Organisation (if applicable):

Local Board: Albert-Eden

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   The direction is great, but the goals are small for a long timeframe... I would like to see more urgency and measurable targets set for 2030.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Other

Tell us why:

I largely agree, but restoration needs to be mentioned in the Kaipara FMU.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Resilience is core to sustainability and to making meaningful change. It ensures that we can preserve and maintain our freshwater ecosystems, even in extreme events.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

I view it more as accessibility than amenity - many New Zealanders view our freshwater environments as integral to our wider ecosystem and cultural experience. I enjoy leading the conservation activities I participated in as a child, recounting the mythology of these environments, and keeping an eye out for endangered species. Even in its heavily degraded state, Auckland's freshwater systems are a significant source of connection to our environment.

7. Do you have any feedback on the proposed environmental outcomes?

The blue-green networks and integrated stormwater management are some of my biggest hopes for restoration and conservation in Auckland. It could create more habitat for species facing extinction, more opportunities for locals to conserve and appreciate these species, and more safety from extreme weather and pollution. It's a win-win scenario for everybody that I strongly support.

More than just protection needs to be done for the Waitakere Ranges - the understory is decimated by invasive species, destabilising the banks around waterways and eventually

causing landslips and marine pollution. The more suburban areas have become heavily infested over the past decade, becoming unsightly and dangerous for future weather events. I'd like to see the community and council working together to maintain healthy streams and banks again. This may also apply to Hunua.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

I like this for many reasons, and I'm glad Oakley Creek got a shoutout; I was down there trying to spot some endangered geraniums the other week. It's important to recognise these areas while they're still here, learn what we can from them, and protect them to the best of our abilities for future generations.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It's better to have more data and a clear idea of what's polluted than to risk delicate environments or poisoning. With warming waters, environmental pathogens will become more likely, so we need to keep an eye on this.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

It's unsurprising to see a low baseline for Auckland's waterways. I don't think it's a great comparison to compare the region's outcomes against the rest of NZ due to vastly different land use and geology - it may paint us as doing better than we actually are.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Your report gives some great evidence as to our waterways' poor health. The accessible streams and rivers reek of sewage, even when there hasn't been rain. I want to teach and learn in these environments, but they're intolerable. It's very shameful.

In the future, I'd like to see citizen science opportunities for biomonitoring.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Toxicity and bioaccumulation concerns. Zinc and copper are also toxic to people in high enough amounts.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Absolutely - it will also help prevent pathogenic threats to people and wildlife. Bring on the tree cover!

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Better environmental regulations are great, but this plan could be more urgent and ambitious.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Don't compromise on the environmental standards - biodiversity will be worst affected (see EAT-Lancet). Access central government funding to develop nutrient remediation strategies - especially those with multiple applications, such as farming green seaweeds. Balancing food security and nutrient pollution is an international issue, with international and national funds allocated towards solutions. With a more ambitious and innovative approach, more support is available. Make sure this is a collective, educational effort for the community and that it's clear that regenerative agriculture benefits everyone.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

I think that the regulatory changes are completely necessary and rational.

17. Are there other management options outside of those listed that you think we should consider?

Fines incurred by wastewater discharge breaches, littering, and the like should reflect the long-term remediation costs. Pollution needs to be prohibitively expensive, not council-sponsored.

Involving our rangatahi is also very important - it's their future, and they're showing a keen interest in involvement. I've met a lot of young scientists motivated to help with these issues but unsure about their overall career direction. There is a lot of potential in this plan to rebuild community and intergenerational education. There is also the potential to save dozens of endangered species. I think a lot of locals would find participation empowering.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

I recently learned about longfin eels' lifecycle - I can't believe they can live 100 years in freshwater, then swim almost to Tonga to lay their eggs, which then get washed back to NZ... Still, freshwater habitat is their biggest threat?! The ecology is obviously complex, but a collective effort could be very beneficial here - I like the approach and would love to participate.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We need more environmental protection; this is a sound move. Keep leading by example.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

All Aucklanders should be trying to reduce their water consumption- a 10% reduction is completely possible. In some cases, initial investment may be required for businesses and communities - providing resources (financial or educational) for this could make transitioning to lower water use more equitable.

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking water?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

There is a lot of opportunity to lead other cities, involve the community, protect endangered species, and save lives in this plan. My recommendations are to do more with ambition and urgency. I like how this plan invests in the future and faces past mistakes; I think it will pay for itself in the coming decades.

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Agree

    Tell us why:

    Main sources of natural resources

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Future sustainable development plan

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

There will be fewer and fewer resources in the future

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

More disasters will occur as the earth warms

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Life on Earth cannot live without water

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Circulation system design must be scientific

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Reduce pollution and pay attention to environmental protection

17. Are there other management options outside of those listed that you think we should consider?

conservation of ecosystem

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Think about what we would do without water

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Thank you - please protect and enhance the freshwater for Tāmaki Makaurau Auckland. Please increase biodiversity, daylight and naturalise the streams, planting with natives to protect and filter the water too.

    Please provide walking, cycling, and wheeling pathways alongside the streams where appropriate.

#36

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

   The unit is too large and too diverse to be managed effectively as one. Consider breaking into smaller units

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Yes

Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

Yes

Tell us why:

Amenity values provide important areas for recreation and provide opportunities to connect with nature

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Agree

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Key stormwater-derived contaminants. Can settle and accumulate in marine environments causing harm. Limiting and reducing input will benefit freshwater and marine environments.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Important to monitor going forward in light of predicted temperature increases and changing climate

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Important to have high goals, but need to ensure they are achievable in the set timeframes otherwise there is the risk of feeling helpless or that we are 'failing'

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Need maximum protection

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#39

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Firstly, I believe that we need to engage fully with the local indigenous community. Secondly, we need to care more for our waterways, especially those situated near industrial sites.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Other

Tell us why:

I agree with keeping contaminants out of waterways. I would like to see a moratorium on all human activity involving contact with the water.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Maintain native trees and plants around waterways - this is well covered by volunteer groups such as 'Friends of Oakley Creek'. Ensure that people do not use waterways as rubbish dumps.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Kaitiakitanga respect for our environment is tantamount to living life therefore we tend to and improve on current condition. When polluted unpollute, when unclean clean etc

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   some effort to clean up better than no or minimal effort

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

clean green tidy up

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

imrovement of any kind is welcome

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

now and the future worth the time and effort to improve conditions

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

improvement

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

By using permaculture principles

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

immediately

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritise water to food production

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#90

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Agree

   Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Agree

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   The vision seems to be well thought through. It is balanced between water, people and community and reasonable in terms of timing of improvement without economic stress or interrupting food supply

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

without resilience we will see variable water quality

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

many people are attracted to water, even walking along the shore has health benefits.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    I think that Maori input is useful but is somewhat overdone in the consultation. It might have been useful to define Mataurangi Maori in this context before making its insertion compulsory.

    References to the treaty as a partnership are legally incorrect and should be removed.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

   Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   I don't know

   Tell us why:

   Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

   Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

3. What do you think about our proposed vision statement for the Kaipara FMU?

I don't know

Tell us why:

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

7. Do you have any feedback on the proposed environmental outcomes?

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

So much better than any places in the world, some good streams and beaches. Not perfect, but that's no surprise in a big city.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

Maybe microplastics are worse?

Report says 'may' be toxic?

But yes, reduce heavy metal and all pollution is a good action.

Also,

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

Humans can't fight the world, nothing council can do will change the climate.

Better to adjust living styles.

However, the actions proposed like tree planting to shade rivers is a good idea.

Also,

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Difficult problem, be careful of unintended consequences.

If in doubt, let the market decide, with Council creating and enforcing realistic and practical public health and safety regulations.

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

21. How do you think we should prioritise allocation where or when water is scarce?

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Do what is best for all the people of Auckland, regardless of ethnicity, race, tribe or ancestry.

Do not create special privileges, rights or exemptions based on any of tthe above, because that creates division, inequality and conflict.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I do NOT want any proposal that has co-governance within any part of it.

   I find this racist and do not support any proposal that segregates based on race. Overseas experience shows that any attempt to segregate based on race ends in disaster with unrest and unfairness. We are all born equal - rules, regulations and governance needs to reflect this.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   I do NOT want any proposal that has co-governance within any part of it.

I find this racist and do not support any proposal that segregates based on race. Overseas experience shows that any attempt to segregate based on race ends in disaster with unrest and unfairness. We are all born equal - rules, regulations and governance needs to reflect this.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

I do NOT want any proposal that has co-governance within any part of it.

I find this racist and do not support any proposal that segregates based on race. Overseas experience shows that any attempt to segregate based on race ends in disaster with unrest and unfairness. We are all born equal - rules, regulations and governance needs to reflect this.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

I do NOT want any proposal that has co-governance within any part of it.

I find this racist and do not support any proposal that segregates based on race. Overseas experience shows that any attempt to segregate based on race ends in disaster with unrest and unfairness. We are all born equal - rules, regulations and governance needs to reflect this.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

I do NOT want any proposal that has co-governance within any part of it.

I find this racist and do not support any proposal that segregates based on race. Overseas experience shows that any attempt to segregate based on race ends in disaster with unrest and unfairness. We are all born equal - rules, regulations and governance needs to reflect this.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

I do NOT want any proposal that has co-governance within any part of it.

I find this racist and do not support any proposal that segregates based on race. Overseas experience shows that any attempt to segregate based on race ends in disaster with unrest and unfairness. We are all born equal - rules, regulations and governance needs to reflect this.

7. Do you have any feedback on the proposed environmental outcomes?

I do NOT want any proposal that has co-governance within any part of it.

I find this racist and do not support any proposal that segregates based on race. Overseas experience shows that any attempt to segregate based on race ends in disaster with unrest and unfairness. We are all born equal - rules, regulations and governance needs to reflect this.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

I do NOT want any proposal that has co-governance within any part of it.

I find this racist and do not support any proposal that segregates based on race. Overseas experience shows that any attempt to segregate based on race ends in disaster with unrest and unfairness. We are all born equal - rules, regulations and governance needs to reflect this.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

I do NOT want any proposal that has co-governance within any part of it.

I find this racist and do not support any proposal that segregates based on race. Overseas experience shows that any attempt to segregate based on race ends in disaster with unrest and unfairness. We are all born equal - rules, regulations and governance needs to reflect this.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Prioritise domestic needs, municipal water supply, and animal drinking water above other water uses

21. **How do you think we should prioritise allocation where or when water is scarce?**

Prioritise domestic needs, municipal water supply, and animal drinking water above other water uses

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Local Board: Albert-Eden

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Water is one of our most important resources particularly in these times of climate change.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

You have adequately covered and planned to address all the important concerns

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The history of our waterways show that this is necessary and important.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The pleasure the residents of Aotearoa's biggest city and visitors to this area get from our waterways is vitally important to the value of this region.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

I'm not an expert in this area and trust those who are to give feedback on this.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

I don't have first hand knowledge in this area.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

To protect aquatic life.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

For all the reasons you give.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

It seems a good compromise, though I think the views of mana whenua should be taken into account.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Maybe allow lower standards at first but these should be adjusted in time and fruit and vegetable growers should be required to transition to better management practices.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

There must be an improvement in this area and strong action is required. The plan seems to address this.

17. Are there other management options outside of those listed that you think we should consider?

Encourage regenerative farming where practicable which addresses more directly many of these concerns and does not necessarily result in loss of productivity.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

For all the reasons you give.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

This is important and urgent for all the reasons you give.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

This is difficult and I don't have enough knowledge to suggest an approach but I hope over allocation will be addressed as a matter of urgency.

21. How do you think we should prioritise allocation where or when water is scarce?

As above

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#152

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Need to educate people to save fresh water.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

Very clean

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Yes need to make farmer use fresh water for veg.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Education for kids.

21. How do you think we should prioritise allocation where or when water is scarce?

Products to save water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   It's good for community.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   I don't know

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Because its helpful

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

the freshwater shall check the quality of water and particles and clarity

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Swimming is a primary function for the people to enjoy and its good to have sticker stricter standards.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

it needs to be protected and stop it from going contaminated

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

should prevent swimming

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

aquatic life needs to be protected.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

I don't know

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Agree

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Yes

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Absolutely needed in the face of climate change.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

Not sure how that sits within te rao Maori values and if indeed people should be allowed everywhere

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Much needed lenses for Te Ao Maori framework. We need to apply more Maori values and include more Maori in the decision making process.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It is great.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Dairy industry should pay more for all the pollution is causing. Very dirty water no good for anyone.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Definitely yes!

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Definetly yes!

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Prioritise the quality of water and the land. The rest will follow.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Definetely yes

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

prioritize THE WATER AND THE LAND. those "HOLDERS" have to do with the minimum possible. Everyone should pay the price for clean water.

21. How do you think we should prioritise allocation where or when water is scarce?

First and foremost, for the quality of the land. Not for people and businesses.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Implement much higher standards and get the 3 waters going. We need much higher quality of water right now and urgently. Include Maori in all decisions. Better for the many, not for the few!

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   WATER is a precious resource which we shall preserve/conserve for future generations

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   We may be water rich today be we need to keep with that way or future.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

If is good initiative and vital one

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

It must consider the ethnic mix in that region.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

the quality and quantity of water needs to be sustained and this is a good initiative.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

we are known for using our water reserves for centuries and it should remain that way.

7. Do you have any feedback on the proposed environmental outcomes?

White the work cares less about this we need to sustain our special treatment of natural resources.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

We need to respect their beliefs & customs.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It is aligned to a vital life skill & every effort should be made to upkeep this.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Prevention is better than cure so we need this measure.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Together we can do much to keep them better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Absolutely without aqua wealth we will no good.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Yes as global warming is a reality now.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Stringent measures need to be put in place before its too late.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

It is a good balancing act. We need to get this at right balance.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Planning is vital for rapidly growing NZ's largest city.

17. Are there other management options outside of those listed that you think we should consider?

Monitoring compliance, educating people, putting more resources, saving rainwater, clearly rubbish form way with water resources.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

We need to help ecology sustain, no hinderance to be there, ensure all species are protected for next generations.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

We need to work hard to grow this.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

More focus for human consumption as breezy animal rejoins are scarce in Auckland runs.

21. How do you think we should prioritise allocation where or when water is scarce?

Separate line for portable use of existing lines for other uses.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

'-Rainwater harvesting

-All houses to have water resources

- watercare should have more resources of fix issues immediately from wastewater.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Need to do more than just maintain.

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    I don't know

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

install swim safe elective boards at all swimmable beaches.

#488

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

They have to be adaptable to climate change - bring back the wetland,s restoring streams from culverts, etc

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Connection to the water is essential for people remain connected to nature, and therefore advocate for it.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Rivers have terrible quality and are mostly unprotected from their urban environments - not enough freshwater plantings either

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

This is excellent long term vision-ing

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    We need to incentivise this as much as possible - do not support longer time frames

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

    Essential to eco-system to support fish habitat and behaviours

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

    Keep them higher - ultimately it is needed in the long run.

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Very very very very important for us to restore our waterways in Auckland. Please do whatever you can to make this happen as soon as possible

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

   You then have the opportunity to provide feedback on the specific Freshwater Management Units. If you do this, you can reiterate the points you have already made in your answer above.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Disagree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Fresh water is for everyone to enjoy and no special rights for maori who will then use it to extract money from everyone else/. You give apartments to your mates in Auckland at cheap rates - I know many people who got 2 bedroom brand new apartments in the CBD that they wont share and they pay minimal rents on. More corruption by the caring socialists. I think its time I started naming those individuals who get bargain base rents on apartemtns paid for by the ratepayer because of their council connection. Socialism is another name for corruption and the the water resources is no exception

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   We are all one people with a history of democracy. Which amounts to one man one vote and no special privileges determined by race.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

We are all one people with a history of democracy. Which amounts to one man one vote and no special privileges determined by race.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

What real evidence is there of people getting ill as a result of swimming in areas deemed unsafe?

I suspect it is massive overkill.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

The idea that Maori have a special relationship with water that others don't have is nonsense. I have an emotional relationship with water in New Zealand but I do not hold that sacred to me alone. We supposedly have equal rights in a democracy, so to elevate the status of Maori (whoever they are) is simply racism. Stop, cease, desist.

The statement about 'whoever they are' stems from the proven concept that race as defined genetically (DNA etc.) is also a nonsense. Moreover, if I were, say, 1/32 Maori, does that trump the other 31/32? Of course not.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Indeed water is the essence of not only our survival but overarching, our quality of life. As such, every human, regardless of creed has an equal and indivisible interest and responsibility for the short, medium and long term provision and protection of our resource and the environment that supports it.this resource

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Because it is a common and shared resource, regardless of race, religion or creed, New Zealanders comprehensively value highly, the benefit and access to these commonly held resources and facility.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Because it is a common and shared resource, regardless of race, religion or creed, New Zealanders comprehensively value highly, the benefit and access to these commonly held resources and facility.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

On the proviso that these are a commonly shared resource. I strongly disagree that there is some sanctified 'cultural significance' for waterbodies to Maori, that is somehow more significant to those of more recent settlers or indeed, recent 'new arrivals'. A resource

originating from the skies and channeled across our landscape must be maintained and promoted as of equal significance, value and importance to all.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

Poor management, poor education and poor enforcement. Industrial polluters MUST be held accountable and far more severely that now.

Resident contamination requires education as to the effect and prosecution, possibly of the kind requiring community cleanup of the types of contamination made.

Management by council should be immediate and comprehensive. Less excuses and more 'stick and carrot'.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Poor management, poor education and poor enforcement. Industrial polluters MUST be held accountable and far more severely that now.

Resident contamination requires education as to the effect and prosecution, possibly of the kind requiring community cleanup of the types of contamination made.

Management by council should be immediate and comprehensive. Less excuses and more 'stick and carrot'.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Maintaing the quality of streams surely MUST include the banks and boundaries of such. If not already, why not?

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

   Strongly do not support

   Tell us why:

   You PC woke government departments have been brainwashed. maoris don't own the water & they are no more special than any other person when it comes to water, which falls out of the sky. How is it that you have previously consulted with maoris but not others - white people & others?

   We don't claim to be an expert on the scientific or regional issues covered by the Council's proposals, but we do recognise the potential for frightening consequences from giving exclusive, unaccountable rights over water to one sector of the community.

   We say people must not be divided by ancestral lines. Policies and rules must apply to us all equally.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

As mentioned above - you lot are totally racist against any person who is not a maori. Wake up wokesters!

There is massive potential for frightening consequences from giving exclusive, unaccountable rights over water to one sector of the community.

We say people must not be divided by ancestral lines. Policies and rules must apply to us all equally.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Why is there separate and prior consultation with Maori groups. This is racist separatist nonsense. All cintizens and ratepayers regardless of ethnicity have importtant relationships with water and water quality. This is not something is special or stronger in Maori. This is just another expression of power grabbing by Maori elite and Maori business. Give any group priority or veto power and they will quickly start charging you for the product. It's simple greed and the environmentalism is a nice greeny front. Nothing more.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

I have just seen the document. It is massive. I am a ratepayer yet had no advance notice of such a document. It is now November 27 and I have 5 days to comment. This is underhand & manipulative - subversive probably

3. What do you think about our proposed vision statement for the Kaipara FMU?

Other

Tell us why:

same comment

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

Same comment

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

same comments as above

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Other

Tell us why:

same comments as before

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

same comments as before

13. Do you think we should include and manage temperature as an attribute in this plan change?

Other

Tell us why:

same comments as before

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly do not support

Tell us why:

same comments as before

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

same comments as before

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

same comments as before

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Albert-Eden

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

   I think it is important that I understand your proposed objectives but I am unable to make sense of the following. For example, "recognising that water is taonga and a living entity, and that when Te Mauri o te Wai is degraded, there can be no Te Mana o te Wai." It would be appreciated if this whole objective could be stated in English:

   Our proposed objective for Te Mana o te Wai

   Freshwater management in Tāmaki Makaurau will give effect to Te Mana o te Wai by:

   (a) Restoring, enhancing and protecting Te Mauri o te Wai; recognising that water is taonga and a living entity, and

   that when Te Mauri o te Wai is degraded, there can be no Te Mana o te Wai.

   (b) Taking a transformative, aspirational, and innovative approach, consistent with te ao Māori, that prioritises

   halting further degradation, achieves remediation and recognises that freshwater management to date has led

to widespread degradation.

(c) Ensuring natural and physical resources are managed in a way that prioritises:

(i) first, the health and well-being of water bodies and freshwater ecosystems

(ii) second, the health needs of people (such as drinking water)

(iii) third, the ability of people and communities to provide for their social, economic and cultural well-being,

now and in the future.

(d) Involving Mana Whenua consistent with the Auckland Unitary Plan Regional Policy Statement objectives in

B6.2 (recognising Te Tiriti o Waitangi partnerships and participation) and B6.3 (Mana Whenua values) and by

recognising and providing for Mana Whenua:

(i) rangatiratanga and mana whakahaere,

(ii) values, mātauranga, kaitiakitanga and tikanga,

(iii) determination of the local expression of Te Mana o te Wai,

(iv) partnerships at governance and operational levels.

(e) Adopting an integrated approach, ki uta ki tai – mountains to the sea, consistent with

a holistic te ao Māori world view.

(f) Improving resilience to the effects of climate change.

(g) Ensuring that freshwater sustains present and future generations.

(h) Using mātauranga Māori and scientific knowledge and monitoring approaches.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

   "assessing available information relating to Māori cultural values"

   Any assessment carried out should be done with consideration for the cultural values of the whole community, Maori included.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    All members of the community should be treated equally and with equal respect and consideration.

    I am unable to understand parts of your submission because it is expressed in a language other than English, I assume Maori.

    The parts I understand give me the impression that because I am not Maori I will be disenfranchised with regard to any decisions relating to the management of Auckland's

freshwater. If that is the case and it is advertent, then it is divisive and will prove to be ultimately harmful to our society.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Each consent holders needs must be assessed individually based on current guidelines.

21. How do you think we should prioritise allocation where or when water is scarce?

More information is required.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Infrastructure must be upgraded to allow an improved supply of fresh water.

This means more investment in water treatment and supply.

   It's a Māori concept that does not translate to practical applications

   Needs rewording

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

That means forward planning

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Not all Māori agree or adhere to the written ideals

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

I don’t know what wake ama means

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau’s river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Ensure that no commercial entities making profit from water can have an allocation

21. How do you think we should prioritise allocation where or when water is scarce?

Greatest need for the greatest number

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Call it Auckland

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

No

Tell us why:

The term is broad and when something good is -it can be open to different interpretations and incremental changes- over time (as the original key or founding document's intentions and its proposals are changed for political, idealogical or economic reasons . A bit like the Treaty of Waitangi.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

No--except that those 'outcomes' should not assume arbitrary access and denial of any private property rights or use of private land-- or any such dictatorial compliance.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Send every domestic household ONE small timer to attach with a suction to the shower door--set at 7 minutes. I, and many others, shower for too long--TWICE A DAY! This would have been better than supplying those silly food scrap bins-- few actually use ONCE A WEEK.

21. **How do you think we should prioritise allocation where or when water is scarce?**

    Send a message: "So sorry everybody but really need to ask you to help us out here as water is getting scarce. On... ..to...would you please set your shower timer at 3 minutes? The more who can do that--the quicker we can offer a normal supply. THANKS

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    YES. RUN A BUSINESS ON THE SIDE. YOU CAN SELL PEOPLE FILTERS. STOP PUTTING CHLORINE AND FLUORIDE IN THE WATER SUPPLY. ASK PEOPLE TO BUY A SUBSIDISED

STEAM FILTER SYSTEM FROM AC for PURIFIED drinking water. Make revenue from a side service--selling shower timers and water filters.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   We cannot understand why this is a special issue for certain races and not for all New Zealanders.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Resilience is a term used for a person's character.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Amenity describes something useful in the civic setting usually for everyone

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

Urban streams are not used by people. There is scarcely any aquatic life that would be affected. It's a lot of regulation and man-hours for little outcome.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

The weather is colder not warmer.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly do not support

Tell us why:

What have Mana Whenua got to do with pressurising council?

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Most of the farmers in that area are suffering under ridiculous regulations which make it impossible to make a profit. Please leave them alone. Farmers know what they are doing.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

This is job creation by the look of it. Why so much red tape?

17. Are there other management options outside of those listed that you think we should consider?

Slimline the water governing bodies and reduce staff. Obviously keep high standards as per health regulations

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

This should be Auckland / Tamaki Makaurau

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our fresh water

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on

race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   I don't know

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I strongly object to any and all segregation and/or preferential considerations based on race, ethnicity or ancestral lines.

All Aucklanders should be treated equally

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Maori should not have any special/additional rights over water than any other New Zealander. This a racist policy. Maori are immigrants, the same as everyone else.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   I agree with the concept, but not if one racial group has preferential rights over everyone else. Everyone has equal rights.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Disagree

Tell us why:

I agree with the concept, but not if one racial group has preferential rights over everyone else. Everyone has equal rights.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

I agree with the concept, but not if one racial group has preferential rights over everyone else. Everyone has equal rights.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

I agree with the concept, but not if one racial group has preferential rights over everyone else. Everyone has equal rights.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

I support to reduce contamination, but it has to be realistic and practical and suitable for the community.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I disagree if one racial group has preferential rights over everyone else. Everyone has equal rights.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the property of all New Zealanders, and cannot and must not be at all based on race. This is a shared global resource, that within New Zealand should be protected from access from abroad, and be available equally and fairly to all those living in New Zealand. Segregation based on race, when the water system is part of a global cycle, is unfathomable and divisive. Further efforts should be undertaken to protect and more effectively manage freshwater resources from exploitation and contamination from farming and other industries. However, it must be not be given in preference based on race.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

There must be no division based on race of the water systems in the region. Water is a common resource shared by everyone. Engagement has already been undertaken, and ongoing and further engagement will just hold up the process, and make it increasingly challenging to manage these resources effectively. Exclusive, unaccountable rights to water, for one ethnic group, is totally unacceptable and must not be allowed to occur.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

There must be no division based on race of the water systems in the region. Water is a common resource shared by everyone. Engagement has already been undertaken, and ongoing and further engagement will just hold up the process, and make it increasingly challenging to manage these resources effectively. Exclusive, unaccountable rights to water, for one ethnic group, is totally unacceptable and must not be allowed to occur.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

There must be no division based on race of the water systems in the region. Water is a common resource shared by everyone. Engagement has already been undertaken, and ongoing and further engagement will just hold up the process, and make it increasingly challenging to manage these resources effectively. Exclusive, unaccountable rights to water, for one ethnic group, is totally unacceptable and must not be allowed to occur.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

There must be no division based on race of the water systems in the region. Water is a common resource shared by everyone. Engagement has already been undertaken, and ongoing and further engagement will just hold up the process, and make it increasingly challenging to manage these resources effectively. Exclusive, unaccountable rights to water, for one ethnic group, is totally unacceptable and must not be allowed to occur.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

I agree with anything that leads to cleaner and healthier water systems, and allows for continued, fair and equal access to all New Zealanders, irrespective of race, gender, belief system and so forth.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

The ambition to clean up our water systems is one I support, where access and decision making is guaranteed equally, regardless of race, gender or belief system. There cannot be continued consultation with mana whenua on this issue as this has long ago occurred. Race based policies are apartheid and inappropriate in the modern age.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   There is far too much importance being given to initial input and final use / control / etc being based on race - this is an outright breach of basic Human Rights laws both nationally and internationally. ALL people, irrespective of race depend upon fresh water for life and I think that the path that NZ politics is taking with so much open pandering to Maori opinions is racially offensive and disgusting in the highest degree. I myself am of Maori ancestry and I can only see division and anger being created by anything that separates - and that will be terrible for our generation and the generations to come. The lessons learnt from World War II were hard earned by all of our ancestors and I can't believe that 80 short years later so many politicians that its more important to appease the current socially acceptable stance of being pro-Maori over taking the courageous, but difficult and FAR more sustainable of bringing ALL New Zealanders together. ANYTHING that divides will weaken this city and this once great nation. Please stop doing this and get back to good old common sense!!!! Race based decisions are NEVER going to be acceptable in my view and history is abundant with lessons of how vitally important this point is.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Disagree

Tell us why:

Far too much strength being given to the "Maori opinion" (which I assert doesn't even reflect the views of all Maori!!!) - this is segregation based on race and is illegal. I am of Maori descent and I see apartheid being actively built into the country I love and I'm deeply disturbed by it. ALL people and ALL animals will be effected by our joint decisions about freshwater management and ALL people should have an EQUAL say in how this critical asset is managed - for the good of ALL PEOPLE EQUALLY. Have the courage to uphold the Humans Rights laws nationally and internationally and stop pandering in ways that only divide communities rather than truly build them.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

Far too much strength being given to the "Maori opinion" (which I assert doesn't even reflect the views of all Maori!!!) - this is segregation based on race and is illegal. I am of Maori descent and I see apartheid being actively built into the country I love and I'm deeply disturbed by it. 22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I do not support ANY splitting of anything along racial lines. History is littered with events and occurrences of this and none have ended well. All caused civil unrest at best and horrible nasty outcomes at worst. Why continue with this and not learn from history. What you are proposing does exactly this again. STOP SPLITTING BY RACE. TAKE ALL RACE OUT OF THE PROPOSALS!

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Mana when is should not have stronger input or say in this. Water belongs equally to everyone in the community and no one race or culture should feel as if they have more rights to it. Do away with this special consultation of nana whenua.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Again you are favouring a segment of the community and causing division. Maori should have no more rights to water than anyone else. It is god given to all.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Submitter details:

Organisation (if applicable):

Local Board: Albert-Eden

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The proposed direction awards Maori greater influence. We live in a democratic society where we are all equal and have an equal interest in good outcomes. There is no place for divisive policy where some segment of society are given special treatment, especially when we are all paying for the outcome. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

   The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Water is a crucial resource for everyone in Auckland.

    NZ is a democratic society where we are all supposed to be given an equal vote and say in how things are managed and governed. Awarding special management rights to a particular

ethnic group is divisive and is undemocratic. No one should have any special rights or influence regarding our freshwater simply because of their ancestry.

I do not support the proposed approach given it awards special treatment to Maori - nor would I support any approach giving special and undemocratic rights to any other sub-group of society. The approach to water management must be democratic.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   Water is the essence of ALL life, so everyone has an interest in healthy water. All Aucklanders should be equal stakeholders in how freshwater is managed in their city.

   Auckland Council you presents the idea that Māori are entitled to be involved to a much greater degree in the decision-making, monitoring and management, plus allocation, of Auckland's freshwater.

   I say people must not be divided by ancestral lines. Policies and rules must apply to us all equally.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Let's get this done with minimal red tape. We don't need to pay for expensive consultations with a tiny fraction of a minority group. We need scientists and biologists doing the work to ensure these beautiful water features and our precious water are protected for all people, especially all those people that have paid rates to the city over the last century. Stop the red tape cheast beating, get the job done properly and pay specialists that will allow this to be

done efficiently and quickly, not line the pockets of a few in the name of "inclusions". We simply cant afford it any more.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

   We all should be able to enjoy our water, its a free, healthy activity for families and people allowing the community to connect and enjoy your beautiful Auckland.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I believe these proposals should be written in English, should be clear and succinct, and shouldn't use un-quantifiable spiritual terminology. Water is essential to life. We don't need to 'acknowledge the life-sustaining capacity' of it. All policies currently being developed should be written clearly, and treat every New Zealander as equal.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

No

Tell us why:

I believe these proposals should be written in English, should be clear and succinct, and shouldn't use un-quantifiable spiritual terminology. I do not think 'resilience' is clear and specific. All policies currently being developed should be written clearly, and treat every New Zealander as equal.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

I believe these proposals should be written in English, should be clear and succinct, and shouldn't use un-quantifiable spiritual terminology. I do not think amenity is clear and useful enough in this context. All policies currently being developed should be written clearly, and treat every New Zealander as equal.

7. Do you have any feedback on the proposed environmental outcomes?

I believe these proposals should be written in English, should be clear and succinct, and shouldn't use un-quantifiable spiritual terminology. All policies currently being developed should be written clearly, and treat every New Zealander as equal.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

I believe these proposals should be written in English, should be clear and succinct, and shouldn't use un-quantifiable spiritual terminology. 'Maori cultural values etc etc' is vague and racist. Making separate provision for Maori is racist. All policies currently being developed should be written clearly, and treat every New Zealander as equal.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    I don't know

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    I don't know

   Tell us why:

   There is great need to address below ground pipework network infrastructure so that storm over flows and failures likes of the Parnell sink hole are avoided. These actions will ultimately lead to remediation of natural water bodies

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Other

Tell us why:

Resilience of water supply has been and issue twice in the last 30 years suggesting planning has been inadequate. There needs to be greater thought given to adding dams in the future as we cannot rely on the Waikato for ever. Micr Hydro electric power generation could also be part of these schemes

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

All natural water bodies have an amenity value if they are unpolluted

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

While it is agreed water bodies are important we need not differentiate and therefore accept poor quality in some places

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

See 13 above

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

The recent Parnell sinkhole event served to highlight the alert levels often found on Auckland Beaches. I live in Westmere were Cox's Creek is an appalling open sewer

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

There are far bigger issues to deal with and those elements are natural elements that will disperse in nature

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

There are more important things to get on with

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

The first priority is determined by the fact that it is a significant and vital part of our food supply chain.

As the Dairy industry is transitioning and changing do to can Pukekohe farmers over time with reasonable measures and expectations

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

We can improve practices and retain productive capacity. It is about settings goals, collaboration and education

17. Are there other management options outside of those listed that you think we should consider?

Education

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Education and adequate time frames. The public may need to fund these works

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

Pressure on natural features is part of making a city. We need to act in a smarter way in relation to managing freshwater systems.

Detailed master planning that considers these matters needs to be implemented.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

There need to be more dams built to store rainwater to satisfy growth in freshwater demand. This is a known and predictable fact so planning for it must happen. We can prevent over allocation and degrading most of the water system by sacrificing a few and create significant water bodies that become homes of birds fish and animals.

21. How do you think we should prioritise allocation where or when water is scarce?

As above

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

It is a resource that must be allocated on a needs basis not race.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   There should be no reference to any race based decision making or guidance. This includes giving unequal rights to any one ancestoral group over any other(s).

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   There should be no reference to any race based decision making or guidance. This includes giving unequal rights to any one ancestoral group over any other(s).

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Disagree

Tell us why:

There should be no reference to any race based decision making or guidance. This includes giving unequal rights to any one ancestoral group over any other(s).

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

There should be no reference to any race based decision making or guidance. This includes giving unequal rights to any one ancestoral group over any other(s).

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

There should be no reference to any race based decision making or guidance. This includes giving unequal rights to any one ancestoral group over any other(s).

We live in Auckland - not Tamaki Makaurau. Stop trying to rename the city and region!

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Disagree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Agree

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Fairly satisfied

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    No

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    No

    Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

There should be no reference to any race based decision making or guidance. This includes giving unequal rights to any one ancestoral group over any other(s).

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

Let farming be. There is enough controls in place currently

17. Are there other management options outside of those listed that you think we should consider?

No. Remove and simplify

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

There should be no reference to any race based decision making or guidance. This includes giving unequal rights to any one ancestoral group over any other(s).

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

There should be no reference to any race based decision making or guidance. This includes giving unequal rights to any one ancestoral group over any other(s).

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is not more important to one ethnicity then another. To suggest that water is more important to a Maori person, or half maori person, or 1/16 maori person to just stupid and offensive to all other ethnicities. i oppose any plan with race based ideology. this is really offensive to me.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Disagree

Tell us why:

it is offensive to me that you would place maori or any other races cultural values over any other. I am opposed to these divisive race based proposals. we all live in this area together.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Every Aucklander regardless of race or background should be treated equally as a stakeholder in water. Race based policies are offensive, divisive and disgusting.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The vision should not discriminate between the needs of Maori and other races, but should be a vision for all people.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

   The vision should not discriminate between the needs of Maori and other races, but should be a vision for all people.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Other

Tell us why:

The vision should not discriminate between the needs of Maori and other races, but should be a vision for all people.

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

The vision should not discriminate between the needs of Maori and other races, but should be a vision for all people.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The criteria should not specify the values of a specific culture, as it cannot override the other values which are values that all other people share.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   You are being ridiculous. The overarching vision is obviously to have ample quality water supply for everybody during the very variable and unpredictable climate that Auckland has always had.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Stop being racist! Only the ignorant of history support racist. What about non-Maori cultural values!!! We need to remove racism. Not introduce more. Special management is only jobs for the boys. What is obvious is some areas to protect the environment require special management. But not race based.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

We certainly need to upgrade the wastewater system. It was a stupid idea to to allow rain to wash the roads then drain into the sea.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Build infrastructure like the more sensible councils of the past did. They could do it and there are no engineering, environmental or other reasons why we can't keep doing so.

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    It must be important to use and appoint experts to research and develop our fresh water resources. How can this be achieved if we allow a small section of our citizens to be involved in what must ultimately be a disruption of this important planning.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

Hopefully the new government will review & revise the legislation and exclude any provisions based on ethnicity/race. The supply of freshwater is a simple engineering issue and should not include any other elements. Obviously without freshwater we die, so it is a necessity not a treasure. NZ is ostensibly a secular society but somehow the woke elite & bureaucracy have bought into stone age beliefs. The recent general election & council rebuff on Maori wards should give a strong indication of how the general population feel about these topics. Please just stick to your knitting !!!!

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

   Well it really depends on why this council feels it is so important to have a statement like this one in the vision "... Freshwater is precious and limited, a taonga of huge significance, and of particular importance to Maori....”

   The state of our water is no more important or precious to any one of the numerous ethnicites who have kindly made Auckland their home. If you are going to list one ethnicity then you must list them all. Or none at all. What an arrogance to suggest that if you are not Maori then you dont consider water quite the treasure or quite as important as what Maori think about it. What nonsense.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   inserting Maoritanga lexicon into legislation brings understanding since 1980 state sector Act (adding Maori lexicon to all legislation)

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Improve inner harbor water quality stop fishing & dredging inner gulf Auckland

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Not enough understanding

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Water management extremely lapt

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It's a great site! I hope it's easier to navigate sometimes!

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

too much pollution & waste going into our streams

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

This is so important & should be apart of a non-negotiable plan

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

This will allow you to set your priorities.

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

I don't know

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Yes

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

Look at data + statistics, weigh out pros & cons of where water should go. Prioritize the most important thing that is going to affect other.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   As its an essential and to preserve is important for our whanau at large.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

I would say usage of public transport would help envrionment.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    Avoid chemically used fertilizer and weed spray

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    I would count via units used can be limited in that way sewage would have less load

21. **How do you think we should prioritise allocation where or when water is scarce?**

    Units of usage of water can be given (target use)

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Yes, see attached.

Submission: ’Setting our direction for improving freshwater in Tāmaki Makaurau/ Auckland’

4 December 2023

A note on the applicability of the NPS-FM user the new government:

The 2023-2026 government has committed to the following changes:

- **Replace the National Policy Statement for Freshwater Management 2020** to allow district councils more flexibility in how they meet environmental limits and seek advice on how to exempt councils from obligations under the National Policy Statement for Freshwater Management 2020 as soon as practicable[1].
- **Replace the National Policy Statement for Freshwater 2020** to rebalance Te Mana o te Wai to better reflect the interests of all water users[2].
- **Replace the National Policy Statement for Freshwater Management 2020 and the National Environmental Standards for Freshwater** to better reflect the interests of all water users[3].

These changes will have a significant impact on how freshwater will need to be managed in Auckland, especially in relation to the Council’s obligations to ‘Te Mana o te Wai’.

This calls into question the wisdom of going through this process at this time. However, that being said, please see below my feedback.

First up, I am very supportive of any action plan intended to stop freshwater degradation and improve water quality and ecosystem health. Clean freshwater is of importance to us all.

Mana whenua as a sector of the community

Therefore, I am dismayed to see that Auckland Council, a public authority mandated to:

> “*enable democratic local decision-making* and *action by, and on behalf of, communities; and to promote the social, economic, environmental, and cultural well-being of communities in the present and for the future*[4]*”,*

has chosen to prioritise the views of a sector of the community, which the Council refers to as *“mana whenua”,* in the decision-making, monitoring, management, and allocation of Auckland’s freshwater.

[4] Local Government Act 2002: https://www.legislation.govt.nz/act/public/2002/0084/latest/DLM171803.html?search=sw_096be8ed81dd8cee_democratic_25_se&p=1

While the Council may say this follows the requirements set out in the NPS-FM, Auckland Council's response in **'Setting our direction' (SOD)** establishes as a degree of community exclusion not provided for by the drafters of NPS-FM.

The NPS-FM does accord a limited degree of special status to *"tangata whenua".* Although we are not provided with a definition in the NPS-FM, the term is commonly known to mean *"the people of the land"*, or if we were upfront about the racial element, people with Māori ancestry. However, SOD instead accords special rights to *"mana whenua"* - a term that does not appear in the NPS-FM, but defined in SOD as: *"Māori who have customary authority over land through ancestral links".*

This definition is incorrect. The Resource Management Act 1991 and the Natural and Built Environment Act 2023 both define "mana whenua" as: *"customary authority exercised by an iwi or hapū in an identified area."*

When SOD uses the term, *"mana whenua"* it refers not to those who affiliate with an iwi or hapū of Auckland, but those who represent those who affiliate iwi and hapū of Auckland - a very small number of Aucklanders indeed. The term specifically excludes people of Māori descent with ancestral links outside of Auckland, and people who have ancestral links to the iwi and hapū of Auckland, but choose not to affiliate with a tribal organisation.

Section 5.3 'Mana whenua, communities and stakeholders' of SOD also clearly distinguishes mana whenua from other people of Māori ancestry:

> *"The NPS-FM requires that we engage with mana whenua and communities at each step of the process. Auckland Council is committed to undertaking robust and fulsome engagement with* ***mana whenua****,* ***the community****,* ***stakeholders*** *and* ***mataawaka****."*

As we know, and as defined in the Glossary of SOD, mataawaka means *"Māori who live in Auckland and are not in a mana whenua group"*.

Under SOD proposals we can clearly see that the voices of those who represent the tribes of Auckland will be prioritised above the voices of everyone else - whether they be Māori or non-Māori.

To illustrate the size of the community these tribal representatives represent, using the Council's data, is less than 2.3% of a total population of 1.72 million[5], or less than 40,000 Aucklanders. Those who affiliate to a tribe also make up a fraction of the total Māori population of Auckland, with Māori who live in Auckland and are not in a mana whenua group making up 80% of the Maori population, which is 11.5% of the total population.

---

[5] Auckland Council - Auckland's population: https://www.aucklandcouncil.govt.nz/plans-projects-policies-reports-bylaws/our-plans-strategies/auckland-plan/about-the-auckland-plan/Pages/aucklands-population.aspx

Making it a priority to engage with mana whenua in relation to Te Mana o te Wai does not reflect the intention made clear in the NPS-FM, which is that:

> *"Every regional council must engage with communities and **tangata whenua** to determine how Te Mana o te Wai applies to water bodies and freshwater ecosystems in the region."*

The requirement set out in the NPS-FM to involve *"tangata whenua"* is to mean all Māori in the area, but Auckland Council, using "obligations" set out in its own Auckland Unitary Plan, has declared that the voice of *"tangata whenua"* must now give way to the voices of *"mana whenua",* or more specifically, the voices of those who speak for the tribes[6].

This is a degree of exclusion that cannot be demonstrably justified in a free and democratic society.

The inclusion of tikanga Māori

Most Aucklanders, not being Māori language speakers, would not understand the degree of power that SOD is handing to those who identify as mana whenua in Auckland. They would be none the wiser if they were to refer to the Glossary provided, as the definitions provided do not reflect current thinking.

For example, section 4.3(d)(iii) says that:

> *"Freshwater management in Tāmaki Makaurau will give effect to Te Mana o te Wai by…. Involving Mana Whenua and by recognising and providing for Mana Whenua… tikanga."*

The Glossary tells us tikanga means *"Practices / protocols / customs".*

However, the Natural and Built Environment Act 2023, the Act that this National Policy Statement will eventually sit under (if the Act is not repealed as is the intention of the new government), defines tikanga as *"Māori customary law, customary values, and customary practices"* (emphasis added).

Digging deeper into the world of tikanga reveals that this is an evolving area of law that is set to have significant constitutional ramifications.

Hon Justice Joe Williams is seen as the pre-eminent authority on tikanga Māori. In his 2013 talk *'The Harkness Henry Lecture Lex Aotearoa: an Heroic Attempt to Map the Māori Dimension in Modern New Zealand Law[7]',* he outlines what tikanga means for New Zealand. It is worth a read. And in his role as a member of the Supreme Court, Hon Justice Joe Williams has made significant advances in the way our highest court sees tikanga in relation

---

[6] Auckland Council - Māori in Tāmaki Makaurau: https://www.aucklandcouncil.govt.nz/plans-projects-policies-reports-bylaws/our-plans-strategies/auckland-plan/about-the-auckland-plan/Pages/Māori-tamaki-makaurau.aspx

[7] The Harkness Henry Lecture Lex Aotearoa: an Heroic Attempt to Map the Māori Dimension in Modern New Zealand Law: https://www.austlii.edu.au/nz/journals/WkoLawRw/2013/2.pdf

to New Zealand's legal system. The way some in the judiciary see tikanga is summarised in the New Zealand Law Commission's recent Study Paper 'He Poutama':

> *"Tikanga "has been and will continue to be recognised" in the development of Aotearoa New Zealand's common law in cases where it is relevant. Tikanga has been judicially described as the first law of Aotearoa New Zealand, a "free-standing legal framework", and a "third source of law".*

The impact of the inclusion of tikanga in SOD should not be dismissed. An illustration is a recent decision of the Employment Court, which said that as Customs had voluntarily *"incorporated into its employment relationship with all employees to act consistently with applicable tikanga/ tikanga values"*, that Custom's dismissal of an employee for refusing a Covid-19 vaccination was not justified, and awarded damages to the now ex-employee[8].

The ongoing development of tikanga is of concern to our system based on the rule of law, as it is described as *"a principles-based system of law capable of adaptation according to context"*. It is not universal, but dependent on place and time. It is not codified and requires "experts" or pūkenga to advise our Courts as to how tikanga applies in each circumstance.

Has the Council considered the full extent of the inclusion of tikanga in SOD?

Other definitions

Section 4.3(d) includes the intention to recognise and provide for Mana Whenua:

(i) rangatiratanga and mana whakahaere; (ii) values, mātauranga, kaitiakitanga and tikanga; (iii) determination of the local expression of Te Mana o te Wai; (iv) partnerships at governance and operational levels.

Rangatiratanga is not defined in the Glossary nor does it appear in the NPS-FM, Resource Management Act 1991 or the Natural and Built Environment Act 2023. However, it is defined in other places, such as the aforementioned *'The Harkness Henry Lecture Lex Aotearoa: an Heroic Attempt to Map the Māori Dimension in Modern New Zealand Law[9]'*, which defines rangatiratanga as *"self-determination in modern English".* Rangatiratanga is also sometimes used to mean sovereignty or ownership. Used in combination with **mana whakahaere**, which is described in both SOD and NSP-FM as *"the power, authority, and obligations of tangata whenua to make decisions that maintain, protect, and sustain the health and well-being of, and their relationship with, freshwater."*, it implies a level of sovereign decision-making power and authority above that of Auckland Council, and in reality, it is also used to imply a level of sovereign decision-making power and authority above that of the State.

---

8 https://www.hrnz.org.nz/news/article/employment-court-considered-the-relevance-of-tikanga-in-the-employment-jurisdiction

9 The Harkness Henry Lecture Lex Aotearoa: an Heroic Attempt to Map the Māori Dimension in Modern New Zealand Law: https://www.austlii.edu.au/nz/journals/WkoLawRw/2013/2.pdf

Has the Council considered the full extent of the inclusion of rangatiratanga and mana whakahaere in SOD? Is that indeed constitutionally possible for the Council to promote rangatiratanga?

The Glossary of SOD describes **kaitiakitanga** as *"the obligations of tangata whenua to preserve, restore, enhance and sustainably use freshwater for the benefit of present and future generations."* This is directly from the NPS-FM, but the NPS-FM also refers back to the Resource Management Act 1991, which interprets it as *"the exercise of guardianship by the tangata whenua of an area in accordance with tikanga Māori in relation to natural and physical resources; and includes the ethic of stewardship"*. Or if we want to look at a future relevant interpretation, the Natural and Built Environment Act 2023 interpretation is the same, but drops *"the ethnic of stewardship"*). However, this is not a settled term. For instance, *"in accordance with tikanga Māori"* adds a completely different dimension that is excluded from the interpretation provided in SOD. In the aforementioned *'The Harkness Henry Lecture Lex Aotearoa: an Heroic Attempt to Map the Māori Dimension in Modern New Zealand Law*[10]*',* Hon Justice Joe Williams defines kaitiakitanga, when under a tikanga Māori framework, as *"the obligation to care for <u>one's own</u>"*. (Emphasis added)

This makes sense in a tikanga Māori context, as at the heart of tikanga is the concept of *"whanaungatanga"*. Whanaungatanga is the basis of tikanga Māori. It refers to the notion that all rights are kinship based, and they are passed through the person's mebership to their iwi, hapu or whanau. The rights provided under tikanga are descent-based rights, and do not belong to anyone outside of the bloodline.

What SOD is therefore saying, is that the right to participate is conferred on those whose rights are given at birth.

While some may see the Māori world view that is permeating our system as inclusionary, they fail to see the inherently exclusionary nature of te ao Māori. The idea that rights are not available to all but inherited is not a new idea, it is an idea that all cultures have at some point been based on. But we as a society have moved on from inherited rights to a more inclusionary system based on equal rights for everyone in the community.

Mātauranga Māori is defined as "Māori knowledge, refers to all things physical, spiritual and emotional in a Māori context." It is not unique for a culture to claim divine rights in an attempt to govern others. For instance, we see this in religious orders such as the Christian Church, which has in the past asserted control over people as given God-given right. Our secular democratic society has moved away from this practice and now works on the basis that the views of individual citizens are equally valid.

Partnership at governance and operational levels flies in the face of our democratic system, where political authority that comes from the people of Auckland by democratic means, that

[10] The Harkness Henry Lecture Lex Aotearoa: an Heroic Attempt to Map the Māori Dimension in Modern New Zealand Law: https://www.austlii.edu.au/nz/journals/WkoLawRw/2013/2.pdf

is universal suffrage with regular and free elections. The implication of including “partnership” is that the authority vested in the Council by the people of Auckland will be devolved to “mana whenua”. As mana whenua are not subject to the ballot box, there is no accountability for decision-making.

The words used in SOD are powerful in a te ao Māori context. They should not be included by the Council as a box-ticking exercise. The meaning behind these words - to some - signal agreement to embed major constitutional change in the way public power is exercised in New Zealand. If enacted, this new constitutional order will curtail the right of New Zealanders to equal treatment from the State - to be free from discrimination based on ethnicity, race or national origin.

Were the Council to make good on s 4.3(d), public power would be removed from the democratically elected public institution that is Auckland Council, to an unaccountable group whose membership is based on ancestry.

The point of a democracy is to ensure that political power is not concentrated in a few, and that political power can be stripped from those who work against the best interests of those they govern.

Is the Council aware of this significance? Is it wilfully stripping the rights of all Aucklanders (Māori and non-Māori alike), to appease a sector of the community? How much longer will Aucklanders continue to allow their right to equal representation, their right to expect equal treatment from their council to be curtailed?

I have grave concerns for the consequences of a group of private citizens having so much power over Auckland’s freshwater - a group who are unelected by and unaccountable to the wider community. I am also concerned that should the council not fulfil the terms of sections 4.3(d) to the satisfaction of mana whenua the council could be threatened with legal action. **Therefore, I recommend the rejection of all provisions assigning authority to mana whenua.**

Democratic control of our water resources is vitally important, but this document contains provisions which could result in the control of Auckland’s freshwater being placed in the hands of a group of citizens who are unaccountable to the wider community.

I sincerely hope that is not the intention of Auckland Council.

Thank you.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   These comments also apply to other parts.

   While the long-term goals are mostly admirable, the consultation procedures and specific goals privilege mana whenua, perhaps 10% of the population, at the expense of all other citizens in the region..

   Water is essential to us all but this document's emphasis on Te Ao Maori and Te Mana o te Wai, tikanga - which can vary form one tribal area to another, and mauri - defined in the main text as 'the life-sustaining capacity of water, but in the glossary as 'life force/vital essence', a notion which lost all scientific credibility about 150 years ago, leads me to wonder how responsive this policy will be to all people's attachment to clean water, what special expertise mana whenua bring to the table, why the rest of us are not partners entitled to the same degree of consideration as to our values, why mana whenua are not considered part of the community, what happens when the mana whenua views are out of step with their neighbours. The justification of Treaty partnerships with privileged input is not only a dubious interpretation of the ToW, but a slap in the face for modern notions of democratic equality,

incompatible with the NZ Bill of Rights Act and the UN Declaration of Universal Human Rights.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori

have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

We need greater vigilance in sustaining safe swimming areas.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to

discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water belongs to no one person or race.

   It is a natural resource and necessity thst comes from the sky .

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   Water dosent belong to Maori or any race.

   It is a fundamental necessity of life and cannot be politicise and racialised

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Disagree

Tell us why:

See above

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

See above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

As long as this concept relates to all people and not not only maori

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

See above

7. Do you have any feedback on the proposed environmental outcomes?

This must be racialised, it relates to all people, nit just Maori

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

See above

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

As long as these criteria relate to all people

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

See above

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

As long as these criteria are not racialised

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

See above

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

As long as not racialised or subject to control by maori

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

I agreebit control must not be given to Maori, every voice and every race is equally important

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

See above

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

See above

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

These standards should not be controlled by Maori.

Every voice from every race must be given equal authority

21. How do you think we should prioritise allocation where or when water is scarce?

See above

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#1936

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Summary is too short

full document is difficult to understand without Chinese

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Keeping our water ways clean is important

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

We just want safe water for our children to swim in

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

We need to keep our waterways clean

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Protect our water and aquatic life

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Very good

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Very good

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Protect our fish

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Advocate government investment in freshwater resource conservation.

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Support voluntary water reduction initiatives.

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Provide training and resources to support more efficient water use.

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Water resources should be given importance by the government; planning visions ought to be supported.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Agree

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Agree

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Supporting the establishment of health indicators for our rivers, streams, and lakes is essential.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Some places that people often visit, including rivers, streams, and lakes, have insufficient management and need to be strengthened.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

    Fish resources are crucial and should be protected.

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    I don't know

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

Priority for human use.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The Vision for Freshwater is very important.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Protecting the environment and water resources are very important

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Protecting the environment and water resources are very important

7. Do you have any feedback on the proposed environmental outcomes?

Firmly support the environmental outcomes.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

Lots of difficulties.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

    Keep vegetables safe.

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

Prioritise water supply for people.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   The Vision for Freshwater is very important.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

We care about the safety of drinking water, the quality and safety of the environment, and leisure convenience.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Protecting the environment and water resources are very important

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

should be strictly managed

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Protect water sources and prevent pollution.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Under the strict management by relevant departments, it becomes better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

Strictly controlling temperature rise is a difficult task.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Keeping vegetables safe is very important.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Prioritise water supply for people.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3573

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   This is very important.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Need regular checks.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

See if it is enough or not.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

It is important to have somewhere good to swim, so is safety.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Sustainability is the most important thing, so we won't spend more money on sorting it out.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Fairly clean.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Need to protect ecology.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

If fertilisation causes pollution, then it should be limited to ensure food and drinking water safety.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Work in the right direction.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Limit water use, for reference with large water consumption.

21. How do you think we should prioritise allocation where or when water is scarce?

Priority allocation should also ensure that every household has enough water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Ngā Ringa o Te Auaunga
Friends of Oakley Creek

Submission on Setting our Direction for Improving Freshwater in Tāmaki Makaurau / Auckland

National Policy Statement for Freshwater Management Auckland consultation document, November 2023

To:

Auckland Council - freshwaterplanning@aucklandcouncil.govt.nz

Name of Submitter:

Ngā Ringa o Te Auaunga - Friends of Oakley Creek
4/65 Woodward Road
Mt Albert
Auckland 1025

Introduction:

Ngā Ringa o Te Auaunga - Friends of Oakley Creek Te Auaunga (FofOC) is a community-based organisation that acts as on-the-ground kaitiaki for our local awa, and concerns itself with the protection, restoration and enhancement of the natural ecological values of Te Auaunga and its environs.

Te Auaunga - Oakley Creek is one of the few remaining open waterways on the Auckland isthmus, flowing through an extensive network of green space and parks, from the northern slopes of Hillsborough Road across the isthmus and out into a marine reserve of national significance – the Motu Manawa Pollen Island Marine Reserve, and Waitematā Harbour. It provides a range of values, including open space, recreation, heritage, habitat and connectivity for both people and wildlife. It is significant as a natural resource and has unique Māori and early European heritage.

Since 2004, FofOC has worked in partnership with Auckland Council, local boards and the community to protect and restore our precious awa and environment. With the support of volunteers, we have planted tens of thousands of trees, undertaken extensive pest plant and animal control and regularly monitor the water quality across the catchment.

Whenever the opportunity arises, we advocate for greater protection of the natural environment and improved freshwater quality through policy and regulations, and have submitted on relevant bills, plans and policies, both locally and nationally.

Submission:

Ngā Ringa o Te Auaunga - Friends of Oakley Creek (FoOC) welcomes the opportunity to submit on the *Setting our Direction for Improving Freshwater in Tamaki Makaurau / Auckland* consultation document.

Our submission relates to all the topic areas listed on the Feedback Form, as they are all critical for improving our freshwater.

We would like to commend the Council for an extensive and thorough document and support the Draft Long-Term Vision, in principle, with the following feedback.

6. Long-Term Vision:

6.1.a. by 2030:

3. We recommend that the vision go beyond the proposal - *Net loss of streams and wetlands is no longer occurring*, and include a *net gain* with identified opportunities for:

   - *Daylighting of more streams / reaches of streams.*

   - *Restoring lost / degraded wetlands and developing new wetlands.*

11. Freshwater values:

We support the addition of *resilience* and *amenity*.

12. Environmental outcomes:

Table 3:

Irrigation, Cultivation etc. - This needs to be strengthened to include not just *an adequate level of reliability* but to include *supports the health and wellbeing of the water and ecosystems*.

Commercial Use etc. - This needs to be strengthened to include not just *an adequate level of reliability* but to include *supports the health and wellbeing of the water and ecosystems.*

14. Attributes:

We support the inclusion of the monitoring of *zinc and copper (in urban streams) and temperature (in all streams).*

14.2: Nutrients:

Table 9:

Rivers (eutrophication effects) - Preferred direction – also need to include *maintain where good* and *improve where poor.*

Lakes (toxicity effects) – Preferred direction – needs to include *improve where poor.*

14.3: Sediments:

Table 10:

Rivers:

Deposited fine sediment (wadeable rivers) - also need to include *maintain where good* and *improve where poor.*

Estuaries:

Sediment load delivered to estuaries - also need to include *maintain where good* and *improve where poor.*

15. Aquatic life and habitats supporting ecosystem health:

15.2: Fish in wadeable streams

Table 13: We are shocked to learn that there is *no national bottom line for the Fish IBI attribute in wadeable rivers*. We ask that Auckland Council lobby the government take measures to include this in the NPS-FM.

16. Human impact on our lakes and rivers:

16.1: E. coli

Table 14:

All lakes – need to include *improve where poor.*

18. Achieving the targets: limits and action plans for water quality and ecosystem health:

18.1. Management tools under consideration

Wastewater and stormwater management (urban and rural):

- Bullet point 3 - Council needs to ensure the WQTR continues to enable the important programmes funded by it can continue / be undertaken.
- Bullet point 5 – All measures must be made to ensure maximum levels of permeable surfaces are maintained through LIUDD as our city further grows and develop. This is crucial as the health of our freshwater streams, lakes and wetlands is very much dependent on sufficient levels of water feeding into them from groundwater / springs / aquifers.

With thanks.

Sincerely,

[redacted]

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   To have any lesser vision would be a travesty. It is based on science and should be based on science. Restoring the vitality and diversity and abundance of freshwater and marine life flora and fauna is of the utmost importance.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

Thus will necessitate more infrastructure -I woukd much rather see the money spent resuscitating the water quality and environment first and once that has been done decisions can be made about the sustainability of recreational access.

7. Do you have any feedback on the proposed environmental outcomes?

Very much support the Pukekohe proposals. Food resilience is likely to become pressing. Waitakere is fast becoming overbuilt and this threatens the critical role the bush plays in retaining filtering etc rain water. Same for the Hunuas

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Just get on with identifying these sites without reference to recreational values. That will follow in due course

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Frankly all water should be safe to swim in!

Safe to swim in means, surely, that it is safe for wildlife too. But if resources are limited then start with the environmentally critical waterways (Manakau and Kaipara harbours are very important fish nurseries- protecting them protects our food supply- food resilience etc

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

    Many reasons, not least that climate warming is likely to mean these margins are likely to be more protective in times of heavy rainfall/ flooding

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

Allow them to catch and store their own water and provide a rates discount in proportion to the extent they don't rely on external supply

21. How do you think we should prioritise allocation where or when water is scarce?

Human drinking, animal drinking, human washing, food production, maintaining essential water levels for survival of the waterways

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#546

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Race should not be basis of decision making and management

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

As above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Race is not a basis for such organisations

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

As above

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

The presumption of a race-based (Maori) connection to water that prevails over that of other races is an utterly flawed and objectionable presumption. All of humanity has a connection with and interest in water, a necessity for survival I strongly object to Maori interests or authority taking precedent over the interests of the entire community.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I understand in Hawai the council went with so called indigenous values for water and shut it off so it didn't become contaminated and wasted putting out fire to save peoples homes or lives because they wanted to reduce the earths population for the new world order and let developers take the land over so the council can take more rates.

I understand all citisens of New Zealand are tungatufenuwa and we all have equal rights to have a say with no particular race having precedence or controlling preferential say or power.

Next you will be making it into a corporation, or selling it off as a company so we can be ripped off by shareholders in Australia or china or shareholders in The New Zealand company on the New York stock exchange.

The Creator and sustainer of the heavens and the earth gives water for all peoples, and we are to use it wisely as needed. It is used to flush the toilet to keep better in motion.

I instruct you to stop your plans at this time and wait to see what our new democratically elected government says.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   No place for spiritual references.

   the policy should be written in clear Scientific terminology

   The policy should not be distorted by beliefs that have no scientific support

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

Values are not quantified and some are too vague and lack sufficient description to understand what they mean

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Of Course. I suspect nobody enjoys polluted water. How is resilience and amenity to be measured

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

8. It is inequitable to the majority of New Zealanders for Minority views, that may or may not be relevant to the 21st Century, to be used in any way as a criteria

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

to many water systems are contaminated

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

It is self evident that all pollutants should be managed to safe levels

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Self evident

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Restrict housing developments encroaching (a bit late now)

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

This all costs money and only the best Scientific advice should be considered

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Allow a reasonable time for consent holders to reduce demand

21. How do you think we should prioritise allocation where or when water is scarce?

Have an action plan which may include desalination for drinking water

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Limited funds demand efficiency of action. Only suitably qualified people should be employed in management and be accountable.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

1. The Council states that freshwater is.....of particular importance to Maori... I object to this statement. Water is of EQUAL essence to all people (provide evidence to the contrary plese) and all citizens of Auckland should be equal stakeholders and have equal consultation rights based on the fact that we all pay rates to pay for these services.

2. I object to the fact that Maori have had a separate and priority engagement and engagement programme - justify this please. It is racist.

5.3 I object to the priority given to Maori in management, decision making and monitoring. This is is in effect racially biased practise and cannot be justified. What are Maori freshwater values and how are they different from anybody else. Justify this statement with evidence not just rhetoric.

6.1 What is Matauranga Maori - specify and provide evidence. If you can't prove it exists delete reference to it. All communities have a connection to water bodies as it is essential to all life and focusing on one community is racist.

Why is freshwater of special significance to Maori that is not shared by the rest of the community. Justify this statement and provide evidence. Otherwise delete it.

All citizens should be equal stakeholders in how freshwater is managed (we all pay for the management services after all) and there is no reason why Maori should be entitled to be involved to a greater say than anybody else in decision making. Justify your policy and provide evidence .

People should not be divided along ancestral or racial lines - it is profoundly anti democratic. Your proposal also will add considerable additional costs to freshwater management which neither the Council nor ratepayer can afford for what gain specifically?

Policies, rules and consultation rights involving public resources apply to all equally. We pay for management and we have a right for equality of standing in policy consultation and subsequent management of these resources.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   Fo not support any Maori specific policy or preference for Maori over others for any say on water. All should be treated equally regardless of ethnicity or race.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Disagree

Tell us why:

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Other

Tell us why:

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Other

Tell us why:

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

7. Do you have any feedback on the proposed environmental outcomes?

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Streams are polluted and full or rubbish. Houses are too infilled causing further issues for pollution and poor water management. Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

13. Do you think we should include and manage temperature as an attribute in this plan change?

Other

Tell us why:

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly do not support

Tell us why:

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Pukekohe soils are soecial and ahould be preserved for food growing permanents. i Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

All people should have access to water recreational fishing and riparian rights should be respected.

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

17. Are there other management options outside of those listed that you think we should consider?

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

Everyone should have the same rights and access - there should be no race based access to fish. This is a natural birth rite of all Kiwis

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

As long as it is actually enforced fairly and evenly for all parties.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Support any protection of environment as long as it is the same for everyone - no special rules or exemptions or access for Maori or any race over others

21. How do you think we should prioritise allocation where or when water is scarce?

It should be allocated evenly to everyone. There should be no prioritisation on basis of race, business over residential etc

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Supportive of initiatives to improve environment as long as it is fair and reasonable, the same for everyone

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

The rights of way for fish species are essential for their survival

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

You will never be able to put them back once they are gone.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

prioritize where you get the most output from the water. This could mean reducing growing of crops that are too water reliant in the Auckland Region.

21. How do you think we should prioritise allocation where or when water is scarce?

Municipal supply then farming, We need to use grey water for toilets and garden watering.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Houses in flood zones should all be given the option of water storage tanks to use for garden watering but also to slow the progress of water run off in these areas.

#76

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I have skim read your ~Setting our Direction" paper on freshwater. I was disappointed by the paper, which is long and lacks substance.

I live on Lake Pupuke, which is probably the most important freshwater lake in the whole city . It gets sparce mention in the paper. I fail to see how throwing Lake Pupuke into a large Hauraki FMU will assist in its future waterquality, management and preservation. Indeed, I believe this would be seriously detrimental to the long-term future of the lake.

Lake Pupuke (page 35) is said only to have Cultural/Recreational values. You make no mention of the Wildlife Reserve along a section of its shoreline.

Lake Pupuke is under immense pressure from public usage. Current management by AC is disappointing. What is needed if AC is serious about improving water quality in Lake Pupuke, is to set up a special committee of locals and council officers, which just manages Lake Pupuke on all matters (not just water quality, but including this as one of its important objectives).

You should adopt a similar approach to other KEY freshwater lakes, rivers, etc around the city- put their management into the hands of local committees made up partly of people with some local knowledge and some officers. Give those committees power over everything to do with that freshwater resource- not just its water, because all the activities impact on the water quality.

Add three large FMU`s to cover other freshwater outside these special freshwater assets if the new legislation requires it- otherwise forget FMU`s across the whole city and concentrate effort just on the specific areas of freshwater where it is important to make progress.

David Schnauer.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Dedicating resources to fresh water quality is not a choice, it is essential.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   It's not a question of why or if, it's essential to do it.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

As above

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

As above

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

To not do so would be foolish and short sighted

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

As above

7. Do you have any feedback on the proposed environmental outcomes?

The more the council can do to protect the healthy and productive environment for water quality and food production close to the city the better in the long term. To not do so would be foolish.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Protecting natural and livable waterways is a human, animal and environmental imperative, unit up for debate.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

As above.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Need to be higher standard and more strictly enforced

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Evidence clearly illustrates that the waterways of the region are a cesspool unfit for human or ecosystem health.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

As above

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

As above

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

No target - no outcome. The targets are too low.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Yes - refer to best practice and innovation to make the area an example of what can be done.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

The process to date has been abysmal and requires greater commitment and enforcement by council.

17. Are there other management options outside of those listed that you think we should consider?

More / better communication with the public and commercial orgs on goals and expectations.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

You don’t jeopardize valuable resources you protect and enhance them.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

To not do so is foolishness

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Either reduce allocations or demand financial compensation based on usage to support the sustainable waterways region wide.

21. How do you think we should prioritise allocation where or when water is scarce?

Based on its requirement to sustain the greater public and environmental good.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#95

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Organisation (if applicable):

Local Board: Devonport-Takapuna

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I think this use of language is not appropriate to water management and is more ethereal. But I do agree with protecting and improving the health of our water ways.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

The water waste / storm water systems need to be repaired.

This is not a stock management issue.

This seems to be an opportunity to put more restrictions on food production / agriculture.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

The water waste / storm water systems need to be repaired.

This is not a stock management issue.

This seems to be an opportunity to put more restrictions on food production / agriculture.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

You don't mention beaches here, but however the Auckland beaches water health are a disgrace due to bad / unmaintained by council infrastructure.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

This sounds just like more crap for the council to inflict on the citizens paying the rates. I can't see the council management the temperature in waterways effectively at all. Perhaps focus on the small projects and do them well.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly do not support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I think the council should let the Farmers inform you how to achieve this. I don't believe anyway in council can tell the farmers what is best.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

Fix the council infrastructure.

17. Are there other management options outside of those listed that you think we should consider?

Fix the council infrastructure.

Stop putting more regulations in place.

The council is the most dysfunctional business I have ever come across and have zero confidence in anything you manage. You don't have any more funds to manage, focus on doing the small jobs properly which is already a struggle for the super city,

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Leave as is. Save everyone the memo.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Domestic needs and animal drinking water should come first.

Perhaps fix the leaks in pipes.

Create more water storage solutions.

Auckland gets enough rain,

21. How do you think we should prioritise allocation where or when water is scarce?

Humans come first.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Fix the leaking pipes.

Fix the infrastructure.

Stop added more regulations and focus on the citizens as equals.

We all pay the rates.

Local Board: Devonport-Takapuna

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Our water bodies must be kept as clean as possible to reduce biodiversity decline.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Our urban streams have been degrade into drains which have no capacity to increase biodiversity or increase water quality.

   Pupukemoana or lake Pupuke needs a special mention as it is national unique

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Resilience is the most important value, especially under our current climate change treats

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

We have put amenity values above biodiversity values for the last 100 years and that is why we have such big problems.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

I am most interested in Pupukemoana. It has never been looked after particularly well, this needs to be changed. The recreational values have been over represented and the cultural and biodiversity values have been under represented for too long leading to degrading water quality

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

They are shadows of their former selves, degraded, piped and undervalued. Biodiversity is declining at alarming rates. In some areas they are considered drains not ecosystems.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

These are issues that can not be seen by the public but have huge impact on our long term health and well being

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

I believe that we should be aiming higher - we should be increasing both both the poor and good water bodies to excellent. "Good" is not good enough

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Thinking about sponge cities, daylighting steams and buying private land to increase natural flood plains

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

environmental 1st

Human and stock emergency need 2nd

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   protect water and protect environment

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

I hope Auckland has a better environment

7. Do you have any feedback on the proposed environmental outcomes?

Guarantee the use of safe water

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

Improve the pollution in the creek and actively participate in volunteering

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Pollution-free water is a guarantee for the health of all people. With people's health, New Zealand will build a better place.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

If it is necessary to reduce resource allocation, reduce industrial water use first

21. How do you think we should prioritise allocation where or when water is scarce?

Focusing on everyone's daily life, we provide limited guarantee of household water to ensure that the water is pollution-free and we can drink water with confidence.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Pollution-free water is a guarantee for the health of all people. With people's health, New Zealand will build a better place.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   It's a big NO to race based solutions.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

No to race base policy

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I don't know

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Although I support the overarching plan to ensure that Auckland has adequate quality fresh water, I strongly object to any reference that the input from a minority group based on their ethnicity would be taken into account. The quality of water of of no more importance to one race that it is to another. There should be no reference to or consultation with any group which is racially based.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Disagree

Tell us why:

So called maori cultural values have no place in local government decision making. They do not and never have "owned" the water. I fully support having some areas set aside as reserves but very strongly onject to exemptions being granted on the basis of race.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Agree

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Can we move on from the pretence that Maori are a significant contributor to the supply and quality of Aucklands water. They aren't and never have been guardians of this recourse. I'm quite frankly sick and tired of pandering to meaningless entities by local government.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   Are we to continue to pay the price for the inaction of past councils or get on with improving supply and quality.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The proposal looks to be raced based and priority given to a specific set of people based on ancestry instead of equality for ALL New Zealanders. This is very dangerous to our democracy as it gives rights to a specific group/Maori of people

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

   again, priorities should be for ALL New Zelanders and not one specific group based on race. Water is a human right an no human regardless of ancestry should have their rights prioritised over another group of humans. This is a racist policy.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Fresh water is no more important to those identifying as Maori as to those from other ethnic backgrounds who live in Auckland. No one anywhere in the World including in Auckland can exist without a supply of clean fresh water. Therefore, the management of Auckland's fresh water should be undertaken without particular reference to any one racial group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Disagree

Tell us why:

The outstanding waterbodies should be those agreed by all residents of Auckland, not just those who happen to have some Maori heritage, i.e. water is just as important to me and all others living in Auckland as it is to those with some Maori heritage.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Agree

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Your policies are racist and divisive. The majority of New Zealanders are sick of council shunting special deals through that elevate the power of one minority group over all others

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

I think council is already overreaching its authority in dictating how people manage their own lives

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

I think council is already overreaching its authority in dictating how people manage their own lives

7. Do you have any feedback on the proposed environmental outcomes?

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is water. Let it be an equal opportunity for all ratepayers/citizens (in that order). It is not a commodity to be 'gifted' to any 'special group or race'. No-one has any prior rights to H2O, it 'belongs' to us all, equally. And should stay that way. No racial manipulations to status quo, thanks.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Disagree

Tell us why:

The (claimed maori) proportion of the population is infinitesimal. They should have exactly the same representation on all water that everyone else has. The are not special in any way.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Documents don't want to download. But water is for all people so cant agree to one race have more say than others.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Can't download docs. And the above statements I cannot understand all as they are in maori with out translation. Water is for all people and one race should not have a separate representation.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Can't download the docs.

I live in Auckland. If you are going to use the so called maori name please make sure you include the English translation.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Can't download the docs. I live in Auckland not tamaki makaura. Low priority should be given to maori ecological and landscape criteria. And none to recreational values. All people should be consulted and majority rules.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

Wastewater systems all over auckland need to be upgraded before any extra work is done onrececration facilities . Stick to your core reasons for a council and not the expensive fluffy things.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

As above. Concentrate on upgrading wastewater and pipe over auckland. When that is complete then the problems with the rivers and streams will be much less.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

I live in Auckland. Which is not mentioned in this question

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

Upgrade the existing water systems over auckland and this should improve the situation.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

Nice to see we are now talking about auckland. Changing temperature is global and the way the world is. It's a waste of money to try and fight it.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

I don't understand the question. And the maori words used.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

We need the good to feed the country. Leave it be

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

The farmers do a great job of managing themselves leave them alone.

We need horticulture to feed rge country leave them alone.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

Include this consideration when upgrading existing water systems not as a separate thing.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

All existing wetlands should be retained regardless of standard

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Built another dam. Or encourage the installation if water tanks domestically

21. How do you think we should prioritise allocation where or when water is scarce?

It's alway the domestic user that bears the brunt of this. Why are you asking? You already know the answer.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Nice to see both names used but as 90% of aucklanders speak English aucklsnd should be first.

Also no special consideration should by given to one race we are multi cultural and should all have a say.

Too much Māori language!

We are all New Zealanders with almost everyone speaking the English language and also understand written English!

We live in Auckland and Tamaki Makaurau is not a place. For it to be we would require a referendum.

Our recent election advised a Māori takeover is not wanted.

Council states: “Freshwater is precious and limited, a taonga of huge significance, and of particular importance to Māori.”

They also mention that in addition to the public consultation, “There is a separate and ongoing programme of engagement with mana whenua in Auckland.” Fresh water is NOT any more significant to Maori than a person of any other ethnicity. Access to fresh water is a requirement for life and a civil right. By conducting separate discussions with Maori you are conducting apartheid and depriving me of my civil rights to open democracy.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing ‘outstanding waterbodies’. I oppose any policy that prioritises one race or culture’s values over all other races or cultures in relation to the management of our freshwater.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing ‘outstanding waterbodies’. I oppose any policy that prioritises one race or culture’s values over all other races or cultures in relation to the management of our freshwater.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing ‘outstanding waterbodies’. I oppose any policy that prioritises one race or culture’s values over all other races or cultures in relation to the management of our freshwater.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I do not think that WATER, which we ALL need to live, should give priority to race. We all have a special interest in our water being clean and plentiful - this isn't something that one race feels more strongly than another. Everyone has the same needs when it comes to water.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

i DO NOT THINK THAT MAORI HAVE ANY DIFFERENT VALUES WHEN IT COMES TO WATER QUALITY AND AVAILABILITY FROM THE REST OF THE POPULATION. TO CONSIDER THIS TO BE THE CASE IS QUITE WRONG. YOU ARE ASSUMING THIS TO BE THE CASE, BUT I CANNOT AGREE WITH IT.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

IT IS ESSENTIAL THAT STRICT RULES ARE INTRODUCED TO KEEP FRESH WATER RECREATIONAL SITES SAFE. YES! KEEPING STOCK OUT OF THE WATER AND UP-GRADING WASTEWATER SYSTEMS MUST BE PART OF THE PLAN.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

IT WOULD SEEM SELF-EVIDENT THAT THESE METALS NEED TO BE CAREFULLY MONITORED SO THAT ACQUATIC LIFE IS NOT ADVERSELY AFFECTED IF FRESHWATER LEISURE SITES ARE TO BE INCLUDED.

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly do not support

Tell us why:

I THINK THAT EVERYONE HAS A RESPONSIBILITY TO ENSURE OUR WATERWAYS ARE KEPT TO A VERY HIGH STANDARD. THIS IS NOT JUST THE WISH OF MAORI, IT IS THE WISH OF EVERYBODY. KEEP RACE OUT OF THESE DECISIONS PLEASE.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

I THINK YOU SHOULD CONSIDER EVERYBODY IN YOUR MANAGEMENT OPTIONS, NOT JUST MAORI. KEEP RACE OUT OF DECISION-MAKING AS EVERYBODY SHOULD BE ON THE SAME SIDE WHEN IT COMES TO EXCELLENT WATER-QUALITY.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   1) Unless I'm mistaken Auckland City has never had a referendum to change its name

   2) The predominate vocabulary in NZ is English and any proposals put to the General Public should be in ENGLISH. The 2018 census showed only 2.4% of Aucklanders spoke Te reo

   3) Water is not any more significant to Maori than it is to any other section of the population

   4) If any proposal by Auckland Council gives any preferential treatment to any Maori group it is racist.

   5) There are at least 4 ethnic groups who have bigger prescence in Auckland than Maori. NZ European, Chinese, Pacific Islanders, Indian

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is precious to all human life, but we know that water is the NEXT WEF/UN/WHO issue after COVID especially now they admit they have lost the climate change big stick. This idea of the council smacks of racism by favouring one group over and above the others. It goes against a free and democratic society's values.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   The reason there is a freshwater problem in Auckland is because of the number of houses being built in smaller and smaller spaces. Just like the roads, Auckland is overcrowded with no sign that the situation will be addressed in the near future.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

Water is everyone's right and in a free and fair society available to all regardless of any historical association.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Again it comes down to mindless urbanisation that should have been controlled years ago. Now everyone has the same challenges, therefore everyone should have access to water as a human right, not an Iwi right and the council needs to fix stuff.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

In principle but what is the Tauranga waka?

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

Enjoying the water either from within or without is an historic freedom humans everywhere have enjoyed without mandates from politicians.

7. Do you have any feedback on the proposed environmental outcomes?

It all reads wonderfully well, but knowing city councils in New Zealand often there are a lot of well-meaning and sounding points, but the reality is just another tax. Can the council guarantee what is written will actually happen without rate rises?

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Agree

   Tell us why:

   Agree in principle to promoting and providing sustainable improvements to the existing waterways and ecosystems. Disagree strongly with the racist statement at the very end that particular interest should be given to one minority group over the rest of Auckland or even New Zealand. Why did people vote the Labour coalition out? Co-governance among other woke racial policies.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

   Any measures to reduce the horrendous drowning record NZ has will be welcome to all people.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Agree

    Tell us why:

    Improving all waterways, ecosystems and human contact points will be of benefit not only to those who choose to use them but also to wildlife. Again, for all people, not a select few.

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Fairly dissatisfied

    Tell us why:

    Media coverage, I'm not sure it is always honest, especially with the previous government.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

Here is where I see another tax on motorists.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Plant more shady trees and do not use this as a veiled excuse for another hoax-ridden climate change emissions tax.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly do not support

Tell us why:

Who uses the waterways more than the mana whenua?

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

The Dutch government tried to manage fertilizer and reduce cows, so again I come back to the WEF and how much influence they are having via the corrupt UN. As the recent election in the Netherlands has proved, that didn't work out so well. What's the best practice and how can you achieve it without taxing growers leading to household inflation?

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

It all looks good on paper, but the ratepayers and vehicle owners usually foot the bill. Perhaps you should also ask Iwi to contribute some funding.

17. Are there other management options outside of those listed that you think we should consider?

Equal rights to everyone.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

To be honest I don't trust a single councillor an inch.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Other

Tell us why:

Depends on who is saying so.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

No trust whatsoever. NZ councils are notorious liars.

21. How do you think we should prioritise allocation where or when water is scarce?

Fix the pipes so obviously not fixed during Gabriella.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

All New Zealanders first

#1048

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The responsibility lies with not one race of people but with all. Freshwater is important to all. To say Maori have a particular interest is misleading. We all have a particular interest in freshwater. I certainly have a particular interest in drinking freshwater for example.and I’m not Maori.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   There appears to be a co governance approach to a commodity that is precious to all people .This should not be allowed to happen. The best and most appropriate resources should be applied to achieve the necessary results.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   You are basing decisions on race, race has nothing to do with who cares for or needs to control water. It is for the rate payers of Auckland who are of a variety of races so you shouldn't be trying to have race based decisions of rules put in place.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Submitter details:

Organisation (if applicable):

Local Board: Devonport-Takapuna

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Remove any racial references or preconceived ideas that water is more valued by one culture over another.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Concentrate on the ecological, landscape and recreational values, ignore Maori Cultural values. The first three values are of equal importance to ALL Aucklanders in our current and future multicultural society. You should NOT be having separate consultation, or applying added emphasis, to ideas put forward by one minority section of New Zealanders.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Because you have allowed indiscriminate infill housing and higher density (high rise) housing to increase your rate-payer base with minimal thought or effort to upgrading the critical infrastructure (storm water and waste water control) required to cope with the higher density and added population pressures.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

By being sensible

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

This does not require mana whenua engagement or initiatives.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Don’t. Take a long term view and increase storage capacity in the Waitākere and Hunua ranges.

21. How do you think we should prioritise allocation where or when water is scarce?

It’s NOT scarce, you just aren’t managing it properly.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Get sensible engineers involved, face up to the fact of population growth and plan properly for it. Remove ANY references or considerations of one section of society (Maori). They contribute nothing but self interest.

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

All Aucklanders should have the same rights, not special rights for Maor

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Auckland has hundreds of different cultures within its population, so if Maori culture has to be considered, then all surely others should be too! That would be impossible to do, so we should just do it all for the people, the whole population of Auckland and NZ, they are all paying for it and need to be able to use and enjoy water which is healthy and clean. The council plans are excellent but do not need unqualified, unelected citizens of any culture getting involved unless they are experts in the provision and care of water supplies. Everyone has the same rights, as NZ is a democracy.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Of course we have to have a long term vision to provide life with water, but it can not be racially based. We are all New Zealanders, we all need fresh water and no sector of the community should have special access or control over any water, based on religion, history or myth.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Maximum effort/cost should go into controlling the issues relating to maintaining fresh water or everyone and the environment, not in giving it to a special race for spiritual reasons! Do you think they will give a damn about how pure the water is. They only want to own it!!!

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Controlling water bodies should be totally ecological, and have northing to do with cultural reasons.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

In this day and age people are looking or more freshwater entertainment areas for their families. I agree that strict monitoring of contamination should be a priority.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Just dont let anything to do with water fall into the hands of people who identify as Maori. There are NO full blooded Maori's in New Zealand and the Treaty recognises us as one, all New Zealanders!!!

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

There are a few aspects where one's racial/cultural background appears to matter to the ARC. I suggest that it is important that our Council treats all of our citizens equally and without prejudice.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   I am very happy that Auckland Council is seeking to establish and implement a long-term vision for the wise, just and appropriate use of water in and for Auckland. However, I am VERY unhappy that there is any sense that water is more important or owned or water use is determined more by a minority or race-based group of Aucklanders. We ALL need and own the water and should have equal voice and control over the ownership, distribution and use of our water. Furthermore, Council members, bureaucrats are all servants of the wider population and should not yield to the demands, lobbying or pressures of vested-interest groups seeking to justify their partisan claims on the grounds of race, history, social status, wealth and position. Especially, date of arrival in this country does NOT justify claims reflecting greed, demands based on desire for power, individual or group preference justified by ethnicity. We are all equally Aucklanders! Please do NOT destroy our city's identity or harmony!

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

Again, it is NOT just, fair, wise or appropriate to unequally favour the interests of one or more partisan groups within our city - whether commercial groups and fishery interests or racial sectors and sub-groupings within our community. PLEASE resist the self-interested demands of such groups in the interests of the EQUAL interests of ALL Aucklanders, whom YOU REPRESENT!

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

It is thoroughly unjust and totally unwise to favour ANY ONE ethnic sector in our city. We are EQUAL in this statedly-DEMOCRATIC society and city and the provision and use of ALL of our Auckland resources and facilities should be EQUALLY AVAILABLE to all members of our wider community. Please do not deny justice and equality and do NOT establish socially destructive policies and procedures which will only serve to divide our wider community and jeopardise our hoped-for harmonious future.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

I am distressed to see the increasing encroachment of 'official' controls over our lifestyle choices and work and relaxation options. Practical safety is appropriate, but the proliferation of bureaucratic rules and requirements does not help for responsible development of individual maturity! Please Back Off!!

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The vision for Auckland's water should not be segregated to Māori having priority over any other ethnic group. I find this offensive's that our elected Council has prioritized Māori & is discriminatory.

   Water is essential to all life & no one or organization should profess to own it or have preferred management of it.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

Same reasons as stated above. - these mandates are set out without consultation of all Aucklanders regardless of race

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

By the way our city is legally called Auckland.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

   Obvious

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Exclusive, unaccountable rights over water must NOT be given to one sector of the community. Furthermore people must not be divided by race or ancestral lines. Policies and rules must apply to us all equally.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   The management of fresh water should include the use of it for pool and household utilities. A better plan for its use could see a major reduction of council supplied fresh water. Each house should be subsidized to install water retention tanks for household, garden and/or pool top up usage.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   I don't know

   Tell us why:

   the effects of rainwater on the environment are huge. By utilising it where it falls will mitigate this and save more expensive solutions.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

   Maori culture should not be part of this discussion.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

Tell us why:

There is an old saying ' you shouldn't eat where you shit"!

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

with the odd exception (e.g. wairau creek after heavy rain) the freshwater seems fine.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

start with something you can achieve and do it!!!!

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

its common sense to maintain what you have achieved whilst targeting better results.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Capture the run off. incentive the use of less toxic fertilisers and utilise such items as the recently started food wastage collections to provide natural mulch.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

see (www.microbio.co.nz) how to cost effectively, naturally and super efficiently reduce stock run off. It would appear to be a 'no brainer' to insist farmers with stock treat their effluent properly, cheaply, efficiently and stop contaminating our ground water.

17. Are there other management options outside of those listed that you think we should consider?

see above

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

incentivising households to utilise rainwater more efficiently is another 'no brainer'!

In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

The any task or problem must be sorted by anyone who own knowledge's and skills in that area, not by anyone who decide he feel connection with ... It is the same as allow to build and manage nuclear power station based not on technical and business skills but on the race and because somebody closer to nature than another.

we are in 21st century (and positioning ourself as supercity!!!), that is a time to logical, but not emotional and especially racial based decisions and actions.

to clarify - I'm totally agree with any actions for improving water quality, but only without any racial arguments. Do we have scientists and experts with proved experience? If yes, then let's allow them to manage that processes, if not, let's think - how we can prepare them.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   the presumptions that Maori have a special relationship with water that is not shared by the rest of the community and that they have stronger ambitions to improve our waterways and water quality are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on Race. All Aucklanders should be equal stakeholders in how fresh water is managed in our city.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   the presumption that Maori have a special relationship with water that the rest of the community do not share is incorrect. Decisions on the use and quality of water should be

made by all stakeholders effected in any area there is no room in NZ for boards or advisory groups to be chosen based on Race so any Race based vision is inappropriate.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

Same reasons as mentioned for Hauraki FMU

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Same reasons as mentioned for Hauraki and Manukau FMU

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Maori are a small percentage of the population, and their values don't necessarily coincide with the majority of the population so their values should not be the criteria by which water ownership, quality or use should be judged.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

   all Auckland residents should be able to enjoy the lakes, beaches and ocean in a safe and accessible way and if higher standards are necessary to ensure that then they should be implemented.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too critical for the council to base its management on race, every single person in Auckland relies on our fresh water to survive. No one should have any special rights or influence regarding our fresh water simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as a stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   I don't know

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   I don't know

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Support the mahi that eke panuku are doing.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

Does that include paddling on the water?

7. Do you have any feedback on the proposed environmental outcomes?

As long as there is constant consultation and local iwi/ mana whenua are leading the proposed environmental outcomes, I am happy to support.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Make sure that there are many local iwi that are consulted before any planning is done.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Other

Tell us why:

Consideration about where paddlers paddle needs to be thought of - usually not close to the shoreline which may not have as much contamination.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Please only use certain native rakau for extra shade. Willows are not good for our awa. (Not all native trees should be used too - need to have Maori experts.)

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Keep communicating openly.

16. Tell us what you think about the draft management options being considered?

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Rahui - local iwi need to be consulted and this should be a normal occurrence that everyone in NZ does.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Communication is always the key, talking, activity and working with each other

16. Tell us what you think about the draft management options being considered?

I don't know

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

More awareness is required for our communities, not many or not all are aware or know of all these issues. The more awareness the more we as a whole can help with these issues.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Because water i wai maori is important to te ao maori and sustaining our land and our bodies.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

awareness/resilience in important so people have the knowledge to make informed decisions in and around water care.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Personally, I love being in the water to connect especially on a hot day. If the amenity is short term then that is okay.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

To manage these sort of things, stricter standards are required. Short term for long term gain.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

They just arent clean or clean enough to get in. Its sad to see an important element be not looked after.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

These toxins are just going to keep increasing as technology does. Hitting it early will help decrease them.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

This is probably the biggest thing i suuport

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Frequent inspections. More meetings letting people know the "why"

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Number of household people living in the house. (Income);

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#1612

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   Such important Decisions need to be made by elected people provided with data from qualified people. Decisions should not be made in isolation as other aspects could be affected. The retention of permeable land in housing areas should be manditory to maintain acquifiers and prevent the run off which causes so much damage,

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Mental health benefits from green spaces which are rapidly declining in Auckland and there are usually still trees and grass in these "amenities".

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

Cultural values shouldn't over-ride the overall good. Everyone pays rates and taxes and aspects of water management should be for the benefit equally of all.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Drinking water for people and animals is paramount and as we need to eat irrigation may also be necessary. If population increases alternative supplies of water should be provided - another dam - more water from the Waikato? If this is not possible perhaps a satelite town or cities should be considered.

21. **How do you think we should prioritise allocation where or when water is scarce?**

    People - animals - irrigation

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Look ahead - don't wait for an emergency. Things don't get cheaper.

#1789

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water has equal importance to every citizen and ratepayer. To insist that one racial group, Maori, has a superior claim is repugnant to me and my acquaintances. Water should be managed by the city for the city with no special influence given to Maori.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

   Yes

   Tell us why:

   Climate change with flooding, overheating and pollution mean we need to develop strategies which anticipate negative changes.

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

   Maori cultural values re water are of equal value to other citizen's cultural values. To make them dominant is to force a racist proposal upon the rest of the ratepayers.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Lake Pupuke is identified for its cultural and recreational values. Also should be added its ecological value for the lake birds and the community, But at present this value is under attack from an infestation of Alligator Weed which has taken hold over the past two to three years and is spreading steadily. The lack of effective steps for eradication seem to indicate a failure of the present Auckland Council structure. What would be different in future to handle this situation??

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Lake Pupuke is a present primary contact site, Within the past two weeks an algal bloom showing up as a dirty brown lake has been apparent. I expect that this will have been identified and reported.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    I wonder whether within the Auckland Council there is an up-to-date understanding of the recreational and other activities that occur on Lake Pupuke? As a long-time resident I've noticed a considerable increase in use over the years. Practically every day, seven days a

week, the lake is used by wind surfers, canoeists, waka-ama crews, rowers and yachtsmen. These are supplemented regularly by school water experience trips, school sailing, sea scout sailing, swimming, naval dive training, fire brigade training, (and water polo in the attached quarry lake).

There seems to be a lack of any oversite of these activities. To date I'm unaware that this has caused any problems, other to the water birds occasionally. But this might deserve future consideration. I understand that the Auckland Harbourmaster has present responsibility.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Thank you for providing us with the opportunity to comment on your proposed freshwater management document Setting our Direction for improving freshwater in Tāmaki Makaurau Auckland. It is a great and very welcome piece of work.

   However, as your discussion document states, the proposed freshwater management approach is written in the spirit and within the guidelines of the current National Policy Statement for Freshwater Management. Having read the proposed document, and taking into consideration the statements that the document is not specifically linked to other water management strategies and other documents, we are somewhat perplexed how, exactly, is it possible to manage freshwater in the holistic, integrated manner, with a sustainable future in mind, without directly linking to and referencing other water management policies and documents?

   All these documents and policies need to be intrinsically linked. Indeed, the tone and argument presented throughout the proposed Freshwater management document seem to be written in its entirety in the spirit of other 'unrelated' documents.

Following the elections in October, it appears the public commitments made by the incoming government may impact on the water management policies and management strategies, to the degree they may require major, if not substantial changes. With this in mind, we would like to wait to see the upcoming national policies and their impact on Auckland.

We therefore strongly suggest the Council emulates the example of some other local government bodies across the country and pauses this process until the potential new directives and policies from central government are clear. Pausing the process and awaiting those central government policies in the interest of saving rate payers' money and time would be prudent and welcome, we feel.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The management and control of fresh water is so fundamental to our very existence that regulations must be designed to protect the quality, supply, management, and fair distribution for ALL New Zealanders. We all have an interest in sustainably healthy water. I do not accept that Maori have a special relationship that gives them more rights or responsibility to control how fresh water is managed than any other group.

   The management plan and decision making must be done by those who have the knowledge, skills, experience based on scientific analysis to achieve the goals of sustainable healthy fresh-water ecosystems.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

While the life force component of water, or mauri, is a sincerely held belief of modern-day Maori, I would not agree that it or any other cultural values should dominate methods of fresh- water management or control.

There are many groups with research capabilities, expertise, experience and competence in the fair and proper care, use, management, and control of fresh water (e.g. Universities,

farmers, agriculturalists, councils, anglers, research groups and power companies) The management of water requires expertise and experience that can be found in these other groups and should be prioritized.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Other

    Tell us why, and if you think there are other considerations we should include?

    I strongly support the determination to stop freshwater degradation and improve water quality the in the Auckland Region freshwater ecosystem.

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

As degradation of fresh- water ecosystems is primarily due to intensive agriculture, farming, industry, and population growth, remediation and restoration will best be achieved through accepted scientific methodology and best practice, by suitably skilled, qualified, and experienced persons .

The proposed Bill contains a mixture of Te Reo and English. Recent research into the practices of other similar first world countries with an indigenous minority shows that:

In the countries examined there were NO examples where legislation is a jumbled mixture of English and an indigenous language – except for a prescribed limited number of proper nouns in Welsh.

The purpose of legislation is to provide certainty and clarity. Words such as ‘tikunga’,’mauri’, matauranga, and kaitiakitanga have different interpretations and nuances for different iwi and hapu. (And are most probably not properly understood by non-Maori. Including those drafting the Plan!) The Plan should be written entirely in English, except,perhaps, with the occasional te reo Maori word in common use.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   The waterways in the Auckland region must be healthy water environments, restored to health where this is possible, and sustain fish life.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

   It's not strong enough.

   Auckland Council continues to approve urban sprawl over good productive countryside (an engrained Political and NZ Planning mindset) and thus destroy water ecosystems in those areas by stealth / death by a thousand cuts / polluted runoff etc - while untruthfully stating that the adverse effects will be 'less than minor'.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Other

Tell us why:

It's not strong enough.

Auckland Council continues to approve urban sprawl over good productive countryside (an engrained Political and NZ Planning mindset) and thus destroy water ecosystems in those areas by stealth / death by a thousand cuts / polluted runoff etc - while untruthfully stating that the adverse effects will be 'less than minor'.

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

It's not strong enough.

Auckland Council continues to approve urban sprawl over good productive countryside (an engrained Political and NZ Planning mindset) and thus destroy water ecosystems in those areas by stealth / death by a thousand cuts / polluted runoff etc - while untruthfully stating that the adverse effects will be 'less than minor'.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Other

Tell us why:

New Zealand water ecosystems are NOT resilient...!

Construction washings (cement, chemicals etc) plus other pollutants such as lawn clippings tipped into waterways, road runoff with hydrocarbons, tyre particulate matter, one-off oil and chemical spills etc will completely destroy NZ water ecosystems. The pollutant devices that exist to capture pollutants - which exist in some places - are generally just tokenism, and not well maintained by Council, nor by consent holders who are responsible for private systems..

Furthermore, undisciplined sectors of NZ communities will pollute water systems.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

A clean water body is beautiful.

7. Do you have any feedback on the proposed environmental outcomes?

Its doubtful whether Auckland has the freshwater ecologists, rangers, honorary rangers or Police to effectively manage the natural water systems in order to protect those natural water systems. Auckland has many plunderers in it's population, Auckland has very few environmentalists.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

However it would be necessary to emphasise - NO so called Cultural harvesting rights by iwi i.e. disallow totally, because 'cultural harvesting' would likely lead to wholesale plundering.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

However cannot imagine Council authority having the drive or energy to enforce some of these ideas. Unfortunately.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Will anyone know who is in charge..?

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

I was involved with field hydrology, subdivisional surveying, water engineering, stormwater engineering, environmentalism, city developments for a long time and have observed systematic degradation of water systems, streams etc. I am a tertiary qualified engineer and know the difference in water quality between a completely natural catchment and an urban catchment

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If we don't, we are being a bit stupid

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Because it makes good sense.

Unfortunately Akld Council allows increased road building, lots of asphalting and concreting of the earths surface, many new subdivisions of rural land, making the land impermeable. This is the root of the problem. Lots of water runoff heated by the dark surfaces and concrete.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

However, achieving these targets requires the involvement of the entire population of Auckland, not just a Council department.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

1. Town Planners and Politicians involved in decision making - regarding essential NZ vegetable growing must gain some education about agriculture, soil sciences etc. They (decision makers) seem to have severe blind spots and make inappropriate leadership decision regarding sprawling over best soils. Disallow sprawl. It's stupid. Akld must go up.

2. Some of the agriculturists around Pukekohe obviously have inadequate farming practices, such as herbicide spraying of watercourses, roadside drains etc - possibly NZ has poor legislation regarding soil conservation, sustainable farming practices. (However the NZ rural sector looks good on TV's Country Calendar.) Auckland Council (?) environmentalists should monitor the Pukekohe area better, provide farm advisory services / water ecosystem people - although there will be better experts within farming circles.

3. Lots more workable ideas to communicate, but don't have the time to write it here..

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Essential practices.

On-site wastewater practices were often substandard in my experience.

Rainwater harvesting (rain tanks) must become mainstream practice.

Many Engineers and Planners have little understanding of catchment hydrology. Including highly qualified.

17. Are there other management options outside of those listed that you think we should consider?

1. Compulsory Rainwater Harvesting

2. Water Storage for Drought management

3. Excessive herbicide spraying of road edges and watercourse margins by Councils must stop.

4. Awareness of weed pests, and targeting weed eradication.

5. De-compaction of soils and better soil management

6. Seriously limiting the formation of impervious surfaces

7. The power of the sun could be utilised in a better way.. Another big subject.

8. Projects to dredge the topsoil and silt deposits in Akld Harbours and return to land as fill etc

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Would be best to engage freshwater ecologists on these matters, rather than other lay people.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

There are not many original ecosystems left.

However, other Council departments will probably be making decisions (e.g. Planning, Auckland Transport etc) or are involved in decisions (such as subdivision approval, large footprint houses, large carparks) that adversely affect the natural ecosystems, unbeknown to the Freshwater Dept who are working to preserve pockets of nature.

Councils work in silos.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Tell the property owners to harness roof water. Rainwater harvesting.

Being a water specialist - I have a lot of other ideas about this topic, but don't have the time, nor space to encapsulate it here.

21. How do you think we should prioritise allocation where or when water is scarce?

It must be intelligent allocation.

Disallow water wastage, which is always occurring.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

There's so much that can be done, beyond the scope of this submission.

#1927

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Devonport-Takapuna

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Proposed a comprehensive, sustainable freshwater management vision for Auckland, including protection of water source, improving water quality, communitymanagement, participation, and adapting to climate change.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Because the statement outlined a concrete vision for local water resource.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Beneficial to the promotion of water resource management, strengthen people's awareness with regards to reasonable usage of water resources.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Professional management will better utilise and develop water resource in the area.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, every concept that is harmful to water resources should be changed.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

People's recreations should not lead to secondary pollution of rivers, lakes, and waterfalls.

7. Do you have any feedback on the proposed environmental outcomes?

The vision is very wonderful, I hope it will really come to fruition.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

When implementing water quality protection management measures, there should be clear priorities, and progressed step by step, and then at the end extend effective management to all water resources.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Target management special water resources, clear sytems in place, will be more beneficial to people's health.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Through the collection, assessment, and analysis of baseline health attributes, these data provides a foundation for future management of water resources, making it more scientific.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

The government can readily announce water contamination situations to notify the public.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Because copper and zinc are both heavy metals, when they exceed their limits it will harm public health.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Important condition to protect water resource, protect freshwater life, make it co-dependant.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Should protect water resources from invasion of pathogens, so to ensure and protectd humans and living things' normal activities.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Set up comparatively achievable standards, too low it will not guarantee food safety, too high it is not achievable, so need to analyse current figures, and on that basis, through analysis, obtain effective testing methods to realise this.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Only through detailed management can effective protection and utilisation of water resource be achieved.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Currently it seems pretty comprehensive, detailed.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Yes, because the sooner wetlands and streams are protected, the more beneficial for environment protection.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

City Council should first sort existing consent holders by their purpose of water use, and openly distribute the allocation accordingly. Then let those with allocations know under what conditions were the allocations given to them, and so that they can do risk analysis preparations in advance.

21. How do you think we should prioritise allocation where or when water is scarce?

Should centralise planning of human, livestock, and crop use of water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Organisation (if applicable):

Local Board: Devonport-Takapuna

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting the environment is everyone's responsibility.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   I think it is very good.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very good.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Very good. Keep improving.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, I think it's very good [to do that].

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, plannig it as a whole benefits the public.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Think it's reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

When you make the environment better and improve the water pollution, it makes the public feels more reassured.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

I don't currently have better views about this.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

Only when rivers, streams and lakes have reached the required standard, will the environment be even more beautiful.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

So that the water quality reaches a better standard.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Let the temperature be suitable for all living things.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protect the environment, water quality reaches target.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Whilst ensuring everying is within normal range, protect food safety; improve water quality to make humans beautiful and more healthy.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Pragmatic.

17. Are there other management options outside of those listed that you think we should consider?

Currently don't have better solutions.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Sure.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Keep what we have now, beautify the environment.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Keep what we have is enough.

21. How do you think we should prioritise allocation where or when water is scarce?

Ensure everyone can live normally, increase and encourage water-saving measures.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2701

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Organisation (if applicable):

Local Board: Devonport-Takapuna

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting the environment is everyone's responsibility. Eagerly participate in activities that's good for the public.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Very good.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very good.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Very good, continue to improve to completion.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Very good recommendation.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Should. When you achieve unitary planning, it benefits everyone.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Make the environment better, people more healthy.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Not very clear about this.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

Only when rivers, streams and lakes have reached the required standard, will the water quality be better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Lifts the standard for better water quality.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Let the temperature be suitable for all living things.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protect the environment, make water quality better.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Strictly keep all indexes at a normal range, protect food safety, improve water quality to a higher standard, allow people to live healthier lives.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

It is more realistic.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Not familiar with this.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Keep.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Keep what we have now, increase when conditions allow.

21. How do you think we should prioritise allocation where or when water is scarce?

1. Ensure people's water usage for normal living, 2. strengthen people's understanding of saving water, 3. depending on the actual situation at the time, can provide water in sections, to ensure people can continue living a normal life.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Devonport-Takapuna

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   This is a long-term freshwater vision, and will benefit humankind.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Because with regards to the use and protection of water resource, it's all outlined in the comprehensive and detailed plan in the statement.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Beneficial to the promotion of detailed management of freshwater resource, better utilise and protect current water resources.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Refined management realised in steps.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, every concept that is beneficial to the protection of water resources should be promoted, and guide everyone to collectively protect our resources.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Prevent secondary pollution of water resources.

7. Do you have any feedback on the proposed environmental outcomes?

100% agree.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

When we target special areas and refine their management, we need to standardise all atrributes; when we are all on the same page, will our actions be correct.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Strict management is required to really have an impact on the protection of our water resource to be reasonably developed and utilised.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Through the analysis of all data gathered, this provides a better foundation for future management.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

We often see the government announce the situation about our water resource.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

When heavy metal exceeds limit it will harm people's health.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

There are many attributes to protect water resource, among them, change in temperature is also an important one.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

One of the key reasons humans can live a normal life is that the water is clean and safe, all the germs that makes us ill and pollutes the water resource cannot be tolerated.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

The setting of standards should be scientific and effective, to ensure users can reach these targets. The government should also help them to estimate costs, and to find the balance point.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Management must be based on science, with clear plan, steps, and clear goals, to achieve effective protection of water resource.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Already very detailed.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Yes, because higher than national requirements is an important means of effective protection of wetlands and streams.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Openly announce allocation allowance, fully listen to recommendations from all parties, to formulate an allocation plan that is generally accepted and feasible.

21. How do you think we should prioritise allocation where or when water is scarce?

Reasonable allocation of water resource to ensure residents' daily water usage, as well as pets, agriculture and aquaculture use.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#2710

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We all have responsibility to protect our surrounding environment.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Support.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very good, support.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Hope can continue moving forward.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, very good viewpoint.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Agree, especially applicable to elderlies.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Improve water quality, makes water source safer.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Don't quite understand this area.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Can be even better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Let the water quality reach a higher standard.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Support. Suitable temperature can better protect the environment.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protecting the water source is everyone's responsibility.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

On the premise of protecting ? work hard to improve water quality.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Currently don't have better solutions.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Don't quite understand.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Consider the situation, retain the best result.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Maintain status quo.

21. How do you think we should prioritise allocation where or when water is scarce?

On the premise of ensuring daily water usage, save water as much as possible.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We all have responsibility to protect our surrounding environment.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Extremely supportive.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very good, support.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Hope can continue moving forward.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Agree, especially applicable to elderlies.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Improve water ?

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Don't understand.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Can be even better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Support. Suitable temperature can better protect the environment.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protecting the water source is everyone's responsibility.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

On the premise of ensuring safety, work hard to lift water quality.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Increase public awareness and encourage citizens to save water.

#2942

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   I support the proposal. It would be better if the time frame for the third part could be moved forward, e.g. 2045-2055. Also the second part to be at 2035.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

The proposed environmental outcomes looks good. However, we don't know what obstacles we'll face when executing the plan. Also, there's no mention here with regards to the ? of the construction of basic infractructure.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

For people, ensuring food safety and improving water quality is equally important. I believe, we can accomplish these two goals at the same time, and that there is no conflict. Because there's already many examples of practical experiences in the world. Therefore, I don't believe we must balance between the two.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Target and restrict main contamination sources. Mainly restrict the variety of fertilisers, strongly prevent the use of fertilisers that cause pollution, and use substitutes that does not pullute freshwater sources.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Proposed a comprehensive, sustainable freshwater management vision for Auckland, including protection of water source, improving water quality, communitymanagement, participation, and adapting to climate change.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Because the statement outlined a concrete vision for local water resource.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Beneficial to the promotion of water resource management, strengthen people's awareness with regards to reasonable usage of water resources.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Professional management will better utilise and develop water resource in the area.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, every concept that is harmful to water resources should be changed.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

People's recreations should not lead to secondary pollution of rivers, lakes, and waterfalls.

7. Do you have any feedback on the proposed environmental outcomes?

The vision is very wonderful, I hope it will really come to fruition.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

When implementing water quality protection management measures, there should be clear priorities, and progressed step by step, and then at the end extend effective management to all water resources.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Target management special water resources, clear sytems in place, will be more beneficial to people's health.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Through the collection, assessment, and analysis of baseline health attributes, these data provides a foundation for future management of water resources, making it more scientific.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

The government can readily announce water contamination situations to notify the public.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Because copper and zinc are both heavy metals, when they exceed their limits it will harm public health.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Important condition to protect water resource, protect freshwater life, make it co-dependant.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Should protect water resources from invasion of pathogens, so to ensure and protectd humans and living things' normal activities.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Set up comparatively achievable standards, too low it will not guarantee food safety, too high it is not achievable, so need to analyse current figures, and on that basis, through analysis, obtain effective testing methods to realise this.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Only through detailed management can effective protection and utilisation of water resource be achieved.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Currently it seems pretty comprehensive, detailed.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Yes, because the sooner wetlands and streams are protected, the more beneficial for environment protection.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

City Council should first sort existing consent holders by their purpose of water use, and openly distribute the allocation accordingly. Then let those with allocations know under what conditions were the allocations given to them, and so that they can do risk analysis preparations in advance.

21. How do you think we should prioritise allocation where or when water is scarce?

Should centralise planning of human, livestock, and crop use of water.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3339

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting the environment is everyone's responsibility.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   I think it is very good.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very good.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Very good. Keep improving.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, I think it's very good [to do that].

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, plannig it as a whole benefits the public.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Think it's reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

When you make the environment better and improve the water pollution, it makes the public feels more reassured.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

I don't currently have better views about this.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

Only when rivers, streams and lakes have reached the required standard, will the environment be even more beautiful.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

So that the water quality reaches a better standard.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Let the temperature be suitable for all living things.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protect the environment, water quality reaches target.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Whilst ensuring everying is within normal range, protect food safety; improve water quality to make humans beautiful and more healthy.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Pragmatic.

17. Are there other management options outside of those listed that you think we should consider?

Currently don't have better solutions.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Sure.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Keep what we have now, beautify the environment.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Keep what we have is enough.

21. How do you think we should prioritise allocation where or when water is scarce?

Ensure everyone can live normally, increase and encourage water-saving measures.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3340

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting the environment is everyone's responsibility. Eagerly participate in activities that's good for the public.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Very good.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very good.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Very good, continue to improve to completion.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Very good recommendation.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Should. When you achieve unitary planning, it benefits everyone.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Make the environment better, people more healthy.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Not very clear about this.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

Only when rivers, streams and lakes have reached the required standard, will the water quality be better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Lifts the standard for better water quality.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Let the temperature be suitable for all living things.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protect the environment, make water quality better.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Strictly keep all indexes at a normal range, protect food safety, improve water quality to a higher standard, allow people to live healthier lives.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

It is more realistic.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Not familiar with this.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Keep.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Keep what we have now, increase when conditions allow.

21. How do you think we should prioritise allocation where or when water is scarce?

1. Ensure people's water usage for normal living, 2. strengthen people's understanding of saving water, 3. depending on the actual situation at the time, can provide water in sections, to ensure people can continue living a normal life.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3341

Strongly support

Tell us why:

Protect the environment, make water quality better.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Strictly keep all indexes at a normal range, protect food safety, improve water quality to a higher standard, allow people to live healthier lives.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

It is more realistic.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Not familiar with this.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Keep.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Keep what we have now, increase when conditions allow.

21. How do you think we should prioritise allocation where or when water is scarce?

1. Ensure people's water usage for normal living, 2. strengthen people's understanding of saving water, 3. depending on the actual situation at the time, can provide water in sections, to ensure people can continue living a normal life.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting the environment is everyone's responsibility. Eagerly participate in activities that's good for the public.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Very good.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very good.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Very good, continue to improve to completion.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Very good recommendation.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Should. When you achieve unitary planning, it benefits everyone.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Make the environment better, people more healthy.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Not very clear about this.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

Only when rivers, streams and lakes have reached the required standard, will the water quality be better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Lifts the standard for better water quality.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Let the temperature be suitable for all living things.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protect the environment, make water quality better.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Strictly keep all indexes at a normal range, protect food safety, improve water quality to a higher standard, allow people to live healthier lives.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

It is more realistic.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Not familiar with this.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Keep.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Keep what we have now, increase when conditions allow.

21. How do you think we should prioritise allocation where or when water is scarce?

1. Ensure people's water usage for normal living, 2. strengthen people's understanding of saving water, 3. depending on the actual situation at the time, can provide water in sections, to ensure people can continue living a normal life.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3343

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Devonport-Takapuna

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Protecting the freshwater ecosystem, restoring their health to allow people to collect food ingredients from the land, support rare animals to restore their numbers, the public can as much as possible conveniently go to these places to safely swim, participate in varous recreational activities and collect food ingredients. Freshwater ecosystems support health and a vibrant underwater life.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Agree with the management and control of Freshwater Management Units, ensure the water source is safe ?, prevent contamination, ensure smooth flow of rainwater in the city to flow

into ground, prevent landslide going into sea, so that we have a safe and settled living environment.

3. What do you think about our proposed vision statement for the Kaipara FMU?

I don't know

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Other

Tell us why:

Weather changes is influenced by shifts in the cosmic. There are many unknown factors that are yet to be discovered and controlled by human beings. We can only do our best to improve our ability to predict climate changes and natural disasters, strengthen prevention, and reduce damages.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Realise citizen's wish to be able to safely and freely appreciate the various natural beauties of our rivers, lakes, wetlands, and waterfalls in our recreational activites.

7. Do you have any feedback on the proposed environmental outcomes?

No. Very good.

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Agree

Tell us why:

Control harmful substances within an acceptable range' make sure baseline attributes reach good levels; manage eutrophication to within an acceptable level; protect beneficial life in the waer. Increase management of contruction work, logging, agriculture, and livestock, reduce sediments going into and accummulating in the water, regularly inspect and clean them up.

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Fairly satisfied

Tell us why:

Mostly are pretty good, but individual areas have contaminants that need education and management.

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Yes

Tell us why:

Because zinc and copper are harmful to human health, so we need to control these within acceptable range for human need.

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

I don't know what water temperature is suitable for us; different areas have different temperatures, I don't know the temperature in different seasons, which again is fifferent in different areas, so I I don't know.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Support maintaining those that are already good, and improve the health of those that are poor until they reach the bottom lines and higher.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Recommend to first start with resolving the issue of fertilisers. Put effort in developing organic fertilisers to replace chemical fertilisers, use those that causes less pollution and limit their usage. However, with continued population growth, the need for vegetables are increasing, how should we consider this issue?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

To realise these freshwater goals, we support the method of concurrent progressing and management.

17. Are there other management options outside of those listed that you think we should consider?

Universally, let everyone all know the relevant laws and contents.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Should introduce into law, to strengthen management and ensure balance in the ecosystem.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

What's the national stardard for vegetation removal based on? What results will Auckland achieve if we were to keep the 20 metres setback for vegetation removal?

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

If there's a need to reduce water allocation, then first reduce water for car wash and washing buildings and the like. However, we should reduce in a scientific way, using scientific methods to limit water use to achieve the desired water-saving outcome.

21. How do you think we should prioritise allocation where or when water is scarce?

1. Firstly protect domestic use for huamns and animals. 2. Industrial and agricultural water use. 3. Water use for cleaning.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Promote the habit of "save water".

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   This is a long-term freshwater vision, and will benefit humankind.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Because with regards to the use and protection of water resource, it's all outlined in the comprehensive and detailed plan in the statement.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Beneficial to the promotion of detailed management of freshwater resource, better utilise and protect current water resources.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Refined management realised in steps.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, every concept that is beneficial to the protection of water resources should be promoted, and guide everyone to collectively protect our resources.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Prevent secondary pollution of water resources.

7. Do you have any feedback on the proposed environmental outcomes?

100% agree.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

When we target special areas and refine their management, we need to standardise all atrributes; when we are all on the same page, will our actions be correct.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Strict management is required to really have an impact on the protection of our water resource to be reasonably developed and utilised.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Through the analysis of all data gathered, this provides a better foundation for future management.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

We often see the government announce the situation about our water resource.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

When heavy metal exceeds limit it will harm people's health.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

There are many attributes to protect water resource, among them, change in temperature is also an important one.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

One of the key reasons humans can live a normal life is that the water is clean and safe, all the germs that makes us ill and pollutes the water resource cannot be tolerated.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

The setting of standards should be scientific and effective, to ensure users can reach these targets. The government should also help them to estimate costs, and to find the balance point.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Management must be based on science, with clear plan, steps, and clear goals, to achieve effective protection of water resource.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Already very detailed.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Yes, because higher than national requirements is an important means of effective protection of wetlands and streams.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Openly announce allocation allowance, fully listen to recommendations from all parties, to formulate an allocation plan that is generally accepted and feasible.

21. How do you think we should prioritise allocation where or when water is scarce?

Reasonable allocation of water resource to ensure residents' daily water usage, as well as pets, agriculture and aquaculture use.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3352

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We all have responsibility to protect our surrounding environment.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Extremely supportive.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

Very good, support.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Hope can continue moving forward.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Agree, especially applicable to elderlies.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Improve water ?

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Don't understand.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Can be even better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Support. Suitable temperature can better protect the environment.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protecting the water source is everyone's responsibility.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

On the premise of ensuring safety, work hard to lift water quality.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Currently no.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Don't quite understand.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Consider the actual situation, retain the best result.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Maintain status quo.

21. How do you think we should prioritise allocation where or when water is scarce?

Do our best to save daily water use.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#3354

Very good, support.

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

Hope can continue moving forward.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes, very good viewpoint.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Agree, especially applicable to elderlies.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Reasonable.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Improve water quality, makes water source safer.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

Don't quite understand this area.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Can be even better.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Let the water quality reach a higher standard.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Support. Suitable temperature can better protect the environment.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Protecting the water source is everyone's responsibility.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

On the premise of protecting ? work hard to improve water quality.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

Currently don't have better solutions.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Don't quite understand.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Consider the situation, retain the best result.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Maintain status quo.

21. How do you think we should prioritise allocation where or when water is scarce?

On the premise of ensuring daily water usage, save water as much as possible.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Agree

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#3381

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Develop both at the same time, ?, both are essential.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

Ensure residents' water usage for daily living.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

It's only through continuous improvement of water quality and safety will we achieve food satefy. The two goes hand in hand.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Assess according to actual situation at the time.

21. How do you think we should prioritise allocation where or when water is scarce?

Ensure residents' water usage for daily living.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

"Resilient" communities to increase our ability to respond to climate change and natural disasters

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The value of amenity allows local people to carry out leisure activities along the rivers, lakes, wetlands and other places without getting into the water.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

To protect and enhance the vitality of water is to improve and enhance the vitality of human health.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#3545

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I think it is very necessary to protect and enhance the "vitality of water". It is to improve and enhance the vitality of human health. a. By 2030 or before, determine the deteriorating freshwater areas and improvement methods; stop the loss of streams and environment; let more community members actively protect the freshwater ecological environment; make good use of land planning and water management. B. By 2040 or before, ensure areas with good water quality and improve areas with poor water quality; restore the health of the freshwater ecological environment, allow people to use local materials, allow endangered animals to recover in numbers, and reduce man-made soil erosion. C. From 2050 to 2080 or before, water quality improvement will become higher than the national minimum requirements; the freshwater ecological environment supports a healthy and colorful ecological environment.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

Tell us why:

Hauraki Freshwater Management Area - 20% of the land area, including Rosedale Wastewater Treatment Plant. The terrain of Auckland is mountainous, with Lake Pupke on the North Shore and the Wairoa, Auckland's second largest river. At present, many water resources are contaminated by E. coli, and some suburban lakes are eutrophic. Urban streams are also contaminated with ammonia, zinc, and copper. Reinforced concrete urban areas prevent rainwater from penetrating into the ground, which increases the amount of water in drainage channels when it rains. Vision plan: Restore and build wetlands to prevent debris flow along the coast, protect and restore the ecological environment of the Hauraki Gulf islands, protect and cherish the freshwater ecological environment of the Hunua Mountains, including freshwater resources, and provide outdoor activities in the area.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Other

Tell us why:

"Resilient" communities to increase our ability to respond to climate change and natural disasters

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

I wish to enjoy the natural ecological appearance of rivers, lakes, wetlands and waterfalls in leisure activities that do not require touching the water.

7. Do you have any feedback on the proposed environmental outcomes?

For each value, we set our implementation goals for its environmental outcomes. The main purpose is to protect the environment where there is good water quality and improve the environment where there is poor water quality; protect the natural ecology so that it can support the growth of the number of rare animals; except in places where there are safety risks or cultural concerns that are not suitable for entertainment, let people safely engage in water activities. Humans and animals have safe and reliable drinking water, and the water quality and quantity can be reasonable and effective to supply crop irrigation, commercial water, and industrial water.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

The National Policy Statement on Freshwater Management specifies 22 benchmarks or health indicators that must be met, including nutrients, sediments, aquatic life, E. coli, cyanobacteria and more. In addition, Auckland Council has identified the importance of managing zinc and copper levels in urban streams and controlling water temperatures in streams. NPS-FM requires city counciles to improve areas where water quality is below the national baseline. We must also take into account the impacts of future climate change.

Baseline health indicators: A are blue, B are green, C are yellow, and D are red, A and B are the best, and C and D are unqualified.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

The government and community members attach great importance to greening the urban and rural environment every year. The community groups organize groups of volunteers to participate in tree planting. We plant different saplings by the streams near the communities where we participate. This not only prevents soil erosion, provides shade and controls water temperature, but also promotes ecological balance. Rare animals can also gradually come back. Such an ecological environment will greatly promote our own health.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

If the level of these metal elements is too high, it will be toxic to aquatic life. To reduce the level of these metals in waterways, we need to manage parking lots, heavily used roads, and some industrial and trade activities that generate a lot of pollution, and consider controlling the use of building materials containing these metals and improving stormwater management.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

The plan and advice must be sensible and practicable. That is the best way to get people affected on the same page and supportive.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

But blanket rules are not always the answer to sensible and practical solutions.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Give good incentives. Very little water in the air is pure, and all water that hits the ground is polluted to some extend - minor through to major. Years ago we swam in water believed to be very clear, but now the tests pick up minute organisms. All aqua living organisms are poo and peeing and shedding external coatings into the water, as is external organisms. Only man made filtering / bug killing treatment can produce pure H2o, and that isn't necessarily health for any living organisms!

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Disagree

Tell us why:

Provide new stock regulation information,

Cultural influence should not be included.

Food productivity is important

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Might not be sustainable in the future

Indicates increasing governance

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

If it impacts on private ownership, no

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Race based influence is jut that, racist

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

Ridiculous, how would you control a rain down pour on a hot road.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

You won't, food production will decrease, be happy and drink more water.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

Food prices will rise, private property owners will not be able to grow their own meat animals, you are creating an over regulating local govt.

17. Are there other management options outside of those listed that you think we should consider?

A sensible one

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Only if they exit on the affected property now

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Not sure

21. How do you think we should prioritise allocation where or when water is scarce?

Fairly and not based on race

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#31

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    Prioritising productive land with reductions over a reasonable time promoting/rewarding efficiencies. Penalise urban creep, promote urban harvesting and waste management pre-treatment within a development.

21. **How do you think we should prioritise allocation where or when water is scarce?**

    Productive land first, easier to measure and manage, has other benefits such as reduced transport, access to the market, access to staff, etc.

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Metrics need to be publicly reported frequently, repeat offenders need to be pursued, benchmarking against similar cities as best practice

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Why bother?

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Why bother?

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

What about non-Maori cultural values?

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

Too many rules

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very satisfied

Tell us why:

Where is this "Tamaki Makauru"? Do you really mean Auckland? If so, then say so.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

No

Tell us why:

What next?

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

What proof do you have?

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly do not support

Tell us why:

Just stick to the basics of what a local authority should do.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Stop filching valuable land for growing and replacing it with housing.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

The climate is NOT changing. The weather changes each day

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#54

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   I don't know

   Tell us why:

   Too many links

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

A better question is why wouldn’t you have resilience?

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

Not sure what you mean by that

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

It sure why someone’s race needs to come into it

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Can’t swim in pollution

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau’s river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Do the right things without making vegetables more expensive

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#99

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Also must look at Sediment. It is the biggest health issue for all harbuors/ estuaries, most of the sediment comes from the hillsides from slips.

   Need environment grants for erosion/ slipping prone land to fence and planted especially headwaters. 2017 Tasman Tempest caused masses of landslides, which tend to keep slipping by planting native plants & trees will cushion rainfall & greatly reduce the impacts of flooding. Main problem is urban/ industrial streams. Urban stream plans with landowners along urban streams encouraged to plant their sections in natives and controlling the weeds. We have farm plans, so why not urban and industrial environmental stream plans, with focus of encouraging neighbourhood communities to own/care for their stream by planting with native plants and carrying out weed control.

   Most of Auckland councils Park native forests & streams are infested in weeds. need to be controlled and restored with native plants instead of Privet Forest in improve biodiversity and stream health. Focus on reducing proposed development - climate change, sea level rise - looking at where not to develop due to flooding and water run off flooding down stream properties.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The old ARC had a huge number water testing site throughout the stream system from headwaters to sea with many in-between. It makes sense to test at these same location so new data can be compared with this old data. Currently the Papakura Stream only has three testing site, in the lower part of the catchment. The Papakura Stream study down a while ago has many testing sites throughout the catchment and very detailed data, Lots of planting has been carried out in the upper end of the catchment where no recent water testing has been carried out. It would be great to have water testing etc result which measure these catchment improvements.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Native trees take centuries to grow and are our native bird supermarkets, loaded in biodiversity. They provide shade, & cool our cities an Infilling established native trees recreated a fast forest cover. Time to grow native forests can be measured, We need to measure and value editing native habitat as it is not replaceable.

7. Do you have any feedback on the proposed environmental outcomes?

Should also identify the Forest and Bird South East wild link Area (Biodiversity Hotspot) Coast to Coast from Manurewa to Clevedon (The Gardens to Clevedon, including all Brookby, Brookby/Ardome- Alfrisotn Hills, Broobky , Northen Brookby Hills, Brookby - Clevedon Hills. These areas have large amount of very ancient native forests due to the land being so steep and unsuitable for intensive cropping. There are champion Northern Rata Trees, Champion Kauri, Puriri, Tariare, Rewarewa, totara, Pukatea Kahikatea trees, Huge numbers of birds and species Up to 8 Kaka often visit the large Kauri trees at once. this is on film. Lots of native bird species (little black shag, etc also kora, fresh water mussels, eels and are listed on inaturalist. Importantly this SWE wild link is over multiple catchments are wildlife and birds, pests often move along ridge lines into different catchments.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

Should also identify the Forest and Bird South East wild link Area (Biodiversity Hotspot) Coast to Coast from Manurewa (The Gardens to Clevedon, including all Brookby, Brookby/Ardome- Alfrisotn Hills, Broobky , Northen Brookby Hills, Brookby - Clevedon Hills. These areas have large amount of very ancient native forests due to the land being so steep and unsuitable for intensive cropping. There are champion Northern Rata Trees, Champion Kauri, Puriri, Tariare, Rewarewa, totara, Pukatea Kahikatea trees, Huge numbers of birds and species Up to 8 Kaka often visit the large Kauri trees at once. this is on film. Lots of native bird species (little black shag, etc also kora, fresh water mussels, eels and are listed on inaturalist

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Also Upper area of the Papakura Stream has historic and present, pristine swimming holes

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Water is a limited resource, auckland has had water shortages in past and we have no new dams so all this population expansion is unstabtainable,

Auckland sewage and waste water can't cope on top of climate change, flash flooding and sea level rise. Need to shut the gate on Auckland city farm (overstocked with people). Rules for development need to change, lest about maximum yield, need to allow for natural watercourse flows, instead of filling in streams, wetlands, with pipes. Urban Houses/ industry need to have at least a 30 m set back from streams/ wetlands/ watercourse. This will help to future proof climate change. Gravel tracks, cycle ways network could be provided.

Need to stop new development especially on Flood plains,/low lying land hazard land. zneed to buy up flooded/ native tree properties and turn them into green spaces i.e. native forest wetlands. Council should buy houses with lots of ancient native trees an plant them out in native plants to help with soaking up water run off.

Daylight streams create more urban forest wetlands. Need less concrete and more soft native wall and roof gardens.

Airport need to be relocated to higher ground/sea level raise and let the native birds thrive in the harbour instead of controlling them due to aircraft damage.

Sediment is the biggest health issue for all harbours/ estuaries, most of the sediment comes from the hills from slips.

Need grants for ersion/ slipping prone land to fence and plant. 2017 Tasman Tempest caused masses of landslides, which tend to keep slipping so need planting up in native trees

Main problem is urban/ industrial streams. auckland city needs urban stream plans with landowners along urban streams plant their sections in natives and controlling the weeds.

Most of Auckland councils Park native forests & streams are infested in weeds. need to be controlled and restored with native plants instead of Privet Forest in improve biodiversity and

stream health. Need to bring back fish passage especially to urban streams to allow whitebait to swim to there up catchment areas above the tidal toe.

Focus on reducing proposed development (creates lots of run off) - climate change - looking at where not to develop flooding and water run off causing flooding down stream

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Cities are a lot hotter than farmland. Heat from Cities must be taken into account (heating up the planet) Introduce method to reduce city temperature by increasings greening of landscaping and vertical plant walls, roof gardens . The water run off from urban areas will be hotter that water run off rom rural areas due to lack of plants and hot concrete and ash felt. Black Roads, tarmac are very hot, so hot water run off. Night lighting especially in cities is also heating up the planet. Restriction and rules to reduce heat from sighing is also important as water also effected when rain falls onto lighting.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Takanini and Ardmore are also important horticultural, farming and food growing areas

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Also sewage tanks in rural areas need regular testing to ensure they are not contaminating the waterways.

Sediment is the biggest health issue for all harbours/ estuaries, most of the sediment comes from the hills from slips.

Need environment grants for ersion/ slipping prone land to fence and plant. 2017 Tasman Tempest caused masses of landslides, which tend to keep slipping so need planting up in native trees. Other councils have grants for erosion prone & slipping land. These are extensive areas and developing houses on these slopes are not appropriate.

Felled pine forest often slip, due to shrinking of tree roots which then let water in, so planting of new forests on steep slopes is not appropriate.

17. Are there other management options outside of those listed that you think we should consider?

Also sewage tanks in rural /urban areas need regular testing to ensure they are not contaminating the waterways.

Sediment is the biggest health issue for all harbours/ estuaries, most of the sediment comes from the hills from slips.

Need environment grants for ersion/ slipping prone land to fence and plant. 2017 Tasman Tempest caused masses of landslides, which tend to keep slipping so need planting up in native trees. Other councils have grants for erosion prone & slipping land. These are extensive areas and developing houses on these slopes are not appropriate.

Felled pine forest often slip, due to shrinking of tree roots which then let water in, so planting of new forests on steep slopes is not appropriate.

Cities are a lot hotter than farmland. Heat from Cities must be taken into account (heating up the planet) Introduce method to reduce city temperature by increasings of landscaping and vertical plant walls. The water run off from urban areas will be hotter that water run off rom rural areas due to lack of plants and hot concrete and ash felt. Black Roads, tarmac are very hot, so hot water run off. Night lighting especially in cities is also heating up the planet. Restriction and rules to reduce heat from sighing is also important as water also effected when rain falls onto lighting.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Daylighting streams with fish passage and wide 30 - 50 m buffer each side will help with water runoff will help whitebait to access upstream habitat.

Rules for development need to change, lest about maximum yield, need to allow for natural watercourse flows, instead of filling in streams, wetlands, with pipes. Urban Houses/ industry need to have at least a 30 m set back from streams/ wetlands/ watercourse. This will help to future proof climate change.Auckland city needs urban stream plans with landowners along urban streams plant their sections in natives and controlling the weeds. We have farm plans, so why not urban and industrial environmental stream plans, with focus of encouraging neighbourhoods to own/care for their stream by planting with native plants and carrying out weed control.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Mill Road has a waterway Papakura Stream (road ditch) about 1m from the residential fence with a residential houses about 2 m from that. there is no planting This too close. Need at least a 30 m native panting buffer from residential housing. Most of the lower reachers of the Papakura Stream is a series of ditches and culverts with no planting impeding fish pass & biodivesirty.. The Papakura stream needs to be celebrated and shaped into a more natural state including areas of wetland to cope with future flooding events. It will require the purchase and removing of houses to enable this.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Its easier to limit and stop more urban development as the city cannot cope with future water demands. It important for horticulture and farming to have access to water.

21. How do you think we should prioritise allocation where or when water is scarce?

Its easier to limit and stop more urban development as the city cannot cope with future water demands. It important for horticulture and farming to have access to water.

Encourage garden tanks for urban gardens. Farm plants of natives actually helps to retain water as less impact from drying winds. so planting more native trees in urban ares will help reduce heat.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   Just dredge out the creeks widen and deepen all of them where you can. Keep it simple.

   Create lots of ponds where possible and natural dams where you can.

   Be practicable.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    You need to create more water reservoirs.

21. **How do you think we should prioritise allocation where or when water is scarce?**

    Water is scarce because you let about 97% of water go back to the sea. Create a series of reservoirs and enlarge ponds etc.

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Don't get complicated the answer is have natural water ponds and reservoirs enlarged.

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Other

Tell us why:

Very wishy washy- doesn't really consider all of the other food production in this FMU other than growing vegetables in Pukekohe.

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Resilience in our food production- we are in a cost crisis for producing food. I am concerned what all of this will do to the costs of producing food- our food production needs to be resilient as well as our fresh water.

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

No

Tell us why:

Too ambiguous, doesn't show any real direction.

7. Do you have any feedback on the proposed environmental outcomes?

'Very long and confusing- seems to be double ups on certain issues.

Perhaps be better to group things with similar themes (such as the below) together to make it easier to follow and understand.

- Food and Drinking Water

- Spiritual

- Scientific

- Recreation

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

They are somewhat important- but not at the expense of food production

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

I don't know

Tell us why:

Again They are somewhat important- but not at the expense of food production.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

I don't know

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Fairly dissatisfied

Tell us why:

I am more concerned with the beaches and urban streams- and the degredation there compared to the rural streams.

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Yes

Tell us why:

Urban need to be more accountable for their activities.

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

I'm not Sure how realistic this would be to do.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

Question what these standards actually are and mean for us

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I this is vitally important to understand the importance of food production in Pukekohe. Setting unachievable targets here will cause growers to seriously consider the viability of growing food, if they decide to cease it could be even more detrimental to water quality and other environmental outcomes, as food will have to come from elsewhere in the world that may not live up to the same standards. And as stated before, believe the urban fresh water is in a considerably worse state than the rural waterways.

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

'When making any decisions around rules consider the impacts on the stakeholders- especially in the productive sector.

- For example increasing the minimum set back for stock exclusions from the NPS, could be detrimental to farmers who could loose a large portion of thier land. Therefore an overall decrease in the viability in business.

For these fresh water targets to be met, there seriously needs to be healthy and productive businesses in both Rural and Urban sectors of Auckland. Please don't make the rules more constrictive than they are useful.

Do the opposite of the NPS and consider a carrot approach, and think about how you can reward proactive businesses/farmers/growers and their good practices rather than using a stick. The majority of Farmers and Growers are the best stewards of the land and water , and they have a deep respect for the natural resources on thier land.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Again consider the costs to these individual land owners of doing this when costs of living and doing are super high, and we are living in a very tough economic climate.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Consider improving the resilience on water demand in urban areas. The amount of water wastage in urban environments is huge (clearly a lot of people who have never lived on exclusively roof water in a drought). Make it a requirement for all new dwellings built, and any dwelling undergoing extensive renovation that requires a building consent in both urban and rural areas to have some sort of roof water catchment, recycling and filtration system so they become more resilient and reduce the demand on the council supplied water.

21. How do you think we should prioritise allocation where or when water is scarce?

Drinking Water and then Food production and processing

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

The document is very difficult to understand and follow unless you have had lots of exposure to this topic and process specifically. Can you make it considerably simpler for the average Jo Bloggs to understand.

#138

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Franklin

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   there is no definition of TMOTW - what is it that I am supposed to be supporting. the reference to mythical and science based concepts is very confusing in coming to a decision - is it a cult or science.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

I don't know

Tell us why:

no detail of what the ephemeral terms actually mean in real life- conceptual aspirations vs reality is not consultation

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

If it means being able to handle abuse by the over use and over populated environment

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Mahinga Kai - the pristine environment before human interference would have due to the infertility of the waterways had minimal food available. Maori have over history not been great conservators (Moa). The sustainable level of Mahinga Kai in the region would have been for a few thousand at most pre European. The expectation that the greater Auckland population of over 200000 identifying as Maori will be able to harvest sustainably mahinga kai is fantasy even in a generations time with pristine water - there needs to be recognition of this!

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

information on viewer incorrect- cannot consult with incorrect data

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Fresh water is inherently more dangerous to swim in. The mythical Taniwha was there to warn people of the dangers. By creating more access you are taking on the responsibility of behaviour and risk

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

good science

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Rural community has done the hard work with Fonterra/ Clean Streams etc. from there own funds - now make the urban catch-up at there expense not the ratepayer- observations suggest that most public don't care and litter/ degrade water at will

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

you have identified it as a concern - the problem can be solved by ringfencing Auckland, have no sprawl, insist on developement up, and concentrate the people to justify a reliable public transport system. If you don't do that its not worth the effort to worry about Cu/Zn.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

as recently experienced flow is more important as weather extremes are supposed to get more extreme this measure is a by-product of greater things

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

aim for greatest ROI- worst to better than average is aspirational

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

stop houses being put on class1 land then the concentrations are spread and more is not being expected of less - see above comment - stop the sprawl on class 1 land. If you want to prevent expansion of the problem remove the problem- extra mouths - offer birth control.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

current rules are approaching best practice - reducing the pressure of food production from less area must be considered. Enforcement or help with compliance would be better use of resources rather than expecting everyone to re invent the wheel now you want to move the goalposts= do it once- right

17. Are there other management options outside of those listed that you think we should consider?

education and indoctoration of children around not destroying the food source and resource limitations in the future and being a tidy kiwi

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

the rape and pillage of the fish themselves - fresh waterways are not the cause of the demise but the over harvest of Mahinga kai - put the resources into the problem not the symptom

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

provided latest science is involved and recognition around rate relief for improved outcomes

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

fire and hold accountable those that have allowed over allocation - there will need to be compensation paid to those that have reductions incurred as they have done nothing wrong in the current process. Ratepayer should not cover this cost. Fixing the incompetency of the past is what a lot of this process is - don't swing to far to try and correct it.

21. How do you think we should prioritise allocation where or when water is scarce?

food -recreation

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

good luck getting the average person to give a stuff and don't persecute those doing OK and have done the hard work already.

My question was not answered on the webinar(and then deleted as if it had been) and thus this consultation is a worthless predetermined outcome exercise, if the documents you provide are false and inaccurate then how can it be considered valid!!!

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Your document is written in 2 languages and consequently I do not understand what you are trying to achieve

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

Your document is written in 2 languages and consequently I do not understand what you are trying to achieve

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

The entire system needs to be resilient so as to be able to accomodate the changes which maybe coming from climate change

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Other

Tell us why:

Fresh water is not an amenity, it is a necessity

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

There are other cultures in New Zealand so why are their views not canvassed

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Other

Tell us why:

There are streams in Manukau which are known to be polluted but Auckland Council does nothing to prevent this pollution from occurring by entering the properties of the likely polluters. How is this going to change

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Need to have a baseline, 2017 is about right

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

There is nothing done about known polluted streams

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

You need to include all contaminants e.g. rubber

13. Do you think we should include and manage temperature as an attribute in this plan change?

Other

Tell us why:

How are you going to cool/prevent water from entering waterways from roads and other hard standing areas

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Why do you need to be above the National bottom lines as surely these are already high enough

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

You need to make a choice between growing food close to the major market and more pollution from transport. Most growers already have minimised their use of nitrates and if production is reduced growers will simply go out of Business - again your choice between food and no food

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

Wastewater management is a basic Auckland Council task so should already be the "best of the best" but we all know that it is marginal at best because money is wasted on non core Council activities.

What is mean't by "increasing the national requirements around excluding stock from waterways", they are either fenced or not so maybe you should enforce the regulations already in place.

Most growers already have minimised their use of nitrates and if production is reduced growers will simply go out of Business - again your choice between food and no food

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

It is not difficult to upgrade the physical barriers

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Why do you need to be above the National bottom lines as surely these are already high enough

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

How is it that aquifers have been over allocated as there is already a robust system in place. If there is an overallocation Auckland Council will need to buy out enough users to bring the level of usage down to what the aquifer can allow, the end user is not at fault here if he has followed due process

21. How do you think we should prioritise allocation where or when water is scarce?

Food production must come before recreational use. Look at what the water is to be used for and is it possible for some of the end users to shift their production and thence usage to other parts of New Zealand. If so the Council/Government will need to carry the associated financial costs

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Clean up what we have, eg wastewater treatment improvements, existing waterways, at the same time as looking to the future

#191

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   As growers we are doing what we can within our time and resources. Preservation of resources is important for the future.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   Its necessary for resource allocation in relation to fresh water

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Make it easier for water allocation for irrigation & food processing. Difficult if relying on a neighbor for acceptance.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

I don't know

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

To protect aquatic life.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Organic growers work alongside conventional to teach how to practically grow without synthetic fertilizers and agrichemicals.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Come to the farms and talk and see what we are facing.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Discuss with the consent holders about what is fair to them so they are still able to do their work.

21. How do you think we should prioritise allocation where or when water is scarce?

Discuss with consent holders what is minimum amount they need to do their work so it doesn't affect production. Let the consent holders know and they will be fine, when it is a surprise is when the consent holders are upset.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Find alternative, sustainable ways to provide growers with water for irrigation and food processing or whatever it is they need it for.

#483

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Agree

Tell us why:

Takes into account the areas around pukekohe that require differing levels of stock/vegetable/gardening/grower nutrients

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Important to preserve and increase the resilience of these natural bodies for our future generations and the future of this area of NZ

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Important that the people of this area and visitors are able to access and use these places for rest, recreation and learning and to appreciate what we have

7. Do you have any feedback on the proposed environmental outcomes?

seems good and appropriate

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

We need to preserve these values for future generations - for ALL.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Other

Tell us why:

Would need to tread carefully here as keeping stock away for water systems puts yet another stress and cost on to farmers. Fully agree with keeping water safe where it is only small areas of stock, but placing more burden on farmers needs to be looked at cautiously. Def agree with upgrading wastewater systems

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

Looks sensible

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Some lakes and streams need clearing from weed, pests (swans, other birds that are prolific and a nuisance). Some areas would be lovely to swim in but we are warned not to, due to algae or contaminants

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Aquatic life needs to be looked after carefully for the balance of life for all

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Again, aquatic life needs to be preserved - will cost to manage this but will benefit all

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Mostly support rather than strongly - as need to watch costs ballooning out

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Not sure but is vital to keep vegetable growers growing and supplying - and stop letting council consenting for land to be sold for residential purposes in areas that should be continued to grow agricultural supplies. Growers and farmers are usually happy to comply to help prevent further nitrate issues, as long as they are listened to and supported to do this and the cost is manageable

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

How will mana whenua initiatives impact private land owners?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

absolutely

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Ensuring local infrastructure is built prior to building new subdivisions, roads, so water runoff is directed away from rural areas and the potential to wash out earth and land. Having the infrastructure to manage large rainfalls and direct water safely to where it should be headed.

Submitter details:

Organisation (if applicable):

Local Board: Franklin

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   - Agree that water is important to the whole community.
   - Agree that our waterbodies need to be healthy.
   - Disagree that the health of the water bodies supercede everything else. Eg supercedes people, animal health, food production and economic wellbeing. The 4 wellbeings – environment, social, cultural and economic – are linked and need to be balanced. Hence, a pause in this Freshwater Management work would be beneficial until we see whether the new government is going to repeal the latest National Policy Statement on Freshwater and go back to the former 4 wellbeings approach. The benefits of a pause are:

   a) a more balanced direction

   b) less waste of time and money for ratepayers and council staff. We are tired of wasteful spending. Council should serve its people, not the other way around.

   - Disagree that mana whenua have superior rights and interests in water. There should be no “divine rights” for those whose ancestors arrived here first. The whole community has a vested interest in water resources and must be equally consulted. A good start would be to

communicate in a way that everyone understands. Full marks for a glossary but it's a struggle to understand exactly what Council is asking us to consider when half the terms are written in te reo Maori and contestable as their interpretations.

Recommendation:

Recognise the tikanga and customary rights of all Auckland's citizens.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

I support some aspects and not others. eg. Everyone should be exercising mana whakahaere and kaitiakitanga over water, not just mana whenua.

I support proposals around the Pukekohe Specified Vegetable Growing Area because it is difficult to commercially grow vegetables inside Nitrogen limits that are optimal for healthy water. But food production is essential. This is a good example of why you can't prioritise "health of water bodies" in isolation to other well beings.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

I do not support 2 extra values, over and above those already listed in the NPS. There has been much controversy and nation-wide protests over the ambitious nature of the NPS – FW

and how workable it is for those closely involved in meeting these values. Let's not make it any more complicated by adding extra values to an already long list.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

The NPS is already very ambitious. Lets not add extra features to the list. Amenity is the last priority. My priorities are human drinking water, animal drinking water, irrigation, cultivation, food production, commercial and industrial uses and protection of biodiversity.

7. Do you have any feedback on the proposed environmental outcomes?

I agree that water quality and quantity should be sufficient for reasonable and efficient irrigation and food processing, with freshwater needs provided for to an adequate level of reliability. I agree the same applies to human drinking water, domestic use, and to commercial/industrial uses.

I do not agree that mahinga kai should be available for mana whenua only. All people should have access to FW bodies and the resources they provide - as long as it is sustainable.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Generally agree but why criteria for Maori cultural values only? What about everyone else's cultural values? And are not everyone's cultural values aimed at improving environmental outcomes?

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Other

Tell us why:

I agree that we need baselines. Don't necessarily agree that Bands A, B & C need focus on them in improving water quality. Concentrate on D band.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Still good by world standards in the rural and bush areas of the region ie most of the region.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

I think the priority should be on urban contaminants and run-off, period.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

Because you are proposing to get private landowners to fund a public good. The public should, if they demand kilometres of riparian plantings, pay in full for the cost of the plants and the ongoing labour involved in doing this. Perhaps the Council can provide cooling systems for all run-off from roads and subdivision roofs and concrete before their water enters our streams.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly do not support

Tell us why:

Stick to the NPS bottom lines. Recognise it is a long term project. Start with an aspiration to improve the D band while retaining baseline attributes for the other bands. We all have strong desires to improve our waterways where they have been negatively impacted by human activity or wherever they are not of the highest quality but who is going to pay for these aspirational, unrealistic goals? Perhaps we can have a targeted rate for those volunteers who want top-of-the-range quality.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Agree with the proposals on this.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

The NPS is already ambitious and contentious. Meet its bottom lines. I want to know what data has been collected in the past 10 years since stock exclusion from waterways regulations were introduced? Has water quality improved and by how much? Retain the principle of excluding stock from waterways without prescribing how that is achieved. I recommend you do not penalise those who have already excluded their stock by making them move their fences out to a prescribed distance from the waterway. In many cases those fences will be greater than 3m. because of the contour, while at other points in the stream they will be closer. Don't get too prescriptive. You cannot force landowners to go to the great expense of getting them to plant trees on their riparian margins for a public good. The public will have to fund 'nice-to-haves' if they demand them. Note, planted areas are harder to maintain and keep free of pest species. Long grass does a great job of catching nutrient and sediment run-off.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

Retain the requirement for new culverts to provide fish passage. Who is going to find the manpower and pay for inspecting 4,000 private structures that are already in place?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

The NPS is already very ambitious and contentious. Stick to the national requirements and encourage voluntary adoption of higher standards. Re, wetlands - 20m. buffers take out a lot of productive land. Have you done an analysis of just how much land is being lost to production? Some farmers created artificial wetlands, only to find they were penalised by new rules.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Should not have got to a stage of the acquifer being over-allocated. If the worst comes to the worst, then the only way to reduce water allocations to existing consent holders is by reducing the allocation evenly, on a percentage basis.

21. How do you think we should prioritise allocation where or when water is scarce?

As we do now. ie human drinking water, animal drinking water, domestic use, food production, commercial/industrial use.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

4.3 Proposed Objectives for Te Mana o te Wai. - See page 13

I agree with these objectives if they mean:

- Protecting the health of water bodies
- Recognising water is vitally important to ALL Aucklanders

- Recognising that Aucklanders all have equal rights in the use and decision-making around water.

I disagree that:

- Te Tiriti o Waitangi was a partnership between Crown and Chiefs or that in 2023 this translates to an obligation for councils to prioritise te ao Maori over the world view of the rest of our citizens.

- Or that tangata whenua should have mana whakahaere over water ie power, authority and obligations to make decisions on behalf of the rest of the community.

- NB: Mana Whakahaere is vested in the Council and those we elect to represent us.

Your feedback

1. What do you think about the direction we are proposing in the region-wide vision statement?

Mostly do not support

Tell us why:

1. The Long-term vision must include Mana Whenua as the key partner that are able to articulate and determine if Te Mana o te Wai is being upheld. This is not included in the wording for the overarching vision. If the ability of Mana Whenua to articulate their mana through Te Mana o te wai statements is not included in the long-term vision, then the true meaning of Te Mana o Te Wai is not recognised and the treaty principles for Mana Whenua to have active participation to the extent that they wish is also made unavailable.

2. The vision statement must include as an objective giving effect to Te Mana o Te Wai. Mahinga kai is a compulsory value which cannot be put of until 2040 or 2050. Immediate steps need to be included in the plan change so that this compulsory value is achieved. Part-FMU specific objectives should be considered for all brown and green field developments, especially that ear marked for Manukau FMU where significant residential development is occurring. The proposed outcome/AUP objective does not fully encapsulate the requirements for mahinga kia nor its role in the overall achievement of Te Mana o te Wai and Te Mauri o te Wai. This objective is written passively without any obligations on the securing, enhancement, protection and recognition of mahinga kai as a data gathering tool also. There is still a gap between the AUP obj, pols, and rules and giving full effect to Te Mana o Te Wai and Te mauri o

Te Wai with Mana Whenua. Management tools rivers and streams: need to include roles and support for Mana Whenua in these.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Disagree

Tell us why:

3. The vision statement for each FMU must include articulation by Mana Whenua of what the vision should be from their perspectives.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

3. The vision statement for each FMU must include articulation by Mana Whenua of what the vision should be from their perspectives.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

3. The vision statement for each FMU must include articulation by Mana Whenua of what the vision should be from their perspectives.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

4. This is critical to keep a broad perspective on what our waterways and water needs in order to be healthy.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

5. amenity provides for wider range of values to be applied to waterways in a meaningful and useful way.

7. Do you have any feedback on the proposed environmental outcomes?

6. The mahinga kai environmental outcome is a narrowly defined outcome of what Mahinga kai is. This outcome should be expanded to: Mahinga kai is supported by the other values so that iwi and hapū are able to practice Mahinga kai according to their tikanga, kawa and Mātauranga in the places they identify. The practice of mahinga kai includes materials used in the construction of mahinga kai technology and tools, the ability for these natural materials to readily be available and are supported in the presence, abundance and survival of these natural materials, for the practice of mahinga kai to be a monitoring tool in the progress and achievement of the overall principle Te Mana o Te Wai and Te Mauri o Te Wai.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

7. This approach is appropriate and enables the identification of māori values by Mana Whenua. I would suggest that the management required to these outstanding waterbodies is also tied to the criteria used and extend to the action plans and resource consent activity status.

8. Māori cultural values need to link the values of Mana Whenua with their role in Te Mana o te Wai across the region.

9. Preliminary list of outstanding waterbodies need to also provide for the nomination of each Mana Whenua iwi/hapū for their waterbodies.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. This is a good approach that utilises existing technologies and programmes. This programme should also be expanded to include roles for Mana Whenua as part of the management of primary contact sites.

11. Utilising existing programmes and workstreams is an efficient approach. But the ability for Mana Whenua to participate to the extent that they wish needs to be clarified.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

13. This is a requirement in order to enable Mana Whenua participation and the requirements of Te Tiriti o Waitangi.

14. The summaries of the baseline states need to take into account the full history and context of the waterway. This includes the harm to the health of the waterway that may have occurred as well as the historical treaty breaches that Mana Whenua have sustained against their waterways in association with Te Mana o te Wai and Te Mauri o te Wai. Therefore it is suggested that an additional attribute is included in the baseline state to accurately record the quality and quantity of the waterway based on the experiences of Mana Whenua. The details of the banding can be confirmed with Mana Whenua and still be consistent with the national direction of the A-D banding.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

15. In many of our waterways the quality of the habitat is good. However it is clear from the data that there are significant issues relating to our urban waterways and those within a rural setting. This is concerning due to the ability to improve this situation being available and the time required to create change being decadal in scale. There are simple solutions that can be implemented and made mandatory yet they are debated.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

16. A systematic approach to diffuse and point source contamination needs to be used. We have already identified the main drivers of copper and zinc but there needs to be longterm change to identify alternatives or better capture and management systems. For example, using green infrastructure to capture contaminants and prevent them from entering our waterways.

17. The primary sources of copper and zinc need to be identified. As it currently exists most roofing types of metal include zinc which if not maintained leach into the environment and Copper is introduced through manufacturing and brake pads. There needs to be a connection between the instream measures of Zinc and Copper with their sources being via the land use activity and the building code and Land Transport legislation.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

18. Temperature is a key stressor on waterway environments and is good indicator of the resilience of a waterway to the surrounding landscape.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

19. It is important to maintain the waterbodies that are in a good state and to protect them while at the same time improving the waterbodies that are poor. Attributes measured should be expanded to include attributes for the value mahinga kai as these are co-dependent. That is to say a healthy ecosystem for aquatic life and habitats supports a high quality mahinga kai value.

20. There should be a higher target set for any outstanding waterbodies in recognition of the values that those waterbodies hold. This is to ensure that those values are maintained, protected and enhanced in areas that can be achieved.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

21. This area has a special designation for produce production. The currently policy wording is to balance the ability of food provision with the freshwater objectives. The policy reaches a conflict with the reality that some of the produce that is grown within the area is for international markets. While the balance between food production for communities within Aotearoa – New Zealand and freshwater outcomes can be easily understood, further work/thought needs to go into the balance between international exports and freshwater.

21.1. At what point is it acceptable for freshwater to be degraded (and to not be giving effect to TMOTW) for the purposes of international export and commercial gain.

22. Specific funding needs to be made that directly targets that application of fertilliser and water as part of the vegetable production. There is no point in creating rules with bottom lines if the cost is our food production and national food security. The Pukekohe Specified Vegetable Growing Area needs to have a holistic multi-catchment scale approach to agriculture and landuse to make step change improvements that bring landowners and food producers along. Specific funding should assist with the costs of adopting new technologies, farm management strategies and waterway protection operations, this should operate in the same way as a general rates to reflect that the growing area contributes nationally to food security. Planning provisions should be made to expand or create new food agriculture where the activity will be done with no fertiliser use, and minimal water applications, this will encourage existing farms to change their practices and incentivise new agricultural operations that align with the overarching principle of Te Mana o te Wai and Te Mauri o te Wai.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

23.These are good overall steps to be taking. The question will be how these activities can be funded. We currently have a significant deficit for infrastructure maintenance, and with compounding operational costs there is a risk to the agricultural sector that could end up preventing food production.

17. Are there other management options outside of those listed that you think we should consider?

24. There also needs to be consideration in the material used for building and infrastructure. A key source of zinc is in roofing materials which is part of the building act. How can these things be brought together in a similar way as the issues with brake pads and car parking areas.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

25. A broader approach to fish passage remediation should also be considered. As well as a catchment scale analysis to determine what type of change and the sequencing of that change is required. If the costs for a total catchment scale approach was used it might identify a better way of doing this or cost savings.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

26. Retaining the standards that are higher than national requirements ensures there is a backstop and helps to mitigate the potential for further degradation. A larger scale approach needs to be considered for wetland that has already been drained as these areas are susceptible to both flooding and in coastal areas storm inundation, an approach to identifying these areas and enabling wetlands to be reinstated should also be considered as part of the framework.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

27. Once locations of over allocation have been identified a transition plan with consent holders should be established with a reasonable time frame of 5-10 years by which it will need to be first in to demonstrate compliance with the allocation limits and reduction in overall water use within the catchment. Put simply it is impossible to keep doing more with more, and a same with less approach is needed. A similar approach needs to occur within urban environments looking at potable water and wastewater, we need to reconsider how water is

used and whether it is appropriate to use the water that we do for the activities that they are used for. Unfortunately as a result of historic and current practices, in order to reduce water allocation it will mean some users can no longer exercise their consent.

21. How do you think we should prioritise allocation where or when water is scarce?

28. Allocation for water should be health based with the intention to minimise harm. Allocation for animal drinking water, human drinking water, food production and waste management should be prioritised over water that is used for cleaning, non-vital manufacturing and production, and similar activities that if needed can be stopped for several weeks or months in a water scarcity event.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

29. Take limits need to also be tied to wider land-use and land-cover to account for the fact that a catchment that has greater vegetation cover will be more resilient in the flows throughout the year.

30. phasing out of over-allocation should be tied to resource consenting to improve water use and efficiency.

Other feedback section:

The aim of the Essential Freshwater package is to:

1. Stop further degradation of the country's freshwater
2. Take immediate steps to improve water quality within five years
3. Reverse past damage to bring waterways and ecosystems to a healthy state within a generation

Te Mana o te Wai:

1. The fundamental concept of Te Mana o te Wai (TMOTW) underpins the entire freshwater management system and must be given effect to. The concept recognises the mana and mauri of wai/water and the relationship between wai and tangata whenua.
2. It is necessary to therefore resource tangata whenua through their Te Mana o te Wai statements so that the relationship between wai and tangata whenua is clearly understood within the policy and monitoring context.
3. At a national level Te Mana o te wai recognises the special connection all people have with freshwater. While the requirements to give effect to Te Mana o te Wai is set nationally the implementation must occur locally. This means that Auckland Council as a unitary council must include objectives and policies in the RPS that describes how Te Mana o te Wai will be given effect to through the management of freshwater. This should include describing what outcomes will be achieved, how decision-making should occur and how to enhance or restore relationships with freshwater.

Auckland Councils proposed objective for Te Mana o te Wai:

4.3. Our proposed objective for Te Mana o te Wai Freshwater management in Tāmaki Makaurau will give effect to Te Mana o te Wai by:

(a) Restoring, enhancing and protecting Te Mauri o te Wai; recognising that water is taonga and a living entity, and that when Te Mauri o te Wai is degraded, there can be no Te Mana o te Wai.

(b) Taking a transformative, aspirational, and innovative approach, consistent with te ao Māori, that prioritises halting further degradation, achieves remediation and recognises that freshwater management to date has led to widespread degradation.

(c) Ensuring natural and physical resources are managed in a way that prioritises:

(i) first, the health and well-being of water bodies and freshwater ecosystems

(ii) second, the health needs of people (such as drinking water)

(iii) third, the ability of people and communities to provide for their social, economic and cultural well-being, now and in the future.

(d) Involving Mana Whenua consistent with the Auckland Unitary Plan Regional Policy Statement objectives in B6.2 (recognising Te Tiriti o Waitangi partnerships and participation) and B6.3 (Mana Whenua values) and by recognising and providing for Mana Whenua:

(i) rangatiratanga and mana whakahaere,

(ii) values, mātauranga, kaitiakitanga and tikanga,

(iii) determination of the local expression of Te Mana o te Wai,

(iv) partnerships at governance and operational levels.

(e) Adopting an integrated approach, ki uta ki tai – mountains to the sea, consistent with a holistic te ao Māori world view.

(f) Improving resilience to the effects of climate change.

(g) Ensuring that freshwater sustains present and future generations.

(h) Using mātauranga Māori and scientific knowledge and monitoring approaches.

Pg. 13 of Setting our direction Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

1. The B6.2 objective only recognises and provides for the principles of Te Tiriti o Waitangi, it does not give effect to these principles. In order to give effect to TMOTW iwi and hapū must be able to participate to the extent that they wish to participate.
2. The objective B6.3 recognises some Mana Whenua values however there are principles of in the NPSFM that need to be given effect to.
3. It is suggested that the wording for 4.3(d) needs to be:

(d) The ability of Mana Whenua to participate in the governance, policy and monitoring of the NPSFM to the extent that they wish is given effect to. Mana Whenua provide direction to giving effect to their values including but not limited to:

a. Rangatiratanga, Mana Whakahaere, Kaitiakitanga, Manaakitanga, Governance, Stewardship, Care and respect;
b. Values, Mātauranga, and Tikanga,
c. Partnerships at governance and operational levels

4. TMOTW has six principles, a hierarchy of obligations and requirement that freshwater is managed in a way that gives effect to TMOTW. All six principles are of relevance to tangata whenua, and they ability for them to participate in regards to those principles must be provided for. This is detailed in caluses 3.2 and 3.4 of the NPSFM.

5. The plan change must notify a regional policy statement that gives effect to the NPS-FM by 31 December 2024. This includes giving effect to Te Mana o te Wai and all the compulsory values.

Below is Auckland Councils Proposed vision for inclusion in the Regional Policy Statement for the whole region and each of the three Freshwater Management Units. Below that I have provided comments.

6.1. Proposed vision for inclusion in the Regional Policy Statement

Draft long term vision – Auckland-wide

Freshwater is managed to protect and enhance te mauri o te wai (the life-sustaining capacity of water) in Auckland's freshwater bodies and ecosystems, to contribute to the revitalisation of the mauri of coastal receiving environments, and provide for the wellbeing of mana whenua and communities, such that:

a. by 2030:

1. Mana whenua have increasing connection to the waterbodies in their rohe and are enabled to embed Mātauranga Māori in freshwater monitoring and reporting to the extent they consider appropriate.
2. Waterbodies that are degrading are identified and priorities are set for action to address the causes of the degradation.
3. Net loss of streams and wetlands is no longer occurring.
4. Communities increasingly recognise and actively participate in protecting and enhancing the values of freshwater bodies, including rural and urban streams, lakes, wetlands and aquifers.
5. Land use planning and water management is integrated and contributes to an increase in resilience of freshwater resources to the effects of climate change and enhancement of the health and wellbeing of freshwater bodies.
6. Future urban growth and redevelopment applies water sensitive design so that waterways are maintained and enhanced as part of blue-green networks that enhance public access, provide amenity, and help to provide resilience to storm events.

b. by 2040:

1. Flows and levels in freshwater bodies are sufficient to protect the values of ecosystem health, human contact, threatened species and mahinga kai.

2. Water quality is maintained where already good, and improved where degraded for all freshwater attributes from the baseline state.
3. Degraded freshwater systems and habitats are rehabilitated and restored so they support mahinga kai, and threatened species begin to recover
4. Measurable reductions in human-induced sediment discharge have been achieved.
5. New water infrastructure and replacement of existing water infrastructure is resilient, mauri-enhancing and where practicable nature-based.

c. by 2050 to 2080:

1. Water quality is improved from the baseline state for all attributes and wherever practicable is above any national bottom line.
2. Freshwater bodies are accessible and safe for swimming, recreation and mahinga kai gathering to the fullest extent practicable.
3. Freshwater habitats support a healthy and diverse aquatic ecosystem.
4. The operation of water infrastructure is resilient, mauri enhancing and where practicable nature-based.

Pg. 21 of Setting our direction Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Auckland Council Proposed vision for inclusion in the Regional Policy Statement for the Kaipara FMU:

8.1. Proposed vision for the Kaipara FMU

The following text is proposed to supplement the region-wide vision with a particular focus on the Kaipara FMU. It should be read in conjunction with the region-wide vision in section 6.1.

For all timeframes, as well as achieving the Auckland-wide vision, in the Kaipara FMU:

1. The Kaipara catchment is managed holistically acknowledging the whakapapa / connections of freshwater, mountains, whenua and moana, mana whenua and communities (ki uta ki tai) that cut across council jurisdictional boundaries.
2. The water bodies in the Kaipara catchment are managed as living and connected entities where local communities actively engage in their restoration and protection to restore the health and mauri of Kaipara Moana.
3. The dune lakes are healthy and thriving.

Pg. 25 of Setting our direction Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Auckland Council Proposed vision for inclusion in the Regional Policy Statement for the Hauraki FMU:

9.1. Proposed vision for the Hauraki FMU

The following text is proposed to supplement the region-wide vision with a particular focus on the Hauraki FMU. It should be read in conjunction with the region-wide vision in section 6.1.

For all timeframes, as well as achieving the Auckland-wide vision, in the Hauraki FMU:

1. The Hauraki Gulf catchment and all its freshwater bodies are understood to be a living and connected entity, indivisible from Te Moananui-ā-Toi / Hauraki Gulf.
2. There is restoration and creation of wetland systems to trap sediment before it reaches coastal waters.
3. The freshwater systems of the islands of the Hauraki Gulf are protected and if necessary, restored for present and future generations to sustain cultural, spiritual, social, economic and kaitiaki needs.
4. The freshwater systems of the Hunua Ranges are protected and treasured for their many values including their ecosystems, recreation, and drinking water supply.

Pg. 27 of Setting our direction Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Auckland Council Proposed vision for inclusion in the Regional Policy Statement for the Manukau FMU:

10.1. Proposed vision for the Manukau FMU

The following text is proposed to supplement the region-wide vision with a particular focus on the Manukau FMU. It should be read in conjunction with the region-wide vision in section 6.1.

For all timeframes, as well as achieving the Auckland-wide vision, in the Manukau FMU:

1. The Manukau catchment and all its water bodies are respected by its communities by being well known and visible, with access restored.
2. The rich cultural history of waterways of the Manukau catchment is known and celebrated with mana whenua exercising mana whakahaere and kaitiakitanga so that it is safe to source and eat kai, to swim and safely pursue traditional and contemporary activities and tikanga (including tauranga waka, portage routes, and connections with cultural heritage).
3. The legacy of degradation of waterways has halted and reversed.
4. The Manukau catchment management actively supports that Te Manukanuka o Hoturoa, the receiving environment of the Manukau Harbour, has mana and prestige and its mauri is enhanced, revitalised and protected.
5. The freshwater systems of the Waitākere Ranges are protected and treasured for their many values including their ecosystems, recreation, and drinking water supply.

6. The Pukekohe Specified Vegetable Growing Area has a healthy freshwater environment where its wellbeing is protected and enhanced while supplying fresh vegetables for the health and wellbeing of the peoples of Aotearoa New Zealand 7. The Awhitu lakes are recognised as part of an important ecological network of springs, streams and wetlands. 8. The Waikato River tributaries are recognised and understood as being indivisible from the Waikato River, te mana o te Awa, and the whakapapa of mana whenua.
Pg. 29 of Setting our direction Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

9. The essential freshwater package aims to start making immediate improvements to freshwater. These improvements include the fundamental principles of TMOTW, te mauri o te wai and all compulsory values.
10. The proposed timeline and vision for Auckland-wide is inconsistent with the requirements of the NPSFM to give effect to TMOTW and to the NOF framework. Long-term vision setting does not necessitate the time frame out to 2030, 2040 and 2050 for outcomes and changes that can occur either immediately or within 5 years.
11. Each of the visions does not clearly articulate how the compulsory values will be achieved or given effect to. Especially in the case of the compulsory value of Mahinga kai, there is an absence of how this value is given effect to.
12. Proposed outcome / Auckland Unitary plan objective for Mahinga kai:

Mahinga kai	The mauri of freshwater systems is protected. Mana whenua have access to freshwater bodies and mahinga kai.
Pg. 33 of Setting our direction Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland	

This outcome is unclear and inconsistent with the Appendix 1A – Compulsory values of the NPSFM:

4 Mahinga kai Mahinga kai – kai is safe to harvest and eat. Mahinga kai generally refers to freshwater species that have traditionally been used as food, tools, or other resources. It also refers to the places those species are found and to the act of catching or harvesting them. Mahinga kai provide food for the people of the rohe and these sites give an indication of the overall health of the water. For this value, kai would be safe to harvest and eat. Transfer of knowledge is able to occur about the preparation, storage and cooking of kai. In FMUs

or parts of FMUs that are used for providing mahinga kai, the desired species are plentiful enough for long-term harvest and the range of desired species is present across all life stages. Mahinga kai – Kei te ora te mauri (the mauri of the place is intact). In FMUs or parts of FMUs that are valued for providing mahinga kai, customary resources are available for use, customary practices are able to be exercised to the extent desired, and tikanga and preferred methods are able to be practised.
Pg 40 National-Policy-Statement-for-Freshwater-Management-2020.pdf (environment.govt.nz) (updated February 2023)

13. Mahinga kai is simultaneously a cultural connection of tangata whenua with the environment, and a framework of tools, resources and environmental monitoring. To reduce the compulsory value of Mahinga kai to the proposed objective is inconsistent with giving effect to TMOTW and the ability for tangata whenua to be actively involved in freshwater management as stated in "3.4 Tangata Whenua involvement" of the NPSFM.
14. Each FMU and the Auckland-Wide long term vision need to be consistent with the NPSFM and the RPS B6 to give effect to the principles of te Tiriti o Waitangi, and to recognise the role of tangata whenua mana, values, knowledge systems, tikanga and kawa.
15. Each FMU needs to provide for the involvement of tangata whenua as an objective as it is a requirement of the NPSFM. This needs to acknowledge the local context/approach of tangata whenua. Because it is a requirement for Auckland Council to engage with Mana Whenua, objectives and policies need to include mechanisms for Mana Whenua to articulate what the overarching principle of TMOTW means to them in their rohe.
16. To give effect to TMOTW there must be objectives and policies that:
    a. Enable the articulation of TMOTW and compulsory values by Mana Whenua
        a. And achieve this within a reasonable timeframe
    b. Set the monitoring of both the NPSFM and freshwater by Mana Whenua as part of the objectives and policies.
        a. This must be equitable alongside monitoring of other compulsory values in order to be consistent with te Ao Māori and involving Mana Whenua.
17. Attributes and flows, limits, action plans and methods:

    This section is blank on how mahinga kai as a compulsory value is given effect to through the NOF framework of 1) attributes and flows, then 2) limits, action plans and methods.

18. There needs to be articulation of how the values of mahinga kai move from a value to methods. In the same way that Human contact was an example. The NPSFM 3.10 Identifying attributes and their baseline states, or other criteria for assessing achievement of environmental outcomes states:

1) For each value that applies to an FMU or part of an FMU, the regional council: a) Must use all the relevant attributes identified in Appendix 2A and 2 B for the compulsory values listed (except where specifically provided otherwise); and b) May identify other attributes for an compulsory value; and c) Must identify, where practicable, attributes for all other applicable values; and d) If attributes cannot be identified for value, or if attributes are insufficient to assess a value, must identify alternative criteria to assess whether the environmental outcome of a value is being achieved. 2) Any attribute identified by a regional council under subclause (1)(b) or (c) must be specific and, where practicable, be able to be assessed in numeric terms. 3) Every regional council must identify the baseline state of each attribute. 4) Attribute states and baseline states may be expressed in a way that accounts for natural variability and sampling error.
Subpart 3.10 pg 17. National-Policy-Statement-for-Freshwater-Management-2020.pdf (environment.govt.nz)

Table 7. Example of applying the NPS-FM to move from a value to methods

Pg. 42 of Setting our direction Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Value	Environmental outcome	Attributes	Targets	Limtis and methods
Human contact	Water quality and water quantity in freshwater bodies provides for people to connect safely with water through swimming and other water-based	E. coli (rivers and lakes) Cyanobacteria (lakes and Lake-fed rivers)	Concentration and % of exceedances Concentration	4. Rules for wastewater systems and discharges 5. Riparian management 6. Stock exclusion 7. Freshwater Farm Plans

	activities, except in locations where the public safety or cultural values risks mean contact recreation is inappropriate			

A possible example for mahinga kai would look like:

Value	Environmental outcome	Attributes	Targets	Limits and methods
Mahinga kai	Tangata whenua are able to practice mahinga kai at locations they identify to provide for their nutritional, cultural, and environmental monitoring needs.	Locations where mahinga kai can be practiced Materials to practice mahinga kai Monitoring and decision making informed by mahinga kai	Where mahinga kai can be practiced, the quality of the kai gathered The quality of materials and tools used in mahinga kai Decisions and processes that are informed by Mana Whenua through Mahinga kai	• Riparian management • Auckland Council funding for monitoring • Mana Whenua aspirations and progress monitoring for mahinga kai locations

20. The Objectives and policies of the NPS-FM must provide for the ability of tangata whenua to engage to the extent that they choose to. This includes how Mana Whenua can articulate the values, environmental outcomes, attributes, targets, limits and methods for the compulsory values.
21. Definition of the baseline state:

Each of the attributes need to be assessed against the baseline state. This then determines the banding A-D of the attributes. The NPSFM 3.10 identifies the baseline state as 2017. Auckland Council must include the history and experiences of Mana Whenua in establishing the banding of the values. Setting the baseline state at 2017 severely limits the context of the quality and values that need to be given effect to in the NPSFM. In order to enable Mana Whenua to participate to the extent that they wish, there also needs to be the ability for Mana Whenua to include their history and experiences.

22. Clause 3.2 Te Mana o te Wai / 3.4 Tangata whenua involvement

    22.1. A key policy is for the engagement of tangata whenua, iwi and hapū to the extent that they wish to. This needs to be more clearly reflected in the policy wording so that this is also given effect to.

    22.2. There is also the requirement of monitoring both resource use and the state of freshwater. This monitoring must include Mātauranga Māori and the involvement of tangata whenua in this process. This is because the concepts and values that are being given effect to in this regional policy statement come from a te ao māori worldview.

23. Māori freshwater values:

Tangata whenua have the expertise and mātauranga to identify Māori freshwater values and who share or hold certain information and knowledge.

24. Engaging with tangata whenua:

    24.1. The process of engagement, active involvement, collaboration and decision-making should be mana enhancing. This should be informed by the principles of mana whakahaere, kaitiakitanga and manaakitanga as set out in clause 1.3(4) of the NPS-FM.

Organisation (if applicable):

Local Board: Franklin

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   I believe all our fresh water systems are wet precious. I believe they need to be cared for and made safe for drinking (not to swimming standard but drinking standard). Where I live more and more stuff is being discharged legally and all that happens in that tue standards get lowered to accommodate this. I want better environmental outcomes with less pollution and dumping of treated effluent into the waterways

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   As above. Stop dumping partially treated products. Other places manage to treat to potable standards ..:.: and then discharge ....: not just a system of “swimmable”

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

I do not want water bodies like streams to be amenities to be looked at …. I want to be able to swim on them and have my kids drink the water without risking getting sick.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    I don't know

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Yes

    Tell us why:

    I think they should be higher than what they are

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

I strongly disagree with the council adding more treated effluent to other local stream. I strongly disagree with the review looking at adding another 20000 houses waste into this. The local system of pipes etc can’t cope and hasn’t been checked to mitigate factors from rain and storm etc. when a leak in the system create a heath hazard in the stream and or ocean the safe swim website doesn’t seem to get updated. I feel our children deserve more protection as do our waterways and all who live there

#552

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Franklin

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial

discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Auckland Council has the idea that water is very important to Maori only. Why are you assuming this? Very racist. Maori are not indigenous to this land. We are all immigrants and we should all be treated the same. Shame on you Auckland Council. Bringing apartheid to this country.

   The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   These are Racial and separatist. We are all equal and this needs to be reflected in ALL laws, regulations and Policies.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   If areas are to be closed, they must be closed to ALL. Treaty Entitlements are blatantly abused and Maori are the worst abusers.

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Commercial food growers are critical to the healthy survival of all people. Serious inputs are needed to continue this ability well into the future. Maori have no first right to land. they are not Indigenous. Like myself they immigrated here!

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Better control over boating. As boatees ourselves, we believe there should be a quality control over where they launch and the state of hulls. Cleanliness spot checks at ramps may assist.

    Berth moored boats are less likely to move stuff, in my opinion than trailer boats moving around the country.

#694

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I do not agree with the loaded questions we are one people & all dependent on water quality.

   No one owns the water it is for everyone to share regardless of colour or race.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Other

Tell us why:

Loaded questions again we are one people to share the land sea & water

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Agree

Tell us why:

I understand freshwater sites are for the benefit of all races all people.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   As long as it stays in the control of the council, and not some mickey-mouse unelected entity like 3 waters.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

As long as it stays in the control of the council, and not some mickey-mouse unelected entity like 3 waters.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The water belongs to ALL the people, not a pre-selected minority.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

As long as control stays under the umbrella of council and does not pass into the hands of 3 waters or some greedy international conglomerate.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the liquid of all life on earth, no one race or religion should have more say than anyone else.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Water is for everyone nobody should have more say than anyone else. We are one nation.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

We have an adequate system in place already no race based values should apply.

We need less beauracracy not more.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

We have an adequate system in place already no race based values should apply.

We need less beauracracy not more.

7. Do you have any feedback on the proposed environmental outcomes?

We don't need anymore bureaucracy compliance costs or hoops to jump and certainly no race based racist policies.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

All waterbodies are equally valuable to all peoples no race policies should apply.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

Status quo in the current poor economy is fine less council spending on new policy and more work on existing already place policy please.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

Our pollution comes predominantly from residential areas with a very low proportion from rural activities work on policing urban pollution and support the work already being done rurally stop vilanising farmers target only the non compliant rural offenders.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

Runoff from our roading infrastructure and public spaces is appalling.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

It is what it is nature will prevail.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Agree but within current systems that frankly just haven't been consistently applied consistency is key dreaming up new rules and standards might create new public service jobs but just annoys rate payers as we already have rules and standards.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Work with growers on the whole all the growers i know are already improving systems and technology at huge costs to them adding more unnecessary compliance costs will only hinder the progress already being made.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

I agree but increasing compliance costs to stake holders only hinders the progress already being made.

Work with people avoid dictating to them.

17. Are there other management options outside of those listed that you think we should consider?

Highlight social responsibility and reward proactive initiatives.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

Agree with the initiative but strongly disagree with a race based approach to it.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

Lots of us have already complied why change now.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

In high demand areas users must justify allocation or lose any excess allocation.

21. How do you think we should prioritise allocation where or when water is scarce?

Public health first and foremost.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Littering needs massive unavoidable prosecution.

Your feedback

1. What do you think about the direction we are proposing in the region-wide vision statement?

Strongly do not support

Tell us why:

No matter what culture we are from, we are all interested in clean healthy tap, stream, lake and wetland water. It is wrong to presume Maori have a more special relationship with water than any other ethnicity. I oppose any long-term plan or vision that provides different rights for people and communities based on race.

All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater. We all care.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Please ensure this improvement policy is not race based as we are all NZ'ers and all care equally about the purity of our water.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

   Your long term vision includes special treatment for Maori people. I am a Maori although I object yo us being given special treatment for anything. Water is essential to all life and everyone should have an EQUAL say.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

   Maori cultural values shouldn't come into it. Everybody's vales should be recognised equally.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Maori or any other ethnicity shouldn't have greater involvement in decision making, monitoring, management, or allocation simply because of the colour of their skin or ancestry. All people are all the same colour under our skin. All people of New Zealand should have the opportunity to have a special relationship with N.Z waters and express our ambition to improve our waterways. No one should be more entitled than another, because of their ethnicity or heritage. The rights to fresh water and protection of freshwater policies and rules should apply to ALL peoples equally and must not be divided by ancestral lines. This is unethical and only has origins in apartheid and discrimination. Stop this madness. We can honour the waters, bless the waters, and respect the waters of our land in Maori and English, but we need to recognise and appreciate that N.Z waters are for all people.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Fresh water is essential to ALL Kiwi's. There should be NO priorities given to those of one race over another. All decisions must be based SOLELY on sound, proven scientific practices and measures. There is NO place for so called "treaty" entitlements or Maori folklore when it comes to critical natural requirements such as water. to do so would be racist, separatist and divisive. Stick to what you have been elected to do: preserve and enhance water for everyone using international best practice. Do not be deluded by the Woke minority that think democracy is to let a handful of unelected, self serving people make the decisions that will enhance their lives to the extreme detriment of the vast majority. Democracy is more than just voting on election day. Democracy is what makes NZ so special. It is how we think and act. Do not destroy what has taken hundreds of years to build.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Maori should have equal rights to water, no more no less. Any management that favours one race over another is racist and separatist, which have no place in NZ. Why should one race of people (who were not the first here anyway) who came on an earlier boat / plane to those who followed be given special favours? This is racist in the extreme. NZ is better than this.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water .

   The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have “stronger ambitions to improve our waterways” are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   I do not believe any racial group has more say than any other.

   Historically Māori were not ecologists,camping out at river mouths draining the natural resources,there was no sewerage systems until the Europeans came.

   There should be no special weight given to any submission due to race.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Other

   Tell us why:

   Pollution should be reduced as much as possible, how ever no group should have control or say over other residents and why is this written in non correct English interspaced with

Māori,surely it is better understood in English or Māori depending on what language the resident is fluent in.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Other

Tell us why:

Please refer to number 6

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

Please refer to number 6

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

Once again ,Māori have no more cultural relationship with the sea or rivers than any other person ,should not get preference,why where they consulted first,historically Māori had little ecological knowledge before arrival of Abel Tasman

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Firstly thank you this is the first reference that tells me what Tāmaki Makaurau means.

I believe that the water ways should be improved ,but a cost benefit analysis should be applied,Funding should be provided to residents to improve run off of contaminants and private land should not be taken from residents.

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

We are all New Zealanders nobody has a monopoly on anything that belongs to us all.Tribal rule has no place in a modern society.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Other

Tell us why:

In principle, however no group is to have different representation. All people in Auckland are equal.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

Common sense to apply.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

Overall fresh water quality has been effected by commercial activities, and continued regulation required by local government to ensure they comply going forward.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

Yes within practical levels . Anzec standards are tight.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

Natural cooling will take effect.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

Water conditions must be set by the majority and minority groups like Moari should only be submitter like all Aucklanders

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Long term strategy required, but common sense must apply to our food source.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Everyone must contribute to the result.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

This is only a council decision. No groups have special rights and we are all just submitters.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Only where the activity changes. Everyone deserves an even and consistent set of regulations.

21. How do you think we should prioritise allocation where or when water is scarce?

Households then animals

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Yes. No group is special in NZ . We are all equal and deserve equal rights to water as it is the essence of life All references to special groups like Moari, must be removed from legislation.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Council documents reveal a persistent presumption that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways".

   Water is the essence of ALL life, so everyone has an interest in healthy water. All Aucklanders should be equal stakeholders in how freshwater is managed in their city.

   Auckland Council presents the idea that Māori are entitled to be involved to a much greater degree in the decision-making, monitoring and management, plus allocation, of Auckland's freshwater.

   They're now asking for Aucklanders' input to this new policy, yet engagement with mana whenua has already been undertaken through a separate process.

   I don't claim to be an expert on the scientific or regional issues covered by the Council's proposals, but I do recognize the potential for frightening consequences from giving exclusive, unaccountable rights over water to one sector of the community.

We say people must not be divided by ancestral lines. Policies and rules must apply to us all equally.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Disagree

Tell us why:

Council documents reveal a persistent presumption that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways".

Water is the essence of ALL life, so everyone has an interest in healthy water. All Aucklanders should be equal stakeholders in how freshwater is managed in their city.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and we all have an interest in healthy water - in streams, culverts, lakes, wetlands or out of a tap.

   Auckland Council's vision supports the idea that water is more important to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared with the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision of freshwater management plan, there must be no racial discrimination involved in the decision making, monitoring, management or allocation of the region's freshwater. Preference should not be given to one racial or ethnic group. Auckland City Council's job is to represent all its citizens equally.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

The Setting of our Direction document places Maori cultural values at the top of a list of considerations for managing “outstanding waterbodies”. I oppose any policy that prioritises one race or culture’s values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau’s river, streams and lakes?**

    Tell us why:

Setting up plans and rights to water based on a presumption that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" is treating the rest of the population as ignorant and not part of the plan.

Please give the rest of the population the equal status that we all deserve.

Auckland needs to be for everyone, and a place where everyone is equal.

Water is the essence of ALL life, so everyone has an interest in healthy water. All Aucklanders should be equal stakeholders in how freshwater is managed in their city.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Water is important to all of us, so we do not need any additional note about "particular importance to Maori"

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#1139

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Franklin

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. and is inherently racist and very offensive. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are frankly rediculous and simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group as this is racist and completely unacceptable in our country.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises

one race or culture's values over all other races or cultures in relation to the management of our freshwater.

The racism and racial division that has permeated our country in the last three years simply must be reigned in, certainly not promoted by public entities.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   water management should not be allocated along racial lines.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Maori culture does nothing to protect the waterways.DOC would be a better ambassador to cleaning up the waterways than Maori.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Farmers are already doing a great job of fencing off waterways, it is the council who need to up their game regarding wastewater upgrading.The latest wastewater contamination of the harbour is a classic example of poor maintainace of the wastewater system

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Other

    Tell us why, and if you think there are other considerations we should include?

    agree in principle, but who will pay for this initiative, Council,Maori groups,landowners.Also should you not be looking at experts other than mana whenua(it does not say that in your question) ,what experience have they got on this issue.

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    No

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Firstly the name should be in English so we all know what this is about. Every Nzer is concerned about water, the treatment, the seabed, the marine life, the long term goals of the Council. To cloak this in a name only few Maori understand does not make any sense. Water is the lifeblood of us all not just Maori. Everyone needs to understand and be on an equal understanding of what is at stake, there should be no bias towards Maori and to suggest that Maori have a better understanding than other New Zealands is discrimatory.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   The documents are mostly wonderful - but they again assume that Maori have more stake in the outcome than every other New Zealander. There are Maori phrases which I do not

understand "mahinga Kai - mana whenua have access to freshwater bodies" does this mean that Maori have rights that no other Nzer has? Yes. We are all NZers no need for any of this. All have equal rights. All restrictions should be for all. Because of this I have to disagree

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

The documents are mostly wonderful - but they again assume that Maori have more stake in the outcome than every other New Zealander. There are Maori phrases which I do not understand "mahinga Kai - mana whenua have access to freshwater bodies" does this mean that Maori have rights that no other Nzer has? Yes. We are all NZers no need for any of this. All have equal rights. All restrictions should be for all. Most NZers can claim Mana to NZ somewhere too. Because of this I have to disagree

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

The documents are mostly wonderful - but they again assume that Maori have more stake in the outcome than every other New Zealander. There are Maori phrases which I do not understand "mahinga Kai - mana whenua have access to freshwater bodies" does this mean that Maori have rights that no other Nzer has? Yes. We are all NZers no need for any of this. All have equal rights. All restrictions should be for all. Because of this I have to disagree

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Other

Tell us why:

Of course resilience should be included. No use fixing something and letting it degrade again. In this question again - what is wai tapu. Cant find it in the glossary either! These documents should all be in English - Mahinga Kai - No race discrimination

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes all NZers value the rivers, lakes and streams and the foreshore and seabed.

7. Do you have any feedback on the proposed environmental outcomes?

If we could drop the Maori out of these documents, I shouldnt have to rip down to the glossary every so often to figure out what they mean. Manu o te wai - governing of water. whats wrong with that? Very frustrating to read.

The documents are great and fully support a rewrite as above.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

All NZers have a culture of some ethnicity. We all live in NZ. This is singling out one race only.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

All rivers, streams, lakes should be free to swim - however stock must be kept out of all waterways and this should be the first action before restriction on humans.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

If 2017 is the earliest we have then that would be our baseline. However is there is earlier data, we should look to go back to that.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

Actions taken have improved pollution however stronger measures should be imposed on stock in stream/river sources.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

encourange more waterway plantings, incentives to farmers to plant more trees in waterways and their pastures also.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

If good waterways can be improved, advice should be available on how to improve further. Mana whenua (Maori) are not the only ones with strong ambitions to improve water!

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

It made sense to grow produce in an area that has unique growing soil - Pukekohe. Housing has been allowed to erode a lot of our foodbowl which doesnt make any sense. Working with growers, Universities (Lincoln perhaps) would identify how to help grow food without excess nutrients being added.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Give growers/farmers time to adjust to permanent reduction. Give them a summer/winter allowance after that. Our streams, rivers, lakes are important. Suggest diversification on the farm. No Hawkesbury River in NZ please.

21. How do you think we should prioritise allocation where or when water is scarce?

If a programme is adopted now on probable lowest levels, work with farmers in the catchment and get their advice. Consultation with allocated properties in a particular area is the way forward.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I think your documents are great.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I strongly oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I strongly support protecting our Auckland water sources from pollution and capture by special interest groups to the detriment of anyone living in this area.

   I strongly object to the notion that anyone has a greater need for good water, be it fresh or salty, than anyone else living in this country.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   All of the wording and vision revolves around one races views (Maori) and seems to imply that all other peoples do not have the same regard for freshwater resources. This is not correct. I grew up in Orakei so understand full well that we need to be treated as New Zealanders, no matter our race.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

We have lived near Tahuna Pa for approx 43 years and for all of that time the Maori lands in this area have not been utilised by Maori, but leased out to other races for profit. I disagree with clauses 10.1 2. and 4. regarding Maori mana - over all these years they have shown no mana for their land. There is too much emphasis on doing things the Maori way. We are all New Zealanders and care equally on all these issues.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Other

Tell us why:

All these ideas are excellent but must be worded to include all Aucklanders - less references to Maori tikanga/mana.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Wording needs to include all peoples, not race.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

I strongly disagree that Maori cultural values should be so prominent in Auckland City Council planning documents - Yes, Maori deserve to be heard, respected for their tikanga and mana whenua ideas, but Auckland is made up of many different races and they need to be treated as equals. No one race owns freshwater resources.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   People must not be divided by ancestral lines. Policies and rules must apply to us all equally.

   All Aucklanders should be equal stakeholders in how freshwater is managed in their city.

   It is absolutely wrong that mana whenua has already been undertaken through a separate process.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life, and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. For me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The 'Setting Our Direction' document places Māori cultural values at the top of a list of considerations for managing ‘outstanding waterbodies’. I oppose any policy that prioritises one race or culture’s values over all other races or cultures in relation to the management of our freshwater.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Makes sense for us all.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is too crucial for the Council to base its management on race. Everyone in Auckland relies on freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

The council is being too woke for its own good and ours.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

As the new government has undertaken to review the Labour goverment's Fresh Water Policy , Auckland Council should postpone this consultation and any decisions until new Government direction is given.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Water belongs to every single person. Maori have no exclusive rights to any consultation or control of water. Three Waters is due to be repealed because of the so called ownership of water and assets by Maori. It is alarming to see Auckland Council trying to bring in Maori participation in water when the general population are against this very idea.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

Farmers are already doing their best to ensure waterways are protected. The general public needs to be aware that polluting the waterways with general rubbish is not acceptable.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Ratepayers need better communications from Auckland Council on significant matters. It is almost as though Auckland Council are trying to bypass consultation especially with regards to water and Maori.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   I refute the comments made that would separate Māori out from the rest of the nation as being of special entitlement. All Aucklanders should be equal stakeholders in how freshwater is managed in their city. Giving special significance or rights to Māori is simply creating apartheid. We are one nation and no one group should have any rights over any other person when it comes to water management.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

I don't know

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Agree

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I agree with the view of protecting our water supply, I disagree strongly that Maori should have a greater degree of input or say than anyone else

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   I agree but again , Maori should not have an overarching higher level of control on direction and policy, policy and direction should be set by using science

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

Tell us why:

I agree but again , Maori should not have an overarching higher level of control on direction and policy, policy and direction should be set by using science

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

I agree but again , Maori should not have an overarching higher level of control on direction and policy, policy and direction should be set by using science

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

It was clear with floods etc that we are under prepared

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

People value the ability to use amenities

7. Do you have any feedback on the proposed environmental outcomes?

Why to you keep referring to Mana Whenua world view , it has no relevance when setting policy for all New Zealanders, if you say instead Maori scientists with active and profound knowledge and experience in managing degradation in soils , streams and water ways including ground water, then that should be included.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

I agree with protection and improving water quality, but disagree strongly that any race should have a greater or lesser access to or specifically for only one race.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

I have seen it degrade in my lifetime

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

With great intensification of our urban environments , run off into our streams will become a bigger problem.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I live in Pukekohe and have lived in the growing area, with market gardens next door, our food security is key, but you need to work with growers not just enforce regulations that you have no knowledge of, the sprays and fertilizers they use if they are toxic or bad for the environment, suppliers need to come with options and the science needs to keep up so we have phase out of old supply of products while introducing products that are better for the environment if they exist currently.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Again you need to work with Farmers and growers as well as small block holders and get them on board, every cost you enact comes back to the consumer

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Again remove references to Manu Whenua, it is a fallacy to think that just because you are Maori that you have an intrinsic connection to all things, what is fact is that some Maori are more likely to go through the courts for exploitation of our resources taking undersized Kina and crayfish in vast numbers, taking eel and salt water fish without consideration of regulations and laws that outline catch numbers and size of fish. I do accept that some Maori do have a connection and this should be celebrated but like all New Zealanders there is a small population of exploiters and that includes Maori.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

High productive land needs water to grow, but the way they use it and the times they use it should be factored in, water use at night gets the full benefits, ensuring that they use the water with the best tech and equipment available means they lose less, they need to treat water not as just a commodity but something that is essential .

21. How do you think we should prioritise allocation where or when water is scarce?

Food security first, and second don't urbanise in areas that we don't have water security

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Other

   Tell us why:

   No one racial group should have any more say than any other, we are all one people and we all have the same interests in our water assets, allowing over representation of one racial groups interests over others is un democratic and wrong.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Again how are one racial groups cultural values anymore significant or important than any other New Zealanders? All this is doing is dividing us further based on race. No one race as a whole contributes more to our multicultural society than any other, so why give one preferential treatment?

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

Seems the majority of issues that lead to these outcomes in recent memory are a direct result of undermaintained infrastructure, we've got watercare etc CEO's getting payed exorbitant salaries whilst our water and sewerage lines leak like sieves ... seems a massive imbalance of priorities and resources is to blame... sort that out!

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   I do not support the strong emphasis on Maori participation over and above others, we should all be equal and have an equal say. I do not believe one particular race has a more important association with water than others. I have difficulty in accepting concepts of water having a life force, however I do support the intended outcomes of a healthy enviroment

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

This value is already represented in the above list. Given the outcomes will be represented as requirements in the AUP, the more that is added the more opportunity to apply ever increasing restrictions and limitations, red tape that will limit the opportunity of land owners to enjoy their property. As Auckland grows the need to look after ourselves will conflict with other desirable outcomes in terms of the environment. It is very easy to swing the balance in the wrong direction

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

This value is already represented in the above list.

7. Do you have any feedback on the proposed environmental outcomes?

As Auckland grows the need to look after ourselves will conflict with other desirable outcomes in terms of the environment. It is very easy to swing the balance in the wrong direction. I believe the needs of the people will be wider than the specifics of the 3 regions listed

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

I do not believe Maori values are significantly different or better than the values of others. I do not believe any one race should be prioritized above others

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Other

Tell us why:

It would be good to be able to improve water quality at the sites listed, but I do not believe there should be significant restrictions on other locals just so some can enjoy a swim.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

With extreme caution, Council will need to work with the locals to get a just outcome. NOT just impose outcomes via the AUP

21. How do you think we should prioritise allocation where or when water is scarce?

With extreme caution, Council will need to work with the locals to get a just outcome. NOT just impose outcomes via the AUP

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

The proposal is full of jargon and full of Maori language. I spent an age reading and rereading the same passages to try to understand. Simplify the jargon and write in english. (I accept that there are some specific words/terms that will need to be expressed in maori but it should not be that I lose the context of what is being discussed because I don't speak maori)

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   This is a divisive policy that sets up a hierarchy of privileged Mana Whenua over third class "other" communities.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

There is no allowance for either local board control or the establishment of public interest catchment groups.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

No allowance has been made for the cultural needs of non-maori.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

This has not been properly defined.

7. Do you have any feedback on the proposed environmental outcomes?

No room has been made for creative and constructive solutions to come from interested members of the public. Nitrate and sediment load are an issue, but market gardening is important to the economy and the food chain. Where can interested individuals go to work on constructive solutions?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Other

Tell us why:

If this is used for a degrowth agenda then no. If this is used to improve water quality then yes.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Other

Tell us why:

This baseline has already been done. We should not be still having to establish a baseline. Water quality monitoring has been done for decades.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

Yes if this is to find constructive ways to improve water quality. No if this is to advance a degrowth and/or car free agenda.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Other

Tell us why:

Temperature is already monitored. Yes if this is to find constructive ways to improve water quality. No if this is to advance a degrowth and/or car free agenda.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

We need to include more people in the solutions here. We need creative science based solutions. How can communities influence freshwater management in a system that buts them at the bottom of the hierarchy and provides no way to engage with Auckland Council?

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

Yes if this is to find constructive ways to improve water quality. No if this is to advance a degrowth agenda.

17. Are there other management options outside of those listed that you think we should consider?

I would like to see catchment groups and local boards to have a say with a focus on innovative and creative solutions to water quality issues.

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

Yes if this is to improve freshwater fresh populations. No if this is part of an agenda to dilute property rights.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Other

Tell us why:

Yes if this is to improve wetland area and health. No if this is used as part of a degrowth agenda.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

I would like to see more that just water take calculated but also an effort to estimate how much of the water take will eventually be returned to the system. I am concerned that we are underestimating how much water that is taken, is eventually finding its way back into the freshwater system.

21. How do you think we should prioritise allocation where or when water is scarce?

User pays. Funds could be used to help fund Healthy Waters.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

My main concern is the establishment of a hierarchy. This should be removed. All Aucklanders should be equal. Anything else is racist.

Submission on the Proposed Plan for Freshwater Management in Auckland

The proposed plan for the direction of improving freshwater has some serious flaws and is potentially a breach of most Aucklanders' basic human rights (New Zealand Bill of Rights Act 1990 sections 15, 19, 20 and 27).

In the proposal Section 4.2 Te Mana o te Wai outlines that there is a hierarchy of obligations: first the health and wellbeing of water bodies and freshwater ecosystems, second the health needs of people (such as drinking water), third the ability of people and communities to provide for their social economic and cultural wellbeing now and in the future.

While the three items are in line with the principles of sustainable development as first outlined in the Rio Declaration on Environment and Development 1992 (under principals 1, 3, 4, 7, 10, and 22) the imposition of a hierarchy is not. No hierarchy was included or implied in the original sustainable development statement nor that I am aware of in New Zealand Government documentation prior to the National Policy Statement for Freshwater Management (2020).

This hierarchy needs to be removed from both this Auckland Regional Freshwater Plan and the National Policy statement as it is implicit in the hierarchy that the rights of Maori will come first, the rights of Watercare second and other communities will be reduced to explicitly third-class citizens. This hierarchy is explicitly racist, setting up a privileged oppressor class and a disenfranchised oppressed class.

I would like to see the removal of a hierarchy in the objectives for Te Mana o te Wai. I would like to see an explicit recognition of "other communities" in line with the principles of the Rio Declaration for Environment and Development (1992).

Also, the inclusion of Maori religious beliefs and the central and driving force of this plan is a breach of the principle of separation of religion/church and state. There is no mention of other communities or of creative solutions, or of the application of science, which are all principles outlined in the Rio Declaration and should be included.

Under section 5.3 Mana Whenua, communities, and stakeholders, is the proposed goal of "giving effect to Te Tiriti o Waitangi the starting point". This is problematic as "the principals of Te Tiriti o Waitangi" has not been defined in law. I would like to see this defined first before incorporating it into this Fresh Water Plan. This would mean establishing what the principals though the national level democratic processes of New Zealand. We need a full public discussion, statute law to be drafted, debated, and passed. Also, there is no consideration for other communities either in this section or in a separate section for other communities. This should be included.

What I would like to see is a path to include "other communities" in this plan. Either, by the establishment of local catchment groups for interested members of the public, perhaps along the line of the farmer catchment groups that have been setup around the country, or perhaps through the existing Local Boards, or both. These should be empowered to make local decision for their catchments, and this would encourage creative solutions. A lack of creativity and a lack of pathways for public involvement has led to a lack of progress in ecosystem restoration.

Kind Regards,

[redacted]

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I oppose the establishment of a hierarchy which will divide Aucklanders along race lines. All communities should be considered of equal value.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

While is want to see improvements to nitrate and sediment levels in the Franklin area I do not want this to put our National Food Security at risk.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

There is no inclusion of the values of non maori communities. I would like to see this included on an equal footing.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. Tell us what you think about the draft management options being considered?

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

1. Plan includes a hierarchy that places Maori at the top, bureaucracy in the middle, and non-Maori at the bottom. The hierarchy should be removed.

2. The plan cites Te Tiriti o te Waitangi without defining the principals of the treaty. We need the principals of the treaty to be defined before they are included in any plan.

3. Pathways for the interested members of the public to get involved in freshwater management need to be included perhaps through catchment groups or through local boards or both.

Organisation (if applicable):

Local Board: Franklin

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Without water there is no life. it is of equal importance to All Aucklanders and they should be treated as equal stakeholders, and have the same opportunity to participate, if they freely chose to do so. Auckland Council's vision appears to support the idea that water is of more importance to one ethnicity is wrong. If people chose not to participate and one group dominates the consultation process and formation of the policy, then nobody can complain. However no preference should be to the views of any one group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Management of outstanding water bodies must be over seen by Auckland council. Appropriately qualified people to manage and make decisions on freshwater must all ultimately come under the control of Auckland Council. ie All charges. monitoring etc must be unde council control.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Tell us why:

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   All Aucklanders should have an equal say in the management of water. Any ethnicity having different rights to the freshwater management plan is racist and unfair.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The document places Moari cultural values as being important where as I think every Aucklanders interest in water is equally important otherwise it sounds very racist to me.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Just about everyone in Auckland can either read or speak English so why do you persist in placing moari words in these documents ? Is it to purposely confuse people so they won't submit ? How about a full on English and a full on moari version to pick from ?

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   I know Council is constrained by the last Govt's NPS-FW but I would you to know that if the new Govt gives councils greater autonomy, I do not agree with the current hierarchy of priorities, nor the principles of Te Mana o te Wai. Re, the hierarchy of priorities - we should return to a holistic balance between the 4 wellbeings; environmental, social, cultural and economic. The need for a Pukekohe Specified Vegetable Growing Area is a good example of why that balance is needed. Re, Te Mana o te Wai - these objectives suggest that superior rights are being bestowed on one sector of our community, at the expense of the rest of the community. Treat everyone the same. Everyone has a strong interest in water. Note, it is hard for people to submit when the discussion document is interspersed with te reo Maori. The problem is in the interpretation of these terms. Despite the glossary, I keep finding a variation in what these terms actually mean, and it changes the whole meaning of what we are being asked to agree to.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Other

Tell us why:

I support the Pukekohe Specified Vegetable Growing Area.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Amenity is a 'nice to have'. Its subjective and hard to pin down. There are more important attributes to prioritise. We can't afford everything.

7. Do you have any feedback on the proposed environmental outcomes?

Support the view that water quality and quantity should be sufficient for reasonable and efficient drinking water needs, both human (first) and animals (second). After that I would prioritise sufficiency for food production, cultivation, irrigation and commercial/industrial uses. The rest come if those priorities have been fulfilled and we can afford it. There is an implication that mahinga kai should be available for mana whenua only. All people should have the same access to FW bodies and the resources they provide, as long as sustainable.

Note: we should not discount hydroelectric power generation in the future. May decide small scale ventures are necessary.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Why just Maori cultural values? What about the values of Auckland's many other cultures? We all value water. Without it we die.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Other

Tell us why:

At this stage, too difficult to have an opinion. Generally, I think we need to be pragmatic and maintain Bands A, B & C while undertaking to improve Band D.

Why? Ability to pay. Also sediment is not something easily improved to a high standard in this region. We have muddy bottoms and very fine sediment. You could take a glass of stream water and find it stays suspended for a long time. We need to be realistic on how much we want to spend, fighting the impossible.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly do not support

Tell us why:

Agree we should maintain those areas which are good. Do not agree that we set ambitious targets for Band C. We need to be realistic and start with improvements to Band D. Utterly reject the suggestion that we set ambitious targets wherever water is not of the highest quality, or wherever human activity has negatively impacted our environment.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I support the Pukekohe Specified Vegetable Growing Area. I think the growers are best placed to answer this question.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

Don't think we should start getting more ambitious than the NPS requires. Lets met those requirements first. Where private landowners are asked to provide a public good, they should receive compensation. eg planting out riparian margins. There are good initiatives already

supporting landowners to plant. Remember, the biggest cost is the ongoing maintenance of these areas. Farm Plans are a good initiative but could become a monster. Beware of the costs of these documents (consultants) and minimise reviews and upgrades.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

Beware of the costs. Perhaps prioritise new projects first.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

The NPS-FW has been contentious. Recommend meeting the NPS requirements and not getting over-ambitious. 20m buffer zones for wetlands is too ambitious. It takes out a lot of productive land and you need to work out what cost that will have to the regional economy. Has a cost/benefit analysis been done? You also need to consider existing use rights.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

This is a very important issue. I'll await your further work before commenting.

21. How do you think we should prioritise allocation where or when water is scarce?

Human drinking water, animal drinking water, food production & processing (including cowshed hygiene), industrial and commercial uses first, in that order.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

No, I think Auckland has one of the best water management teams in the country. Keep up the good work.

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Franklin

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly support

   Tell us why:

   Needs to better reflect NPSFM and approach to take i.e. more consistent with NPSFM eg emphasis on direction of travel, and other national requirements eg Freshwater Farm Plans.

   Should be reflected in wording/phrasing:

   E.g 4.3 a) Restoring, preserving enhancing and protecting Te Mauri o te Wai; recognising that water is taonga and a living entity, and that when Te Mauri o te Wai is degraded, there can be no Te Mana o te Wai

   b) Taking a transformative, aspirational, and innovative approach, consistent with te ao Māori, that prioritises halting further degradation to achieves remediation and recognises that freshwater management to date has led to widespread degradation.

   d) (i) rangatiratanga kaitiakitanga and mana whakahaere

   Would like to see Vision split into current plan of 10 years (2025 to 2035) and then future vision and long-term goals from 2035 to 2080. With achievable targets and realistic timeframes in shorter current 10 year plan term.

Recognise that in practice many actions around freshwater are farm-specific, informed by eg landscape characteristics, catchment features, land use.

Recognise mitigation actions to reduce effects of cause as leading to improvement, not just requiring cause to be removed.

Improvement may be for specific freshwater attributes not all.

Important to consider private landowners property rights when developing how to implement vision.

2. What do you think about our proposed vision statement for the Hauraki FMU?

Agree

Tell us why:

2. Restoration and creation of wetland systems: Is important to implement through non-regulatory action plans where often a catchment approach can achieve better outcomes through large wetlands and constructed systems. Putting the onus on specific landowners risks an inconsistent and less effective outcome for the water.

Current joint Fonterra and Auckland Council Wet Area Reversion Project is an example of funding for the creation of wetland systems within the Wairoa catchment.

The Auckland Council Wetland Protection Fund is an example of funding for the restoration of wetland systems. Although this would be improved by taking a more site-specific project-based approach rather than the current one size fits all approach.

4. When discussing the Hunua Ranges it should be clear that it is the freshwater systems within the Hunua Ranges Regional Park that are protected for recreation and drinking water supply.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

This value is too subjective therefore hard to deliver on outcomes. How the community feels, and accesses waterways is something this plan should not focus on.

It may be more important from an urban or public space perspective but not relevant to private property. Has the potential to complicate the ability to deliver actions on farm. Although, farmers will need to deliver on continued riparian enhancement, management which would improve the amenity value.

Other Values

Hydroelectric Power: Just because there is no commercial generation in the region currently does not mean this will be the case for the whole 55 year period this vision represents. There will be an increasing need for power in the region and renewable sources of power, potentially including hydroelectric power, will be needed.

Animal Drinking Water: Should be to meet the needs of farmed animals (NPSFM), which includes eg dairy shed washdown, milk and vat cooling, and other water take that supports this food production.

7. Do you have any feedback on the proposed environmental outcomes?

Ecosystem Health: Water quality is protected maintained where it is excellent or good.

The existing activities and use within the catchment are already providing for the water quality to be in A or B band therefore a hold the line and improve where possible approach is sensible.

Habitat: Aquatic habitats and freshwater ecosystems are protected maintained where they have high value.

The migratory access of native fish (unless restricted access is protecting upstream species)

Recognition needs to be made to restricted access supporting some species to be protected from introduced pest/predatory species.

Human Contact: locations where the access, public safety issues

Added access to reflect that there are waterways where access is not provided to the community.

Threatened Species: have terrestrial and aquatic habitats

The Action for Health Waterways definition of Habitat was “the physical form, structure and extent of the waterbody, its bed, banks and margins, riparian vegetation, and connections to the floodplain.” This already includes the terrestrial portion of the aquatic habitat associated with the water system. Including the term ‘terrestrial’ in this context is unnecessary and could complicate understanding eg how far from waterbody could it apply?

Mahinga Kai: The mauri of freshwater systems is protected. Mana whenua have access to freshwater bodies and mahinga kai where parts of the FMU provide for mahinga kai gathering.

Access to areas where access is not provided should not be a focus of this plan change. The wording has been added to recognise that those parts of the FMU that already provide for mahinga kai gathering should be prioritised.

Natural form and character: the highly valued natural qualities, characteristics and features of freshwater systems that are degraded are improved, and where they are not degraded they are enhanced safeguarded.

Recognise that natural form and character is signalled to focus on those highly valued systems within the FMU rather than every system.

Enhanced is a concept used in the NPS, have concerns around the meaning of safeguard.

Drinking Water Supply: water quality and quantity is sufficient for people to have reliable and healthy clean water for drinking and reasonable domestic use

NPSFM states that the FMU meets peoples drinking water needs and makes no reference to reasonable domestic use. Acknowledge its value to people but it should not be included as domestic use is fundamentally different to the health need, I think is the NPSFM intent.

Areas Where Special Management is Required

Pukekohe Specified Vegetable Growing Area:

Support the intent of the outcome for this area. Consistency between both the Waikato and Auckland catchments of this area will be important to ensure that these areas function effectively for the purpose the NPS has identified.

The indicative Pukekohe SVGA mapping area used by Auckland Council is incorrect in places. It is imperative that this is corrected for consistency and certainty for growers and farmers alike.

The desktop application of a distinct area needs to be easily ground-truthed as part of the process. This is very similar to the original Unitary Plan situation where pine plantations and

weedy areas like gorse were identified and listed as native forest. Our experience was the desktop shading was not particularly accurate at the final level, but once in place was difficult to change.

Our current example is that the Pukekohe Specified Vegetable Growing Area cuts through Waytemore Farms and includes our sheep and beef farm with exotic and indigenous forest blocks on this part of the farm – all in steep gullies. This is a sheep and beef farm that identifies as a North Island Hill Country Farm. In fact, the hills to the south are sheep only and the highest point on the farm, with a trig. Practically, the highest and steepest parts of the farm are not really suitable for vegetable growing.

Hunua Ranges:

General support for the Hunua Ranges where special management is required. It is important to consider the boundary where the Hunua area separates into farmland.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

In principle I support the approach to reduce loads through a proportion in the absence of absolute load. On farm reductions made and demonstrated actions will be assessed on the site-specific nature of benefits such as setbacks and riparian planting. It will be difficult to account for each farm specific action. However, with good farm environment plans and industry reporting, farmers should be able to show changes in practice and efficiencies on farm that bring reductions.

The national bottom line is an adequate level for Auckland.I support a focus on changing the direction where an outcome is sitting below national bottom lines. That is, the C and D bands and in some instances the B band, otherwise maintain health.

Providing adequate timeframes is important, to be practical for farmers to make changes.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Other

Tell us why:

Riparian Margins:

Council should consider national regulations and Freshwater Farm Plans as they provide a good framework to improve riparian margins in Auckland.

Where council is proposing additional setbacks, areas of restricted land use/ grazing, this removes land from the farming system. On-going maintenance, especially weed control, imposes additional costs (including time resource) that are often significantly more long term than planting and fencing.

Ensuring wider margins to provide for rivers to short and change course over time shouldn't always apply. In heavily modified pastural catchments these waterways have often been modified and altered to fit into the farming landscape. A focus should be on establishing a prioritisation model for setbacks and areas where farmers can see the best water quality benefit, which is generally through the FWFP actions and identification approach.

Rural Activities:

Stock exclusion should not be more stringent that the national regulations.

Buffer Wider Than 3m:

I do not support this and it is a significant concern. The evidence base around buffer widths do not provide the evidence base for blanket 3, 5, 10m setbacks. It is important to provide farmers with the flexibility to increase and decrease depending on the landscape, stream attributes and the unique on farm situation. FWFPs and identification of critical source areas provide a good basis for identifying where larger setbacks are required than current state.

We recently fenced and planted a wetland with support from AC via the Waterways Protection Fund. The agreement stated a 5m setback and we agreed because it worked in that particular situation and because we were receiving a benefit with the grant. That was our choice for that site as opposed to a regulatory tool.

Restricting Expansion and Intensification:

Changes in the NPS-FM require further measurement of intensification that creates further risk of nutrient loss. When developing the regional plan, we would consider it important to provide for those pathways to intensify. They could be subject to conditions and a pathway that will ensure the risks associated with intensification are addressed by those wishing to undertake such changes.

Limits on Nutrient Discharge Volume, Catchment Nutrient Loads, or on Fertiliser Application:

As for proportionate reductions for nutrient loads, I would not support nutrient limits being set at farm level through this plan change. I am concerned about the proposal to allocate nutrients and would strongly oppose any proposal to allocate nutrients to a property level. There are no available tools, and the first generation NPSFM plan changes are about

improvement, not allocation. I support the use of sector specific GMP surrounding fertiliser which includes right time, place, rate and product which has both economic and environmental benefits.

Identify Alternatives To Current Nutrient Practices:

The farming industry already supports farmers to achieve more efficient nutrient use on farm. Better efficiency results in less risk of nutrient loss to water. The dairy industry has actioned requirements and directions to do so through the Dairy Tomorrow strategy.

FWFPs and GMP: The role of FWFPs and Good Management Practices are going to be critical to improvements made in the Auckland region.

Work done by industry through the best dairy catchments program demonstrate the improvements management changes have made to several key dairy catchments to date. This is all through non-regulatory means and is a continuous improvement occurring without regulation. The Fonterra and Auckland Council Wet Area Reversion Projects can be added to the list of existing schemes.

Wastewater and Stormwater Management:

I support permitted activity pathways for rural wastewater and stormwater requirements. As earlier in this submission, I support consistency between AUP provisions and updated guidance documents for stormwater and on site wastewater. This should be sympathetic to the effect that waste water and stormwater have on water quality. In terms of setting limits on the discharge volume, and instead concentrations of nutrient loads, there are concerns around nutrient loads and allocation and how this will be regulated and enforced.

Land Disturbance/Earthworks Activities:

Land disturbance and earthworks activities are fundamental to farming operations. Once again, the approach taken needs to be comparative to the effect being addressed. For example, the consultation document discusses requiring land disturbance on small sites to be regulated and managed with sediment controls that are the same as for large scale developments. This is unfair, but also unnecessary given every site is different, and the activity being undertaken varies in scale. Farm scale earthworks typically would be considered small scale (depending on the works being undertaken) and provision for farm scale earthworks should be provided for as a permitted activity, with some requirements around sediment and erosion control.

Freshwater Farm Plans:

A specific catchment context is better than region-wide or even FMU regulations. FWFPs encourage identification, understanding of environmental challenges and planning for improvement.

any additional regional farm plan requirements beyond these may integrate (the consultation document suggests that alternative requirements may be made through AUP provisions). Careful consideration needs to be given to transition arrangements and to integration to ensure that farms do not end up having to comply with two different regimes.

I am concerned about the additional and unnecessary cost and uncertainty if we have to comply with two separate requirements intended to achieve the same outcomes. Council needs to avoid the unnecessary duplication of regulations that will be covered in regulated freshwater farm plans to avoid placing unnecessary regulatory burden on farmers and consequentially removing their opportunity for tailored approaches to manage their on-farm risk.

It is important for AC to recognise that existing regulatory and non-regulatory farm plans reflect a significant body of work that has been undertaken to improve

environmental outcomes and a significant investment by many farmers. We consider it critical that any national farm planning regime takes into account and builds on the work that has been done to date, to ensure invested resources are not lost and regional variations are enabled. We also note that B+LNZ is actively involved in the farm planning space, the environment is an integral part of this, and they see value in farm planning and encourage farmers to have a farm plan either through our own set of resources, or that of the New Zealand Farm Assurance Programme.

Auckland Council should not incorporate existing voluntary farm plans into a regulatory framework, particularly within a short timeframe. Voluntary commitments made by farmers should not be translated into enforceable regulation, as doing so may disincentivise the uptake of some voluntary actions to the benefit of the environment contained in farm plans.

Rivers and Streams:

I understand that approaches under consideration include maintaining AUP non-complying activity status for river reclamation, removing regulatory barriers to stream restoration, aligning AUP definitions with national definitions, promoting community stream restoration, and actions in the fish passage action plan to remove fish barriers on private land. We support consistency with national definitions and encourage council to think about consistency with the NES-FW for activities (as opposed to more stringent requirements) – this avoids confusion, but also encourages Council to think about the issue being addressed and reasoning for more stringent provisions.

Lake Management:

Support at a high level lake specific management approaches to respond to the different characteristics of lakes. Possible approaches include provisions for contaminant load management, nutrient management, and non-regulatory methods to remove pest fish and invasive plant species (already underway in some lakes). As previously highlighted, further information is sought around any contaminant load management and what this approach may look like at an FMU level. I encourage initiatives to remove pest species and invasive plant species and would like to see AC play an active role in addressing these issues.

Extent and Value of Natural Inland Wetlands:

I support the integration of national natural inland wetland regulations (NES-F) into the AUP to simplify the regulatory framework. Consistency with national regulation and avoiding duplication in the AUP is paramount.

I fully support the removal of regulatory barriers for the restoration of natural wetlands. This can be an area of frustration for farmers, when faced with costs and regulation while attempting to do the right thing in restoring wetlands. It is not just the regulatory and cost barriers that impede farmer action in this area. Another barrier is where wetlands are situated on privately owned land. In these instances, it may be unfair or uneconomic for a farmer to restore a wetland on their land where the benefit accrues to all landowners in the catchment, and this acts as a barrier. Where restoration of wetlands on private land will provide catchment wide benefits, Council may play a role in facilitating this restoration.

We would support further recognition for the non-regulatory constructed wetlands farmers are adopting to improve water quality outcomes, particularly where this can be recognised alongside any management of diffuse discharge requirements.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Other

Tell us why, and if you think there are other considerations we should include?

The consultation document does not have any details on ACs approach to remediation in rural catchments. Presumably there are, for example, many crossings and culverts that are barriers on farms. Council could support remediation through funding programmes and incentives, including through mutual assistance with the Ministry for the Environment.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

I support the integration of national natural inland wetland regulations (NES-F) into the AUP to simplify the regulatory framework. Consistency with national regulation and avoiding duplication in the AUP is paramount.

I do not support maintaining or increasing the stringency of requirements beyond the NES-F. For example, the 20m AUP vegetation removal setback should be reduced to 10m (refer to

Rural Activities: Buffers wider than 3m section) and there should not be a wider definition of stock.

I fully support the removal of regulatory barriers for the restoration of natural wetlands. This can be an area of frustration for farmers, when faced with costs and regulation while attempting to do the right thing in restoring wetlands. It is not just the regulatory and cost barriers that impede farmer action in this area. Another barrier is where wetlands are situated on privately owned land. In these instances, it may be unfair or uneconomic for a farmer to restore a wetland on their land where the benefit accrues to all landowners in the catchment, and this acts as a barrier. Where restoration of wetlands on private land will provide catchment wide benefits, Council may play a role in facilitating this restoration.

We would support further recognition for the non-regulatory constructed wetlands farmers are adopting to improve water quality outcomes, particularly where this can be recognised alongside any management of diffuse discharge requirements.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

I understand AC is reviewing flows and levels already set in the AUP for areas previously identified as having the highest demand for water. AC is also considering approaches for waterbodies where no AUP limit is set. AC needs to decide on its approach for setting flows and levels, and what weight to put on the first priority for ecosystem health. It is noted in the consultation document that the approach adopted may be different for different water bodies, which I support.

While I support justification of use and volumes needed for activities either already consented (or being consented), there also needs to be some flexibility for operations to look longer term and develop land that may require more water resource.

While we acknowledge and recognise the direction in NPS-FM to phase out overallocation and to avoid future overallocation, it does not give any timing for when overallocation must be phased out. This is something that should be considered as part of the FMU process (and would not support the setting of an arbitrary region-wide date). Given that the consultation document states that around 10% of aquifers are currently overallocated, and there is no anticipation of significant or widespread over-allocation of surface water compared to current AUP limits, it appears that management moving forward and how flows, levels and take limits are reviewed will have the biggest effect on people, and particularly rural water users.

21. How do you think we should prioritise allocation where or when water is scarce?

It is difficult to provide comment without knowing what approaches are contemplated (for example, any potential changes to permitted activity take volumes, activity status for water

use, region wide rules vs. FMU specific rules, etc). However, generally the setting of arbitrary and region-wide limits (without consideration of the particular catchment and waterway) should be avoided.

I support efficient allocation and use of freshwater, and would want to make sure that any policy proposals are practical for agricultural takes (particularly if there might be greater need for resource consents as a result of other policy proposals). Resource consents with appropriate 'backstops' i.e., efficiency and use requirements, take restrictions correlated to flow, up to date monitoring data, etc will allow for appropriate assessment and prioritisation. However, there also needs to be appropriate provision in the policy framework for the animal health and food safety aspects of farming operations, and the crucial role they play in food production (refer to Other Values: Animal Drinking Water).

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Waytemore Farms Limited, Waytemore Forests Limited and Kauri Hiwi Limited: Submission on: *SETTING OUR DIRECTION: NATIONAL POLICY STATEMENT FOR FRESHWATER MANAGEMENT AUCKLAND CONSULTATION DOCUMENT* to the Auckland Council submitted 2nd December 2023

WATER QUANTITY
Questions 20 and 21

1. DESCRIPTION OF SUBMITTERS

We, Rick and Shirley-Ann Mannering, the submitters, own three active family farming companies situated in the rural districts of Ararimu, Paparimu and Paparata, adjacent to the Hunua Ranges in Auckland. The total area of all properties is 1454.51 hectares or 3594.17 acres. The generational family farms all have a mixture of flat land, rolling hills and steep hill country with mixed forest remnants, kahikatea stands and waterways spread throughout. A significant area of 147.5091 hectares, about 10% of the farms, is QEII covenanted.

We aim to continue to operate our farming business ventures in an environmentally safe and profitable manner.

- 2 Dairy farms
- Dry stock beef operation including raising, fattening and dairy grazing
- Sheep breeding operation
- Grow feed crops (eg Hay, Grass Silage, Maize, Chicory, Plantain and Turnips)
- Continual improvement of conservation and environmental approaches and activities
- Maintain extensive roading on the properties
- Operate farm airstrips and quarries
- Manage on-farm Plantation Forestry blocks

There are 15 people working on the farm business and consist of direct employees (8), contract milkers and partners (4), their workers (4) and the owners (2). The owners, the farm manager, the 2-IC, a general worker, the contract milkers and the contract milkers' employees all live on farm with their families. Any children attend local schools and they participate in and contribute to local community activities in Ararimu and Paparimu.

Our farming business has funded our environmental vision to protect and conserve tracts of native bush and waterways for almost 20 years. Since July 2019 we have employed a Farm Ranger to help us "protect and improve the quality, resilience, biodiversity and ecological integrity of the natural values in the bush remnants, wetlands and waterways across Waytemore Farms and associated properties … implementing long and short-term farm conservation and/or environmental plans and policies." Our Farm Manager has a degree in Ecology and this investment in environmentally qualified employees supports our commitment to the environment.

From 2021 we have accessed three grants through QEII and two grants from Auckland Council, which contributed proportional funding to help us protect four endangered and critically endangered forest ecosystems, establish an animal pest and predator plan and restore a degraded wetland with an important connectivity function between covenanted forest remnants. The results benefit not just ourselves and the families on the farms, but also our local community enjoy the results too. However, our future plans and projects are constrained by available funds and therefore stretch out for at least 15 years before we have protected or restored waterway/wetland areas and stands of indigenous forests identified as candidates for protection. This does not include all waterways, wetlands and forest remnants on the farms, nor areas suitable for retirement and restoration.

Other notable activities this year include:

- working with Dr. Hanareia Ehau-Taumaunu of Plant and Food Research to sample maire tawake (swamp maire) from four selected locations on our farms. Her research goals are to "describe all the microorganisms present on the leaves of maire tawake and other Myrtaceae plants in the ngahere and link the variations in microbes to the presence and absence of myrtle rust. From there this information will inform laboratory research looking at using microbes to decrease myrtle rust infections for future management protocols."
- Retiring approximately 5ha and planting with Mānuka. This is the first stage of creating indigenous forest buffers through a combination of restoration planting and and natural regeneration.
- Assist in a survey by Auckland Council of the nationally critical maire tawake found in 11 locations on our farms (currently underway)

We were recently recognised as the Ballance Farm Environment Award Supreme Winners for the Auckland Region for 2022. This included the Auckland Council Water Enhancement Award. As further evidence of our belief in farming sustainably, we currently support the New Zealand Farm Environment Trust nationally and locally through Rick's position as a Board Trustee and my position on the Auckland BFEA Committee.

From 2010 to 2015 we went through the Auckland Council Unitary Plan process. This included the identification and mapping of Significant Ecological Areas (SEAs) and Outstanding Natural Landscapes (ONLs).

We believe we have significant experience relevant to a considered submission on the Setting Our Direction: National Policy Statement for Freshwater Management Auckland Consultation Document.

Our farms are located within the Hunua Ranges Ecological District. Kauri Hiwi shares a boundary with the Hunua Ranges Regional Park and is inside the Hunua Halo.

This submission is based on our experience and viewpoint as farm owners, located in the Hauraki FMU, who are actively protecting indigenous biodiversity on our properties through fencing, regenerative and riparian planting, weed, animal pest and predator control.

2. SUBMISSION

A. LONG TERM VISION

Q1. Direction of Region-Wide Vision

Mostly support

Needs to better reflect NPSFM and approach to take i.e. more consistent with NPSFM eg emphasis on direction of travel, and other national requirements eg Freshwater Farm Plans.

Should be reflected in wording/phrasing:
E.g 4.3 a) Restoring, preserving ~~enhancing~~ and protecting Te Mauri o te Wai; recognising that water is taonga ~~and a living entity~~, and that when Te Mauri o te Wai is degraded, there can be no Te Mana o te Wai
b) Taking a transformative, ~~aspirational~~, and innovative approach, consistent with te ao Māori, that prioritises halting further degradation to achieve~~s~~ remediation and recognises that freshwater management to date has led to ~~widespread~~ degradation.
d) (i) ~~rangatiratanga~~ kaitiakitanga and mana whakahaere

Would like to see Vision split into current plan of 10 years (2025 to 2035) and then future vision and long-term goals from 2035 to 2080. With achievable targets and realistic timeframes in shorter current 10 year plan term.

Recognise that in practice many actions around freshwater are farm-specific, informed by eg landscape characteristics, catchment features, land use.

Recognise mitigation actions to reduce effects of cause as leading to improvement, not just requiring cause to be removed.

Improvement may be for specific freshwater attributes not all.

Important to consider private landowners property rights when developing how to implement vision.

Q2. Hauraki FMU Proposed Vision

Mostly support

2. Restoration and creation of wetland systems: Is important to implement through non-regulatory action plans where often a catchment approach can achieve better outcomes through large wetlands and constructed systems. Putting the onus on specific landowners risks an inconsistent and less effective outcome for the water. Current joint Fonterra and Auckland Council Wet Area Reversion Project is an example of funding for the creation of wetland systems within the Wairoa catchment. The Auckland Council Wetland Protection Fund is an example of funding for the restoration of wetland systems. Although this would be improved by taking a more site-specific project-based approach rather than the current one size fits all approach.

4. When discussing the Hunua Ranges it should be clear that it is the freshwater systems *within* the Hunua Ranges Regional Park that are protected for recreation and drinking water supply.

B. VALUES AND ENVIRONMENTAL OUTCOMES

Q5. Add Resilience as a value in AUP

Yes
But need context of intent. NPSFM requires climate change to be integrated with freshwater management. This vision should focus on adaption and recognition rather than setting outcomes and targets on emissions reductions. Protection of waterways through fencing and riparian planting will help create resilient ecosystems and provide flood protection.

Q6. Add Amenity as a value in AUP

No
This value is too subjective therefore hard to deliver on outcomes. How the community feels, and accesses waterways is something this plan should not focus on. It may be more important from an urban or public space perspective but not relevant to private property. Has the potential to complicate the ability to deliver actions on farm. Although, farmers will need to deliver on continued riparian enhancement, management which would improve the amenity value.

Other Values

Hydroelectric Power: Just because there is no commercial generation in the region currently does not mean this will be the case for the whole 55 year period this vision represents. There will be an increasing need for power in the region and renewable sources of power, potentially including hydroelectric power, will be needed.

Animal Drinking Water: Should be to meet the needs of farmed animals (NPSFM), which includes eg dairy shed washdown, milk and vat cooling, and other water take that supports this food production.

Q7. Feedback on Proposed Environmental Outcomes

Ecosystem Health: Water quality is ~~protected~~ maintained where it is excellent or good.
The existing activities and use within the catchment are already providing for the water quality to be in A or B band therefore a hold the line and improve where possible approach is sensible.

Habitat: Aquatic habitats and freshwater ecosystems are ~~protected~~ maintained where they have high value.
The migratory access of native fish (unless restricted access is protecting upstream species)

Recognition needs to be made to restricted access supporting some species to be protected from introduced pest/predatory species.

Human Contact: locations where the access, public safety issues
Added access to reflect that there are waterways where access is not provided to the community.

Threatened Species: have ~~terrestrial and~~ aquatic habitats
The Action for Health Waterways definition of Habitat was "the physical form, structure and extent of the waterbody, its bed, banks and margins, riparian vegetation, and connections to the floodplain." This already includes the terrestrial portion of the aquatic habitat associated with the water system. Including the term 'terrestrial' in this context is unnecessary and could complicate understanding eg how far from waterbody could it apply?

Mahinga Kai: The mauri of freshwater systems is protected. Mana whenua have access to freshwater bodies and mahinga kai where parts of the FMU provide for mahinga kai gathering.
Access to areas where access is not provided should not be a focus of this plan change. The wording has been added to recognise that those parts of the FMU that already provide for mahinga kai gathering should be prioritised.

Natural form and character: the highly valued natural qualities, characteristics and features of freshwater systems that are degraded are improved, and where they are not degraded they are enhanced safeguarded.
Recognise that natural form and character is signalled to focus on those highly valued systems within the FMU rather than every system.
Enhanced is a concept used in the NPS, have concerns around the meaning of safeguard.

Drinking Water Supply: water quality and quantity is sufficient for people to have reliable and healthy clean water for drinking ~~and reasonable domestic use~~
NPSFM states that the FMU meets peoples drinking water needs and makes no reference to reasonable domestic use. Acknowledge its value to people but it should not be included as domestic use is fundamentally different to the health need, I think is the NPSFM intent.

Areas Where Special Management is Required

Pukekohe Specified Vegetable Growing Area:

Support the intent of the outcome for this area. Consistency between both the Waikato and Auckland catchments of this area will be important to ensure that these areas function effectively for the purpose the NPS has identified.

The indicative Pukekohe SVGA mapping area used by Auckland Council is incorrect in places. It is imperative that this is corrected for consistency and certainty for growers and farmers alike.

The desktop application of a distinct area needs to be easily ground-truthed as part of the process. This is very similar to the original Unitary Plan situation where pine plantations and weedy areas like gorse were identified and listed as native forest. Our experience was the desktop shading was not particularly accurate at the final level, but once in place was difficult to change.

Our current example is that the Pukekohe Specified Vegetable Growing Area cuts through Waytemore Farms and includes our sheep and beef farm with exotic and indigenous forest blocks on this part of the farm – all in steep gullies. This is a sheep and beef farm that identifies as a North Island Hill Country Farm. In fact, the hills to the south are sheep only and the highest point on the farm, with a trig. Practically, the highest and steepest parts of the farm are not really suitable for vegetable growing.

Hunua Ranges:

General support for the Hunua Ranges where special management is required. It is important to consider the boundary where the Hunua area separates into farmland.

C. WATERBODIES WITH SPECIAL MANAGEMENT REQUIRED

No comments on this.

D. ACHIEVING VISION AND ENVIRONMENTAL OUTCOMES

Q10. Establishing the Baseline

In principle I support the approach to reduce loads through a proportion in the absence of absolute load. On farm reductions made and demonstrated actions will be assessed on the site-specific nature of benefits such as setbacks and riparian planting. It will be difficult to account for each farm specific action. However, with good farm environment plans and industry reporting, farmers should be able to show changes in practice and efficiencies on farm that bring reductions.

The national bottom line is an adequate level for Auckland.I support a focus on changing the direction where an outcome is sitting below national bottom lines. That is, the C and D bands and in some instances the B band, otherwise maintain health.

Providing adequate timeframes is important, to be practical for farmers to make changes.

Q16. Managing Our Activity – Draft Management Options/Tools

Riparian Margins:
Council should consider national regulations and Freshwater Farm Plans as they provide a good framework to improve riparian margins in Auckland.

Where council is proposing additional setbacks, areas of restricted land use/ grazing, this removes land from the farming system. On-going maintenance, especially weed control, imposes additional costs (including time resource) that are often significantly more long term than planting and fencing.

Ensuring wider margins to provide for rivers to short and change course over time shouldn't always apply. In heavily modified pastural catchments these waterways have often been modified and altered to fit into the farming landscape. A focus should be on establishing a prioritisation model for setbacks and areas where farmers can see the best water quality benefit, which is generally through the FWFP actions and identification approach.

Rural Activities:

Stock exclusion should *not* be more stringent that the national regulations.

Buffer Wider Than 3m:
I do not support this and it is a significant concern. The evidence base around buffer widths do not provide the evidence base for blanket 3, 5, 10m setbacks. It is important to provide farmers with the flexibility to increase and decrease depending on the landscape, stream attributes and the unique on farm situation. FWFPs and identification of critical source areas provide a good basis for identifying where larger setbacks are required than current state.

We recently fenced and planted a wetland with support from AC via the Waterways Protection Fund. The agreement stated a 5m setback and we agreed because it worked in that particular situation and because we were receiving a benefit with the grant. That was our choice for that site as opposed to a regulatory tool.

Restricting Expansion and Intensification:
Changes in the NPS-FM require further measurement of intensification that creates further risk of nutrient loss. When developing the regional plan, we would consider it important to provide for those pathways to intensify. They could be subject to conditions and a pathway that will ensure the risks associated with intensification are addressed by those wishing to undertake such changes.

Limits on Nutrient Discharge Volume, Catchment Nutrient Loads, or on Fertiliser Application:
As for proportionate reductions for nutrient loads, I would not support nutrient limits being set at farm level through this plan change. I am concerned about the proposal to allocate nutrients and would strongly oppose any proposal to allocate nutrients to a property level. There are no available tools, and the first generation NPSFM plan changes are about improvement, not allocation. I support the use of sector specific GMP surrounding fertiliser which includes right time, place, rate and product which has both economic and environmental benefits.

Identify Alternatives To Current Nutrient Practices:
The farming industry already supports farmers to achieve more efficient nutrient use on farm. Better efficiency results in less risk of nutrient loss to water. The dairy

industry has actioned requirements and directions to do so through the Dairy Tomorrow strategy.

FWFPs and GMP: The role of FWFPs and Good Management Practices are going to be critical to improvements made in the Auckland region.
Work done by industry through the best dairy catchments program demonstrate the improvements management changes have made to several key dairy catchments to date. This is all through non-regulatory means and is a continuous improvement occurring without regulation. The Fonterra and Auckland Council Wet Area Reversion Projects can be added to the list of existing schemes.

Wastewater and Stormwater Management:

I support permitted activity pathways for rural wastewater and stormwater requirements. As earlier in this submission, I support consistency between AUP provisions and updated guidance documents for stormwater and on site wastewater. This should be sympathetic to the effect that waste water and stormwater have on water quality. In terms of setting limits on the discharge volume, and instead concentrations of nutrient loads, there are concerns around nutrient loads and allocation and how this will be regulated and enforced.

Land Disturbance/Earthworks Activities:

Land disturbance and earthworks activities are fundamental to farming operations. Once again, the approach taken needs to be comparative to the effect being addressed. For example, the consultation document discusses requiring land disturbance on small sites to be regulated and managed with sediment controls that are the same as for large scale developments. This is unfair, but also unnecessary given every site is different, and the activity being undertaken varies in scale. Farm scale earthworks typically would be considered small scale (depending on the works being undertaken) and provision for farm scale earthworks should be provided for as a permitted activity, with some requirements around sediment and erosion control.

Freshwater Farm Plans:

A specific catchment context is better than region-wide or even FMU regulations. FWFPs encourage identification, understanding of environmental challenges and planning for improvement.

any additional regional farm plan requirements beyond these may integrate (the consultation document suggests that alternative requirements may be made through AUP provisions). Careful consideration needs to be given to transition arrangements and to integration to ensure that farms do not end up having to comply with two different regimes.

I am concerned about the additional and unnecessary cost and uncertainty if we have to comply with two separate requirements intended to achieve the same outcomes. Council needs to avoid the unnecessary duplication of regulations that will be covered in regulated freshwater farm plans to avoid placing unnecessary regulatory burden on

farmers and consequentially removing their opportunity for tailored approaches to manage their on-farm risk.

It is important for AC to recognise that existing regulatory and non-regulatory farm plans reflect a significant body of work that has been undertaken to improve environmental outcomes and a significant investment by many farmers. We consider it critical that any national farm planning regime takes into account and builds on the work that has been done to date, to ensure invested resources are not lost and regional variations are enabled. We also note that B+LNZ is actively involved in the farm planning space, the environment is an integral part of this, and they see value in farm planning and encourage farmers to have a farm plan either through our own set of resources, or that of the New Zealand Farm Assurance Programme.

Auckland Council should not incorporate existing voluntary farm plans into a regulatory framework, particularly within a short timeframe. Voluntary commitments made by farmers should not be translated into enforceable regulation, as doing so may disincentivise the uptake of some voluntary actions to the benefit of the environment contained in farm plans.

Rivers and Streams:

I understand that approaches under consideration include maintaining AUP non-complying activity status for river reclamation, removing regulatory barriers to stream restoration, aligning AUP definitions with national definitions, promoting community stream restoration, and actions in the fish passage action plan to remove fish barriers on private land. We support consistency with national definitions and encourage council to think about consistency with the NES-FW for activities (as opposed to more stringent requirements) – this avoids confusion, but also encourages Council to think about the issue being addressed and reasoning for more stringent provisions.

Lake Management:

Support at a high level lake specific management approaches to respond to the different characteristics of lakes. Possible approaches include provisions for contaminant load management, nutrient management, and non-regulatory methods to remove pest fish and invasive plant species (already underway in some lakes). As previously highlighted, further information is sought around any contaminant load management and what this approach may look like at an FMU level. I encourage initiatives to remove pest species and invasive plant species and would like to see AC play an active role in addressing these issues.

Extent and Value of Natural Inland Wetlands:

I support the integration of national natural inland wetland regulations (NES-F) into the AUP to simplify the regulatory framework. Consistency with national regulation and avoiding duplication in the AUP is paramount.

I fully support the removal of regulatory barriers for the restoration of natural wetlands. This can be an area of frustration for farmers, when faced with costs and regulation while attempting to do the right thing in restoring wetlands. It is not just the regulatory and cost barriers that impede farmer action in this area. Another barrier is where wetlands are situated on privately owned land. In these instances, it may be unfair or uneconomic for a farmer to restore a wetland on their land where the benefit accrues to all landowners in the catchment, and this acts as a barrier. Where restoration of wetlands on private land will provide catchment wide benefits, Council may play a role in facilitating this restoration.

We would support further recognition for the non-regulatory constructed wetlands farmers are adopting to improve water quality outcomes, particularly where this can be recognised alongside any management of diffuse discharge requirements.

E. HABITAT PROTECTION AND IMPROVEMENT

Q18. Prioritisation of catchments for fish passage remediation

Other
The consultation document does not have any details on ACs approach to remediation in rural catchments. Presumably there are, for example, many crossings and culverts that are barriers on farms. Council could support remediation through funding programmes and incentives, including through mutual assistance with the Ministry for the Environment.

Q19. Retention of existing regional standards for wetlands and streams where they are higher than national requirements

No
I support the integration of national natural inland wetland regulations (NES-F) into the AUP to simplify the regulatory framework. Consistency with national regulation and avoiding duplication in the AUP is paramount.

I do not support maintaining or increasing the stringency of requirements beyond the NES-F. For example, the 20m AUP vegetation removal setback should be reduced to 10m (refer to Rural Activities: Buffers wider than 3m section) and there should not be a wider definition of stock.

I fully support the removal of regulatory barriers for the restoration of natural wetlands. This can be an area of frustration for farmers, when faced with costs and regulation while attempting to do the right thing in restoring wetlands. It is not just the regulatory and cost barriers that impede farmer action in this area. Another barrier is where wetlands are situated on privately owned land. In these instances, it may be unfair or uneconomic for a farmer to restore a wetland on their land where the benefit accrues to all landowners in the catchment, and this acts as a barrier. Where restoration of wetlands on private land will provide catchment wide benefits, Council may play a role in facilitating this restoration.

We would support further recognition for the non-regulatory constructed wetlands farmers are adopting to improve water quality outcomes, particularly where this can be recognised alongside any management of diffuse discharge requirements.

F. WATER QUANTITY

Q20. Reduction of water allocations to existing consent holders

I understand AC is reviewing flows and levels already set in the AUP for areas previously identified as having the highest demand for water. AC is also considering approaches for waterbodies where no AUP limit is set. AC needs to decide on its approach for setting flows and levels, and what weight to put on the first priority for ecosystem health. It is noted in the consultation document that the approach adopted may be different for different water bodies, which I support.

While I support justification of use and volumes needed for activities either already consented (or being consented), there also needs to be some flexibility for operations to look longer term and develop land that may require more water resource.

While we acknowledge and recognise the direction in NPS-FM to phase out overallocation and to avoid future overallocation, it does not give any timing for when overallocation must be phased out. This is something that should be considered as part of the FMU process (and would not support the setting of an arbitrary region-wide date). Given that the consultation document states that around 10% of aquifers are currently overallocated, and there is no anticipation of significant or widespread over-allocation of surface water compared to current AUP limits, it appears that management moving forward and how flows, levels and take limits are reviewed will have the biggest effect on people, and particularly rural water users.

Q21. Prioritisation of allocation where or when water is scarce

It is difficult to provide comment without knowing what approaches are contemplated (for example, any potential changes to permitted activity take volumes, activity status for water use, region wide rules vs. FMU specific rules, etc). However, generally the setting of arbitrary and region-wide limits (without consideration of the particular catchment and waterway) should be avoided.

I support efficient allocation and use of freshwater, and would want to make sure that any policy proposals are practical for agricultural takes (particularly if there might be greater need for resource consents as a result of other policy proposals). Resource consents with appropriate ‘backstops’ i.e., efficiency and use requirements, take restrictions correlated to flow, up to date monitoring data, etc will allow for appropriate assessment and prioritisation. However, there also needs to be appropriate provision in the policy framework for the animal health and food safety aspects of farming operations, and the crucial role they play in food production (refer to Other Values: Animal Drinking Water).

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Some points below on the issues that is of concern to me:

1. Plan includes a hierarchy that places Maori at the top, bureaucracy in the middle, and non-Maori at the bottom. The hierarchy should be removed.

2. The plan cites Te Tiriti o te Waitangi without defining the Principles of the Treaty. We need the Principles of the Treaty to be defined before they are included in any plan.

3. Pathways for the interested members of the public to get involved in freshwater management need to be included perhaps through catchment groups or through Local Boards or both.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group!

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

As above. For all New Zealanders. Maori should have no more say than the rest of us. Look at the real history. Maori did not respect the land or animals as they made many extinct. I don't have a problem with that as that was happening years ago. Now there are no full blooded Maori left and there are alot who do not recognize there other heritage and there are alot who don't care what they do in the form of rubbish or rape the land along with alot of other races.

We are living in today and it needs to be a joint effort not one ethnicity group who have more say than others.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Other

   Tell us why:

   Again Maori do not need to be involved.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Bring in a law fining people for throwing out rubbish as it ends up in our waterways.

Look at the rubbish collection and recycle infustructure.

Stop building around our water ways as containment sushi as antifreeze, oil etc end up in our water and if we do put drains in place that catch contaminants and into filter stations.

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Why is the council promoting and encouraging the nebulous 'religious' beliefs of one group of people in relation to water. Water is no more or less important to all of us. If you want to include touchy-feely notions, why not include a Christian perspective, After all, Jesus walked on water, turned it into wine, baptised the faithful, Moses parted the waters and Noah built a boat to save all the species on earth from a flood. It is special to Christians (for example) as well, and you are marginalising them and all others who have a 'special' connection to water by not including their stories and caring.

    What does 6.1.a.1 mean? Are the mana whenua being paid for 'monitoring and reporting to the extent they consider appropriate'? How much will this add to my increasingly unaffordable rates? 13.1 'Māori cultural values – the importance, association and values of the water body to mana whenua.' Again, by especially mentioning one group, and failing to mention the critical importance and values other groups may have to water bodies, you are clearly ignoring those other group's connections to the resource. Why not just say New Zealanders and cover all of us?

    And, how much did it cost to produce the 80 page document with all of its flashy, mega-byte consuming pictures? We are not children! Water supply is a serious business. Stop wasting my

rates, get down to the nuts and bolts, get out the tools and fix our problems. Get serious and stop sitting around dreaming!

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Disagree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I am a resident in the Whakatiri area on the Clevedon Kawakawa Road.

For the past twenty years I have had an involvement in monitoring the activities of the shellfish farms in the area including maintaining a daily rainfall record and monitoring the state of the Rotopiro Stream catchment relative to possible impacts on the oyster farm at the mouth of the Rotopiro Stream.

I have read the consultation material and offer my best wishes to the authors. The task of even monitoring the current state of our freshwater sources is immense, let alone considering future measures to improve matters!

Comment:

1. I suggest Council needs to establish a clearly identifiable and properly costed Fresh Water Monitoring Service, with clear lines of accountability for regular measuring a representative range of water sources across the region. I rather doubt all sources can be financially justified, so some effort should be expended to establish an appropriate range of sites.

2. I submit that the discussion document does not include sufficient information about pollution of fresh water by run off from our extensive road network. It is probable that this

issue may need additional research. It was one of the major “deficits” identified in the ARC Growth Strategy.

In essence, our roads are designed to shed rainfall and direct it into the nearest watercourse. Are we surprised that in one of the world’s most motor vehicle intense areas (relative to population size) our streams are asked to accept high levels of vehicle pollutants?

3. Another effect of Auckland’s love affair with its private motor vehicles, is the high levels of discarded rubbish,...cans, bottles, plastic etc., which must end up in the nearest water course. On our rural road, the writer, during the covid lockdown was able to wander along the road verge. Without exaggeration, I encountered at least one discarded item for every meter I walked over a typical 2 or 3 kilometre walk.. Auckland Transport’s record of road verge maintenance is even more appalling than its recent record of maintaining the actual road surfaces !

4. Another issue which received no? consideration in the discussion document was population increase. For some years, covid restrictions aside, we have been bringing huge numbers of would-be migrants in through the arrival gates at Auckland Airport as fast as they can be processed. It would seem that rapidly rising population and aspirations to achieve high fresh water quality is a simple oxymoron.

When we consider that current waste water and sewage treatment infrastructure is inadequate for current numbers, I wonder how the authors of this discussion document, manage to keep a straight face when talking about idealistic levels of improvement to freshwater purity!

5 Finally, and regrettably, I must observe that the discussion document, whilst nicely presented, must be treated only as just ..”another flight of fancy” by authors huddled in their specialist silo and who are oblivious to any wider consideration of costs, benefits, and other trends likely to overwhelm their idealism.

Local government seems to be in the thrall of some need to produce hugely expensive strategies, study documents, fated only to gather dust on some remote storage room.

I think he relevant old wisdom...”perfection is the enemy of good” is a wise adage which needs more attention.

I hope those who are carrying out this work have read and understood the report from NIWA to Watercare on the hydrodynamic model of the Manukau Harbour[1]. This is clearly within scope to take into consideration, considering item 4 in panel 10.1 (page 29 of discussion document) speaks of "The Manukau catchment management actively supports that Te Manukanuka o Hoturoa, the receiving environment of the Manukau Harbour, has mana and prestige and its mauri is enhanced, revitalised and protected". and the statement on the AC web page that The National Policy Statement for Freshwater Management is a government policy to guide how we can manage freshwater across New Zealand, and considers how freshwater affects coastal waters. I suggest you contact Watercare to obtain a copy if you do not already have one.

That report notes that “a key inference from the simulations that we have undertaken is that nutrient loads from Māngere WWTP are having a readily discernible (in the simulation results) influence throughout much of the NE of the harbour (Māngere inlet and the waters of the open harbour around Puketutu Island). Sometimes, its influence is evident in the upper parts of the central, open harbour and eastern flanks of the harbour as far as the seaward end of the Pahurehure inlet.”

The report identifies Mangere WWTP as delivering 390,000 m3/day of treated water into the Manukau – presumably to be inflated further once the central interceptor is in full commission - and on page 23 says “the Māngere WWTP is (by far) the largest individual source of water and nutrients to the harbour, providing approximately 17%, 47% and 82% of the total water, nitrogen and phosphorus loads respectively.” It is therefore in my view very much a second-rate exercise in trying to improve the nutrient loads of the hundreds of streams feeding into the harbour unless and until AC/Watercare address the outputs from this treatment plant.

The expectations from the people living around the Manukau that the outfall must be moved into the Tasman Sea - and renewal of the present resource consent denied - seems from this data to be well-justified. I have heard anecdotally that in a recent discussion a Watercare senior manager said that ‘there is no way they [AC] would not renew the discharge consent’. In such a case, citizens would be fully entitled to believe that Auckland Council and the Councillors were happy to see the Manukau Harbour used as a dumping ground. I note that your 10 year plan is coming up for renewal. I think the move of the outfall to the Tasman is an essential element of that plan, as part of your planning to address the interactions of freshwater with the Manukau Harbour.

I may have further comments to make on your exercise before the closing date.

Submission to Improving freshwater in Tamakl Makaurau / Auckland

I have read the National Policy Statement - Nov 2023 and I am not sure my issues are part of the Directions in the document. Therefore, I will give feedback to the section on Managing our activity and specifically the sub point - reducing wastewater overflows and discharges in urban areas.

I have complained to council engineers for years through the service line, but nothing has changed despite visits to my property. When there is prolonged storm or rain event my backyard floods and I have replaced lawns, gardens and deck walks many times. Water never comes into the house but passes through or settles in the yard at about 15cm, ruining everything. It is costly restoring lawns and removing vulnerable gardens.

I have provided video footage to council services of the raging waters.

Here are main reasons we get flooded in a storm event.

1. We are in a Flood plain: We are the lowest home unit (along with the Parkview Motel) from all the dwellings around further up the hill as far as the roundabout intersection of Wesley, Queen, and Tobin Streets. It was shown to us on a map by council that we are in a flood plain. This unit was built 50+ years ago and no-one worried about it back then. Climate and rain frequencies have changed over the years.

2. Ineffective water catchment pits: There is a stormwater (AT) catchment pit further up the hill outside the St Andrews Anglican Church on Queen St and it goes nowhere. There is NO outlet. It's just a hole in the ground with a grate, so is constantly full of leaves and acorns from the church trees so serves no purpose justifying its existence. That fills quickly and the next catchment is right outside my drive. The volume and excess runs down into my drive flooding the lawns. Some also carries on down the gutter to the intersection of Harris St and Queen St, a well-known flood spot. Excess water is supposed to run into Bledisloe Park, which it eventually does. I don't know if our stormwater drains can continue to cope with all the water from new builds and more housing density around us. One new build behind me has the lid blow off sometimes and we cop extra water from that. It is about a metre higher than my yard.

3ff Old soak hole rules are no longer fit: We have a neighbour behind us who built a house and 4 units and there is NO stormwater connection for the units. He has one soak hole just behind my boundary fence. That was probably fine for the house, but not 4 units as well. Anything the soak hole can't cope with runs into my back lawn. I have tried to block the flow at the fence line, but water finds its way through. It has been inspected in the past when I have complained, and the council engineers say he is not breaking building

rules. Maybe in the past but not with all the extra pressure and weather events.

4l Inadequate drainage above our unit level: The Croquet Club at the end of our block of units is about 2m above the land. When that green floods it's like an infinity pool run off and runs down the back of all the units, finding again the lowest point - my unit.

In summary there are four forces sending water onto my property, and I would rate #3 as the worst. During a protracted rain or storm event there is water from the top of the road, the neighbours soak hole, the croquet club and storm drains that are overloaded.

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Auckland, New Zealand

Submission on National Policy Statement for Freshwater Management (NPS-FM)

Auckland consultation document, November 2023

Overview

1. This submission is on behalf of Pukekohe Vegetable Growers Association (PVGA) in relation to the Auckland Consultation Document for the NPS-FM.
2. Pukekohe Vegetable Growers Association will not gain a competitive advantage in trade competition through the lodgement of this submission.
3. The PVGA represents an estimated 287 commercial vegetable growers from as far north as Warkworth and as far south as southern Waikato, who are committed to sustainably growing fresh, healthy produce. Sustainable practices are an essential element of the New Zealand Good Agricultural Practice (NZ-GAP) system, which every grower must be certified by, to supply supermarkets, markets and processors. This certification verifies that growers meet specific criteria and demonstrate their commitment and ability to grow fresh produce in accordance with sustainable and responsible practises.
4. Within the area we represent is Pukekohe, a hub for commercial vegetable production (CVP) which significantly contributes to meeting the fresh produce demands of our domestic market.

5. Pukekohe significantly contributes to the domestic supply for carrots, potatoes and leafy greens in October, November and the early part of December each year and is unique within New Zealand as it presents favourable climatic conditions for the growing of these crops, enabling winter production. In the north, crops are constrained by disease pressures, and further south may be subject to frosts. Deloitte's acknowledged the significance of this location in providing for our national fresh vegetable consumption in 'New Zealand's Food Story – The Pukekohe Hub', August 2018 and confirmed that this area contributed to 26% of the nation's value of production of vegetables at this time.
6. Food and nutrition are major determinants of the health status of New Zealanders. The 2017/2018 New Zealand Health Survey identified that 1/3 of all adults are now considered to be obese, while 1 in 8 children are considered obese. Both statistics have continued to increase from previous surveys[1]. Obesity and other diet related diseases in New Zealand place a considerable strain on the health care system and have a disproportionally high contribution to largely avoidable health care costs[2].
7. The New Zealand population grew by ~2.1% annually between the 2013 and 2018 census' including significant gains from net migration. New Zealand's population now has a 90 percent probability of increasing to 5.01–5.51 million in 2025[3].
8. The PVGA consider fresh produce to be essential for the health and wellbeing of our growing New Zealand population. On this basis, and aligned we ask for specific provisions to enable Commercial Vegetable Production (CVP) operations within areas identified as food hubs and on land identified as highly productive land through the soon to be released National Policy Statement for Highly Productive Land.
9. We cannot change location, as the production of many of the vegetables grown in and around Pukekohe, particularly over the winter months, cannot be replicated elsewhere in the country. To import these vegetables would have a direct affect on our carbon footprint.
10. We consider that imposed restrictions may inhibit our ability to grow vegetables. In particular, when introducing new controls for specific high-risk activities within drinking water source protection areas, it is important that restrictions imposed exclude commercial vegetable production.
11. It is unclear at this stage what the impact of the recommended proposals might be, however it is likely that they will look at measures to restrict the application of nutrients. Crop nutrient requirements, including nitrogen, are tailored and cannot be adjusted without compromising yield or resulting in an unmarketable yield. This means that imposed restrictions could result in many growing operations becoming unviable. A simple way of looking at this, and a very real example, is to imagine a spinach crop that, for unforeseen reasons, requires the additional application of nutrients to prevent the leaves yellowing. There may be a window of up to two days to add these nutrients before the entire crop is yellow and no longer marketable.

[1] New Zealand Health Survey 2017/2018.
2 Health care and lost productivity costs of overweight and obesity in New Zealand. Lal, A et al. Australia New Zealand Journal of Public Health (2012) 36(6) 550.
[3] Statistics New Zealand 2019.

Without the ability for the grower to respond to crop needs and tailor requirements, all of this product will essentially be lost and will remain in the field. This has many effects, loss of product to market increasing prices, loss of income to the business, nutrients remain in the paddock that are not removed through harvesting the product, yet are unlikely to be in a form that can be utilised by subsequent crops. Fertiliser is expensive and growers use this with precision. A better way to manage this process while still enabling growers to respond to crop needs is through the use of the Freshwater Farm Plans (FEP-FW). Further details of recommendations provided below.

12. The proposed provisions unless carefully managed, stand to have a major impact on the availability and cost of produce to the consumer and as a result, on the access of fresh vegetables within New Zealand.
13. It is our view that the current consultation document goes someway to, but does not fully recognise, the specific requirements of the commercial vegetable production sector, particularly in the context of necessary crop inputs and marketable yield and we consider that specific provisions should be made for CVP operations as an essential industry, noting that we play a significant role in the health and wellbeing of all New Zealanders, but occupy less than 1% of total land area within New Zealand[4].

Overall Recommendation

14. We recommend that a pathway specific to CVP be defined to enable existing CVP operations to continue to operate, where an enterprise:
    a. is registered with NZ-GAP
    b. has an approved Freshwater Farm Plan audited by the NZ-GAP system
    c. is operating in accordance with industry Good Management Practices
15. As discussed within this submission and illustrated in Figures 1 and 2 below, we recommend that the existing and successful NZ-GAP framework, including the Environmental Management System, is utilised to provide a consistent approach for growers to ensure that compounding legislative requirements do not impact on the availability and price of domestic vegetable supply, already a major concern. We consider that the approved FEP-FW can be independently audited through the NZ-GAP programme, ensuring that FEP audits are undertaken by an approved Farm Environment Planner suitably **experienced** and qualified in CVP.

[4] As at 2016 less than 1 percent of New Zealand's total land area was used for growing fruit and berries (0.5 percent or 120,894 ha) and vegetables (0.3 percent or 69,686 ha). Statistics NZ.

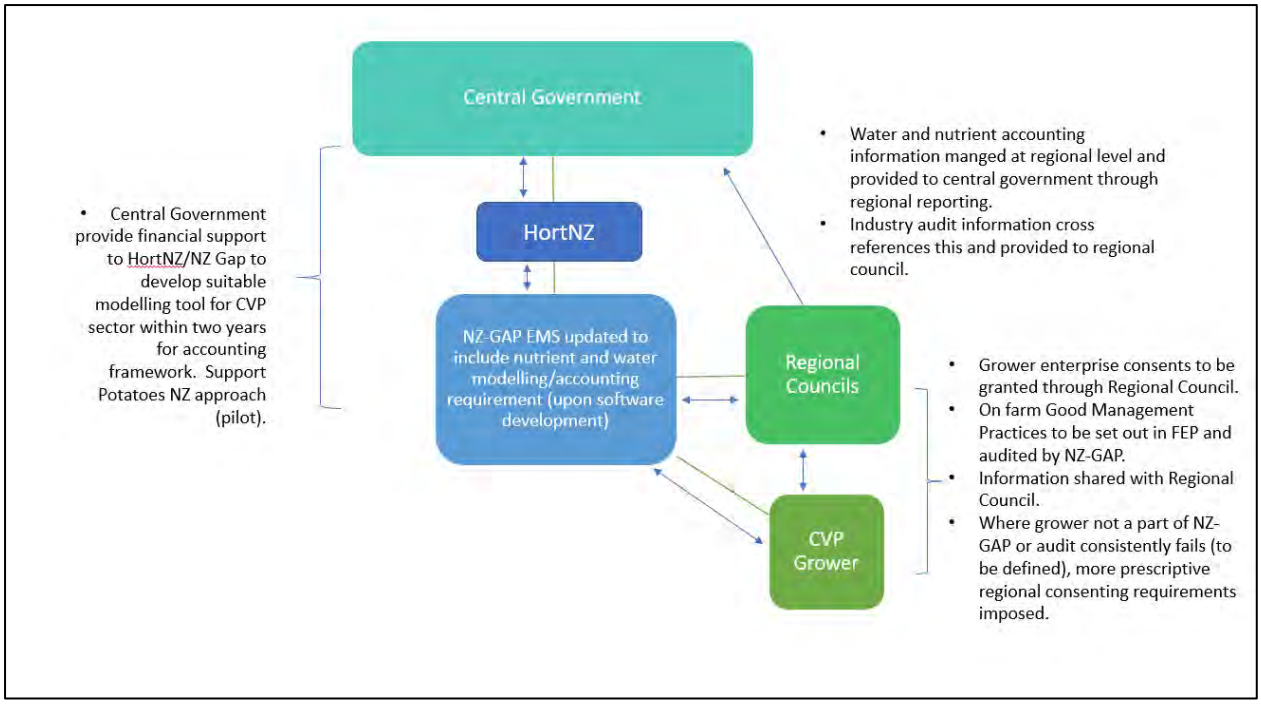

Figure 1: Proposed Framework for Commercial Vegetable Production

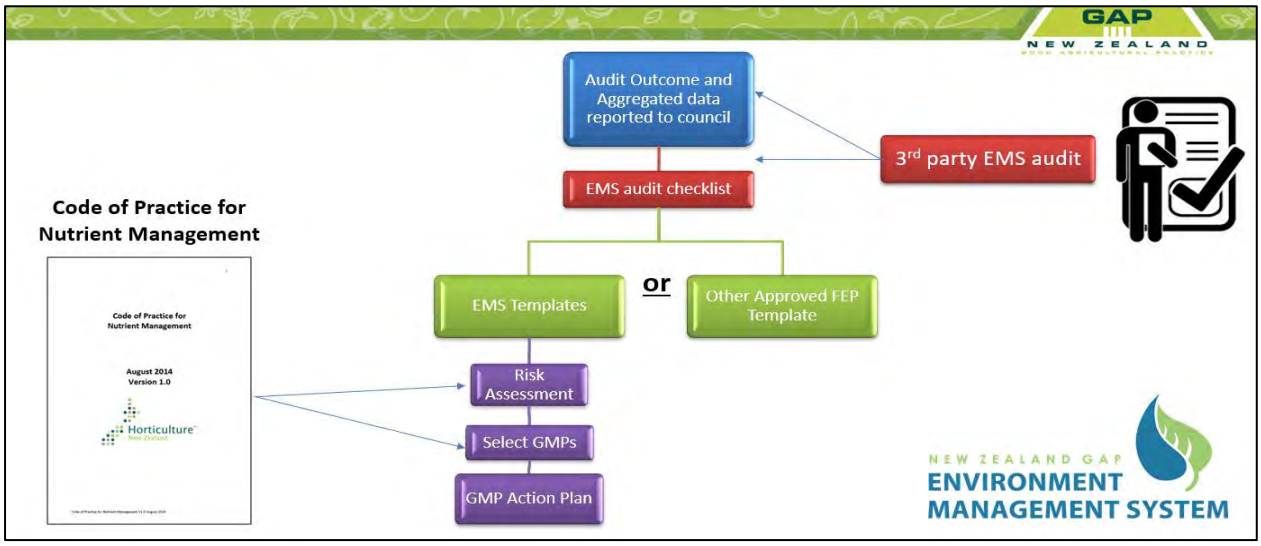

Figure 2: NZ-GAP Environmental Management System

16. Industry GMP relates to many distinct areas of commercial vegetable production (CVP) including erosion and sediment control, nutrient management, crop rotation and irrigation. Industry led guidance is specialised and technical and already widely adopted.
17. It is notable that riparian buffers do not provide the same mitigation within a vegetable growing system as they do in a pastoral system and for this reason, we do not support blanket provisions relating to this. We instead believe that mitigations that are the most suitable and effective for the identified contaminants of concern should be determined through the farm planning process and reflected within the certified and audited FEP-FW.

18. We consider that if provisions are to achieve desired results, then it is imperative that all technical requirements and updates relating to GMP are reflected consistently for growers through a single framework, allowing for on farm adaptation to reflect local conditions. NZ-GAP provides this framework and can be updated as required to reflect advances in technology, science, and modelling software.
19. Overall, the PVGA support playing our role in improved water quality outcomes and we welcome the opportunity to engage with you directly to achieve the best outcomes possible.

Kirit Makan, President of the Pukekohe Vegetable Growers Association

#10

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   If this means an increase to rates then find some other way to pay for it.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   Find the funding from somewhere else ratepayers can't afford to pay for this

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Disagree

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

7. Do you have any feedback on the proposed environmental outcomes?

Find the funding from somewhere else ratepayers can't afford to pay for this

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Disagree

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Disagree

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

I don't know

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I dont care Find the funding from somewhere else ratepayers can't afford to pay for this

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

Find the funding from somewhere else ratepayers can't afford to pay for this

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

I don't know

Tell us why:

Find the funding from somewhere else ratepayers can't afford to pay for this

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Household needs should come first!

21. How do you think we should prioritise allocation where or when water is scarce?

Households come first!

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Educate people about the environment and stop them poisoning the environment, apply bigger fines and have people or cameras policing these areas.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Humankind abuses the Earths natural resources. We have to ensure that those resources are resilient so that we can continue to survive.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

Water is not an amenity. It is a resource critical to survival.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

Every road and train line I use has litter scattered around, waiting be washed into the rivers. Every stream & river I see is polluted. Littering is a major problem in NZ.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

Anything to get our waters cleaner. Why stop at copper & zinc?

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

It just makes sense.

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

It just makes sense.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Use multi-layer farming.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

I don't know

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?

Yes

Tell us why:

It's been avoided for too long

6. Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Agree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

We need a better plan for stormwater than just sending it into our waterways which pollutes them

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Agree

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Agree

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

I agree that the outstanding waterbodies require tailored attention. However, I would want to ensure the focus on these areas does not outweigh the focus on our more degraded waterways/bodies.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Could potentially look at increasing the esplanade margin required to be vested to council upon subdivision. Expanding this, could help reduce sedimentation/contaminates entering the waterways (through vegetation filtration), reduce temperatures (vegetation vs hard surface/heat sinks) etc.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

slow phase out/reduction in quantities regardless of existing consents, with new requirements for new activities to develop large SW retention assets (e.g. subsurface detention) to be used

for their activities. A slow phase out/reduction with clear intents and expectations for industries will help force the industry to adapt and look into alternatives.

21. How do you think we should prioritise allocation where or when water is scarce?

priority should be given to industries/activities where human and animal life require such water take, subsequent priority should be given to major industry playing a clear and essential role in local and national economics.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Looks pretty good, good job guys.

#151

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   There is no place for race in this issue. It is the water of life for us all and we are all as concerned and committed to quality and security of water long term. It is for Auckland not the Maori of Auckland.

   We have just had a general election that has made it abundantly clear that this narrative is no longer acceptable. In promoting this you take away from the non-Maori population of Auckland. Just stop and recognise that most don't want this.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   It appears that Auckland Council supports the idea that water is of more importance to Maori than to all other peoples of Auckland. To suggest that Maori have a special relationship with water that is not shared by the rest of the community is simply wrong. Everybody, surely, has an interest in healthy water whether it comes out of a tap or lies in the waterways. I am totally opposed to any action that provides different rights for people and communities based on race. We should all have equal input into how freshwater is managed. In order for me to support action for a freshwater management plan, there must be no racial preferences involved in the decision-making around the region's freshwater. Preference should not be given to the views of one racial or ethnic group. One racial grouping should not be given preference over others.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life, so everyone has an interest in healthy water. All Aucklanders should be equal stakeholders in how freshwater is managed in their city. We do not need the expense of unlimited control by Te Mana o Te Wai statements

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Disagree

   Tell us why:

   Water is the essence of ALL life, so everyone has an interest in healthy water. All Aucklanders should be equal stakeholders in how freshwater is managed in their city. We do not need the expense of unlimited control by Te Mana o Te Wai statements

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Auckland and the Country cannot be operated successfully where there is an element of unelected people involved in positions of power, See the recent case where because they didn't get their way they vowed to vote 'No' in any future votes or referenda. This is the kind of spiteful, attention-grabbing retaliation expected from such people and we have no way to sanction them for this behaviour.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Mostly do not support

   Tell us why:

   The reference documents in many places presume that Māori have a special relationship with water that is not shared by the rest of the community. I believe this presumption is factually incorrect and deeply offensive to many non Maori like myself. I am 74 yo and have always been absolutely passionate about looking after the natural health of our wonderful country. To suggest that Maori have a greater interest and stake in maintaining the health of our waterways is causing angst and division in our community.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   Remove race based references.

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Water is the essence of ALL life, so everyone has an interest in healthy water. All Aucklanders should be equal stakeholders in how freshwater is managed in their city. To persist with the presumption that Maori have more rights than others, and somehow have more interest in its management is in my view, racist.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   This a basic right of all new zealanders. It is also the property of all new zealanders not just a select racist few with financial gain and power over other new zealanders.

   These people have already proven themselves racists with their thoughtless selfish policies based on greed.

   Every newzealander has an interest in healthy water be it lakes rivers catchments steams or ponds.

   Ethnicity plays no part in this and Maori should have the same amount of concerns about this as every other new zealander not just worry about how much financial gain they can squeeze out of this issue. In order for me to support a vision for a fresh water management plan there can be no racial discrimination involved in the decision making , management and allocation of any of the regions fresh water. Preference should not be given to many one racial or ethnic group full stop.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

As stated in the above view. Keep racism out of water management. it is the right of all new zealanders not just a select greedy few.

Maori cultural views should play no part in this or any other discussion on managing out standing water bodies. I strongly oppose any policy that priorities one race or cultures value over all other races or cultures in relation to the management of our fresh water

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

   It makes no sense to contaminate any of our water ways. it is a precious gift to all new zealanders

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

    If the allocated amounts are causing problems we must save this resource. There will have to be new consents worked out which are fair to all.

21. How do you think we should prioritise allocation where or when water is scarce?

Obviously heath comes first then emergency use, farmers (food providers) and lastly business

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

invest the monies in this that was meant to be invested which the tax payers have paid only to have it squandered recklessly

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water rights and access are equally important for Maori and Non-Maori and you are separating these rights based on RACE.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on

race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

Racist approach

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Maori did not develop our water infrastructure so have no idea how to run in, nor the financial input it took to develop and run it . I'm sick and tired of all this cultural bullshit. If they want to control it. ,, develop their systems at their expense.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

I don't see that Maori have any more claim to oversee our water resources that the taxpayers and ratepayers who after all paid for existing structures. If they want a say, get elected just like everybody else has to.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

No

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly dissatisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Mostly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

The vegetable growing area is shrinking rapidly as urban sprawl encroaches . I believe growers will move out of the affected areas as they cannot spray their crops when surrounded by housing so they will simply sell up and move out of the affected area. As for fertiliser caps, they don't work and are unnecessary anyway as fertiliser costs prohibit anything but bare necessities to grow a crop viably

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

Many of these aims are already in place as responsible landowners(and most of them are) already implement these practices

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

Who's paying for this?? Maori ??

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

More on farm storage would assist but financial assistance should be looked at

21. How do you think we should prioritise allocation where or when water is scarce?

Urban and rural rationing in times of drought except for stockwater

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#1042

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Freshwater is essential for life on earth. Maori values appear to be the basis of the vision. This vision is apartheid in action. The long term vision must be respecting all citizens values irrespective of race or identity.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Disagree

Tell us why:

There is an emphasis on exclusive Maori rights. This is favouring a particular race and is apartheid in action. This is contrary to the foundations of a modern liberal democracy and Auckland Council do not have a mandate to implement such racial division.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

There is an emphasis on exclusive Maori rights. This is favouring a particular race and is apartheid in action. This is contrary to the foundations of a modern liberal democracy and Auckland Council do not have a mandate to implement such racial division.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

In regard to section 13.1 outstanding water bodies, includes consideration of Maori cultural values. This is identity politics. The values of all New Zealand citizens is the democratic requirement for values not a specific race. This is favouring a particular race and is apartheid

in action. This is contrary to the foundations of a modern liberal democracy and Auckland Council do not have a mandate to implement such racial division.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Agree

   Tell us why:

   Safe freshwater swimming should be available to as many people as practicable. Initiatives to include other sites enhances this valuable resource for use by all citizens.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

I find that much of the National Policy Statement for Freshwater Management Auckland consultation document, November 2023 to be Maori centric. The language of Maori is interspersed throughout the document, elevating Maori requirements to supersede those of other citizens. The underlying theme of the National Policy statement for Auckland is to give greater rights to Maori than other citizens of New Zealand. This is both racist and contrary to the requirement of equal rights of citizens in our modern liberal democracy. The use of Maori words throughout the document gives a special and elevated cultural importance which is not warranted because all citizens of New Zealand are equal, Maori culture should not be considered as superior to other cultures. The policy statemen is not written in plain English and is difficult to understand without a good knowledge of the Maori language. The document should have been written entirely in the English language and not have words from another language included in it. Lastly in my opinion the statement is racially divisive and I believe all references to Maori culture and language should be removed from all consultation documents going forward.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   The long term vision must be based on ALL the people of Auckland to have a say into the long term vision for all water sources in Auckland to be of the highest purest and cleanest quality for all Aucklanders, from streams, culverts, lakes, wetlands, dams and all water out of our taps. The above statement is not clear or concise into what it is the Council is actually proposing and the use of the unexplained Maori references has a connatation of racism or in effect excluding the majority of Aucklanders who do not have the inside knowledge of those who are proposing these changes to our water strategy. Surely the vision is one for all and should have a long term vision with the best quality water from all sources for the benefit of ALL life. After all water is a fundamental part of each and every person on this planet and not just for the benefit of those who assume to know better than the overall community.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Disagree

Tell us why:

These proposals must be based with all the local affected communities input and i would like to see a proposal whereby ALL the community have had a say either by mail outs or community based meetings with all the outcomes presented to each and every community to make decisions that affect them directly.

3. What do you think about our proposed vision statement for the Kaipara FMU?

Disagree

Tell us why:

These proposals must be based with all the local affected communities input and i would like to see a proposal whereby ALL the community have had a say either by mail outs or community based meetings with all the outcomes presented to each and every community to make decisions that affect them directly.

4. What do you think about our proposed vision statement for the Manukau FMU?

Disagree

Tell us why:

These proposals must be based with all the local affected communities input and i would like to see a proposal whereby ALL the community have had a say either by mail outs or community based meetings with all the outcomes presented to each and every community to make decisions that affect them directly.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

No

Tell us why:

This term is too simple in its statement, smacks of waffle to me.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

As long as those amenities are for the good of all concerned and not because of corporate interests. Profiteering from our amenities is not conducive to the council achieving this important goal.

7. Do you have any feedback on the proposed environmental outcomes?

I would like to add that all pesticides, chemicals, GMO and synthetics are the main cause of the pollution of all waters and until council takes seriously the harmful effects of all these aspects to water management then you are pushing a rock up a hill. The destructive effects of these on pure clean water must not be overlooked and unfortunately IT IS throughout NZ and very much so in Auckland.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

These water bodies must be protected for the good of all, I see no relevance in relating WATER to cultural values. WATER is of GREAT VALUE and UTMOST IMPORTANCE FOR ALL LIVING BEINGS, human, animal, insect, microorganisms, ALL LIFE and to place Maori cultural values as more important than others to me is completely BIASED.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

I hope that the council also considers the runoff, spraying and dousing of pesticides, chemicals and other leaching of harmful substance that tarnish the water ways, including keeping stock out of water ways! Education about the overuse of chemicals, prescription medications that are urinated out into the water ways, pesticides and over use of synthetic fertilizers pose a major risk to the health and purity of water.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

I do not believe council understands the use of pesticides mainly those with glyphosate leaching into not only the water ways but through all manner of food and water. Council do not take seriously the overuse of chemicals that they spend huge amounts of money on to so called maintain these precious areas and until council really steps up handing that management over to Maori will NEVER solve these problems. Pollution comes in many forms.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Other

Tell us why:

There needs to be a much more comprehensive study not just on zinc and copper but on all contributions to the toxicity to the microbiology of the water ways which also involves the land management and also a realistic look at Councils activities that contribute to the pollution of our land and water with the high contaimination of glyphosate also.

13. Do you think we should include and manage temperature as an attribute in this plan change?

No

Tell us why:

You can not just use temperature to evaluate the oxygen within the microbiome of our ecology you must look at Councils practises that contribute to this, the over use of pesticides and chemicals must be paramount. I find this question questionable!!!

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly do not support

Tell us why:

WE SHOULD ALL HAVE STRONG AMBITIONS TO IMPROVE OUR WATER WAYS. I do not agree that Mana whenua have the sole right to have strong ambitions. Our council is our elected body to manage these long term goals and education and responsibility is with ALL people. The council must not focus on one aspect, we know there is a problem we must fix it as a whole community. This must be about all our communities coming together and having local community meetings to assess where the real problems lie and allow the local community such as the local community board to advise and have a say. After all those who live there know how to fix this with the 'COUNCILS' Support.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

I do not believe this problem cannot be abated earlier and believe your modeling data is incorrect! We must change the culture in NZ of organic being so expensive and the over stringent rules around organics must be reversed to encourage the growers to want to change their practices back to a regenerative form of vegetable growing. However if COUNCIL can not take ownership for its over use of chemicals in Auckland then how can you get your plan off the ground. Why do you not incentivise organic practices, why do you have to limit the expansion we need food.

16. Tell us what you think about the draft management options being considered?

Disagree

Tell us why:

It all sounds very doable until you realise that the problems of pollution and mismanagement runs a lot deeper than those you have specified.

First you have ruled out plastic bags etc and then allow a new waste of undisposable PPE masks to invade the terrain. Then the council is the biggest polluter of agri chemicals within the urban zones as well as in the rural sector. The council are NOT practising what they preach. How about re-establishing the natural bush along the roads, highways etc and working with NZTA to take their responsibility seriously rather than always expecting the tax payer to clean up the corporate bill!!!!. The Forestry as a corporate should have been taken to task a long time ago. Fonterra is the biggest polluter of plastic bottles, make them bring back the glass bottle exchange at their expense not ours as a measure towards corporate responsibility.

17. Are there other management options outside of those listed that you think we should consider?

Council pollution by chemical and toxic pesticide use in Urban, Bush, Rural terrrains.

Hold Corporations accountable immediately for their part, in polluting products and charge them for their future landfill charges, not the tax payer. Empower Community Boards to bring communities together to strategise and improve THEIR OWN local areas.

Tax the Government for not doing their due diligence by bringing in PPE gear that is not environmentally disposable safely eg; one time use face masks (I find these on bush walks)

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Disagree

Tell us why, and if you think there are other considerations we should include?

This is a community issue NOT mana whenua. Education around these areas and a plan set by individual community boards empowered by Council those elected to do the jobs of RATE PAYERS who have funded our communities all these years.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

No

Tell us why:

The reason this has happened in the first place is by those in Council not having had proper local level community input. The powers that be got us into this mess without consultation of the LOCALS it is time now before council become even more draconian to listed to the local community boards with local input and reasonable time frames and local plans put in place. Council is on the verge of behaving as a distator without real dialogue.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

You are assuming that climate does not change, the climate constantly changes and we must adjust for those times. "Council has consistently allowed areas to be developed without

proper infrastructure to handle the water that can be collected appropriately. Now the Council is not claiming ownership for the lack of Forward Planning. The needs of the people must come first and get that right for each area. now when the infrastucture is inadequate that must be remedied before placing more strain on the populace. Its not the populace fault that council took money and did not spend it appropriately.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

GET RID of ALL toxic chemicals, pesticides, 1080 and glyphosate that has the potential to run into any water systems. Council is the biggest spender on these products, it is disgusting how little responsibility is placed on these products that are the most harmful to aquatic, human, animal and microorganisms life. Most studies are based on single dose toxicity but how about constant toxicity.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   I don't know

   Tell us why:

   The papers produced are designed for people who have time to read and digest the meanings of what is being discussed. That would be close to a thousand people who qualify and yet the result is being inflicted on around a million people. The paper would not be useful for the detail that the experts or lawyers need to keep the process practical and accountable. Therefore the paper is a political and ideological concept that will create more problems than it will solve. We need practical objectives to achieve and let the experts do what they are trained to do. If they can't, then new experts are required or the objectives rationalized.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

I don't know

Tell us why:

Resilience has not been defined clearly as it is too difficult to read the whole paper. There is no index reference. Resilience sounds like a good thing but without clear explanation can also be used as an ideologically costly process that can make life unnecessarily difficult for people.

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Provided it is done wholistically.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

We all live in Auckland. We all contribute to the benefit of this city and we all contribute to the problems of Auckland. We also live in a democracy where all voters have an equal say in who should manage our resources. It is not New Zealand's way to be managed under racially selected people . To assume that one culture is more in tune with nature than any other culture is an insult to all the other people of Auckland.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

The stricter standards should not just be stock but all contaminants. However, restrictions need to be verified with critical analysis of the cause right back to an unreputable cause and an analysis as to better ways of managing the problem before more restrictions are applied. We have just had 6 years of control that resulted in more problems, not solutions.

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

Redundancy suggestions from the users would be a good start. They know they are on borrowed time and some may volunteer to quit. A working committee of the affected people with equal rights in an open forum would at least get the reasons for continuing out in the open, making a decision easier.

21. How do you think we should prioritise allocation where or when water is scarce?

Again, all affected people should be kept in the loop in an open forum. Every area will have different drivers.

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#1417

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our fresh water.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

All citizens have an equal right and an equal interest in ensuring the quality and good management of all water resources. Maori do not have any special claims or rights or decision-making rights to water resources above or before any other citizen and especially ratepayers in Auckland (of which I am one). This is race-based politics and as indicated by the new government, must stop. Put a halt to all special consultations with Maori, iwi, hapu etc, or even Maori councillors, debate it openly in Council meetings, let the public know what is being discussed, do not hide anything or give anyone any special privileges or payments. Just stop all Maori-based consultation.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Other

Tell us why:

Asa with anything else the council does, this needs to be openly discussed and the public need to know what is happening.

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

    Ensure adequate monitoring of all freshwater resources, employ more people if necessary. Do not let this issue be monopolised by any group or company. Get the public on board, make it easier for us to report anything they see that doesn't look or smell right, and then take action, and then let the public know that you have taken action on it.

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

I don't know

Tell us why:

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

I don't know

Tell us why:

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

I don't know

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

I don't know

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

I don't know

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    I don't know

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    I don't know

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    No

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   We are a community group doing restoration in the upper reaches of the Hauraki Gulf. Water quality is a real challenge with continual sewage overflows in heavy rainfall events and massive mud load due to sedimentation. This is ALL due to human activity and the attitudes and values of us all. We need a policy like this to make sustainable change.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Agree

   Tell us why:

   I think it is spot on. We need a paradigm shift if we are going to affect change and I believe that this document delivers that. The only thing I would add is that this is not going to be easy and there will be budget challenges principally to following this approach that will require innovative thinking to meet this policy without blowing the budget."S

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

As housing intensification progresses, these natural spaces will become increasingly important for the mental health of the population to enjoy, without necessarily entering them directly.

7. Do you have any feedback on the proposed environmental outcomes?

I agree with these areas being identified as requiring specific environmental outcomes. They are very different and unique.

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Other

Tell us why:

I think that those are good, but I think that Te Wai o Pareira [Henderson Creek] needs to be added as a unique and special taonga. It isn't at the moment, but that is due to it being treated as an extension of the sewer network for decades and the upstream runoff causing massive silt damage to this taonga such that it is no longer regarded as such by many. But because we (humans) have destroyed this taonga we need to make this one a priority, as it is surrounded by one of the higher populations of urban Maori and thousands of people have access to it. It is an outstanding water body - it has been destroyed by us and needs to be restored by us and then enjoyed by the thousands of people surrounding it.

9. Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?

Agree

Tell us why:

Recreational use of Te Wai o Pareira is high (a Safe Swim Site), with local clubs with kayakers, rowing skiffs, waterskiing and sailing all active all year. The high incidence of sewage overflows at this site both during high rain fall events and overflows due to pipe failure are very concerning. We recorded 41 sewage overflows in 2021, 96 in 2022. This area needs prioritisation for attention!

10. What do you think about the summaries of the baseline health of our rivers/streams and lakes?

Agree

Tell us why:

We need to be data driven and to set a baseline to which we will measure the impacts of actions. This needs to be highly visible to local communities and involve local communities where possible.

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Very dissatisfied

Tell us why:

They have been abused. They are used as the dumping ground for sewage overflows and the increase in sedimentation has killed many of them. They are in a dire state due to how we treat them.

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

We need to manage what we put in and create awareness in the community about how these toxins are getting in to our waterways and how. We must not exclude minor improvements in these factors as we have got to this position in incremental steps and we need to take larger increments back, but each little gain is important.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Definitely, as we have seen the benefits first hand of increasing the shade over a local stream. Life is returning, (pending the next concrete run off event).

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

There needs to be more openness with the communities about the state of e-coli in our waterways. We need more monitoring and tracking down of persistent dry weather sources of contaminants. At present, there are areas identified which require research to determine the sources but no visible action. This is unacceptable. This target needs to be set higher.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

Could council work with growers and research organisations to develop effective alternatives to the current fertilisers to start the mitigation earlier. I generally support however, the longer time frames, but with measurable published data showing progress to meet these targets.

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

I support this approach. However, the current funding model to address urban wastewater overflows is insufficient to see the needed progress. We need to remove this restriction and allow for more rapid mitigation.

17. Are there other management options outside of those listed that you think we should consider?

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

I totally agree with this. However, the rules around reclamation need to be clarified. Reclamation for the purposes of establishing a wetland (eg a small bund to prevent the ingress of salt water) should be excluded. At present this is being used as a reason as to why a wetland cannot be established.

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

I am supportive of considering nature first. After all, we are totally dependant on water for our use. Why cannibalise the resource that is sustaining you??

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

#1807

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

#1839

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Tell us why:

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

Tell us why:

5. **Do you think we should add ‘resilience’ as a value in the Auckland Unitary Plan?**

Tell us why:

6. **Do you think we should add ‘amenity’ as a value in the Auckland Unitary Plan?**

Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

Agree

Tell us why:

11. How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?

Fairly satisfied

Tell us why:

we need to spend more so that it does not flood again and ruin families

12. Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?

Yes

Tell us why:

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly do not support

   Tell us why:

   Water is the essence of ALL life and everyone has an interest in healthy water – in streams, culverts, lakes, wetlands or out of a tap. Auckland Council's vision supports the idea that water is of more importance to one ethnicity than to all others. The presumptions that Māori have a special relationship with water that is not shared by the rest of the community and that they have "stronger ambitions to improve our waterways" are simply wrong. I oppose any long-term plan or vision that provides different rights for people and communities based on race. All Aucklanders should be equal stakeholders in how freshwater is managed in our city. In order for me to support a vision for a freshwater management plan, there must be no racial discrimination involved in the decision-making, monitoring, management or allocation of the region's freshwater. Preference should not be given to the views of one racial or ethnic group.

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. What do you think about our proposed vision statement for the Kaipara FMU?

Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Tell us why:

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Tell us why:

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Tell us why:

7. Do you have any feedback on the proposed environmental outcomes?

8. What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?

Disagree

Tell us why:

The Setting Our Direction document places Māori cultural values at the top of a list of considerations for managing 'outstanding waterbodies'. I oppose any policy that prioritises one race or culture's values over all other races or cultures in relation to the management of our freshwater.

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

Tell us why:

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Water is too crucial for the Council to base its management on race. Every single person in Auckland relies on our freshwater to survive. No one should have any special rights or influence regarding our freshwater simply because of their ancestry. We cannot begin to discuss the many aspects of improving the quality of our water and the health of our environments until the council ensures a foundation of equality that has every Aucklander as an equal stakeholder.

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   I think that this vision is great. I believe that only good will come of respecting Te Mauri o te wai

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. What do you think about our proposed vision statement for the Manukau FMU?

Agree

Tell us why:

The Manukau area has such precious toanga and feeds directly into the Hauraki gulf. The mana of the freash water streams need to be protected in this area. I like the emphasis in the vision statement on the restoration and protection of fresh waster bodies.

5. Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

Yes,given recent flooding events I do think that this is an important edition. I believe that the more that we improve our natural environment and respect our waterways the more resilient they (and in turn we) will be

6. Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?

Yes

Tell us why:

I think that Aucklander's have a right to be able to enjoy the waterways that make up our city. We need local and central government to help us protect these environments so they can continue to be used and enjoyed. I think that people should be able to swim, fish, and exercise on and around the water. As people use the spaces they grow in their desire to protect it too so I believe that recreation can bring positive environmental gains

7. Do you have any feedback on the proposed environmental outcomes?

I am going to speak to the Waitakere ranges heritage area as this is an area I am most familiar with and passionate about. This area does need specific protection as it is such a toanga and could be so negatively impacted by development of any kind. Many of the waterways of the waitakere ranges are pristine and are an example of what healthy waterways should look like. It is so amazing to have great examples of healthy eco systems and these need to be protected and expanded.

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Agree

    Tell us why:

    Yes we need to monitor and establish a baseline so we can see trends over time. It is important so we know what is working and what isn't. Also so we can adjust our activities if they are having negative environmental impacts

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Very dissatisfied

    Tell us why:

    In the area I am familiar with Te Atatu Peninsula and other urban West Auckland waterways there is so much work that needs to be done. Most urban streams are covered over, or unshaded. Our local stream has concrete running into it from construction, killing all life. Our local awa Te Wai o Pareira is full of sediment and has to contend with regular storm water overflows.

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Yes

Tell us why:

Yes, it can do so much damage to an eco system, invertebrates that contribute to the health of streams are incredibly sensitive. I would love to see other runoffs included in this testing including oil run off and concrete runoff both of which have an effect of urban streams.

13. Do you think we should include and manage temperature as an attribute in this plan change?

Yes

Tell us why:

Riparian planting is a relatively easy and effective way to improve the heath of a stream. I would love to see this become standard across all streams as I think it would improve water quality and a streams ability to sustain life

14. What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?

Strongly support

Tell us why:

Without targets progress would be slow, targets can help create action. The targets proposed sound promising and I am excited to see what can be achieved.

15. How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?

16. Tell us what you think about the draft management options being considered?

Agree

Tell us why:

I would like to speak to managing run off and sedimentation. In the area that I live this is a huge problem and is having negative impact on the waterways. I am very keen that management of this would become part of the plan.

17. Are there other management options outside of those listed that you think we should consider?

I think that urban streams that have been covered over should be daylighted if possible. Although this may be a costly project I think that the Auckland Floods have proven how constricted our waterways are and we will continue to have flooding unless we learn to allow space for water. Creating healthy urban streams benefits native species, recreation and meets the principles of Te Mana o Te Wai

18. What do you think of our proposal to prioritise catchments across the region for fish passage remediation?

Agree

Tell us why, and if you think there are other considerations we should include?

Yes this makes perfect sense we need to allow fish migration and breeding. I think there are simple and cost effective solutions in many cases.

19. Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?

Yes

Tell us why:

It's difficult to believe that we actually need to have this discussion, of course we should at the very least hold on to the wetlands that we have. Wetlands are vital habitats, catch sediment, filter run off so that it doesn't poison waterways, and help to reduce flooding. I think yes we should go further than the government requirements

20. How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?

21. How do you think we should prioritise allocation where or when water is scarce?

22. Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?

Thank you for this fresh water management project. It is vital to the future of our city both for the natural world and for people that use the water. All of the things that are proposed are excellent, now to see them put into action!

15. **How should we strike the balance between maintaining food security and improving water quality in the Pukekohe Specified Vegetable Growing Area?**

16. **Tell us what you think about the draft management options being considered?**

    Tell us why:

17. **Are there other management options outside of those listed that you think we should consider?**

18. **What do you think of our proposal to prioritise catchments across the region for fish passage remediation?**

    Tell us why, and if you think there are other considerations we should include?

19. **Do you think we should retain our existing regional standards for wetlands and streams where they are higher than national requirements?**

    Tell us why:

20. **How do you suggest the council fairly reduces water allocations to existing consent holders where that is considered necessary?**

21. **How do you think we should prioritise allocation where or when water is scarce?**

22. **Do you have any other feedback on improving freshwater in Tāmaki Makaurau / Auckland?**

Setting our Direction for improving freshwater in Tāmaki Makaurau / Auckland

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Organisation (if applicable):

Local Board: Henderson-Massey

Your feedback

1. **What do you think about the direction we are proposing in the region-wide vision statement?**

   Strongly support

   Tell us why:

   Because water is important in our lives

2. **What do you think about our proposed vision statement for the Hauraki FMU?**

   Tell us why:

3. **What do you think about our proposed vision statement for the Kaipara FMU?**

   Tell us why:

4. **What do you think about our proposed vision statement for the Manukau FMU?**

   Tell us why:

5. **Do you think we should add 'resilience' as a value in the Auckland Unitary Plan?**

   Tell us why:

6. **Do you think we should add 'amenity' as a value in the Auckland Unitary Plan?**

   Tell us why:

7. **Do you have any feedback on the proposed environmental outcomes?**

8. **What do you think about our approach to identify outstanding waterbodies, with criteria for Māori cultural values, ecological, landscape and recreational values?**

   Tell us why:

9. **Tell us what you think about our approach to use the Safeswim sites as our primary contact sites, and introduce stricter standards to manage contamination in these catchments?**

   Tell us why:

10. **What do you think about the summaries of the baseline health of our rivers/streams and lakes?**

    Tell us why:

11. **How satisfied are you with the health of Tamaki Makaurau's river, streams and lakes?**

    Tell us why:

12. **Do you think we should include and manage copper and zinc as attributes for urban streams in this plan change?**

    Tell us why:

13. **Do you think we should include and manage temperature as an attribute in this plan change?**

    Tell us why:

14. **What do you think about our proposal to at least maintain the state of waterbodies where they are already good and set ambitious targets to improve the health of waterbodies where they are poor?**

    Tell us why:
