OPTION ONE

KOMPAN – SPICA

(1) GXY8014 / (2) GXY8015 / (3) 8016

The quirky shapes, toothy top and triangle platform invite the curious 6–12-year-olds to investigate the Spica. The rotation point of the Spica is at the centre, and it takes exploration and problem solving to master how to spin. The curved pole can be held on to at any position and the child will figure out that leaning into the pole will increase the spinning speed and leaning out will decrease the speed. Mastering the rotation element stimulates the cognitive skills of the child, particularly the logical thinking. The agility, balance and coordination skills are challenged as the Spica invites different body positions when spinning. The triangular shape of the seat allows room for up to three children, stimulating the social skills of cooperation and turn-taking.

OPTION ONE

PLATINUMPLAY - ACE SWING

2.4M HIGH, 1 BELT, 1 You and Me seat

No playground would be complete without swings! Our Ace Swings have been designed to complement both our own PlatinumPlay range as well as Kompan equipment so they fit into any modern environment. All of our Ace Swings are very robust will with a hot dipped galvanised finish that won't chip, rust or fade.

Pictures are for illustrative purposes only.

KOMPAN - YOU & ME SEAT

SW990121- **H 2.5M**

The easy-entry seat the You and Me swing invites the child and adult to swing together, additionally the height of the seats is such, that adult and child can be at eye level when swinging . The child-parent connection in play is important for the child-parent bonding in social activities.

BALANCING

WOODEN BALANCE LOG 2M

PLATINUMPLAY (Set of 3)

Great for creating a fun link between two pieces of play equipment, these logs require courage and balance to cross. PlatinumPlay Wooden Stepping Logs are made from 250–350mm round treated H5 pine posts of varying lengths. The stepping logs can be arranged in a variety of patterns to suit your play space. Ideas include and inclined balance event, up an embankment or as a bridge between other play events.

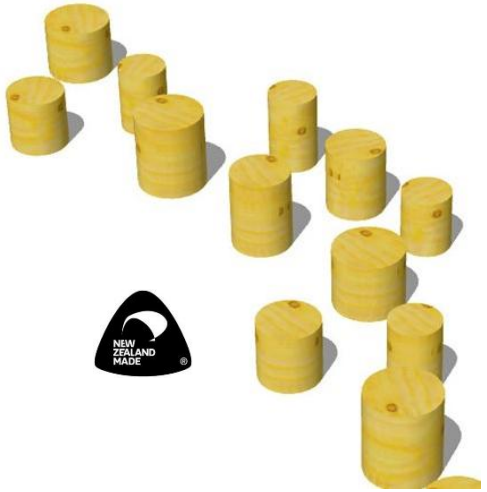

WOODEN STEPPING LOGS

PLATINUMPLAY (Set of 12)

Great for creating a fun link between two pieces of play equipment, these Logs require courage and balance to cross. PlatinumPlay Wooden Stepping Logs are made from 250–350mm round treated H5 pine posts of varying lengths. The stepping logs can be arranged in a variety of patterns to suit your play space. Ideas include and inclined balance event, up an embankment or as a bridge between other play events.

OPTION TWO

KOMPAN - ANGLED TRIPLE TOWER

PCW301221 WITH TUNNEL

Triple the richness of play variation: it's the Triple Tower. A huge attraction to toddlers with its numerous areas to explore, again and again. There is a world of auditive and tactile play panels on ground level, stimulating logical thinking and creativity in the child: The music panel can be played by hitting or clapping the tubes, creating little tunes. The tube and steering wheel panel invites role play, which trains language and negotiation skills. The bubble window in the tunnel bridge distorts voices when spoken into, evoking a sense of wonder and training logical thinking. Sliding down the slide or curly climber to the ground supports posture and balance, all important skills for young children, and great fun! There are varied levels of play challenges in the accesses as well as egresses. This means fun training of life skills for all.

OPTION TWO
