may let various Maori impose rahui for unsubstantiated reasons, or reasons that are unsatisfactory to other Aucklanders. Whatever policies are imposed, they must be created and applied without any racial bias, control or benefit.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

The measurements and benefits sought must take into all stakeholders and factors, without any cultural/racial interference or bias.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Auckland sewage and stormwater systems have been badly neglected while the Council has wasted significant time and monies on fashionable, ideological programmes. The Councils needs to get back to basics and focus on its core responsibilities of infrastructure and essential services.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

Safeguards must be in place to ensure such a programme is supported by independently and scientifically qualified experts. It cannot be ideologically or culturally driven resulting in unfair application, extraordinary expense, conflicts of interest, or undocumented/unauthorised money flows.

All those in positions of authority must be appropriately qualified in science, technology and/or the delivery of public infrastructure and services.

The health of the water and the region needs some balance with the economic interests of the country and not unfairly hampered by unreasonable demands or council rules.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Other

Tell us why:

It all depends if there's balanced decision-making, and no racial interference.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly do not support

Tell us why:

I strongly oppose any suggestion that mana whenua or urban Māori have a greater interest in the quality of our water. They should not have a greater say in the decision-making, monitoring, management or allocation of the region's freshwater than any other group or individual Aucklander.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Keep racial influence out of all authorities and decision-making.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

All rules and regulations must be developed and implemented without any racial bias or influence.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

There must be no discrimination between Aucklanders or groups of Aucklanders in the development and application of environmental improvements. Consent from any/all affected landowners is essential, no matter their ethnic origins.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

There must be no discrimination or racial influence in this decision-making or application. If private land is involved, it is up to the Council to sell the benefits to landowners rather than unilaterally impose new rules and regulations.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Keep all racial/ethnic influence or interference or benefit out of the decision-making. Water is essential to us all. It is not a Maori issue, it is an essential resource to all life.

21. How do you think we should prioritise allocation where or when water is scarce?

Keep all racial/ethnic influence or interference or benefit out of the decision-making. Water is essential to us all. It is not a Maori issue, it is an essential resource to all life.

Apart from households, businesses and food growing/farming need it to survive. If the Council intends to limit any sectors' allocation, the reasons must be justifiable to all Aucklanders without any racial bias. They must also be notified of the rules well in advance so commercial decisions can be taken about viability.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I ask Auckland Council to acknowledge in their Freshwater Policies and Plans that –

- All Aucklanders have an equal right and interest in Auckland's freshwater in all its forms.
- Regarding any locality-specific plans or rules, all residents will be consulted, and their views accommodated without any racial preference.
- There will be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater.
- No preference will be given to the views or demands of one racial group simply because some of their ancestors immigrated to the country or region before other New Zealanders.
- Safeguards are to be in place to ensure red tape, expense, conflicts of interest, or undocumented/unauthorised money flows are minimised.
- All those in positions of authority must be appropriately qualified in science, technology and/or the delivery of public infrastructure and services.
- Any policy or rule must have a measurable benefit to Auckland and all Aucklanders.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   It is racist and Maori oriented, everyone should have equal control over water. I totally oppose Maorification policies that are race based. Maori are NOT INDIGINOUS, Moriori were here first.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   Racist again, everyone should get equal rights to fish and use water

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Disagree

Tell us why:

Racist again

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Racist again

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

It's full of Maori shit and racist everyone should have equal rights on water

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Because every thing you do seems to have Maori racist undertones and I don't trust you

7. Do you have any feedback on the proposed environmental outcomes?

Yes it is Auckland you racist trash, not some Maori name

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

It is racist and not equal in regard to every new Zealanders right, stop trying to slip this racist crap in

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Because it is a non racist approach and sensible to protect water quality WITHOUT the Maori shit

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Because I have seen no documentation

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

I don't know what tamale makouri is as I don't speak Maori, but I will say it is stupidly racist to rename things with no consultation to Maori

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

Just do the right non racist thing ffs

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    No

    Tell us why:

    Because it is a naturally occurring thing, stop wasting money on shit that won't work

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Strongly do not support

    Tell us why:

    Because you are using race based language and I don't trust this- Maori

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    Stop being idiots and let the farms do what they need to do to feed us

16. **Tell us what you think about the draft management options being considered?**

    Disagree

    Tell us why:

    Because of race based language I don't trust

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Disagree

Tell us why, and if you think there are other considerations we should include?

Because it will cost a lot of money and the greenie activists need to take a lo g walk off a short pier

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

Because it will cost more and achieve nothing as history has shown

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Stop overseas interests exporting our water utilise Waiwera and bottle and sell the water

21. How do you think we should prioritise allocation where or when water is scarce?

Stop selling it for nothing to overseas interests for one

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#689

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   The documents reveal a persistent presumption that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways". This is nonsense.

   Water is the essence of ALL life, so everyone has an interest in healthy water. All Aucklanders should be equal stakeholders in how freshwater is managed in their city.

   In the far-reaching consultation document, Auckland Council presents the idea that Māori are entitled to be involved to a much greater degree in the decision-making, monitoring and management, plus allocation, of Auckland's freshwater.

   You're now asking for Aucklanders' input to this new policy, yet engagement with mana whenua has already been undertaken through a separate process.

   We are concerned about the potential for frightening consequences from giving exclusive, unaccountable rights over water to one sector of the community.

   We say people must not be divided by ancestral lines. Policies and rules must apply to us all equally.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Disagree

Tell us why:

You have so far failed to take into account the perspectives of non-Maori people, but I note that consultation with Maori has already occurred with no mention of input from non-Maori in that process. This racist.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Why are you so racially biased in favour of Maori cultural values, as if these are somehow more important than the values of all non-Maori ratepayers?

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

You’re now asking for Aucklanders‘ input to this new policy, yet engagement with mana whenua has already been undertaken through a separate process. This smacks of racial preference.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritizes one race or culture's values over all other races or cultures in relation to the management of our freshwater. It is all of our interests to see that water is correctly managed for the good of all our people not for the good, as such the wording needs to change to reflect this.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Other

Tell us why:

Generally a good idea but it must be well managed, within budget and any overspend is to be taken from the following years budget as it will be likely down to inaccurate assessments from the outset. Rather like the terrible management of our water services by the one and only Raveen Jaduram, who saved money to make the budgets look good but sowed the seed of long term failure. And as for his Salary, let that not be repeated, ever! you are spending rates payers money remember.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Yes, we need a clear long term plan that is properly scoped out by the professionals that are paid to do so and not by consultants that they employee. That budget has to account for changes in costs over forward years and the owners of that budget be held accountable to not overspending unless there are a disaster where we call on emergency funds and reallocation of existing budgets. The scope of the plan should be worded in such away that it is inclusive of all people and not seen to reference any one particular group as that brings to the table separation. Let all groups be present when feedback is sought and facilitated in away that delivers a credible pathway forward for delivering fresh water, in a well managed way for many years to come for us all. I do not want to see the likes of Raveen Jaduram in such a senior position ever again or his salary level, disgraceful!

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   There should be no race based bias and/or no co-governance issues

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   Should be no race based bias and/or no co-governance

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Disagree

Tell us why:

See above

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

See above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Ok except for any race based bias and/or co-governance suggestions

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

No race based exceptions and/or any reference to co-governance

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

Agree with principle, but no reference to race based difference and/or co-governance

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

Agree in principle but not to any race based differentiality and/or any co-governance

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

In a terrible state

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

But not in any way differentiate between any race or group and not in any way promote co-governance

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

But not diffirentiate between race or group of people or have any co-governance

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

As long as there is no difference based on race and no co-governance

17. Are there other management options outside of those listed that you think we should consider?

As long as there is no difference based on race and no co-governance

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

As long as there is no difference based on race and no co-governance

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

As long as there is no difference based on race and no co-governance

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

As long as there is no difference based on race and no co-governance

21. How do you think we should prioritise allocation where or when water is scarce?

As long as there is no difference based on race and no co-governance

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Any planning must include resilience as a precaution to include future changes in sithuation

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

An important part of recreational parks and reserves

7. Do you have any feedback on the proposed environmental outcomes?

I support the proposed outcomes

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

I do not support the inclusion of maori cultural values. Our country is moving to a situation where all people have an equal standing and there is no room for peoples to be granted special consideration on the basis of ethnicity.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

An important facet of recreation is being able to safely swim in clean water.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Important to have a baseline for comparison and setting of on going standards

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

OK at present but improvements necessary going forwards

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Management of trace metal contend in areas like building and car parl stormwater is a specialised area and needs to be part of a graduated approach

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

A graduated and measured approach is needed to measure and manage temperature in stream waterways.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly do not support

Tell us why:

I do not support an approach where maoris are granted priveleged roles and status.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

what is resilence?

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Essential to keep race out of water management. Asking for trouble otherwise.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Consent holders should be notified on reductions well before water becomes scarce

21. How do you think we should prioritise allocation where or when water is scarce?

To those that really need the water the most

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Now is the time to start building new dams

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   You are basically stating that the water is more important to Maori than every other average New Zealander. This is racist and totally wrong. If you worded it the other way around it would be an international racist out cry as it should be in this case.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Again this is racist against the average New Zealander. The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

I kind of agree with this, it doesn't appear to be race based but given the obvious race based, corrupt appearance of a lot of other things it is hard to believe any thing here does not have hidden race based agenda's and there for calls into question any credibility this may have.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I object that the documents reveal a persistent presumption that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways".

   Water is the essence of ALL life, so everyone has an interest in healthy water. All Aucklanders should be equal stakeholders in how freshwater is managed in their city.

   Remove race based reference to water.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Disagree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

The temperature is not going up.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly do not support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Disagree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    We have more than enough water, no restrictions are necessary

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Make mandatory a 30000 litre water tank install on every new house

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   It is racist.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   Yo much input from the minority.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

To much over arching control. Making huge red tape.rather than sensible decisions for all the Auckland rate payers.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

Cost prohibitive....

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

How and at what cost

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

Too expensive.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Don't.

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Because it is racist as the council assumes that Maori have more interest in freshwater management than other races. How would Maori feel if the prioritisation was Asian rather than Maori? We are all Auckland rate payers but you focus heavily only on Maori. I want Maori to have the same input as me and all other Aucklanders. Why are you so racist?

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

You should not use racism to promote this water belongs to everyone.

We have just voted racism out of Central goverment do we now need to change those involved in local goverment to eradicate it.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   The heavy emphasis that water is more important for Māori than myself and other New Zealanders born here is offensive . This is my country as well and I served in our armed forces for 20 years as a proud kiwi . Separate meetings and imbalanced input from Māori and " the rest of us" is not the way forward for a united nation or district . One person one vote

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The water is important to all people not only to one particular race

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly do not support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Like many other mistakes the previous government made, race was introduced to many areas of legislation. No race of people living in NZ should have any priority over water rights and usage.Any piece of legislation which allows for this, promotes racial divisiveness

#981

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Water is key to all life, not just descendants of people that arrived in this country before descendants of other people. To state that one race has more interest in water than another is simply racist and nonsensical.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

We need to have balance. When possible, we should aim to maintain clean water, adding focus to freshwater sites is a sensible direction, but it should be no racism in this focus.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

I am not an expert and I believe this is an area that people with the appropriate expertise should be utilised.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

There is always room for improvement and we need to balance economic costs and ways to bring about these improvements.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

We need to balance economic costs and ways to bring about improvements, but the long term focus needs to be continue to improve all aspects which includes zinc and copper.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Other

Tell us why:

Balance is key, all aspects including temperature need to be weighed, but for example this does not mean we should not build a new motorway because it could increase the temperature of a nearby waterway.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Again I agree with the sentiment, but I believe an expert in the field is more important than 'Mana whenua'. If Mana whenua wish to wade into a stream and clean out any rubbish that they find then fantastic. But if they deem outcomes without taking into account economic costs and benefits then I believe relevant experts are a better guardian.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I agree with balancing economic costs and benefits with the long term goal of water improvement.

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

Rules and regulations, carrots and sticks, working with the parties causing / affecting the issue should be the starting point. Focus on the worst first.

17. Are there other management options outside of those listed that you think we should consider?

Some of the worst disasters affecting our local waters are those caused by local government failings over decades (such as the recent sink hole episode). Auckland council needs to look in their own backyard and practice what they wish to preach.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    I am not of the belief that Maori and Mana whenua are the 'guardians' of any resources in New Zealand. We all have a responsibility and should take an interest in our country. At the same time we have to look at the big picture. Example I am totally against importing dirty coal from Indonesia to burn in our electricity generating furnaces, simply because we can't make use of cleaner local gas.

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your document is complex and difficult to understand with so many Maori phrases in it. Whatever it is proposing I strongly feel that no one culture or heritage should have control over the management of water. Water is life giving for everybody. I have no objection to Maori having input into water management but I do have concerns where Maori can decide for everyone what is the best thing to do. We are all New Zealanders and should equally manage our natural resources.

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Disagree

Tell us why:

I think the baseline should be set at an earlier date such as 1990.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

I see a lot of vegetation being washes into gutters and drains. I see council workers mowing berms and parks and then blowing the grass clippings into road gutters to wash away. Residents bordering streams or drains are dumping waste into the drains. Contractors constructing roading and bridges are leaving boxing and waste for the next heavy rain to wash it away from their work site.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

If copper and zinc are such a problem to fish, why do I see so many fish in marinas.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

Waste of time trying to change the temperature.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly do not support

Tell us why:

I believe that everybody wants to have clean water and making this a race based attribute is totally wrong.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Use science and not politics.

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

This issue requires good science without mumbo jumbo.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Ensure that all wastewater pump stations electronics and controls are located well above the highest flood level. They wouldn't fail when we need them the most if we did this. Sand bags around pump stations indicates somebody made a cock up.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Other

   Tell us why:

   I believe people are sick & tired of only Maori being in the forefront of consideration,

   We are a people of huge diversity. Lets go forward without racial predudice.Maori were supposedly first to arrive in Nz..So what we all live here NOW not 200 years ago.

   The spiritual, ethnic and whatever values that are placed on the land apply to everyone not just one load group.

   Stop dividing new Zealanders.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Other

Tell us why:

What is meant be resilience, do you use terminology to put people off from continuing?

My dictionary gives no clue to the meaning you elude to???

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

It is a valuable amenity to ALL

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

My understand of this far-reaching consultation document, Auckland Council presents the idea that Māori are entitled to be involved to a much greater degree in the decision-making, monitoring and management, plus allocation, of Auckland's freshwater.

I see this as an incredibly dangerous and divisive. We are all one species, and are all completely dependant on water for survival. The concept that one particular group should be entitled to greater decision making power than another is dangerous in the extreme. We are all Aucklanders and should all be entitled for equal consideration.

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

I am horrified that you can even think of basing a program of work around water. on race. This is utterly unacceptable and you need to take a long hard look at what you are doing. Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Alll discharge from storm water drains into every estuarine tributary must go to settlement ponds built into the storm water network. All stormwater outlets must have filtration grates p them.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Fresh water is essential for all life and no special arrangements for Maori need be accommodated, indeed this is another racist ploy which is grossly unfair to the people of Auckland and should not be encouraged. Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

These fresh water bodies are important for ALL Aucklanders and the people of NZ. Locking them up for cultural significance is a rubbish idea and will create dis harmony for all in the

future. We are one people of NZ not divided by race or colour. The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   I do not support your consultation with Maori only. It is racist and doesnt support other races who have an equal desire to have good water management. There is nothing in the treaty that required governing bodies to consult Maori as a race and leave others out. Race based consultation is apartheid and racist. You should be ashamed of yourselves.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Resilence is not defined. And means different things to different people. You are making this too complicated.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Same reasons as above.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Why Maori cultural values? Why not the cultural valves of the rest of us? Do our cultural values mean less than Maori. Once again, your proposals have an over whelming bent on things Maori. Racist and not required under the treaty.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

Your overreaching and potentially affecting both peoples income and others enjoyment. We dont need a “big bother” approach on this.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau’s river, streams and lakes?

Fairly satisfied

Tell us why:

Where is this “TamakiMakaurau”? English please! Or at least put the English beside those Maori words which most New Zealanders do not speak or know of. Almost 100% of NZers speak English. Only about 10,000 speak Maori. You need to cater more to the main language of the country. In that way, we might have an understanding of what you are saying.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

You want the food! You pay a price. Less food production means higher prices. You are affecting a lot of people with your proposals. So now you are trying to become the authority on how to grow vegetables? Farmers dont need your advise, or your over bearing authoritarianism. Get out of peoples lives.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

Once again, Maori are being consultated at the expense of all other races and their values. Racist policies! And who is this person manawhenua? He seems such an important person.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

Why is there the need to go to a higher standard? Seems you want to ban everything.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

There is no fair way. But knowing your lot, you will probably give it to Maori households before others. All I see in your proposals is a lot of racism. Maori are not the only people in this country with desires for fresh water etc. Why are you not consulting with other race groups then? Your racist policies are what is dividing this country. Leave the Maori out of consultation. Have a free, open to everyone, consultation. Maori do not need to be consulted separately.

21. How do you think we should prioritise allocation where or when water is scarce?

You need to encourage rain water collection. Storage of rain water would alleviate some of the demand of council supplied water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Arh, there it is! Its Auckland! Who would have known. Why not just call it Auckland. Thats what most know it as.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing ‘outstanding waterbodies’. I oppose any policy that prioritises one race or culture’s values over all other races or cultures in relation to the management of our freshwater.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing ‘outstanding waterbodies’. I oppose any policy that prioritises one race or culture’s values over all other races or cultures in relation to the management of our freshwater.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing ‘outstanding waterbodies’. I oppose any policy that prioritises one race or culture’s values over all other races or cultures in relation to the management of our freshwater.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Finally you have the opportunity to give any other feedback and upload any supporting documentation. Here are some additional remarks you might like to make:

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I totally disagree that mana when have a greater stake in fresh water than all other races.

   The NPS-FM, that requires that we engage with mana whenua at each step of the process is no longer relevant because the new government us repealing 3 Waters legislation. Auckland Council does not need to be committed to undertaking robust and fulsome engagement with mana whenua.

   The Treaty of Waitangi has no bearing on water because it gives all citizens equal rights. The inclusion of maori folklore in a document that applies to all Aucklanders is irrelevant and brings a racist perspective. I totally object to be treated differently from maori because I am European.

   • mana whenua expect involvement in freshwater management processes,

   including decision-making and monitoring

   • locally specific approaches are needed, allowing for Māori freshwater values to be applied in site-specific responses

• an integrated, holistic, whole of environment approach is needed.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Maori values are of no interest to me and my family. We have the desire for high quality water in Auckland. There is no magic that applies only to Maori.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Council needs to be more proactive in keeping communities advised where there is a danger to life and health.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Get rid of all the Maori folklore and present content in English only. Our city is called Auckland because citizens have never been consulted on referring to it as Tamaki Makaurau. If Council wants to rename our city it must do that by referendum.

Water is a gift of nature and All people regardless of Race, Religion or culture are entitled to water equally and the management of water for which we pay our rates must also be managed by those best qualified to do so regardless of Race, Religion or culture.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   To big of a subject to put into one line . Dont trust what sits behind this whole process based on whats happened in the last 3-4 years . Maori have no more say in fresh water than the rest of us . The stuff falls out of the sky . No one owns it .

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Values should be for all Aucklanders not just Maori CULTURAL values . This is racist policy making and should not be supported in any way .

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

Please confirm that these safe swim sites if closed will be closed to everyone , or like other racist policy making (around marine reserves for example) that Maori are still allowed access .

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    All Aucklands are going to be better off with better policy around cleaner water . What we dont want is it being based around racist policy making . There is no need to single out Maori ,

everything should be based around all Aucklanders not one group and another . Its complete BS otherwsie .

I am not an expert in water management in any way, however I do know that the right to access water is not a right that should be influenced by ancestry or race. Water is a natural right and needs good management. However any management that prioritises access is a dangerous president as everyone should have rights that are equal forever.

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

I agree in part,this must be done with the options available to farmers,and take into consideration with what they are already doing

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I think that it is an insult that you consider Maori to be more concerned than the rest of the population of NZ as to our environment,and it is certainly just as importment for all New Zealanders.Maori do not have such a good track record to be proud of

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. we oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for us to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

the Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. we oppose any policy that prioritises

one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Fairly dissatisfied

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Mostly support

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Whilst the objectives are fine, I totally disagree with the assertion that Maori have greater rights in the preservation of water quality. They are but one section of the population and their entitlement and influence should be in direct proportion to the percentage they make of the entire country - NEW ZEALAND and in AUCKLAND. Anything else is but another example of reverse rascism.

The people of New Zealand have very clearly spoken in the voting at the general election. We are one people to be treated equally.

When is Auckland Council going to actaully do what it's population wants and remove ALL comments or considerations around ethnicity?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   I do not agree that there should be any distinction whatsoever between the needs and rights of one group over another. I do not agree to the insertion of provisions and terms that provide rights to Maori over and above those of all other ethnic groups. We are all equal and should have equal rights when it comes to the stewardship and use of our fresh water in Auckland and the wider New Zealand. The entire document should be written in English and not contain maori words or phrases which are largely a mystery to the overwhelming majority of Aucklanders, both maori and non - maori. If any one group needs the document to be published in their language, be that maori, mandarin, german, french or whatever language, then that group should arrange for the translation and all power to them.

   I do not support the separate consultation process for maori that has, if I understand correctly, preceded consultation of the rest of the population. All of us, regardless of ethnicity, should be equally consulted, simultaneously, in a totally transparent manner. It will only be through this process that we can all see what is most important to the various groups that make up our diverse population and, as a group, agree on what special provisions should or should not be made for any one group. I suspect this is the only way we can possibly gain an enduring consensus and avoid further fueling the suspicion and extremely negative

division we are currently experiencing as a direct consequence of things like this 'other' consultation of maori which has the appearance of being a consultation 'over and above' the rest of us. We're in this thing together; we're not and should not be led to behave as though we're a bunch of warring tribes with disparate goals. For goodness sake we need to pull together, not divide ourselves.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

To ensure that all is done to a high standard that will survive the tests of both time and environmental change (both man and nature made). This will require the involvement of better qualified professionals, the use of superior materials and most advanced construction methods. It will cost significantly more however it is high time we all started to think long term and on behalf of future generations.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

There are a number of reasons, one of the main ones is economic; close proximity to water affords attractive views over water and ease of access to that water. Proximity substantially affects real estate values. Thought needs to be given to how those values can be best protected whilst at the same time ensuring those who do not enjoy proximity can nevertheless equally enjoy access to water. For example, in a number of countries the public supposedly have access to all shorelines but in reality wealthy individuals bar access too all but themselves; this should never be permitted in NZ where all individuals should have equal access to our shorelines.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

All New Zealanders should be treated equally. No one individual or ethnic group should have rights of management, decision making or enjoyment over and above the rights of other individuals and ethnic groups. This document should pursue a system whereby all individuals in Auckland will benefit equally from competent, wholly professional management of our fresh water resources.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Other

Tell us why:

Follow the science; if something is toxic to our water and has the potential to harm or kill humans, desirable animals or vegetation it simply should not be permitted.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    I cannot help but feel you have used far too many maori words, phrases and terms in this document which, as a matter of fact, are not properly understood by the majority of kiwis (maori and non - maori). I think it would be more helpful to the process, and certainly less divisive, if this document were published wholly in English, which all New Zealanders speak and understand. There is no reason why maori (or any other ethnic group's) particular concerns and desires cannot be captured in English and thereby more effectively and transparently communicated to the entire community. We need universal buy - in which won't be possible if a large percentage of the population effectively feel they've somehow been excluded from parts of the process which appear to have been reserved exclusively for maori.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises

one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group. Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   There is a great need to monitor and protect NZ / Auckland waterways (rivers, lakes and sea) in terms of quality and quantity. Pure fresh water is a country's / Auckland region's greatest resource.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The ability of a waterway to withstand or recover quickly from an introduced disturbance is important eg silt from nearby hillside flooding or human activity

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

yes, as Kiwis place great value on being close to different types of water - waterfalls, streams, lakes, rivers and ocean for therapeutical and recreational purposes

7. Do you have any feedback on the proposed environmental outcomes?

Each area has unique characteristics (food production, conservation / recreational & water catchment for town supply) which require protection

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

ALL Aucklanders (and ALL ethnic groups in a culturally rich and diverse city) value for cultural, ecological recreational and landscape reasons all forms of fresh waterbodies.

Water is the essence of ALL life, so everyone has an interest in healthy water. ALL Aucklanders should be equal stakeholders in how freshwater is managed in their city.

Also, please do NOT insert token Maori words in your explanations / descriptions eg mahinga kai

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Going on past history, there is a great need to keep fresh waterbodies free of contamination and not a health risk to humans engaging with them.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

You have to start somewhere!

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

The contamination of the waterbodies and the presence of rubbish in the environment eg Oakley Creek in Mt Albert

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

All minerals have an impact on the environment

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Weather patterns are changing and we need to monitor these changes in the weather and the fresh waterbodies

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Should be self evident! Ambitious targets are good as sometimes the complete goal is not achieved and the higher the aim is the better the outcome.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Design water management practices and horticultural practices that both monitor and control the leaching of contaminants into the water table and fresh waterbodies. Market gardens are a key resource for Auckland City (and the area should NOT be used for housing and industry eg near Ramarama!!)

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

In the most part agree with them. Disagree with treating Maori as a special ethnic group in regard to fresh waterbodies. ALL Aucklanders highly value fresh waterbodies and greatly enjoy all kinds of contact with them!

17. Are there other management options outside of those listed that you think we should consider?

Do NOT allow (and therefore strictly monitor) excess food gathering eg fish, shellfish or marine life in any fresh waterbody.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Fish need to migrate up rivers for spawning and down rivers for other activity. Artificial barriers to this migration should be removed or remediated.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

To allow existing freshwater ecosystems to survive. Perhaps also to allow humans to walk and enjoy the wetlands.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

I agree with location-specific priorities for horticulture & agriculture. However, land use restrictions should apply if the water table could not support certain types of land use which uses high levels of fresh water eg water bottling factories, dairy use, golf courses, etc.

21. How do you think we should prioritise allocation where or when water is scarce?

Human and animal drinking water has first priority on any scarcity of water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Ask residents to monitor and collect rubbish from fresh waterbodies and farmers to fence off fresh waterbodies from stock.

Auckland City Council to separate drains which carry sewage from those that carry flood water and to make sure housing developers do not let soil run off into fresh waterbodies (keep some mature trees on development sites!).

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   The city of Auckland needs clean, plentiful and affordable water for all its residents & visitors, which should be achievable via consultation, feedback & input from all interested residents in achieving these goals. No one part of our super city should have disproportionately more say in how these goals are achieved, which appears to be the case with the current 3 waters initiatives.

   We all have a passion and vision for excellent reliable fresh water, with no particular ethnicity having a greater investment or say in how this is achieved.

   I resent being continually told that our Maori neighbours & citizens have a greater understanding and passion towards the environment because of their heritage.

   And therefore have more say and input into what we can and cannot do. We are all one, with equal opportunity.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

If we are to afford Maori significant say and management of their cultural and recreational values based on history, do we undertake the same level of investigation and differentiation

for all other non Maori based on their history, and afford them with equal rights and management as proposed for Maori.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Council states "Freshwater is precious and limited, a taonga of huge significance, and of particular importance to Māori." -

It is time to recognise that it is no more of a taonga to Maori as it is to the rest of New Zealand. We all have equal input into this and many other issues.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I oppose prioritising policies that give any race or culture group greater input or recognition that others. We are all stakeholders when it comes to water management.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

   Water quality and care pertains to all Auckland citizens and should not be the private domain of any race or group. It is patiently wrong to assume greater connection to what is a life giving source for all mankind.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Maori have no greater respect or empathy about the need for fresh water than non Maori, nor should they have more goverenence them any other racial group. Fresh water is the concern of all citizens and under the Treaty of Waitangi all NZ all citizens are equal. The fresh water in Auckland in in whole of NZ should not be at the behest of any pressure group.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Who is 'requiring' you to have this vision?

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

   Further the idea that water is not a right of everyone should be regarded with suspicion. Who is it that would want us to believe that? I'd suggest it is people that want to commoditise water and profit from it.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

We all came here on some kind of waka and therefore share an equal footing to all NZ citizens. There are no indigenous humans in NZ. Plants, birds and reptiles yes. But no humans. We are all equal and should be treated as such. That is explained in the 3 Articles of the Treaty of Waitangi as Sir Apirana Ngata has shared with us: https://issuu.com/esisite/docs/sir_apirana_ngata_book/2

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is essential for all who live in Auckland. Rate payers of Auckland should be consulted equality and without bias of race.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Our waterways are important to all Auckland ratepayes, cultural values for all ratepayes should be taken into consideration not any individual culture that would be wrong.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    All involved will be need to be consulted not any individual race. The council obligations are to the ratepayes firstmost.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   this is raced based - water should be available for all equally. If Maori were consulted, why weren't other groups eg Asian people who enjoy fishing? Priority shouldn't be given to groups of people over others when it comes to water management

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Again, this is giving priority to one group of people over others, assuming Maori values are more important.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is important and essential to everyone, not just one group. Auckland Council's vision suggests that water is more important to one group than other groups. To assume that Māori have greater importance concerning water is not correct. I oppose any plan that gives more rights for different groups on race. All Aucklanders should be included in how freshwater is managed in Auckland. All plans for freshwater management must include all Aucklanders equally, there must be no racial segregation in the decision-making, monitoring, management or allocation of the region's freshwater.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   These are Maori concepts. Life is critical for all living organisms, and after breathing air, water comes next in importance for all people, Maori and non-Maori alike. The make up and characteristics of all water are defined in physics and chemistry not animist perspectives

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Your document puts Māori cultural values at the top for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all others in the management of our freshwater.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    It is surprising to me that Auckland Council seems oblivious to the recent election in October which has strongly shown that the Maorification that Labour, Greens and TPM drove for three years is coming to an end because a majority of New Zealanders don't want any part of it. We are all one people, all New Zealanders, nothing should be separated by race or ancestry. And FYI our city's name is Auckland and none other should be used.

#1852

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is equally important to all people, regardless of their race or ethnicity. It should be managed by people who are experts in water and water management, and their qualifications or skill in water management alone - not their knowledge or understanding of Maori culture, or their ethnicity. I myself am Maori and I have had enough of the racism, and the attempts of greedy people to steal money and resources from New Zealand. And I have enough of watching naive people naively giving it to them. Please stop! They do not care about you, Maori culture, or our country. They care about money.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

   'I am Maori. I am tired of watching greedy people deceive and fool naive people into believing they should give New Zealand's resources and money to them. They do not care about you, the environment, Maori culture, or New Zealand. They care about money.

   -Google what the Maori language version of the treaty of Waitangi says. Put it into Google Translate and read it. It very clearly says equality for all people. Taonga does not mean natural or environmental resources. Taonga means "objects" "possessions". Nowhere does it

say Maori have or want sole rights to possession of natural resources such as water. So there was no confusion or misunderstanding in the Maori version.

-Research why Donna Awatere went to Cuba in the 1970s, and what plan she came back with and developed as a result. (Strategies on how a minority group can subvert, divide, conquer and rule a nation.)

-Listen to Apirana Ngata's entire speech at the Waitangi centennial in 1940, and see how he says everyone understands the Treaty, including Maori - the Treaty achieved equal rights for all citizens regardless of ethnicity, which was a world-leading first.

People who use tikanga Maori to fool naive people into handing over ownership and decision-making into the hands of greed commit theft and make a mockery of true Tikanga Maori, and destroy the democracy our ancestors signed up for. All future generations of New Zealanders lose out, including Maori.

Water management should be entrusted solely to people with water management-related skills and knowledge, and ethnicity and greed have no relevance to that. A. Ngata-Smith

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

Temperatures fluctuate, depending on the polar cycle, and solar cycle. The temperature itself is not relevant to the health of the living creatures, but will of course have a connection with what living creatures are present. For example, more algae may be present when it is t warmer. As these are cycles, there are changes every few years. When the temperature changes again, the balance will shift again. And then it swings back the other way a few years later. Polar cycles are approximately 80-100 years, solar cycles are approximately 11-20 years, and then there is also El Niño and La Niña weather systems. So a peak temperature is not an indication of health or condition, it is merely an indication of seasons and cycles. Currently Arctic ice has already re-grown to the same size as it was in 1996. So we have already passed the peak of polar cycle temperatures, and they will soon be cooling within a few years.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

People need food to eat, grown locally.

16. Tell us what you think about the draft management options being considered?

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

To be honest, I think it should have been managed better in the past. Sitting on fat salaries, while raising rates to cover costs, is corruption. And then asking the public how to best manage and prioritise the short-fall or difficulties is slightly patronising.

Long term, an effective suggestion is that all rates should be coming from a 1% transaction tax, like in Dubai. We would earn many billions of dollars more than what is currently received through income tax, GST and rates combined if we did this. This has already been calculated and proven for the NZ economy.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

We are commenting on the "Preferred direction for future state for sediment in Auckland's rivers" with particular regard to estuaries (p.49 Consultation Document). We think that quick action to stop sediment pollution from building sites is required and that there is enough

evidence to support this stance. That is not to say we wouldn't suppport further work on enhancing understanding of the impact of sediment and other pollutants on the marine ecology but we are convinced that issues around sediment control on building sites can be addressed immediately.

For details see the attached file.

17. Are there other management options outside of those listed that you think we should consider?

We believe that the GD05 Erosion and Sediment Control Manual needs to be updated urgently and that its application needs to be fast tracked and stricly enforced. Changes to the AUP will be required to give extra protection to SEAs and to freshwater flowing into marine reserves.

For details see the attached file.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

The Long Bay Okura Great Park Society (the Society) has a long history for advocating for the protection of our local marine environment. Unfortunately, sediment remains an issue as the Council's own background studies have determined. As these documents note, the Visual Clarity in the Long Bay Okura Marine Reserve (designated SEA1) is C and D (the worst case) at the Council's survey points.

The Society supports the Council's aim to set realistic sediment baselines. However, sediment runoff from building sites is man-made as the Society's observations only confirm. The Society therefore has the realistic expectation that no sediment runoff occurs from building sites.

To achieve this expectation, it has become clear that the sediment control standards are inadequate as the many trigger events at the O Mahurangi – Penlink construction site only confirm. This, even without climate change being fully accounted for.

A revision of GD05 Erosion and Sediment Control Manual is called for. In addition, a robust and inclusive process with the involvement of the appropriate professional experts is expected. The Society would gladly particate with our experts to ensure any proposals are effective.

It is also the Society's long held view that sediment runoff into a designated SEA1 area must be avoided. Meaning construction activities in the catchment of any marine reserve must be avoided and if it does occur then particularly robust sediment control measures are required. To achieve this outcome a review and if necessary, a change to the Auckland Plan is called for.

The Society supports the efforts of Council Staff and community members to ensure sediment control standards are adhered to. As improved standards are adopted the effort to ensure compliance must continue. This is especially true of small sites.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Because currently our streams a quasi stormwater channels and NOT COPING

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Because there are far too many structures being build by AC in sensitive areas. Look at the images in these documents - bridges etc are NOT what makes water better

7. Do you have any feedback on the proposed environmental outcomes?

Excellent outcomes

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

There are too few monitoring sites. ASPM is not described.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

look at the results, the health indicators are very poor

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

make it easier for people to just get on with it by having a bunch of consented solutions to pick from and agree by experts

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

human health

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

talk less, do more

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Only when the environment is on a positive cycle will it benefit people and future generations. Freshwater resource is a very important component of the environment.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

   Generally agree, but FMU require professional knowledge to understand, so selected "Other".

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

Tell us why:

Agree with good proposals but don't understan Kaipara FMU, or it's concept.

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

Agree with good proposals but don't understan Manukau FMU.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

I don't understand the definition of "resilience".

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

"Amenity" is very important.

7. Do you have any feedback on the proposed environmental outcomes?

No, don't quite understand.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Want us to realise our plan, not to go backwards.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Surroundig environment is pretty good.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

Don't quite understand.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Protecting the environment, ensuring balance in the habitat is very important.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

It's very important to maintain good waterbody conditions.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Don't quite understand.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Agree with good proposal.

17. Are there other management options outside of those listed that you think we should consider?

Don't quite understand.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting a healthy living environment is everyone's responsibility.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Very meaningful.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Support.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Continuous improvement and moving forward.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Support.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, consider and service everyone.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Reasonable. Support.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Surrounding environment will be safer, improve and lift water quality, everyone will feel safer.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Support.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Can be even safer and healthier.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Lift water quality standards.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Let the temperature be suitable for all living things.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protecting the environment is everyone's responsibility.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Whilst protecting all habitat standards, improve food safety. Improve water quality, give more security for human lives.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Start realistically.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Support.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

Not sure.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Maintain status quo.

21. How do you think we should prioritise allocation where or when water is scarce?

On the premise of ensuring daily water usage, encourage everyone to save water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting the surrounding environment is everyone's responsibility.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Agree and fully support.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Long-term benefit. Support.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Extremely supportive.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Very good.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Relates to people's livelihoods, very supportive.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Keep local culture, suppot.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Management of pollution must be supported.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Don't quite understand.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Comparatively pretty good, however, can be even better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Global warming is upon us. Temperature management is very important.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Maintain status quo, and keep lifting.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

On the premise of ensuring basic protection, improving water quality is very important.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Start from basic.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Don't quite understand.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Consider the actual situation, reasonably conform appropriate standards.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Do your best to maintain allocations.

21. How do you think we should prioritise allocation where or when water is scarce?

After ensuring basis water use for living, maximise saving water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2711

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We all have responsibility to protect our surrounding environment.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Extremely supportive.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very good, support.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Hope can continue moving forward.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, very good viewpoint.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Agree, especially applicable to elderlies.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Very reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Improve water quality, makes water source safer.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Don't quite understand this area.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Can be even better. Situations in some areas are not very good.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Let the water quality reach a higher standard.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Support. Suitable temperature can better protect the environment.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protecting the water source is everyone's responsibility.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

On the premise of ensuring safety, work hard to lift water quality.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Start realistically.

17. Are there other management options outside of those listed that you think we should consider?

Currently don't have better solutions.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Don't quite understand this area.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Consider the actual situation, retain the best result.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Maintain status quo.

21. How do you think we should prioritise allocation where or when water is scarce?

On the premise of ensuring daily water usage, save water as much as possible.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Disagree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

    Recommend as priority allocate to hospitals, schools, basic infrastructure and necessary public needs. Then allocate to community welfare housing, rest homes, animal welfare shelters, vegetable production.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

A. Strengthen public awareness, make more public realise the important to protect and save water resources. B. Reduce amount of car washes, control public wastage. C. Control the amount of water the public uses for recreation or have a criteria to limit water usage. D. Lift freshwater drinking usage criteria through improvement in technology. E. Amend standards for water use for building management and health and hygiene detection. F. Strengthen management and protection of areas of water source. G. Increase management standards for industrial, commercial, and trade use of water.

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#3198

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Beneficial to water resources.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   I don't know

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Beneficial for the nation and its people.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Improve the quality of life.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Ensuring safety and health is better guaranteed.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

No adverse reactions after drinking.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Absolutely, having a clear purpose, a well-thought-out plan, and a focus on sustainable development are key principles for success in any endeavor. It applies to various aspects of life, including environmental management, public health, and community well-being. Planning and executing with a purpose in mind can lead to positive outcomes and long-term benefits.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Strengthen management to protect the growth of tree shade.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

It benefits both life and survival.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Improving water quality is essential.

17. Are there other management options outside of those listed that you think we should consider?

Save water.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Addressing water scarcity

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Water for agricultural and animal consumption should also be given priority in allocation.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Maintain balance in the ecosystem, water ? live ? precious water resource must achieve ? from ?

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Not within my field of understanding.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

? resource for human development all ?

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Benefit humankind.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Water and human as well as various living things ?

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Foundation for loving nature.

7. Do you have any feedback on the proposed environmental outcomes?

? and spread government policy.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Treat kindly the source of life - water.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

?

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

Not ?. I don't know.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Rely on expert recommendation.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

? need to do ?

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Expert will ? recommendation.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

? national requirement ?

17. Are there other management options outside of those listed that you think we should consider?

Save water, reduce pollution.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

Participate in national ?

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

? allocation, living, agriculture, ? environmental use of water, increase ?

21. How do you think we should prioritise allocation where or when water is scarce?

Scientific ? water ? water resource's continued usage and ecosytem ?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Without water? Lack of water resource becomes ? problem. Hope to lead government and experts to ? Must rectify... ? water resource ?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Obviously wai is the ? potion of life to which every effort to be put is worth.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   The ? Hauraki water quality is getting worse ? It is time to take measures.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Other

Tell us why:

For Kaipara I recon the fresheness of water can be accepted.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

This area is bit of under developed so good plan should be put forth for future.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Only when the environment is on a positive cycle will it benefit people and future generations. Freshwater resource is a very important component of the environment.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

   Generally agree, but FMU require professional knowledge to understand, so selected "Other".

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

Tell us why:

Agree with good proposals but don't understan Kaipara FMU, or it's concept.

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

Agree with good proposals but don't understan Manukau FMU.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

I don't understand the definition of "resilience".

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

"Amenity" is very important.

7. Do you have any feedback on the proposed environmental outcomes?

No, don't quite understand.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Want us to realise our plan, not to go backwards.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Surroundig environment is pretty good.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

Don't quite understand.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Protecting the environment, ensuring balance in the habitat is very important.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

It's very important to maintain good waterbody conditions.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Don't quite understand.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Agree with good proposal.

17. Are there other management options outside of those listed that you think we should consider?

Don't quite understand.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting a healthy living environment is everyone's responsibility.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Very meaningful.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Support.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Continuous improvement and moving forward.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Support.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, consider and service everyone.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Reasonable. Support.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Surrounding environment will be safer, improve and lift water quality, everyone will feel safer.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Support.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Can be even safer and healthier.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Lift water quality standards.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Let the temperature be suitable for all living things.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protecting the environment is everyone's responsibility.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Whilst protecting all habitat standards, improve food safety. Improve water quality, give more security for human lives.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Start realistically.

17. Are there other management options outside of those listed that you think we should consider?

Currently no.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Support.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

Not sure.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Maintain status quo.

21. How do you think we should prioritise allocation where or when water is scarce?

On the premise of ensuring daily water usage, encourage everyone to save water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3345

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting the surrounding environment is everyone's responsibility.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Agree and fully support.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Long-term benefit. Support.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Extremely supportive.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Very good.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Relates to people's livelihoods, very supportive.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Keep local culture, suppot.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Management of pollution must be supported.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Don't quite understand.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Comparatively pretty good, however, can be even better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Global warming is upon us. Temperature management is very important.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Maintain status quo, and keep lifting.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

On the premise of ensuring basic protection, improving water quality is very important.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Start from basic.

17. Are there other management options outside of those listed that you think we should consider?

Currently no.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Don't quite understand.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Consider the actual situation, reasonably conform appropriate standards.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Do your best to maintain allocations.

21. How do you think we should prioritise allocation where or when water is scarce?

After ensuring basis water use for living, maximise saving water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Yes

Tell us why:

I think we should.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

    Priorise allocating to areas where water is scarce.

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#3353

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We all have responsibility to protect our surrounding environment.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Extremely supportive.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very good, support.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Hope can continue moving forward.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, very good viewpoint.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Agree, especially applicable to elderlies.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Very reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Improve water quality, makes water source safer.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Don't quite understand this area.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Can be even better. Situations in some areas are not very good.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Let the water quality reach a higher standard.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Support. Suitable temperature can better protect the environment.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protecting the water source is everyone's responsibility.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

On the premise of ensuring safety, work hard to lift water quality.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Start realistically.

17. Are there other management options outside of those listed that you think we should consider?

Currently don't have better solutions.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Don't quite understand this area.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Consider the actual situation, retain the best result.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Maintain status quo.

21. How do you think we should prioritise allocation where or when water is scarce?

On the premise of ensuring daily water usage, save water as much as possible.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3360

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Disagree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

    Recommend as priority allocate to hospitals, schools, basic infrastructure and necessary public needs. Then allocate to community welfare housing, rest homes, animal welfare shelters, vegetable production.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

A. Strengthen public awareness, make more public realise the important to protect and save water resources. B. Reduce amount of car washes, control public wastage. C. Control the amount of water the public uses for recreation or have a criteria to limit water usage. D. Lift freshwater drinking usage criteria through improvement in technology. E. Amend standards for water use for building management and health and hygiene detection. F. Strengthen management and protection of areas of water source. G. Increase management standards for industrial, commercial, and trade use of water.

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I read the information on the blue paper to understand the specific plan.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It is important to eliminate E. coli contamination in water sources, as well as ammonia, copper, and zinc contamination, which are crucial to human health.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

Tell us why:

I have not seen the proposed vision statement of Kaipara FMU.

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

Did not found the information about Manukau FMU

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The government and people's ability to respond to climate change and natural disasters should be increased. The violent storms and landslides in earlier this year caused many houses to collapse and roads and bridges to be washed away by floods.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The natural ecology of rivers, lakes, wetlands and waterfalls should be protected. Not only for people to appreciate, but also to maintain ecological balance.

7. Do you have any feedback on the proposed environmental outcomes?

It is crucial to protect good water quality from pollution, and improve the environment where there is poor water quality to make it better so that humans can have safe and reliable water.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

There is no information for Chapter 13

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

On the surface they look very clean, but I don't know whether they are contaminated by bacteria or whether they contain ammonia, zinc and copper.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

I think copper and zinc management should be included in the indicators of urban streams, because excessive metal content will definitely affect people's health, especially children!

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

As mentioned above, rising temperatures can reduce the amount of oxygen in our waterways. Not only will it harm fish and other freshwater life, but perhaps rising temperatures will also breed bacteria (just a personal guess for reference), thus affecting drinking water.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

It is a matter of course to maintain good water conditions and improve poor water conditions. Water quality is related to people's health, and we must leave a high-quality water source to future generations.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

It is caused by the use of fertilizers containing nitrates. So is it possible to use your brain on chemical fertilizers? Don’t New Zealand have more cattle and sheep than people? So how is their feces disposed of? I remember that when I was a child, farmers fertilized with manure instead of chemical fertilizers.

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

I didn't see the introduction to Chapter 18.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

To implement organic planting method.

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    To allocate resources according to actual expense.

21. **How do you think we should prioritise allocation where or when water is scarce?**

    To support public service firstly.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

To enhance /improve cycle system, including waste water and storm water.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   I support the proposals set out in the vision statement.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

For the safety of life, water resources should be well protected.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

To make New Zealand more beautiful, we should include "amenity" as a value in the "Auckland Unitary Plan"

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Are Maori people special?

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It is necessary to reduce pollution

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Seems like these drinking water sites should be able to handle it.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Trace elements such as copper and zinc have a great impact on human health.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Necessary.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

It is necessary to maintain good water conditions, and the ecological environment of nature has its laws.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Strengthen education.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

Because there is no need for causal loops.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

let nature take its course

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

To protect water sources, strengthen education appropriately

21. How do you think we should prioritise allocation where or when water is scarce?

Make sure you have drinking water for people and stop washing cars and watering the ground.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Strengthen education about freshwater resources, love New Zealand, and love our global village.

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   People without long-term concerns must have immediate worries, and so does the government. In particular, freshwater resources are indispensable and important necessities for people's lives. They must take a long-term approach, set practical goals and implementation measures, and gradually implement them to serve the country. and lay a solid foundation for the development of social issues.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   I think the investigation of the current problems with freshwater resources in Hauraki (FMU) is relatively clear, the causes are accurate, and the targeted measures for the problems raised

are in line with the actual situation. Of course, it is not easy to implement, but it hits the core of the problem and must be implemented.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Agree

Tell us why:

This vision statement is very comprehensive, very specific, and highly feasible. It has both short-term goals and long-term plans, taking into account different stages of social development. very good.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

There is great uncertainty and danger in climate change throughout the world. This year's heavy rainfall, strong winds and floods in Auckland demonstrated this. Therefore, it is very necessary to incorporate resilience as a value into the Unitary Plan, which can effectively improve the city's adaptability. Reduce losses from natural disasters.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Strengthening freshwater management and improving the ecology of water resources will not only ensure the safety of drinking water, but also improve people's quality of life. Including vacations, appreciating beautiful scenery, and enjoying the beauty that natural ecology brings to people. From the perspective of long-term social development, it is an indispensable important consideration and a very correct value.

7. Do you have any feedback on the proposed environmental outcomes?

Your proposed environmental outcomes are great. Based on the characteristics of these three FMUs, practical protection results and key points are proposed respectively. Very good, no comments.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

These baseline health indicators are based on science and are important standards to ensure that water resources safety meets standards. Testing must be carried out strictly. Can't relax or accommodate. In particular, we must strengthen governance.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

I am quite satisfied with the health of the river. But I'm a little dissatisfied with urban streams and lakes. Because some streams and lakes are close to residential areas, they are

susceptible to pollution, and there are seasonal effects. Pollution will be more serious during the flood season.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

As long as it is a metal element that is harmful to freshwater resources and humans, it should be included in the regulatory indicators.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

I agree very much that temperature should be included in management and detection indicators. But more importantly, how to effectively reduce the temperature of the streams. Our Browns Bay community plants trees beside the streams every year. I think it is an effective measure.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

This should be the most basic working requirement of the government. Now that the importance of this work is clear and the current status of water bodies is clear, measures must be taken to maintain good water bodies while improving poor water bodies as soon as possible.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Contradictions always exist, and there is no need to pursue excessive pursuit of the immutable laws of matter.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Nowadays, in newly developed residential areas and commercial areas, there are many soil floors that cannot be hardened or planted with turf in time. When soil flows into rivers and causes pollution, builders must be required to control it simultaneously.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Everyone should save water, but the government should ensure people's water needs.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3450

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

   Protecting the water environment is a good thing and benefits the country and the people.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Protecting the freshwater environment is of great significance. The earlier this issue is recognized, the greater the significance.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Only by persevering can you achieve promising results.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The environment serves humans, and humans care for the environment.

7. Do you have any feedback on the proposed environmental outcomes?

need concrete measures.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

To strengthen management

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

to maintain biological diversity

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Strongly support

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The vitality of water is about human survival and health

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Because it meets the requirements of ecosystem health!

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Same as above

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Same as above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Because it is conducive to the construction of water resource ecosystems, the establishment and improvement of a complete value system.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Because it facilitates local people to carry out leisure activities along the rivers, lakes, wetlands and other places without getting into the water.

7. Do you have any feedback on the proposed environmental outcomes?

The above-mentioned environmental targets (outcomes) are relatively scientific and reasonable, and the key is to achieve these goals through the joint efforts of all residents.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Fully agree with stricter standards regarding safe swimming.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Strongly support

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   This is a great thing that benefits the country and the people.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   This is a good thing for the long-term development of the country.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

This is a fact that meets the long-term interests of all citizens.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

This is a good thing that benefits the people.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

For a certain job, if you persist and persevere, you can get things done. This is resilience.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Leisure amenity actually improve the quality of people's daily life.

7. Do you have any feedback on the proposed environmental outcomes?

Copper and zinc are elements needed by the human body. If the content in the body is too low or too high, it will affect human health. Therefore, effective means must be used to control them within a reasonable range.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

This is an outcome that must be set in order to improve water quality. Without goals in outcomes, there will be no basis for good governance.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

The level of water temperature affects the life and health of aquatic animals and plants, so clear goals must be set.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Maintaining long-term excellent water quality is an important guarantee for people's life safety.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

First, ensure food safety. Because human life comes first. Of course, improving water quality and ensuring food safety do not create irreconcilable contradictions.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Regarding specific management measures, it is recommended to consult experts and scholars for their professional knowledge to make final judgments and conclusions before implementation.

17. Are there other management options outside of those listed that you think we should consider?

During the implementation process, frequent investigations and studies need to be carried out, and deficiencies found need to be corrected in a timely manner.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting water resources is the guarantee of life for future generations.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Only by persevering can you achieve the desired results.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The water environment serves and enriches people's lives.

7. Do you have any feedback on the proposed environmental outcomes?

Industrial water, agricultural and animal husbandry water, and domestic water must be planned. Preventive measures should be taken against factors that affect the water environment.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Heavy metals should be managed more.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Aquatic life should be maintained at a reasonable level to ensure the diversity of aquatic life.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

Protect domestic water usage.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3483

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Local Board members are elected by us and represent our wishes, and I support the plans set out in the vision statement.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Fresh water is an important resource for people's livelihood. The national policy statement specifies 22 benchmark indicators that must be met. This is for the greatest protection of the health of New Zealanders.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Agree

Tell us why:

For pure New Zealand and the health of its people, water sources and rivers should be well protected.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

It is necessary to increase our ability to respond to climate change and natural disasters.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Recreational amenity is a wonderful way of life for New Zealanders. Protect rivers, waterfalls, lakes, and wetlands to make New Zealand more beautiful. People's lives are more and more comfortable.

7. Do you have any feedback on the proposed environmental outcomes?

The priority is to protect water quality, and water quality and the environment are inter-related. Water quality is lso related to the quality of vegetables and fruits. Environmental protection and water quality protection are equally important.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Protect all water sources, including ancient Māori cultural values and standards of ecological, landscape and recreational value.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It is very necessary to reduce the pollution of drinking water sources.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Baseline health standards need to be resolutely implemented.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

Very satisfied, clean and pollution-free

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Trace elements such as copper and zinc have a great impact on human health.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Temperature management should be included in the indicators, and cooling should reduce the oxygen content in water bodies.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protect current good water bodies and increase efforts to improve the health status of those with poorer water bodies.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Reduce the use of chemical fertilizers and do not use chemicals. New Zealand has vast pastures where cattle and sheep dung can be collected. Organic fertilizers can make these vegetables healthier.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Protecting water sources and wastewater treatment are equally important.

17. Are there other management options outside of those listed that you think we should consider?

Important water sources, lakes, and rivers need to be monitored and managed by dedicated personnel.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

The restoration of fish passages facilitates fish reproduction and survival as an ecological protection measure.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

High standards of national requirements should be retained.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Strengthen education on protecting water sources and saving water.

21. How do you think we should prioritise allocation where or when water is scarce?

Guarantee drinking water for people and animals. Stop using water for car washes

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Educate children at schools to care for water, conserve water, care for our land, and care for our earth from an early age.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting water resources is the common destiny of mankind. Benefit future generations. Water is the lifeblood of human activity.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The most important thing is to maintain it!

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Pay attention to human behavior.

7. Do you have any feedback on the proposed environmental outcomes?

Protect vegetation. Hoticulture practise should stay away from water sources, and limit polluting human activities.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

As long as it's good for water resources and water quality, so it's OK!

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Pollution is the biggest cause, such as washing powder, chemical fertilizers, pesticides. They leach into the ground and filter through vegetation.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Description of A.B, detailed baseline, indicator control.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Aquatic organisms increase, water temperature rises, and water quality deteriorates, affecting human health.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

The vegetable base should be at least 30-50 meters away from water sources. Due to the planting process, there are use of pesticides, chemical fertilizers. They need to be filtered through water, soil, and vegetation can reduce pollution.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

New Zealand's grasslands filter vegetation very well, but the land quality is poor.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

New Zealand is supposed to have no shortage of rainwater. It has abundant freshwater resources. Sufficient water resources are a 100 year plan for the future. The increase in population will bring pressure on water supply. More reservoirs should be built to increase water storage capacity to cope with the population and industrial, agricultural and commercial water use.

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3509

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Water resources are the source of life and very precious. Protecting and enhancing the life of water is an awareness and behavior that every citizen must enhance. We must save water and eliminate waste.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Vision statement, very insightful and forward-thinking.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

I agree that the key lies in implementation

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Resilience is very important and is a reflection of values. Protecting water, loving water, and strictly preventing pollution are necessary to protect New Zealand's ecological environment. Everyone has a responsibility and must be responsible, implement it, and remember it at all times.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Recreational amenity is an appreciation and enjoyment of water. It is of values.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Managing water resources with strict standards is conducive to human survival and development, as well as the safety of life.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Baseline health metrics matter

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

I believe that the Council will conscientiously implement various effective management of water resources and strictly implement standards, which will benefit the country and the people.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Criteria that establish baselines are important. Good water quality standards in Auckland should be well cherished,

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Temperature management needs to be incorporated into normal management, seriously, meticulously, and controllable.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

The long-term goal is the fundamental plan, and everyone is responsible for maintaining good water quality.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Make the long-term compliance with the national bottom line requirements. We must fully implement it, obey the government's arrangements, and never follow our own whims.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Obey and obey the guidance and arrangements of the government, and follow the command in all actions.

17. Are there other management options outside of those listed that you think we should consider?

Reiterate a principle: obey the government, be a good citizen, and protect water sources.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The quality of water directly affects the environment. A good and beautiful environment is a very important guarantee for improving the quality of life and health of citizens, and it also greatly improves the country's economic development.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Properly control the cleaning water used for plants, car wash, etc.

21. **How do you think we should prioritise allocation where or when water is scarce?**

    First of all, we should ensure the daily water supply for people's livelihood.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   As long as there is a matter of protecting the natural environment, it can be carried out after scientific demonstration and investigation.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

I have no knowledge of natural and environmental protection, and I insist that I will not make irresponsible remarks without knowing anything about it. Not understanding the true needs of NZ's natural environment.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Any action taken to protect the environment should be respected, but needs to be balanced and timed with economic support.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

There is needs to be economic support for more stringent standards. Please follow the international basic requirements which is more appropriate. Because the economy is currently in a period of downturn.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Achieve the basics that are more realistic first.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

I have not investigated.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

   Do not understand.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Expand vegetable cultivation and reduce vegetable prices.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Make water related entertainment to the sea waters.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Other

Tell us why:

Save water and protect the environment

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    I don't know.

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    On a per capita basis, floating standard price charges and rewards and punishments are implemented.

21. How do you think we should prioritise allocation where or when water is scarce?

Ensure domestic water and reduce non-domestic water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3543

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Protecting the freshwater environment is the guarantee of life for future generations.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Protecting the freshwater environment is of great significance.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

persevere

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The water environment serves people's lives.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Heavy metals must be managed more intensively.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

    To ensure domestic water supply.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3553

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Protecting water resources is the common destiny of mankind. Benefit future generations. Water is the lifeblood of human activities and the source of life.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The most important thing is to maintain it!

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Pay attention to human behavior.

7. Do you have any feedback on the proposed environmental outcomes?

Protect vegetation. Hoticultural practise should stay away from water sources. And we need to limit pollutative human activities.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

As long as it's good for water source and water quality, we agree!

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Pollution is the biggest cause, such as washing powder, chemical fertilizers, pesticides. They leach into the ground and filter through vegetation.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Aquatic life increases, water temperature rises and water quality deteriorates, affecting human health!

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Vegetable plots should be planted at least 30-40 meters away from water sources to reduce pollution.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

New Zealand's grasslands filter vegetation very well, but the land quality is poor.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

New Zealand has abundant rain and fresh water resources. Sufficient water resources are a 100 year plan for the future. An increase in population will bring pressure on water supply. More reservoirs should be built and water storage capacity should be increased to cope with the demand for water from the population, industry, agriculture and commerce.

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

   Protecting water resources is for future generations.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Protecting the freshwater environment is of great significance. The earlier this issue is recognized, the greater the significance.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Persevere and persevere

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The environment serves mankind, and mankind must protect the environment.

7. Do you have any feedback on the proposed environmental outcomes?

Water use should not only be planned but need concrete measures.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

To strengthen management

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Aquatic life should be maintained at a reasonable level and aquatic biodiversity should be maintained.

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Strongly support

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

It must be made public and it must be in the interests of the majority of people.

21. How do you think we should prioritise allocation where or when water is scarce?

To ensure domestic water supply.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting water resources is the guarantee of life for future generations.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Protecting the freshwater environment is of great significance. The earlier this issue is recognized, the greater the significance.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Only by persevering can the results be expected.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Water environment enriches people's lives.

7. Do you have any feedback on the proposed environmental outcomes?

Industrial water, agricultural water, and domestic water usages require planning and preparation.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Heavy metals should be managed more.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Maintain it at a reasonable level to ensure the diversity of aquatic life.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Public announcement must be in line with the opinion of the majority.

21. How do you think we should prioritise allocation where or when water is scarce?

Protect water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

   No detailed information is available.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Since vegetables are so expensive in New Zealand, areas dedicated to growing vegetables should be expanded.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

New Zealand's freshwater resources are in short supply and freshwater recreational areas should be reduced. Such activities should be put into sea water.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Save water resources and protect the ecological environment

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I don't know.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

First of all, water resources should be classified scientifically and reasonably, such as necessary water for domestic use and water for non-domestic use. Then formulate relatively broad per capita standards, and establish floating price charges and reward and punishment methods based on the standards.

21. How do you think we should prioritise allocation where or when water is scarce?

Ensure basic living water for humans and animals.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3621

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Water resources are the source of life and very precious. Protecting and enhancing the life of water is an awareness and behavior that every citizen must enhance. Therefore, we must protect water resources, save water, and eliminate waste in our daily lives.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Vision statement, very insightful and forward-thinking.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Agree

Tell us why:

Strongly agree, the key is how to implement it

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

I agree that the key lies in implementation

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Resilience is very important and is a reflection of values. Protecting water, loving water, and strictly preventing pollution are necessary to protect New Zealand's ecological environment. Everyone has a responsibility, and the sense of responsibility must be implemented at all times and in practice.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Recreational amenity is an appreciation and enjoyment of water, with values.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Managing water resources with strict standards is conducive to human survival and development, as well as the safety of life.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Baseline health metrics matter

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

I believe that the Council will conscientiously implement various effective management of water resources and strictly implement standards, which will benefit the country and the people.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Standards that establish baselines are important and well cherished, good water quality standards in Auckland.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Temperature management needs to be incorporated into normal management, seriously, meticulously, and controllable.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

The long-term goal is the fundamental plan, and everyone is responsible for maintaining good water quality.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Make the long-term compliance with the national bottom line requirements. We must fully implement it, obey the government's arrangements, and never follow our own whims.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Obey and obey the guidance and arrangements of the government, and follow the command in all actions.

17. Are there other management options outside of those listed that you think we should consider?

Reiterate a principle: obey the government, be a good citizen.

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Ensure water safety

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

    Develop groundwater in areas where water sources are scarce

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Human consumption first

21. **How do you think we should prioritise allocation where or when water is scarce?**

    Groundwater can be developed

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Ensure water safety

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Priorities over commerce, real estate or private profit. If the infrastructure is not there don't build on it.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

repair things for the future not just fora short term fix, for Auckland central govt needs to contribute.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We know how degraded many of the region's aquatic environments have become through the effects of land use change, industry, agriculture and horticulture. Without some robust controls and remediation measures being instituted, this degradation will continue to occur and could mean that the recovery work becomes less and less viable and more and more costly.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Being the most urbanised of the three FMUs, this is where some of the most significant degradation of aquatic environments had occurred. Wetlands in particular are some of the key habitats for threatened or endangered fauna and flora and require more stringent protection

measures and restorative work. A number of waterways have also been channelized or interfered with and so they also need to be reverted back to a more 'naturalised' system to better control velocity of peak water flows, provide a better habitat for aquatic life as well as being more resilient to storm flows during extreme weather events.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Extreme weather events are becoming more commonplace and we see the damage caused through erosion by water flows travelling at high velocity. Making water courses and water bodies more resilient to these types of occurrences can help the cope with the increased pressures placed on them through over average flows as well as reduce the amount of time for them to recover afterwards.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

In some instances, where amenity use has little or no impact on the aquatic environment, recreational use should be looked at. It is situational though and can come down to water quality. The immediate areas surrounding water courses and also water bodies are also important, not just in a functional way, but also for aesthetics and recreational opportunities as well.

7. Do you have any feedback on the proposed environmental outcomes?

No additional feedback other than to say that if they are realised and are sustainable in how they are implemented and maintained, they will accrue some valuable ecological benefits in the long term.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Any values that allow for the protection and restoration of environments under threat are good for all concerned in the long run.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

People are naturally drawn to water for recreational purposes. Unfortunately that connection has had to be severed due to concerns over water quality at various locations around the region. Restoring water quality to 'safe levels' requires a mindset change from landowners and decisionmakers (as well as some considerable investment) in order for this to change and be sustainable in the long term.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Unless there is sufficient data available as a baseline recording, how can judgements be made as to whether the situation is improving or worsening over time?

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Including site appropriate trees and shrubs will aid in not only stabilising the banks and margins of water courses but will assist in regulating water temperatures at those margins through the shade they provide.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Those attributes provide real targets to aim and aspire for as a part of implementing and monitoring the changes being proposed.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Looking at compromises such as increasing the width of the riparian planted buffer between water courses and sites where horticulture is being practiced. Researching methods of native plant species filtering out and locking up nutrient and silt before it enters waterways e.g. vegetated swales, rain gardens. Work with growers on introducing more sustainable work practices e.g. less use of inorganic chemicals and greater use of more organic methods of soil amendments and pest and disease control.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

We need to turn the tide somehow, otherwise things won't change. Funding the changes will be the difficult question to be answered. Perhaps looking at increasing levies for 'high risk' landowners or developers, whose activities are most likely to impact on the waterways and increased fines for polluters will go some way to reducing the cost for the ratepayer.

17. Are there other management options outside of those listed that you think we should consider?

I mentioned in an earlier comment around improving the resilience of waterways to extreme weather events that can lead to increased levels of water pollution and contamination. I think more needs to be invested in addressing stormwater management through restoring degraded wetlands or creating new ones. Also looking a more rain gardens and vegetated swales (where appropriate) for acting as natural filters or buffers before surface water flows (and contaminants they may contain) can enter water courses.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Healthy waterways have an abundance of aquatic life. So many of our waterways across the region have been removed, channelized or piped underground. Any ways that we can restore some of these to their natural state will be beneficial in an ecological sense, but also in aiding in addressing stormwater and floodwater management. By addressing the health of degraded waterways, it will also enhance the viability of them as suitable habitats for aquatic life.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Because it will see real change happening much sooner. I don't think anyone who has concerns around the state of the region's waterways would see that as being a bad thing.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Maybe work with central government around how to look at aiding landowners/business owners harvesting, storing and recycling rain water on their site, before it reaches the waterways. Would be far better than tapping directly into waterways themselves.

21. How do you think we should prioritise allocation where or when water is scarce?

Would depend on the nature of what it is being used for I guess. If it affects people's quality of life, then that obviously has a higher priority.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

As mentioned earlier, look at ways of assisting private landowners/businesses capture and utilise rainwater at their site. But also look at how they can manage their stormwater treatment and management issues, before they can impact on neighbouring water courses and bodies of water.

Local Board: Howick

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Rivers need to be cleaned up to flow better, making the water quality better, enabling better growth of plants and waterlife (fish, frogs, etc). We also need to ensure better water flow to the sea during times of heavy rain.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Water and the environment around streams and flowing water is extremely important for the environment.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Pollution and lack of caring has meant our waterways are not in good condition. This needs to change, which would encourage healthier waterways, more good plant life and animal life.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Levels of all minerals should be monitored to be kept at safe levels.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

We can't control change in temperature, but we can change what is is the water that will keep temperatures at reasonable levels. Plant life would be good at this, but it needs clean water with the correct levels of minerals in order to grow well. Plants would shade the water, keeping it cool, but also provide a place for animal life to grow, breed and feed.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    Don't allow the use of man-made fertilisers, but use composted soils to improve soil health.

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Where water allocation is to be reduced, work with affected parties to find alternate sources for their water needs.

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#40

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Agree

    Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

GD01 and TR2013/035 set a good foundation for this. I'd like to see it's full implementation in AUP including Design Effluent Quality Requirements and roofing materials provisions that have not been fully adopted.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Target as close to national bottom lines as possible. Due to the lagtime we can't afford to set low targets and find out they were not sufficient down the track. Also reduce the conversion

of these important areas into housing so there is more land available allowing it to be better managed.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

In the industrial space, education and monitoring is key to achieving these objectives and seems to be severely under resourced at present. There is a very uneven playing field between those with consents and best practices, and others with consented, poorly managed sites, or no knowledge at all of the permitted activity standards and ITA Consent requirements.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

The current framework with AUP, GD01 and NDC could do with improvement with regards to industrial activities, for example:

GD01 supersedes TP10, but excludes industrial activities, and the NDC seems to be focused on land development rather than industrial. This all leaves a lot to interpretation between Engineers, Planners and Council staff with often different outcomes depending on the individuals involved.

Local Board: Howick

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   The quality of drinking water has gone down. I notice our wet land birds are disappearing. We need more natural green resources for Auckland.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   I don't know

   Tell us why:

   Birds are being affected by pollution and the intensive housing programmes are depleting the wetlands of their natural habitat. Drainage areas needs a lot of improvement plus the water quality is not great, in fact the water quality in East Auckland is so bad I can no longer drink it from the tap. I have to purify my water.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

Intensive housing depletes wetlands of their natural bird life. The water quality is not great and drainage needs improvement.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

Not sure you need some places people can go swimming safely. But there has to be some rules about that.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

All you say is you want to improve water quality but not how. Keeping people out of water is not necessarily going to improve it. Our drainage has been neglected for a long time

7. Do you have any feedback on the proposed environmental outcomes?

Planting by roadsides is a good idea and by streams.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

Not sure of the Maori values but the need to care for the water, I am sure the Maoris agree on

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Keeping stock out of waterways is a good idea

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

We need to monitor the rivers and lakes

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

quality of water not great plus some bird life is dying of disease in summer

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Too many toxins decrease health of people and wildlife

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Definitely need more plant life to keep water areas cooler and cleaner

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Not good present human contamination, you should also place monitors about the litter collected in parks rivers and lakes. I notice a lot of rubbish in the creek near me.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Well, place specific places for swimming. Exclude stock from water areas and manage the waste. Cease intensive housing in this area as the land is needed to feed the Auckland area

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Definetly need clean water and good management

17. Are there other management options outside of those listed that you think we should consider?

Yes, the drainage systems.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Fish and natural waterways that are beneficial to nature needs to be monitored

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

Not sure what you mean in maintaining current standards. Currant standards of water maintenance in wet lands not good enough.certainly agree with the proposal of avoiding loss of wetlands

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

I believe people need to grow fruit and vegetables, while conserving water, I believe more resources are needed in Auckland for the growing demand of the use of water. People have to grow fruit and vegetables to eat. People will do what they have to survive. Please consider than in expanding housing we may lose precious resources such as water.

21. How do you think we should prioritise allocation where or when water is scarce?

I believe everyone should have access to drinking water and water for gardening. Consider helping aucklanders save water such as financing tanks and expanding water collection by water towers .

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I believe the architecture of increased apartment buildings needs to include more plant life grown in the buildings or by them to contribute to the well being of Auckland.

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

An ever-increasing demand for water should never be a surprise to Watercare, people are still sleeping together and the outcome of that is typically new children, and lest we forget immigration!

21. How do you think we should prioritise allocation where or when water is scarce?

Ensure that as water the basis of life never becomes scarce, especially in this country it rains regularly - catch that rain !

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

New Zealanders typically don't plan ahead for anything, WaterCare as a CCO needs to always have the fact that water is the basis of life on this planet and our city! Plan for and have the appropriate funding to ensure we have water storage appropriate for the Population of Auckland - anything less will be seen as either incompetence or a total disregard fore the people who fund Watercare!

#111

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

You are joking , this document is 70 pages of very detailed information ,maps and statistics. I don't believe any of the general public are going to be able to read or understand it. I was keen to read it , but way too much to trawl through to info I was interested in. Have your say Auckland , is a good buzzword , but really , council is not genuine about this . I think sending out a giant document for the populace of Auckland to read and respond to all the "leading" questions , is crap.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Water is a particularly important resource for us humans

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The quality that is more important than hard work and intelligence is resilience. It is important to insist on doing the right thing.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

No.I only hope that the person who makes this proposal or decision has professionalism, foresight and the ability to make overall arrangements

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    You can set up a polluted water source control system, refer to some countries

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    I don't know

21. **How do you think we should prioritise allocation where or when water is scarce?**

Domestic water is the most important

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#476

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   in general I support protecting the streams and rivers etc. HOWEVER this must be done from a political and racial NEUTRAL position, i.e. NOT being driven by agenda's that seek privileges and preferential treatment. So I STRONGLY OPPOSE Section 4.3, co-governance/Mana Whenua involvement and with that decision making based on race, rather than decision making through democratic principles whereby the VOTED, NOT APPOINTED, decision makers do what they're elected to do and govern equally for all in Auckland.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have “stronger ambitions to improve our waterways” are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region’s freshwater. Preference should not be given to the views of one racial or ethnic group.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have “stronger ambitions to improve our waterways” are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region’s freshwater. Preference should not be given to the views of one racial or ethnic group.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have “stronger ambitions to improve our waterways” are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region’s freshwater. Preference should not be given to the views of one racial or ethnic group.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

I feel you are doing enough already, continue testing, no need to introduce stricter standards

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   There shouild be no connection, reference to Manu Whenua or any racial connections what soever. Water is owned by all New Zealanders and MAori are no different to any other ratepayer. The have no special connection to water above everyones need to have a clean fresh low cost supply.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

First , the name of this City is Auckland not the MAori made up name you use..

The streams look mirky to m and have metals and run off stuff in them. Just part of living ina big city. they could be improved with eco measures

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

these metals evetually migrate to the sea and have damaging effect on sea life

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

More shade trees and cooling sumps from car parks etc

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Good intention but what about the costs to ratepayers... we are stretched as it is . Sell the Airport shares immediately

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

No blance needed. the growers should continue as of now and maintain production at ll acosts . fetiliseres might change in future anyway. Veges are vital for life and a few nitrates in water have to be lived with. We dont drink this water. . The nitrates could be filtered perhaps

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

I agree in part buth e elephant in the room is uncontrolled immigration and over population. We need to stop Aucklands growth to stop more pollution and clean up the mess aew are in now ... decades worth..

17. Are there other management options outside of those listed that you think we should consider?

'See no.17 The MISB should be abolished as it will cause you trouble in future with voting on many issues.

-Simply no need for it in a non-racist environment

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Suggest wider use of water tanks in homes and a subsidy for new installation on older homes. Will save demand pressure and pipe lives

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial

discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

It appears you have already had some consultation with Māori. That being the case, if their interests outweigh everyone else's then they should outline how they will manage and pay for the required water supply and infrastructure. You can't pretend to have ownership or more rights than others without taking the lead in ensuring you have the funding in place as an "owner" of those rights.

With respect, no one has more rights than another, nor the right for greater representation in the management of the water for Auckland. All people have equal rights and shares and pay their rates accordingly in support of that. So, get rid of your racist policies and treat us all EQUALLY. THE MAJORITY ARE SICK AND TIRED OF ACC CONTINUING TO FOLLOW RACIST BASED POLICY. WHY DO YOU THINK WE'VE JUST HAD A CHANGE IN GOVERNMENT!!

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

It's a resource as well as a societal feature. It needs a balanced management.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

Natural flood areas need to be resestablished.

Natural overflow areas and safe management of rivers etc

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Recycling and water storage and retention whoever possible

21. How do you think we should prioritise allocation where or when water is scarce?

Safe drinking water, recycling for irrigation.

Storage systems(ponds lake etc to collect and be returned to the ground or natural waterways in a clean condition suitable for aquatic life to thrive.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Organisation (if applicable):

Local Board: Howick

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is water, it does not belong to any person, and ones ethnicity has no role to play in the management or any other functionality of the supply and utilization of water. The new Government has made it clear, there will be no special rights for any ethnic group, including Maori.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Initially, the Council stresses the significance of freshwater, labelling it as precious, limited, and a “taonga of immense importance to Māori”.

   You (the Council) also underscore continuous involvement with mana whenua in Auckland, running parallel to public consultation. These documents unveil a persistent assumption that Māori maintain a distinct relationship with water, differing from the broader community, and hold "stronger ambitions to improve our waterways."

   I strongly disagree with this presumption and am horrified (as a ratepayer in Auckland of over 40 years) that you are pursuing this line of racial division.

   Water serves as the core of ALL life, warranting concern from everyone. Ensuring fair representation of all Aucklanders as stakeholders is crucial in managing freshwater in our city.

   In the extensive consultation document, you (the Council) proposes a substantially heightened engagement of Māori in decision-making, oversight, management, and allocation of Auckland's freshwater.

Although only now soliciting input from Aucklanders on this fresh policy, the Council has already involved mana whenua through a separate process. How insulting.

I foresee potential disastrous outcomes from granting exclusive, unaccountable water rights to a specific community sector. You must know this will not be a popular decision and you should not even be considering this path.

I strongly oppose your continued policies of segregating people based on ancestral lines.

Policies and guidelines should apply equally to all individuals.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I am totally opposed to the way in which it is inferred that Maori have preferential input and say with reference to the supply fresh water. I am firmly of the opinion that fresh water is a resource that should be available to ALL citizens equally. The wording of your vision certainly implies that one sector of the community is being favoured over all the many other members of our society.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I strongly object to any decisions on Aucklands freshwater supply being made on a racial basis

   This is a democratic country and I wish it to stay that way and not have any decisions made on a racial basis

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Disagree

Tell us why:

All waterbodies in that Auckland area should be available to all citizens of Auckland and the whole of New Zealand.

I strongly object to any culture claiming individual rights to any waterway

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I support the vision of Auckland Council for freshwater management for Auckland.

   I do not support the inclusion of one section(racial or cultural) of the community presuming to have the right to

   participate in any part of Auckland Council's management. It is a democratic country.

   If one section of the community regards itself as more important than the whole community then it is a matter for the population of Auckland to discern if this is acceptable. I believe no single racial group has that right .

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Firstly it's Auckland we all live in. More reporting on contaminated streams, fines issued and rubbish removed. Water samples analysed and tracked to contaminants. More care over calved up land and run off.

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I was very interested and keen to read your PDF.

Unfortunately, I live in Auckland, New Zealand and speak only English (as do 97% of New Zealanders (and probably all Maori and this document all seemed to be largely in Maori, with Maori concepts and not at all understandable.

I can't see anywhere in the Treaty that public service documents MUST be liberally sprinkled with Maori and thus readable only by those interested in a Stone Age language.

These words also seem to be ever-evolving or morphing into new into new concepts as Maori elite and self-appointed academics take it upon themselves to twist traditional meanings to suit modern Treaty claims.

Please rewrite the proposal using only English so that I can understand it

Please remove all wording that appears to give Maori an unequal say in water matters.

Stop wasting our money and your time with Te Reo and Co-governance concepts.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Support so long water is for all and not controlled through ethnic interested parties who feel that water belongs to them to control

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

So long as it recognises water is for All

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Water and quality should with common sense direction be for all

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Only that appropiate investment is made to ensure water quality

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The wording appears to suggest that some of the people in NZ have a special affinity with fresh water - that is is more special to them than other groups in the community. That is nonsense - water is the lifeblood of every form of life and therefore is as important to you as it is to me. It is of equal importance to everyone.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   Water is for all New Zealanders not just Maori

   Why on earth should Maori have a different say.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   This is not just water for Mauri

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Disagree

Tell us why:

This is not just water for Mauri

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Disagree

Tell us why:

Maori will control all the water and charge for it

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Yes

Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

No

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Disagree

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

I don't know

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Other

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   We all need to protect our waterways. What makes the council think one particular race is capable of doing it better then the rest of us? (One of them was caught with endangered birds at a local airport.) Those who are elected by a democratic process can be held accountable.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

   Maintaining clean environment, water ways and the air quality has nothing to do with any cultural. It is good science for the survival of human race. Spend taxpayers money on actual research and science, not on appeasing the culture of one particular race.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

   Makes good sense!

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   No racial matters should come into it. Water is for all not just maori.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   All should be under one entity.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Disagree

Tell us why:

As above

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

As above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

This should all be in Auckland,s jurisdiction

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

As above

7. Do you have any feedback on the proposed environmental outcomes?

As long as it is for all people.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

No cultural values should come into it at all. This is for everybody.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

All sites should be monitored regularly as of course.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

This is common sense.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

There is always room for improvement.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

They have no place in our waterways.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Other

Tell us why:

Depends where they are .

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Keep race out of it.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Check all water used for cleanliness. Set a standard.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

All sounds good.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

No race should come into supporting this proposal, all should support and contribute to the scheme.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Good practice.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Build another Dam. The Waikato is rarely short of water.

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking water first.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Keep checking the quality of water at all times and allocate according to need.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

I started reading the council setting the direction. But it got too hard to read the Māori words (I have enough trouble with English words) and seemed to be kissing their asses. This country is for all of us. We are all important so why do we need to change rules to suit them?

I don't but I would like to let you know the following: a certain portion of the population should not be allowed to force their spiritual belief regarding water on to those who don't share those beliefs. Your use of terms which many people do not understand is divisive. Remember, as an elected body you should represent all people of Auckland and not give any one group more power over our natural resources.

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   as an aucklander that is about to move back, i do not think special , money wasting ideas are the best way to spend councils funds and it does not matter your race, no one has more rights to or say in water issues and general running of matters

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

we are all new zealanders end of story, no one has special rights of to, say in , all this race rubbish needs buried. leave it in the past and move on. live as new zealanders.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

if it is for the betterment of aucklanders ok, but stop trying to wrap the world in cotton wool, all this pc etc rubbish is not evolving people and making them softer and scared to do anything

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   the long term version should be based on treating all NZers equally and not giving non-scientific weighting to particular people - we're all Kiwis, not just the distant descendants who are part Maoris

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   why should the water vision be based on race and not best practice globally as proven by science and engineering?

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Disagree

Tell us why:

why should the water vision be based on race and not best practice globally as proven by science and engineering?

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

why should the water vision be based on race and not best practice globally as proven by science and engineering?

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

spend money where it's needed, not pet projects

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

values should align with all peoples of the region, not a specific race at the expense of others

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing ‘outstanding waterbodies’. I oppose any policy that prioritises one race or culture’s values over all other races or cultures in relation to the management of our freshwater.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Why are you still persistent in presuming that only Maori have a special relationship with water? Does the rest of the community not share in the concerns about water? What evidence do you have that Maori have "stronger ambitions to improve our waterways?" That implies that the rest of us - non-Maori - do not give a hoot about our waterways. This documents persists in being racial, privileging and giving special authority to one ethnic group - a mionority group at that.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Again, why is there a consistent theme throughout the documents that only Maori have a special relationship with water not shared by the rest of the community? It is illogical and erroneous thinking that only Maori "have stronger ambitions to improve our waterways."

Water is essential and the essence of ALL life: EVERYONE has an interest in healthy water, not just a minority group. ALL Aucklanders should be EQUAL stakeholders in how freshwater is managed in their city, not just the mana whenua of the area. If you really are sincere with equality for all, there should be representation from other members of the wider citizenry - other ethnicities - rather than just Maori. This decision-making on our waterways based on race is tantamount to apartheid. When Maori were allowed exclusive authority over the

management of some of our public parks, the evidence of their lack of care and concern is evident. NOW you want them to manage our WATER? Water which we pay for and are also as much concerned about, if not more???

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

The Auckland Council's consultation document presents the misguided notion that Maori are entitled to be involved to a much greater degree in the decision-making, monitoring, management, plus allocation, of Auckland's freshwater. Let me remind you again of what happened to our public parks that gave Maori authority to manage: a total shambles.

You are asking the wider Auckland citizenry's input to this new policy, yet you have engaged with mana whenua already through a separate process. That is very underhanded, suspicious, and undemocratic.

The consequences from giving exclusive, unaccountable rights over water to one sector of the community can be far-reaching and frightening. Please stop with the apartheid mentality. We have a new Government which we voted in order to stop this. You need to stop this. The people cannot be fooled anymore. You MUST NOT divide the community by ancestral lines. You MUST not privilege one minority group over the rest of us. New Zealand is NOT a bicultural country, it is MULTICULTURAL, and we are all concerned about our freshwater, ALL of us. Policies and rules MUST apply to us all EQUALLY. Cease the wokeness.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   All NZers have a vested interest in the water ways. Water is a right for all NZers and should be overseen and looked after by an democratic elected process , no one race should have more power than any other NZer. This is dangerous politics if one race gets preference in governance.Aucklanders are equal stakeholders in water , it isnt just a maori concern. I oppose any long term vision that provides different rights for different race groups in Auckland. Views of one race should not eliminate others races in our city.

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    From the United Nations website - "Access to water and sanitation are recognized by the United Nations as human rights – fundamental to everyone's health, dignity and prosperity." Note this is ALL humans. No one ethnic group has more right to water than anyone else and it is insulting to infer that Maori care more about water than the rest of the population in NZ. What happened to equality in this country??

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Race should not come into the management of our water in Auckland. All people groups in Auckland rely on good safe water. We need to have an environment of equality in the council before discussing the improvement of our water. Get the governance right and fair first.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Everyone who now resides in NZ whatever their race, ancestry, or culture has an interest in healthy water it is the essence of all our health and wellbeing, whether it be from rivers, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. Not only is this wrong but it is presumptuous to assume that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people based on their race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city now and moving forward. I would very much like to support a plan / vision for a freshwater management plan, but only when there is a no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to any one racial/ ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

I totally disagree that Māori have the right to manage water for the rest of Manukau citizens. It should be the council in control as it will be our tax paying money that funds this and not the Iwi I expect. However, all communities must have their say (as we are doing now) and be considered. Māori concern themselves with Maori needs only and what will benefit their community even if they have good intentions with how to improve the water, but there are many communities within Manukau and Auckland wide that are not Maori affiliated. Although I like the proposals of how the waterways should be accessible and clean it belongs to us all, therefore we should have our say as should Maori. Council should be in charge and govern decisions that concern us all as our ELECTED COUNCILORS. The rights of all communities need to be heard and no one ethnic group should govern over others.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The 'Setting Our Direction' document comes across as very racially one sided, placing Māori cultural values more important than my own, or any other minority cultural community values found in Auckland today (2023). I am against any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater. It is an essential right for us all and so should its management be.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Every Aucklander should have the right to be an equal stakeholder in the future of their freshwater. No one group should be given special rights to influence decision making by Council due to ancestry or any reason. Nothing should be managed by race which involves natural resources available to all.

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Maori cultural values at the top of a list of considerations for managing "outstanding waterbodies'. I oppose any policy that prioritises

one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is for all.As a rate payer I resent being treated like some second class citizen to a minority group who may have contributed very little, financally, to the project.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Put Maori Culture in perspectve. Apart from much posturing, Maori groups are very much invisible at the cutting edge.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is essential to all living persons, animals and plants. Having a group that has a controlling or more voice than others is unacceptable and undemocratic....racist.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Manukau is an area that is expanding at an alarming rate yet no extra water storage or production is being undertaken. ALL freshwater is precious to ALL Aucklanders regardless of cultural importance. What is Auckland doing about increasing water storage and making available to ALL Aucklanders?

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Resilience is for ALL Aucklanders and unsure why mahinga kai, transport and tauranga waka / wai tapu is considered in this process. They should have been omitted in the same manner as Hydro.....it is not relevant.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Access to freshwater is a basic human right and is a privilege.....not a right. Being able to enjoy rivers, streams, lakes etc, should be for all without restriction.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Another racist policy basing a persons rights on ancestry and not being a part of the community.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Prevention is better than the cure.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

Setting a base line traditionally results is a failure. The quality of rivers in the Auckland area that feed into storage areas is suitable and any contaminants are removed by filtration.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

Current roading and building practices are best practice. Auckland is a growing city. Not being a chemist how do those who build these items suggest change is made?

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly do not support

Tell us why:

Why set yourselves up for failure? Setting targets above the rest of the country is failure waiting to happen. Every Aucklander regardless of ancestry wants to be able to swim, drink water without the threat of contraction of disease. Keep it simple.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Farmers are aware of the results of the use of fertilizer on the land and are changing. Respect what they are doing.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

Building NZ's largest city on the countries smallest foot print (available land) is a recipe for disaster. Everyone has a part to play and setting targets that are unrealistic will only result in failure. Be realistic.

17. Are there other management options outside of those listed that you think we should consider?

Simple options are the best. Involve everyone equally as no one group has an advantage over another.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

Surely any blockage of streams that allow reverse flow of fish would create a flooding event. Consultation with property owners is a minimum.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

If the "housing crisis" is to remain in Auckland then there is no other option other than to keep current policy. Increasing the distances would restrict housing development and limit the number of people able to be accommodated in Auckland.....a great idea.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Do not do it. Find another source of water.....desalination?

21. How do you think we should prioritise allocation where or when water is scarce?

Food growers, industry then house holds. Having a desalination or increased water catchment/storage areas would reduce the allocation requirement.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Fix leaks, increase catchment areas, desalination to mention a few.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

The region is call AUCKLAND.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises

one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

It should be AUCKLANDs river, streams and lakes

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

This seems like a very difficult thing to manage, so more investigation and information is needed.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Plans which embody the enduring quality and abundance of water are critical to the sustenance and productive progress of such a widespread area, particularly as the population growth puts greater demands on the Auckland region more than any other. Maori participation in the discharge of these objectives is entirely appropriate;

   1. As first nation citizens.

   2. With their understanding of the importance of water purity and intrinsic mana of waterways.

   3. With their waste not - want not philosophy.

   4. With their abhorrence of past practices which have polluted water dependent ecosystems.

   In many rural areas, septic tank effluents were discharged directly into waterways by contractors. Maori resisted the installation of toilets within their dwellings, preferring instead to retain longdrops. This was not simply resistance to change, affordability or their disapproval of disposal practices, having a wharepaku within a dwelling where food was

prepared was also considered unhygienic. While their understanding of disease and medicine was not as advanced as their Treaty co-habitants, they at least knew what NOT to do.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Agree

Tell us why:

It is rational and appropriate for the region.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

Lets concentrate on the important things first, if these are achieved the rest will follow.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

As above.

7. Do you have any feedback on the proposed environmental outcomes?

All worthwhile objectives.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Maori cultural values are entirely relevant in this area; refer my comments in spot 3.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

For sustainble development

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Other

Tell us why:

A better description to highlight connection between human beings and our nature.

7. Do you have any feedback on the proposed environmental outcomes?

Good

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Targeted approach at higher risk area

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

It links and reflects the potential contamination and environmental health.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Organic Farming. No excuse for water pollutions.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Create water-saving culture and value of our city. Developing actions to apply into daily life Eg 4 Minutre showers. Business water use guideline. Based on population at equitable and

affordable price. Penalty for water waste. Investment for water prification, recycling technical system.

21. How do you think we should prioritise allocation where or when water is scarce?

Equjty is the key.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Nil. Freshwater system is the root of life and everything for a city. This should be the priority out of priority.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Disagree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Tax business.

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#1634

Agree

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Its a great development in these areas

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

The poisonous heavy metals is the major pollutants, so it is very important to manage it.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Then points are not in conflict. All parties follow the law to ensure the best interest.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Reduction in average

21. How do you think we should prioritise allocation where or when water is scarce?

Put the local resident on the priority group

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#1659

Use rain water capture

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#1679

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

To maintain the productivity of fresh water safety is the most important

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

It is necessary co'operate with farmers to improve the quality of water while ensuring the quality of vegetables.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Plenty of recreational activities can be performed without direct contact with the water.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

The comprehensive assessment criteria consisting Maori culture values, ecological systems, landscape characteristics and recreational opportunities allowing waterbodies to maintain outstanding standard.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

In order to protect aquatic life in the eco-system it is deemed necessary to monitor the temperature.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    I don't know

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    I don't know

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#1730

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Implementing sustainable agricultural practices, precision irrigation and efficient fertilization methods helps minimize water pollution. While ensuring food production. Implement on regular monitoring and adaptation of strategies based on scientific research to contribute to a harmonious balance between food security and environmental conservation.

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

I dont know.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

I dont know.

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

Healthy water is all New Zealanders interest and we all want safe clean healthy water. Therefore there should be no special rights over water which are based on ethnicity

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

Healthy water is all New Zealanders interest and we all want safe clean healthy water. Therefore there should be no special rights over water which are based on ethnicity

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Healthy water is all New Zealanders interest and we all want safe clean healthy water. Therefore there should be no special rights over water which are based on ethnicity

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Recent events such as the mains water breach in Parnell reconfirm that is important to identify safe areas for all New Zealanders for recreation

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   It is the logical and responsible and the only way to halt and reverse the damage we have caused and protect what we value and enjoy the most about our environment, not to mention our health and wellbeing and even our own survival

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   I strongly agree with a vision that takes into account not just freshwater bodies in isolation but includes the surrounding and coastal areas they discharged into. Specifically, waterbodies between the ridge on Sandspit Rd/Litten Rd and the Cockle Bay and Shelly Park estuaries.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Apart from the direct impact it has on our health and wellbeing, the people of New Zealand have always enjoyed recreational activities around and in the water. They are also one of the main tourist attractions. We have the responsibility to preserve and enhance this privilege for future generations

7. Do you have any feedback on the proposed environmental outcomes?

Yes; I do not agree that we should focus only on the Hunua Ranges while overlooking other areas. In Howick and especially Cockle Bay and Shelly Park, freshwater bodies and coastal areas between ridges and the sea should be excluded from abusive housing intensification if we are serious about achieving the proposed outcomes

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Freshwater bodies in Cockle Bay and Shelly Park require special management and they have been looked after by responsible and committed local residents - their ethnicity is irrelevant - Council needs to improve its approach. Rather than imposing rules and regulations, residents, local boards and councils should be working together as a team.

Residents includes all ethnicities; there is no need to mention any in particular

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Swimming is an enjoyment we should never be deprived of, and we have to protect it for future generations

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

We have not taken appropriate measures to stop degradation and contamination and we have allowed inappropriate and irresponsible activities for the sole purpose of convenience and capital gain.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

It would be criminal not to.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

This may help to prevent cutting protected and notable specimens. Trees and vegetation around streams are important for temperature control and they are often wiped away to accomodate illegal housing developments. Council should NOT consent intensification at the expense of the destruction of waterbodies and marine environments

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

It just makes perfect sense, it is the responsible approach and it will have long term benefits

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

By working with vegetable growers as a team and establishing appropriate controls to ensure they comply

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Yes:

Exclude Landowner Approval fees for grants to resident groups doing voluntary restoration and improvement work on Council grounds at their own expense.

Include Stormwater as a qualifying matter for housing intensification.

Reinstate resource consent as part of citizens rights to raise well-founded concerns about inadequate housing developments - many of which are ruining our environment and conspiring against everything Council has outlined in this national policy statement

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Consult with local residents and work together with them and their local boards.

They understand better that anyone else what is required in each region and you will find that many groups are doing Council work - eg work expected from Council that benefits us all -

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

The stricter, the better. Rules are going to be overlooked anyway for immediate capital gain - what a shame

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

The question here is "what is considered necessary?"

The proposed development at the top of the ridge on 30-40 Sandspit Road (taking advantage of the short-sighted "fast track" option) is totally inappropriate, goes against the vision and values set up in this policy and it will result in tragic outcomes for freshwater bodies and coastal areas.

My suggestion is: reject it

21. How do you think we should prioritise allocation where or when water is scarce?

By making location-specific priorities

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Liaise with local residents. Increase the power of local boards. Learn to work together as a team instead of imposing regulations.

If you are interested and serious about your proposals, I can provide specific examples of how important this is and what has happened when residents' knowledge and experience has been ignored and overlooked

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Maori have no more of a special relationship with water than any other New Zealander. To make policy based on Race is unnecessary and divisive. Auckland council is supposed to represent all ethnicities.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

I agree with the preservation of our water resource (both fresh and marine) and the implementation of controls to stop pollution. Fresh water safe for swimming or drinking was once the norm. Allowing the destruction of our environment is unacceptable and short term thinking.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The management of the freshwater resource is essential to all life regardless of ethnicity . What the Council's management plan asserts is that freshwater - access to and its availability, regardless of its source and catchment, should be given priority to one group within the community based on ethnicity. This is highly immoral and discriminatory.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Our Fresh Water and its natural catchments, existed long before humans arrived here and have since, constantly been replenished through the power of natural forces. It is the same as the air we breathe and the warmth and light from the sun. They do no discriminate! They support all forms of life!

Local Board: Howick

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I don't see why Maori should get special rights on a democratically elected council, or for water which is a fundamental human right. Nobody owns the rain.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Maori cultural values can apply to Tribal lands. Council lands and public land should be overseen by best practise according to current scientific principles and civil engineering best practise.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    No place for tribalism in a modern progressive democracy. Decision making over water should be by a board and driven by scientific best practise, practical engineering and good governance. There is no place for decision making by birthright and there should not be.

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Disagree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    No

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Auckland & NZ is one country with everyone having the same environmental rights. There is no one based on race alone, that has any special rights in the maintenance and control of the natural resources of NZ - all Auckland ratepayers have the right to make any decisions needed.

#1940

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

This helps the physical and mental health of the community and is extremely convenient.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

It depends on the area. I heard that some people/restaurants divert sewage into rivers. I heard that some people's dogs became sick after drinking water from the river.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    I don't know

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Water must be clean, need to allow life to continue, to provide a good environment for the continued survival of humankind.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Agree

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Agree

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

The water treament process system for crop planting should be independent to regular water use. Should improve the systems to remove pollutants, so that the polluted water from the growing area will not contaminate regular water system. Once the water from the growing area has been treated, it can then be released into the regular system.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Allocation order should prioritise neccesary industries, agriculture, water for people's daily living for obtaining water resources. Where the need is not necessary, like washing cars, then ban them.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Water must be clean, need to allow life to continue, to provide a good environment for the continued survival of humankind.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Agree

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Agree

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

The water treament process system for crop planting should be independent to regular water use. Should improve the systems to remove pollutants, so that the polluted water from the growing area will not contaminate regular water system. Once the water from the growing area has been treated, it can then be released into the regular system.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Allocation order should prioritise neccesary industries, agriculture, water for people's daily living for obtaining water resources. Where the need is not necessary, like washing cars, then ban them.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#3392

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

   Is water alive? What to maintain?

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   I don't know

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

Why separate for 3 FMUs to manage?

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Basic

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

Why different criteria? Why specific places to have different standards? Is it because there are larger resources input?

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Make the law to punish the source of pollutions!

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   Need to consult property developers &resource management consultants to balance the efforts on land development.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

   Same as Q1 above

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

Tell us why:

Same as Q1 above

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

Same as Q1 above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Satisfied

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Too optimistic

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Too abstract

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

Too expensive and not effective to control

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Reasonable cost and low rates.

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Feedback and special case exemption by fair appeal process on affected cases that has good reason to exempt.

21. **How do you think we should prioritise allocation where or when water is scarce?**

Car and house wishing should be reduced but not ban. Wash once a month is better than on washing.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

No three waters and co-governance.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Water's life sustaining function is vital. It is one of the key element to support human life.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

In my opinion, it's closed related to sustainability of water which is very important.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?
