Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

We also need to plan to incorporate a mixture of housing and commercial placed together.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

We need more trees to provide shade and cover for people who are walking along our roads. The UV is extreme in NZ and there is a lack of roadside cover when walking.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Have Your Say on the Draft Kaipātiki Local Board Plan 2026

Submitter details:

Organisation: N/A

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

The community objectives are captured well in the proposal.

In addition, I wish to add that the parks and community facilities must be well maintained, managed efficiently, and meet community needs. These facilities are anchors for our community groups, and individuals who find belonging in these spaces.

If I could suggest a recommendation, it would be about developing Birkenhead Pool with a spa pool. Spa pools in local, council run leisure centres, seems to be a norm already. Birkenhead Leisure centre seems to be specious enough to accommodate a spa pool like in Takapuna.

Thank you for your consideration and great work the Local Board members deliver in our community and neighbourhood in Kaipatiki.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

Local town centres in Kaipatiki are beating hearts, thriving business hubs, offering employment and development. Therefore I wish to advocate for this economic development objectives.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support all

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

In terms of climate goals and alternative energy sources, and Māori aspirations, I would recommend an objective which incentivise solar panels at households, business facilities and community facilities. Solar energy is the future for Aotearoa.

Papatuanuku, our mother earth, and Rangi, our sky father, are priceless; and the more we look for alternatives to fossil fuels, the better for the community, business and individuals.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

If other sculptures are commissioned; can they be of nature whether it be a native bird;; plants etc. As I don't understand how the 'O' on Oruamo Reserve reflects the above qualities.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

As Tangata Whenua, reflecting Te Ao Māori is so important. Plus with what the Government has been doing, showing Māori they are valued and supported is important. There's so much beauty in our native natural world

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

Safety is so important, living in a safe community allows the community to thrive and feel safe

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Personally I think the T3 lane is counter productive. Between 6:30am-10am the right hand lane can stretch up to Birkenhead, while hardly any cars are able to use the T3 lane. Changing the lane to a T2 lane would allow more cars to be able to use the lane, whilst lowering the volume of traffic on the right lane. Sometimes it can take 40 minutes or lower to get to the motorway. And whilst I realise, there's a push for people to use public transport or carpool; sometimes due to shift times, work locations, pre or post work obligations etc; public transport is not an option.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support all

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

What you have proposed supports Te Tiriti o Waitangi. I love that your vision is to prosper our youth while allowing them to stay in the community to do that.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

I believe a community, city, country can only prosper when those in poverty are supported. Prospering the rich while those in low and middle class suffer is not good.

I love that our council looks beyond wealth of the richest and has a heart for all to prosper. I love that you value Māori, thank you for your respect.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Facebook on the community pages. I often see Richard Hills commenting on posts about the community/roads etc, I find that encouraging and caring. Also surveys like this.

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Submission to the Kaipātiki Local Board – 2026–2029 Local Board Plan

Tēnā koutou,

We respectfully submit this feedback on behalf of the Sikh community of the North Shore.

The Sikh community has been part of New Zealand society for many decades and continues to contribute positively to the social, cultural, and economic wellbeing of our communities. Since 2018, we have operated **Gurdwara Sahib North Shore** at **128 Sunnybrae Road, Glenfield**.

Our Gurdwara is open seven days a week and serves both the Sikh community and the wider public. We provide a range of free services, including:

- Family support and counselling.
- Assistance for seniors and new migrants.
- Employment guidance and CV preparation.
- Punjabi language, music, maths, and English classes.
- A Saturday language school with around 100 registered children.
- Free community meals (Langar) for everyone.
- Food parcels and grocery support for families in need.
- Community health initiatives and medical outreach programmes.

These services benefit hundreds of people and help strengthen community wellbeing, inclusion, and social connection.

However, our current premises face significant parking limitations, which restrict our ability to meet the growing needs of the community. For Sikhs, the Gurdwara is not only a place of worship but also a community hub where people gather for daily prayers, cultural education, family support, weddings, memorial services, and other important life events.

As our community continues to grow, we respectfully request that the Local Board consider supporting the long-term needs of the Sikh community by helping identify suitable land or premises within the North Shore area for a future Sikh community and cultural centre.

We are not seeking funding. Rather, we would welcome the opportunity to discuss a long-term lease or suitable site that would allow us to establish a permanent facility capable of serving future generations and continuing to provide valuable services to the wider community.

Thank you for considering our submission and for supporting the diverse communities of the North Shore.

Note: This simplified version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed, and handwritten submissions have been transcribed.

Submitter details:

Organisation: N/A

Local Board: Kaipātiki

Your feedback:

1. **How well do you think we captured the needs and priorities of *our Community* in this section?**

Very well

Tell us why, and if there's anything else you would like us to consider

2. **How well do you think we captured the needs and priorities of our *Natural Environment* in this section?**

Very well

Tell us why, and if there's anything else you would like us to consider

Excellent objectives; we just need the financial decisions made to ensure we can meet these objectives, though I understand the local board has limited ability to increase available funding.

3. **How well do you think we captured the needs and priorities of our *Built Environment* in this section?**

Not very well

Tell us why, and if there's anything else you would like us to consider

The work on Northcote town centre is great - please keep it up and speed it up, if possible. But the peace and privacy of residential homes can currently be lost at any time by 3 storey developments of 5 or more apartments going up next door, blocking sun and views. And the proposed new plan will allow much higher developments, up to 10 stories in many places,

including in streets surrounding ecologically sensitive areas such as Tuff Crater. We need more housing but buildings like this suit main thoroughfares, and in places where the majority of buildings are already high rise eg in the new Northcote development, but not in small residential streets. Traffic congestion caused by increased on street parking from the 5 apartments on one section developments eg Deuxberry Ave, creates danger for drivers and pedestrians. On street parking could be restricted - why are we paying to build roads only for people to clog them with their parked cars? If they want a car, an off-road parking space should be a prerequisite. I realise most of these issues do not fall under the jurisdiction of the Local Board but they directly affect your Build Environment Objectives, so perhaps these objectives need to be expanded to help us better resist such unfettered development.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

These objectives seem to be more the concern of businesses themselves and education providers, rather than ratepayers. Town centres are often very ugly, due to poor design and seemingly zero aesthetic sense of business owners, and possibly slum landlords who seem to do as little as possible to maintain the buildings. I definitely wouldn't want to come to some local town centres if I was an international visitor, even if there is a good restaurant there.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

- 8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?**

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Your feedback:

1. **How well do you think we captured the needs and priorities of *our Community* in this section?**

Quite well

Tell us why, and if there's anything else you would like us to consider

2. **How well do you think we captured the needs and priorities of our *Natural Environment* in this section?**

Quite well

Tell us why, and if there's anything else you would like us to consider

3. **How well do you think we captured the needs and priorities of our *Built Environment* in this section?**

Quite well

Tell us why, and if there's anything else you would like us to consider

4. **How well do you think we captured our *Economic Development* needs and priorities in this section?**

I don't know

Tell us why, and if there's anything else you would like us to consider

5. How well do you think we captured our *Transport* needs and priorities in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

There has been a huge increase in the number of cars parked on the roadside which has meant a number of streets are almost impassable with on coming traffic. Maneuvering from a driveway onto the road is now becoming an additional risk because the parked cars do not allow you to see other road users. In some cases people are taking the opportunity to park their cars in the side streets closer to bus stops which hinders local residents.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

The taka golf course is an example where your consultation was very poor. You could have asked how do we stop the flooding in the valley and not what you asked which was we are going to flood some of the golf course what do we do with remaining land. And if the "treaty" said it rained cats and dogs it doesn't mean that so you are actually raining cats and dogs. So you are effectively rewriting the treaty and expecting the majority to agree with your stated

"Māori outcomes

- climate outcomes
- equitable outcomes.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

I'm not sure that the "Maori world view" even existed a few hundred years ago, so are you again potentially rewriting history?

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

Its good that you have a vision but how you achieve this remains questionable. Most side roads are now becoming street car parks (unfortunately). And 3 story apartments will intime been shown to be a bad choice of space. Highbury/ northcote shopping are full of cafes/hairdressers etc as the bigger picture says Albany mega mall. If you used KT decision analysis tables then I might be able to understand what your decision making is based on.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

What about the immigrants and their business?

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Do not support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

I dont really like a focus on your "nationality" as this historically caused most of the wars. Some people would say that we are the human race not separate races. By all means support people who are struggling to make ends meet.

- 7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.**

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Well to do this properly would probably take me a few hours to work out, what is important and weight the wants versus the must have's. how about you develop the list and the weightings and then ask the community if they agree?

- 8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?**

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Have Your Say on the Draft Kaipātiki Local Board Plan 2026

Your feedback:

1. **How well do you think we captured the needs and priorities of *our Community* in this section?**

Not well at all

Tell us why, and if there's anything else you would like us to consider

It is racist to only support Māori identity and culture and not all the other ethnic groups and races.

2. **How well do you think we captured the needs and priorities of our *Natural Environment* in this section?**

Quite well

Tell us why, and if there's anything else you would like us to consider

3. **How well do you think we captured the needs and priorities of our *Built Environment* in this section?**

Not well at all

Tell us why, and if there's anything else you would like us to consider

Compared to other countries our urban development quite low quality. please make some effort to compare against even third world countries with better quality.

4. **How well do you think we captured our *Economic Development* needs and priorities in this section?**
-

Not well at all

Tell us why, and if there's anything else you would like us to consider

Town centres need more high risers to house people working in the city, 1 hour commute is the norm but unacceptable.

It is racist to only support Māori businesses and not all the other ethnic groups and races.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

Our roads are not all that well maintained, bad old roads are just paved over so that after some time the same cracks & potholes appear on the new layer, each time this happens the road surface just gets higher with a deep dip where a manhole cover or other object is that can't be paved over.

Please remove the whole road surface & create it from scratch to ensure a long lasting road surface that will save tax payer money in the long run.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Do not support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

stop wasting tax payer money on anything that's not infrastructure, let us vote on where our money is spent, how much we pay and what your salaries are.

Voting you in just so you can do what you want is the antithesis of democracy.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

The only factor about the future of local facilities and assets is the will of the people, let us tell you what to do with them.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

We need to tell you how to govern the community, you need to serve our needs as we communicate them to you, not how you imagine we want the community to be run.

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

I believe the current objectives capture the needs of our community very well. The council has done an excellent job in maintaining our local parks and community facilities, which remain vibrant and well-kept spaces for everyone to use. Furthermore, I appreciate how accessible sports and recreational opportunities are, which truly helps foster a healthier, more active community. The consistent variety of local community events also ensures there is always something engaging for residents to participate in.

Only one suggestion comes to mind:

Enhancing High-Traffic Facilities:

While our parks are generally well-maintained, popular spots like Marlborough Park often get very busy. To ensure these spaces continue to 'meet community needs' effectively, the council might consider upgrading or expanding the existing play and exercise equipment to accommodate higher usage.

(Even something as simple as a few more swings and another slide would do the trick, as it is a great park already).

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

I believe the current objectives capture the needs and priorities for our natural environment very well. Our community is fortunate to have access to many beautiful parks and well-maintained walking tracks, which are clearly valued by residents and play a crucial role in our local quality of life.

To continue building on this, there are a few additional areas the council might consider:

Support for Local Conservation Efforts: Given that our community strongly values the environment and is already highly engaged in protection efforts, the council could further empower local volunteer groups and networks that focus on pest management and native restoration.

Enhanced Biodiversity Initiatives: Encouraging the naturalisation of more local parks through initiatives like planting native vegetation or creating corridors for pollinators would not only support local wildlife but also deepen the community's connection to our unique natural environment.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

I believe the current objectives for the built environment capture our needs and priorities very well. My personal experience with the Glenfield Mall has been consistently positive, as I find it to be a great, well-functioning hub that effectively meets local needs.

However, to support the objective of creating 'vibrant, safe hubs,' I would like to suggest a few considerations:

Enhanced Security Measures: There have been noticeable issues regarding crime in and around the mall, which can impact the feeling of safety for residents. Increasing security presence or implementing additional safety assistance at such key hubs would be a proactive step in ensuring they remain comfortable, family-friendly spaces.

Maintaining Local Hub Vitality: Continued focus on ensuring these major hubs remain well-managed and modern is crucial for their long-term success as community centers.

Balancing Development and Accessibility: As urban development progresses, it is important to ensure that new projects remain sympathetic to the character of our established suburbs while maintaining inclusive, low-impact design principles.

Not sure if this is the right place to raise this, but I'd love a Kmart in Glenfield!

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

I think the objectives capture the needs and priorities for our economic development quite well. While Glenfield might not be a primary destination for international or local tourism in the traditional sense, it is undoubtedly an excellent place to live, which is a major economic strength in itself.

To further refine these objectives, here are a few additional considerations:

Focus on Local Employment: Rather than prioritizing tourism, I believe there is more value in focusing on how our business areas can provide more high-quality opportunities for people to work locally. This would reduce commute times and support a stronger, more sustainable local economy.

Strengthening Community-Focused Businesses: Supporting local businesses that serve the daily needs of residents is critical. If we can make our local business hubs more attractive and accessible, it benefits those of us living here and enhances our overall quality of life.

Sustainable and Māori Business Support: I fully support the goals of helping our business community embrace sustainable practices and ensuring that Māori businesses have the support they need to grow and thrive within our area.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

I believe the transport objectives capture our community's needs poorly. There is a significant gap in service reliability that must be addressed to ensure people truly have 'travel choices to get to work'.

To improve the system, I suggest the following:

Improve Direct Connectivity to Employment Hubs: The current lack of direct bus routes makes commuting to major hubs like Albany unnecessarily difficult, as needing three separate buses is not a viable option for many workers.

Reduce Commute Times: It is unreasonable for a journey from Glenfield to Albany to take over an hour; the council should prioritize more direct services between these hubs.

(I understand using constellation as a hub, but it seems crazy that some of the available options go to Takapuna first?)

Improve Service Reliability and Communication: Buses are sometimes cancelled without any notification, leaving passengers stranded.

Implement Proactive Delay Notifications: If there are delays, these should be communicated to passengers beforehand via an app.

Adherence to Timetables: Buses frequently fail to wait for passengers if they arrive ahead of schedule, meaning timetables should be adhered to more strictly to ensure service consistency.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

I generally support the plan as it highlights important goals for our community and environment. However, there are critical areas that need more attention to be effective:

Public Transport Reliability: The current transport network needs significant improvement, specifically by creating direct routes between Glenfield and Albany, improving schedule adherence, and providing better real-time communication regarding cancellations or delays.

Safety and Maintenance: While our parks are fantastic, high-traffic areas like Marlborough Park require upgrades to equipment to meet demand, and our local hubs would benefit from increased security to address youth crime and enhance community safety.

Regarding climate change and Māori outcomes, I would like to see the plan focus on:

Climate Change: A stronger commitment to practical, local climate action, such as enhancing public transport to reduce car dependency and increasing tree canopy coverage in our urban spaces to mitigate heat and improve biodiversity.

Māori Outcomes: Actively integrating mana whenua perspectives into the management of our parks and waterways to ensure our natural environment is protected in a way that respects and reflects local Māori identity and culture.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

When making decisions about the future of local facilities and assets, the board should prioritize the following factors:

Current and Future Community Demand: Decisions should be based on how well an asset is currently used and whether it will continue to meet the evolving needs of the local population as our community grows.

Accessibility and Inclusivity: Assets must be evaluated on how accessible they are to all members of the community, ensuring they provide equitable benefits across diverse groups.

Sustainability and Maintenance Costs: Long-term sustainability should be a key factor, considering both the environmental impact of the facility and the ongoing financial burden of maintaining it.

Adaptability and Multi-purpose Use: Rather than decommissioning facilities that may no longer be 'fit for purpose,' the board should first explore whether these assets can be repurposed or upgraded to serve new, multi-functional roles for the community.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

You probably do most of this, but as I haven't personally seen them I will note them down.

Diverse Communication Channels: Instead of relying solely on digital platforms, consider utilizing physical newsletters or community noticeboards in popular areas like local malls to reach residents who may not be online frequently.

Simplified Feedback Processes: Keep engagement forms brief and focused, ensuring the questions are easy to understand so that people can provide their input without it being a time-consuming process.

Proactive Information Sharing: Clearly notify the community about upcoming projects or decisions well in advance through various channels to ensure residents feel genuinely informed rather than just reacting to finished plans.

Community-Led Engagement: Host occasional informal "drop-in" sessions at well-used community locations, such as parks or shopping centers, to allow residents to discuss local priorities directly with board members.

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

Our area has issues with massive trees along the berm of most suburban streets, particularly where I live in Castleton Street, Birkenhead, they are never maintained and drop millions of leaves all over peoples property during Autumn, blowing on to roofs, block drains, cover footpaths, cause skidding when walking and driving as they become slimey, these trees in Summer also block light to the house and garden areas. The trees are dangerously massive and during storms, branches fall off and block the road. They are a danger to pedestrians, particularly children walking to school and I have personally witnessed during windy days branches falling off and saw a child hit by it on the way to school. Our area is not well maintained, cars are parked right up to the giveway signs on the sides of roads, there is no yellow lines in these areas and people nearly have accidents when trying to turn into the road as it becomes an instant one laner and cars are heading up the road from the other side and there is no where to pull over, due to all the cars parked.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

no this does not happen in our area

5. How well do you think we captured our *Transport* needs and priorities in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

public transport is poor, buses are not often enough and we need to walk miles to get a bus in a different area, depending on our destination, there is limited options for where the buses will go, normally need to get two buses to get anywhere. No option but buses in our area. No trains and to catch a ferry you need to catch a bus and then another bus just to get to the wharf.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Do not support at all

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

Climate change is a joke and a waste of money and Maori outcomes aspirations are divisional, we are all NZrs, if you are born in this country, this is your country no matter your background or where your ancestors came from (my ancestry is mixed and my Maori ancestors arrived in NZ 900 years, I do not agree with climate change goals, there is not enough NZ research, I am talking about separate unbiased research from our country to support this goal or to back it up

- 7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.**

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Drainage, flooding, marking up roads properly, lines through the middle will stop people driving in the middle of the road - look at Verbena Road for example, and with all the new townhouses, cars are crammed everywhere, leaving roads dangerous to pass other cars on the road, repair and maintenance of roads and maintain the parks and streets and berms. Remove the ridiculous European trees that are mean't for PARK areas not our suburb, - they all need to be cut down and replaced with natives - why are there deciduous 50+ metre trees everywhere? where are the native trees? Drive through Takapuna or Milford suburbs beautiful trees and beautifully kept suburbs everywhere.

- 8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?**

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Send people a letter and email and a valid voting process with return envelopes or option to vote online - not everyone can access the internet, particularly the elderly, not being told what is going to happen. What do have available? your say?, what are the numbers? 10 percent comes back and that is what council and local boards make their decision ? More emphasis with mail outs, advertising and voting rights are needed

Your feedback:

1. **How well do you think we captured the needs and priorities of *our Community* in this section?**

Quite well

Tell us why, and if there's anything else you would like us to consider

Better advertising of local events that involve local groups and clubs would be appreciated.
i.e. car, craft, art and hobby organizations.

2. **How well do you think we captured the needs and priorities of our *Natural Environment* in this section?**

Quite well

Tell us why, and if there's anything else you would like us to consider

There is not enough consideration given to the loss of natural rain drainage that occurs in gardens, when housing developments concrete over them. I have not seen any enlargement of road rain water pipes, are the existing ones near there maximum flow limits?

3. **How well do you think we captured the needs and priorities of our *Built Environment* in this section?**

Not very well

Tell us why, and if there's anything else you would like us to consider

You are not considering future population growth and specifically job opportunities.

AI is forecast to make some existing jobs redundant permanently, what are these potentially non employed, wage earning people to do with their time? Where are they going to go to occupy themselves?

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

As per the last answer, jobs will be disappearing, it will affect young people more at first. What future will they have locally if unemployed?

5. How well do you think we captured our *Transport* needs and priorities in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

You are catered for by public transport if you are young/middle aged, physically fit and live on a flat piece of land near a road. If you are old and/or suffer from a walking impairment, live on one of the many hills, slopes and away from close access to a road less so. There is no easy answer other than having your own transport. Unfortunately, the increase in the intensification of housing in the area is leading to more traffic jams and drivers going through red traffic lights to get where they need to go in time. Less people is the answer not growth to accommodate more.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

Actually listen to what people say, not pay them lip service.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Keep existing green spaces. Stop housing intensification. Reclaim and manage flood prone areas.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Have more information dispersed in the form of door drop leaflets.

The parks are often overgrown and need more regular mowing. There needs to be council workers working the parks not sitting in their cars by the parks. The amount of rubbish around reflects the need to provide rubbish bins to stop all the rubbish going down drains.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

Our urban development minimises impacts on the natural environment. -this is not being met at all. You are building concrete playgrounds and ghettos. Many are already run down and not looked after and they are all only a few years old. You are also developing multiple houses where there once was one house. This is far from minimising impacts on our natural environment. This is killing our native wild life and making drains over load as there is no vegetation to absorb the water. This is just a joke and needs to stop. Look around the world and learn from all these developments. You are building too many houses for not the number of people.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Your feedback:

1. **How well do you think we captured the needs and priorities of *our Community* in this section?**

Not very well

Tell us why, and if there's anything else you would like us to consider

Too much assumption and use of AI. Hard to use platforms. Little to zero communication with ordinary people.

2. **How well do you think we captured the needs and priorities of our *Natural Environment* in this section?**

Not very well

Tell us why, and if there's anything else you would like us to consider

Investment in infrastructure and maintaining existing libraries, schools,

Swimming pools etc and actually communicate with ordinary hard working folks would be a good start.

3. **How well do you think we captured the needs and priorities of our *Built Environment* in this section?**

Not very well

Tell us why, and if there's anything else you would like us to consider

Vacant/unleased spaces in Birkenhead alone that have never been maintained or explained for decades.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

Who cares about Maori? We're all people.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Health and hauora need to be an increased focus of local government. Our national government is not providing solutions to the increasing cost of healthcare or the increasing prevalence of illness such as diabetes, cardiovascular disease, cancer etc. In Beach Haven I see an increase in people asking for free food services, and our community Facebook page is full of locals sharing leftovers, asking for kai, or sharing the location of free food. Food poverty puts our physical and mental health in jeopardy, and when access to health care is determined by what you can afford, lots of people miss out including our children (aka our hope and future). We need other ways to heal ourselves and I believe the local board can do a lot to support this happening at a community level.

Changes at a local governance level could include:

- Funding for and increased promotion of fitness programmes in parks, community centres, libraries etc. to encourage people to exercise in the public spaces available;
 - Increasing support for and promotion of community gardens and kai growing spaces, pātaka kai, marae-based food distribution services, community meals, and food education to encourage people to see food as an avenue to better health;
 - Mental health and wellbeing services promoted and facilitated at a range of council venues, with connections to organisations operating in Kaipātiki and at a regional level across Tāmaki.
-

- Increased eco events across neighbourhoods that target low/no cost wellbeing strategies(e.g. bike repair hubs and community night rides, cooking classes and zero waste food prep, whānau friendly dance and music events, composting and accessible food growing)

I believe that the local board would strongly benefit from consulting community organisations working in the space of health, mental health, kai, and financial support to evaluate which solutions are best to invest in, and what can be done that will not incur a huge cost to the board.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

The taiao is one of the best things about living in Beach Haven. I would love to see more representation of mana whenua history along our many beautiful walkways - whether that be through art, events, or signage.

I think that the local board should consider making emergency flood (/weather)response plans public and transparent. Where are the meeting places during such events, and how is the local board facilitating a coordinated response?

I would also like to see more workshops or opportunities to learn strategies for climate resilience at home from locals e.g. water saving, food growing, insulating/warming old houses efficiently, learn to ride a bike, planning for a disaster etc.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Highbury is beautiful with its cute little roundabout and the twinkling lights! We love Yummy Korean BBQ, Genzui Ramen Bar, and love that they have been able to stand the test of time. I think our town centre is awesome and I would love to see some kind of celebration to mark what the businesses bring to our community.

I wish Kaipātiki was safer to cycle through. If I could cycle to work I would, but the roads are just not safe enough with such high density of traffic. The bus system is great but Onewa Road is purgatory!! It would be so nice to zip through on a bike. Even to cross the Harbour Bridge!

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Businesses need to be uplifted and celebrated while financial times are forcing people to spend less money. And I am very concerned about how difficult it is for our rangatahi to find employment.

Maybe there can be a collaboration with school to capture stories of young people who have tried to find employment? How have they found success / how does the circumstance make them feel? Are there any programmes that the local board can support through CABs, libraries etc to prepare CVs, gain skills for employment etc? Can community organisations and projects be partnered with to intern young people to prepare them for employment? I don't know what the local board can do to support this but I would love to see that you are trying and are engaging in public feedback.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Commuter cycleways are few and far between, and the congestion on the roads is crazy at school time. I think kids don't walk or cycle to school because it's just not safe with so many cars on the road, and there seem to be fewer initiatives like walking school bus' or cycling clubs. So many kids get dropped off in big gas guzzling SUVs which sit on the main roads for hours a day just poisoning the air. It seems so unsustainable and not good for anyone really. I would love to see the local board put some thought into this and think of ways to make our roads and streets more walk/cycle friendly.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

As above, I think the local board can be collaborating more with community organisations that are filling the gaps in health, food, flood and weather resilience, fitness, education, mental health, and whānau support. I think Kaipātiki local board area is a microcosm of what makes Tāmaki such a fantastic place to live, and anything that is invested in should be led with the questions - how is this uplifting our land, and our people? Are we making Kaipātiki ready for a challenging future? Is this kaupapa making Kaipātiki a more hopeful, liveable, communal place to live?

- 7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.**

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

I think old facilities are important to maintain and renovate where possible, especially those that have significance to a community group.

That said, I think upgrades should always focus on making building more environmentally future fit (e.g. rainwater capture, solar, insulation, double glazing, better light, green space enhancement).

I think when assessing whether a facility is fit for purpose, the local board should consider whether they could be doing any more to make the most of the space, promote or encourage its use or make its use more accessible, and whether the communities affected by the closure of a space will have an alternative location nearby to facilitate their activities. If not, the board should consult those people and work with them to find opportunities to help with a transition even if they are outside of the council's usual remit (e.g. school halls, churches etc).

- 8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?**

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

I think they should check out Yeah Nah Bills! It's a great system to get busy parents, or shy teenagers, or differently abled people, or even good old couch potato phone addicts to share their opinions easily. The amount of data that could be gathered with such a system would be much more than these Have Your Say forms I would imagine, and this may mean getting a broader picture of the diversity of views in our local board area.

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

This seems to cover the community priorities I'd expect for a local board, but the detail of what funding choices are made is what counts, both within this objective and between objectives.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

5. How well do you think we captured our *Transport* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

I don't know

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Where do I find this draft plan. I used to read all my local news in the North Shore Times. Since it has stopped I feel very disconnected from what is going on in the community. I cannot stand Neighbourly. I end up with a heap of junk information that I am not interested in.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

not sure if local board has much say in bus frequency and service areas, but love to see bus travel made more attractive with more frequent services on more than just the "main routes". Being able to work locally often means driving to work as buses seem to only really suit those working in the CBD.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support all

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

community still has access to facilities that are important to them.

if something is not fit for purpose, can it be made fit?

survey actual use and intended/desired use rather than working off assumptions when making these decisions.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Would love more parks that are directed to our special needs community. Particularly children on the spectrum. They have no safe places to engage in where they are met with complete understanding. School holidays and weekends are often met with waiting in cues and busyness. These situations are hard for people on the spectrum. Often this leads to families feeling isolated and alone. There are certain programmes but more community understanding and support is required for our neuro diverse families.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

I don't know

Tell us why, and if there's anything else you would like us to consider

Good to recognise differences and what we each bring to the community, but where is the unity in community? What common values do we want to uphold? I can think of being a tidy kiwi but not sure other than that.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

I don't know

Tell us why, and if there's anything else you would like us to consider

Not sure what's done to help businesses thrive. I do really like the local markets, santa parades and events held around the different centres though!

Why are these bullets the shortest?

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

I don't know

Tell us why, and if there's anything else you would like us to consider

I've not seen any initiative to help young people into work but lots of posting from young people on facebook pages looking for work (labourer or nanny etc)

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

I like the new walk / bike path into rosedale from unsworth heights along the motorway

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

I don't know

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

I don't actually care as much about how we could better meet climate change goals or Maori outcome goals. I care more about our facilities being maintained well (eg please fix large potholes in glenfield library carpark), events for young people (love the families in parks initiative).

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

This should have been a multi choice ranking question.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

I liked the polls over this - it's harder for the layperson to understand all the aspects that come into play for some of these questions. And give an option to type our own poll response (other)

Need CCTV at the shops in Beach Haven. It has become quite dangerous at times. I have witnessed the liquor store snatch and grab, the armed defenders squad out walking our streets with guns following the pharmacy armed robber. Me and my grandchildren have seen a car of youths kick and punch the car where the husband and wife sat in the front and their child in a car seat at the back. The couple sped off and the youths (four of them), got in a car and chased them.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Submitter details:

Organisation: N/A

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

I agree with almost everything except focus on

1) the Arts. I don't think it's a council's responsibility to provide that as a high priority, especially not if above other core services.

2) diversity - I prefer funding including activities for our two founding cultures of New Zealand (ie. European-based and Pacific Maori-based people).

The 46% of non-new Zealand born residents in this board are welcome to join in those activities but Boards don't need spending for them specifically for 'inclusiveness'. Immigrants are already 'included' by being permitted to live here. What they do with that is up to them.

The expectation is no one comes here to create a new version of their own culture, especially not for us to financially support. Most Kiwis expectation is they come to adapt to ours. They might create their own cultural groups for activities if they choose.

3) overall access to important services is already equal for all in our board area. Occasionally there are other (family) issues if people don't take up the services available.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Urban development should not encourage destroying or encroaching on reserves. Limited removing of green space in long-term developed suburbs I agree with that.

I don't agree with intensification though see my next section answer.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

Urban development. It is not working as you already mentioned -

1) a lack of green space, creating poor drainage for water, no garden space reduces family home quality, can't grow plants.

2) For well established older suburbs infil housing recent intensification utterly spoils an areas atmosphere. Waters down the original style, intent, vibrancy, and urban enjoyment of residents.

3) Lack of car parking within new builds and the Northcote apartment makes the environment around the buildings messy. Streets are crammed and cramped with people competing for parking spaces on the streets. Locals comment on how the townhouses being used to fill sites are hideous.

4) A section with 2 houses now contains five or six townhouses usually of three levels can look hideous. This is too much intensification. 9 or 10 townhouses were built on one site in College Road, Northcote.

5) impractical internal layout of high density

Homes. The three stories means more space is taken up by internal stairs this is also painful to have to keep going up and down three levels. It creates a lot more work than a one-level home. Little boxes for people to stick their whole family in, cannot be good for mental health.

Plus having all these neighbours glued together affecting each other in the shared spaces.

6) Lack of parking is not realistic or about carbon emissions it's practicality, people have children to take to sports and school they can't be catching the bus all the time with heavy equipment to carry.

7) not to mention creating traffic congestion in certain places with this being done.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

1) I think the trades programs with apprenticeships are very good but I don't know that the council has anything to do with that.

2) I think all businesses need support doesn't matter what culture you are.

3) I see businesses in our small shopping areas especially Northcote in Birkenhead from the outside seems they're not all doing that well. Especially food cafes or restaurants some don't have business training, marketing, customer service understanding to begin with wasted time and money and soon go out of business. Is there a way local business associations can provide training and support for these people through starting their businesses and I particular shopping area?

4) I don't hear of any international visitors coming here. Walkways in reserves are a massive bonus and now area I know we used to have little booklets of local walks perhaps this needs to be added to the tourism portfolio of an operator that can promote this outside of Council?

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Overall these are good. I noticed some of our main roads need more ongoing maintenance due to dips/potholes that develop on the left hand side of the left lanes. This is annoying and causes people to use a right-hand lane just because of the discomfort driving over the bumps. Onewa Rd especially. Even if the road gets fixed these seem to soon come back.

2) I do support the idea of park and ride but more parking needs to be available. If even a small carpark building was there and you pay a low fee for means you can bus directly where you want to go, eg. City draws more people to catch the bus for example.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

1) I think we're doing fine with the sustainability and environment focuses. I don't think carbon emissions should be a focus just continue with the current direction of care for our natural reserves and water access ways. (We have a very clean and green area overall.)

2) I think our bicultural focus is currently good. We have a heavily English-based urban development history and should continue to point those out and celebrate the founders of our areas which I think we do. I think we are doing pretty well with Maori elements

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Thinking of the War Memorial Park in Birkenhead as an example

1) Some groups using Council owned buildings I've never heard of, even though I live in the same area, so perhaps their value is not as high as they think it is. Them Sharing spaces with others in the same boat might be better.

2) Repurposing areas that are never used is preferable in park and leisure spaces.

- Such as Birkenhead War Memorial Park rope challenge area I almost never see people using it. And It could be rebuilt on any under-utilised reserve with spare space and not there if it's really in demand.

- The BMX track that is considered to be removed from that park could also be transferred to another reserve and be purpose built for a certain age group as there are many reserves which are just a patch of grass that nobody uses.

4) people are not interested in fancy architecture and design to impress the public, we want it practical, common sense setup, usable and easy to maintain.

5) keep provision of parking in mind around high-use parks or sports grounds.

6) even at low price things can be high quality; some Council facilities and buildings have things that look nice but are breaking or getting shabby after a short time or they're not simple to maintain.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Surveys - people's panel surveys are good. Local letterbox flyers can be helpful.

Flyers in libraries are helpful.

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

I object to time and money being used to favour one race. I believe in equal citizenship. Every New Zealander should stand equal before the law, with the same rights, the same responsibilities, and the same opportunities. Not only is the huge focus of this plan on Maori interests unfair, I also feel it is somewhat condescending to Maori.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

There is a high Asian population and other cultures ethnic groups. It is good to get Maori input and consultation but it should not. I believe it should be co-governance and a 50/50 partnership.

The elected officials should ideally be representing the whole of the community.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

Walking tracks still remain closed after the storm and whole sections of Kauri Park remain closed for over 7 years. No action to fix or maintain our assets we have already have.

Kauri die back should not mean a whole forest should be closed down in the long term to protect trees unless rare or extinction issue are of concern. Forest should be available to enjoy and walk in etc. Living not locked up with high fences year after year. It is quite extreme in order to protect the environment you have to keep this environment away from people put fences gates etc around parks etc to stop people using and enjoying these facilities.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

No

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Could connect our beautiful tracks small beaches into something tourist would like to visit

5. How well do you think we captured our *Transport* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

Ferries and trains are good around the beach haven area

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

Just remember outcome of the other cultures ethnic groups people aspirations are also important

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Consult those who maybe affected

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Ok

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

It's my fault, but I don't know much about Kaipātiki mana whenua apart from the Awa Taha marae. Is there more information re possible marae at Shepherds Park? Would that be a facility for all (Māori of all iwi & Pākehā)?

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

I love the local tracks and appreciate the care taken to provide and maintain their infrastructure.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

What's the vision, given the inexorable trend to online retail?

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

I don't know

Tell us why, and if there's anything else you would like us to consider

I'm retired and never had a local workplace. What's the future of work and what impact will it have on transport planning? Local employment is desirable.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

I think AT does a pretty good job. Tell that to Wayne.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

All citizens deserve a chance to succeed, If it takes a cultural emphasis to assist the disadvantaged (are they mostly Maori?) go for it, but it needs to be effective. That's a leadership challenge.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Same old same old - sell assets and private interests profit.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Fair question. I react rather than act.

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

I don't know

Tell us why, and if there's anything else you would like us to consider

Your interpretation of a ten-years lower Māori median age is probably flawed: consider that Māori have a lower life-expectancy (75.8 vs 82.8) than Pākehā. You should be addressing the root causes of that discrepancy, "targeting youth" will probably help, but is probably a misapplication of the statistics.

Regarding leasing of land to Māori (at Shepherd's Park): consider that it was probably stolen (or at least raupatu) in the first place. A proper acknowledgement and publication of the provenance of land in the local board area would be appreciated.

I'm not Māori, but am a student of our appalling history. Māori (rather mana whenua) should be more than "taking part in local decision making" they should be leading it with support of the local board and council.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

I don't know

Tell us why, and if there's anything else you would like us to consider

All trees should be protected by default: and the responsibility of the land owner the tree (trunk) is on. Walking the coastal beach haven track it is appallingly obvious that one

property in particular has felled all trees between their house and the water. These entitled rogues should face consequences.

The new(ish) walkway around coastal Beach Haven are amazing: they make the area accessible to my disabled daughter: it's wonderful.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

I don't know

Tell us why, and if there's anything else you would like us to consider

High-density housing is critical to house everyone we need to. There is quite some variability in the visual impact of such housing though. Some development are reminiscent of a prison (e.g. Beach Haven road, opposite Maria Assumpta Church, other look beautiful: stronger requirements for visual amenity would be welcome (especially if green-space and plantings etc are used).

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

I don't know

Tell us why, and if there's anything else you would like us to consider

Disruption for business sucks. Huge (expensive and long term) projects are extremely risky and detrimental. A programme of small-scale projects are almost certainly cheaper in the long-term when the socialised costs of loss-of-amenity and economic impact are considered. City-rail link is a prime example of how Albert Street's economy was practically destroyed during construction. The local board is unlikely to undertake a work of that magnitude, but the same principals apply. The duration of the rejuvenation in Highbury is a good candidate.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

I am a daily public transport user (commuting to work), as are two of my children (commuting to college).

The PT services are excellent, with one caveat: planned disruptions to regular timetables (i.e. due to road works) are somewhat capriciously represented in the communications from AT and in AT Hop. In particular: recent disruptions on Beach Haven Road (Shepherd's Park) and Albert St Stop E have been communicated in inconsistent ways to passengers and apparently very poorly to drivers (via the providers).

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

I don't know

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

Restore the mana to mana whenua: it is/was their land; rather let mana whenua exercise their mana.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

If the future of local assets can be secured simply by funding from rates: then for the love of all that is holy increase rates to do so. I am a rates payer; if a 20% rates rise is needed: do it, I'll pay it gladly. I'd prefer it if the extraordinarily wealthier suburbs bore the high burden, but will "take one for the team" if needed.

That rates-payers have have been under-rated for decades is appalling.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Listen to the youth, they'll be around quite a bit longer than the retirees. Though still listen to the old grey-beards that have experience and offer constructive input.

Tax people more: it's better to keep an amenity than lose it forever.

Have Your Say on the Draft Kaipātiki Local Board Plan 2026

Submitter details:

Organisation: N/A

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

Our biggest problem in Auckland, including Kaipātiki, is the lack of affordable housing. Please give top priority in the local board plan to building or acquiring far more social housing - both to house those in need and to put downward pressure on market rents and house prices.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

Our top environmental priority must be to stop climate change, not "prepare for the impact". In our suburban setting, that means no more spending on road improvements (basic maintenance only) and prioritising bus lanes, safe cycleways and walkways (without big infrastructure which cause carbon emissions in construction, such as the Beach Haven coastal walkway).

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

Our priority in built environment should be to maximise opportunities for more intensive housing across the whole local board area to at least halve rents and house prices so that poor people can afford to live in Kaipātiki. Preventing urban sprawl through intensive infill will also minimise commuting carbon emissions.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

Our economic priority should be to ensure that everyone who wants to work can get work that cares for people and the planet. That means more local self-sufficiency and discouraging tourism to minimise carbon emissions in trade and tourism.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

We should stop investing in road improvements (do basic maintenance only) and instead invest in better public transport, safe cycleways and walkways (with minimum new construction to minimise carbon emissions).

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Maintain existing community assets such as libraries, pools and parks. Do not invest in new assets that require carbon emissions in construction.

- 8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?**

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

I would like the environment and climate change to be at the forefront of decision making as we have to manage this reality everyday. I feel golf is supported more than any other sport in our area. please support gymnastics, tennis, netball, basketball etc.

Please protect our natural environment and green spaces.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

I don't think this "Local and international visitors are attracted to our area." is very important.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

We need more safe and sustainable ways to travel using public transport. We need more footpaths and more bike lanes.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Glenfield gym and leisure centre is so busy we need it to be bigger or another one very near. it is a great asset the is so well used

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Your feedback:

- 1. How well do you think we captured the needs and priorities of *our Community* in this section?**

Very well

Tell us why, and if there's anything else you would like us to consider

It's great to see our diversity as a community being recognised and supported while also acknowledging the importance Māori culture and our partnerships with mana whenua

- 2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?**

Very well

Tell us why, and if there's anything else you would like us to consider

The natural environment is what makes our area so so special. It's what makes us want to raise our family here and I strongly support this continued focus on protecting and enhancing these spaces.

- 3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?**

Very well

Tell us why, and if there's anything else you would like us to consider

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

5. How well do you think we captured our *Transport* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

I strongly support a multi modal approach to safety where we ensure that everyone is safe, no matter how they choose to get around. I would like to see opportunities explored to prioritise pedestrians more in our town centres to encourage active transport and create lively outdoor commercial spaces.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support all

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

I strongly support the commitment to Māori outcomes in the plan. The local boards support of cultural events is greatly appreciated and please may it continue!

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Current usage and where those community groups etc would go if the space was no longer available.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

I feel like we get a good amount of information

Have Your Say on the Draft Kaipātiki Local Board Plan 2026

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

Overreach and council power grabs. The increased involvement of government actively discourages private citizens to step up and provide for their neighbour's, and means each of us to take less personal responsibility. I urge you to only invest in infrastructure, and look to the recent failed example of upper harbour in their bin collection. As soon as they switched to funded collection the rate of strewn garbage massively increased. Bin tags provide collection for what is necessary and do not increase our rates for what is not. We still have uncontrolled dumping here, but giving our residents an option to pay a small fee to pick up extras like mattresses and furniture will avoid the dumping in public.

Encourage pride, not subservience

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

What is a Maori worldview. I am halfway Maori and I promise you, we do not know any more than the rest of the world on how to save the planet. Indigenous knowledge is an excuse to gain a seat in discussions. All new Zealanders love our country, but there is no hidden "secret Maori knowledge" that will save us all.

Stop this lunacy.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Encouraging the tidying of street signs and displays. Fines for dirty signage would be a start. There is no reason a business owner should have mud and dust on their sign other than they have given up.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

I don't know

Tell us why, and if there's anything else you would like us to consider

As a region that has never seen true waves of entrepreneurialism because of its location, i think nothing is being done to encourage outside tourism, but the local economy is doing ok

5. How well do you think we captured our *Transport* needs and priorities in this section?

Tell us why, and if there's anything else you would like us to consider

Small enough to be walkable. Stop.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Do not support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

You are caught up in your own self importance. The council is here to support the people if needed. Not to dictate the comings and goings of life. Pare back your scope of involvement so that you can properly focus on assisting, not Controlling our lives.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Opportunity for local community members to provide these services themselves, delivering better results, employing more locals and creating net inflows for our community

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Involve local community members based on merit. If there are decisions that will effect businesses, talk first to business owners. If there are decisions that will effect rates, talk first to homeowners, not those that will benefit, but those that will be obligated to pay.

Even if it's a road upgrade, talk to those that use the road and live nearby, because your data and "analysis" might not match reality.

Have Your Say on the Draft Kaipātiki Local Board Plan 2026

Organisation: N/A

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Some are expressed clearly so we know what you mean and intend to do (for example: Bullet point 6 on maintenance of parks and community facilities. Others are nice words but wishy-washy so as to leave us having no clue what they mean (for example: "people and communities feel connected").

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

As above, not clear what you intend to do to ensure that our community lives sustainably. It would be great but seems unlikely if you were going to provide subsidies for solar power for example. What are you going to do?

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

The main reason for my submission is this:

It seems that the maintenance of our pipes (particularly storm water and wastewater) have not been included in any of the documentation from Council received with this correspondence. It may be that this is a Watercare responsibility but we should be able to rely on Council and our Local Board to ensure that our area is given the priority it deserves. There are still antiquated and crumbling clay pipe infrastructure that is way past its original replacement date.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

As above, it is not clear what you intend to do in key areas. For example: What is the local board going to do to ensure young people in our area are ready for the workforce?

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Again, some of this seems vague and unclear what you plan to do. Take travel as an example: Rather than the objective being more choices that could be anything from (Av's as they have in many cities now, or eVTOL as they are considering in California), the objective should be to deliver an efficient, affordable and reliable public transport system that meets community needs and reduces reliance on private and commercial transport.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

It would be brilliant if you could campaign for government / local government incentives and assistance that will bring down our power and water costs in a sustainable way.

- 7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.**

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

See comment above about clay pipes. Prevent flood and stormwater pollution by keeping drains, culverts and waterways clear and responding rapidly to wastewater and runoff risks during cyclone and major rainfall events, with coordinated community checking and targeted follow-up action for remaining blockages.

- 8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?**

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Brief monthly emails with bullet point one liners that have links to the detail on your website so people can know what has changed or being done and have an easy way to find out more if they want.

Submitter details:

Organisation: N/A

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

The board is spending too much time planning for minorities in the board area. It is more important for the board to concentrate its efforts on flood mitigation and transport needs that affect the majority of the population in the board area.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

Less time needs to be spent in this area, and more on built environment. More of the population will use, and spend more time in the built environment.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

Many of the smaller built environments (town centres) lack public toilet facilities, and covered rest area seating. Many 'shops' are now cafes replacing shops that previously sold foodstuffs

and hardware, etc. Which causes the local population to travel further to larger town centres and supermarkets to complete their shopping needs. The increase of low quality apartment building in, residential areas, spoil the surrounding area in several ways: they destroy the privacy of surrounding dwellings, because apartments are usually multi storey, and the surrounding housing is single storey; They are ugly in design, and destroy the aesthetics of the area. They are built on sections of land previously occupied by one single storey home, which means that multiple (6 to 8 apartments) are built so close together that there is no space for outdoor recreation (vehicle parking/battery charging, causing occupants to park vehicles on the roadside, laundry outdoor drying, child play under parental visibility, flower and vegetable gardening. These apartments provide a low quality lifestyle for their occupants, and will become rundown slums. New Zealand needs to learn the lessons of America and Europe with regard to this type of apartment construction which lacks the open outdoor space living that New Zealand was once noted for

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

My home has a small(too small)shopping centre and a light industrial area that includes retail access which allows me to cater for most of my shopping needs.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Not well at all

Tell us why, and if there's anything else you would like us to consider

The amount of on street parking in the vicinity of buss stops and, more importantly, close to the northern busway, indicate that public transport is not catering for the population that needs to use private transport to reach the most appropriate bus stop, before taking advantage of public transport. Park and ride facilities are needed to mitigate this problem; especially adjacent to the northern busway where nose to tail, on road parking, is evident for several kilometres around the busway stops. In my opinion, ADEQUATE park and ride facilities will do more to encourage public transport than any other measure. I emphasise adequate park and ride facilities because some of the existing park and ride facilities are inadequate to handle peak hour needs.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Do not support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

The board should concentrate their efforts on work that would improve flood mitigation, local work creation, public road improvements and maintenance, better control of roadside parking for safer driving conditions, and public transport accessibility with park and ride facilities. These items daily affect the vast majority of Patiki residents. Less time, effort, and cost should be devoted to recreational walking footpaths/cycleways, outdoor recreation parks and reserves, etc., which are not daily activities for the majority of the board. residents.

- 7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.**

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

With the increasing frequency of heavy rain events, stormwater flood mitigation should be of urgent priority. Stormwater flooding is extremely costly for the local board, and will continue to be so if mitigation is not given the priority it deserves. What is the point of expending time, cost, and effort on remedial work such as repairing flood damage and unblocking drainage systems when it is certain to recur again in a matter of weeks and months? The cost of flooding affects homeowners more than any other likely expenditure whether insured or not.

The board would be wise to spend money on stormwater improvements which would lessen the cost of future stormwater event mitigation

- 8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?**

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Firstly, most of inhabitants of the board area will not be Maori speakers; and English language alternatives should be given priority script, reversing current practice. The board could simplify and abbreviate the documents it encloses in email outs and surveys, firstly, to save costs, and secondly to cut out any embellishments not relevant to the purpose of email outs and surveys.

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

I think it's easy to say the community aspirations have been done well because there's a vagueness to them that allows for interpretations to feel like these are all ideas that everyone would want. The challenge is the how of this, because my ideas of a safety environment or a supportive community is different from another persons.

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

Again I like all the ideas of this but feel skeptical about the how.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

As above, the how. How is the low climate impact going to be achieved.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

I like that you've identified some of the issues around young people in employment but I fail to see a how in this as a goal.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

As a cyclist I like that you're considering cyclists. This is a significant barrier for me.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

Having had school board experience, I understand how this is suppose to be a high level overview of your goals however I still would like to see this more considered as a 'SMART' goal. I would like to see measurable outcomes. When I look at the Glenfield area plan which is 4 years old now even a number of those short term goals don't seem to have been achieved.

As for how:

- seek support from community centres as to what they can provide around training.
- working with community group and community centres to support the Māori outcome goals
- prioritising the Maere development on Shepherd Park

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Which are getting the most value for investment and additionally how are these being aligned with the ideas of the strategic plan and if they can be utilised in other ways. Many (not all) centres have empty spaces regularly could small businesses use these spaces for a small fee.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

It seems to take a lot of time to read thought these documents as well as a lot of understanding needed. I feel I'm educated and knowledgeable and the reading feels overwhelming for me, not to mention many people who are educated and knowledgeable tend to me time poor due to their work and family commitments. This engagement needs to be more accessible and modernised. The posters around about community centres of community gardens make it feel like it's an easy questionnaire. Perhaps this type of multi choice or ranking questionnaires need to be normalised, alongside more robust consultation requiring reading for those who want the extra details.

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

Great balance of culture, social issues and business

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

Focus on climate action - so important.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

We want to build community here - and working in these spaces helps .

5. How well do you think we captured our *Transport* needs and priorities in this section?

Very well

Tell us why, and if there's anything else you would like us to consider

Having places to walk and ride are so good for mental health and wellbeing

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support all

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

Great focus on all the things I care about - thank yoy!

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Avoid short term contracts - try to give 3 year contracts to allow groups the stability to do things meaningful.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

Come and share stories at local schools - having lunchtime meetings once a term for students to talk with you.

Tell us why, and if there's anything else you would like us to consider

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

we still need more ferries as an option for travel. we have enough buses but we need to have more ferries going to different parts of the city side and local side.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

I really like the historical information in the area that has been displayed on small bill boards but there could be more information displayed about pre pakeha Maori life and what sites were important to Maori before the settlers came.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

we need to maintain the heritage of the area because once heritage has gone it is gone forever and you cannot get it back.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

you probably need to have more visibility in the community itself like a desk at the library or somewhere like that. other than that probably by email or newsletter in the mail. perhaps in the mall there could be a local board notice board with info about what you're doing or proposing.

Submitter details:

Organisation: N/A

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

There is a lot of discussion about support and empowering others to provide or do more, but the plan isn't clear on how the board intends to do those things (e.g. what specifically will the board do to 'support' or 'empower' others)?

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

It is not entirely clear how the board intends to work with mana whenua - what does 'active partnership' mean in practice? In general I feel the plan is light on the details around how the board will work with MW on all aspects of the plan - it seems as if its simply words on a page without specific or clear actions, which is pretty much the same as previous iterations of the local board plan.

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

No specific comments - it doesn't appear the board has much in the way of direct decision-making here, so it needs to rely on others (governing body, central government, private developers etc) to achieve the outcomes it wants. I would suspect this requires strong relationship development / management with those parties, but the plan is silent on what the board intends to do within its role to improve these relationships.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Not very well

Tell us why, and if there's anything else you would like us to consider

I don't think this is an area where the local board has much in the way of direct influence or power. Again, much of the objectives involve 'supporting' or 'encouraging' others, but the plan is vague on what specific actions the board will undertake to do this. The plan should be more direct in the limited power / influence it has in terms of improving the local economy, particularly in terms of its inability to influence employment opportunities or to attract tourism. Of all areas I would like the board to focus its time, energy and investment into areas which will have the greatest impact, and in my view increased investment into or prioritizing local ED isn't the biggest priority for the local board at the moment.

5. How well do you think we captured our *Transport* needs and priorities in this section?

I don't know

Tell us why, and if there's anything else you would like us to consider

It is difficult to say given the lack of clarity about what the local board role will be following implementation of the latest transport reforms. I suspect the local board will want to be directly involved in rather low-level decisions around transport (e.g. decisions around time restricted parking, broken yellow lines), which may distract from more strategic or 'important' matters. I would support the local board delegating decisions around low-level transport related matters to staff to ensure sub-regional / regional consistency, and to ensure the local board remains strategic (rather than operational) in its decision-making.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

I have no significant issues with the plan, but I'd be interested to understand more around what the board sees its role is in terms of 'advocating' to the governing body and others for more. It is evident that there is a significant lack of budget to look after the things we already

have, let alone investing into new things...yet the board want to advocate for more. Although there is a section in the plan broadly outlining trade-offs, the plan is silent on what specific trade offs the board might be willing to make in order to enable new investment in the area to occur. I would very much welcome the board making some difficult decisions around exiting certain services and assets in order to close the funding gap, rather than going cap in hand to the governing body with requests that will only result in high rates (targeted or general).

- 7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.**

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Usage, condition, cost to renew and maintain when compared against budget availability. If the service or activity can be provided by the private sector - even if it costs more than what it would if council were to provide it - the board should strongly consider exiting the service / asset. Council does not need to provide everything for everyone, and it should consider raising its fees and charges if it results in more budget available to look after our critical assets (libraries, pools, sports fields etc).

- 8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?**

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

I don't think any improvements are required - there is more than enough resources around to understand how I could get more involved in local decisions etc. The internet is a ***** of a place :)

Note: This simplified version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed, and handwritten submissions have been transcribed.

Submitter details:

Organisation: N/A

Local Board: Kaipātiki

Your feedback:

1. How well do you think we captured the needs and priorities of *our Community* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

We have a great sense of community in many parts of the local board area although I acknowledge that some areas might need some focus. My main concern is whether we can afford to keep maintaining and operating the significant number of council parks and facilities and whether some tough decisions are needed to sell some to ensure there is sufficient funding to maintain the priorities.

It's good to see the ongoing focus on supporting children and youth engagement to ensure they have a strong voice in local decision-making

2. How well do you think we captured the needs and priorities of our *Natural Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

The draft plan contains many valuable activities but I note the advocacy for further funding. Is there a need to prioritise what is funded better within our area? I agree with the risk that volunteers may feel burnt out and that there is a need for more collaborative work between the community and council teams

3. How well do you think we captured the needs and priorities of our *Built Environment* in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Feels like Birkenhead town centre has been missed from the plan in both this section and the economic development one. It's a thriving centre with rave reviews about new eateries so while it may not need huge amounts of attention and funding from the board, it would be nice to see some acknowledgement and support for it within the plan

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

As above, eateries in Birkenhead provide an opportunity to meet the board's aspiration of attracting visitors along with access to native reserves and places like the Chelsea Sugarworks.

I'm not sure we need to focus on creating more local jobs when there are larger centres not far away - eg city centre, Takapuna, Albany. However, I would like to see public transport connections improved to both Takapuna and Albany - I could probably cycle to both quicker than the bus as it's such a convoluted route.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

The connections plan is very detailed and aspirational but feels like it's more about recreational use so suggest the priority should be on transport to and from school and work as well as repairing / future proofing the remaining tracks that were damaged during the slips.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

It's a great plan with very appropriate aspirations and goals for the community. Just not sure what is likely to be feasible within the current financial environment

- 7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.**

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Cost / benefit of the facility - how well it's used, how much is needed to maintain / ensure it's fit for purpose

Needs based - focus on areas where community facilities are more needed and reduce duplication

Geographic spread of facilities

- 8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?**

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

More informal engagement eg through volunteer organisations and targeted approaches so we can opt in to topics / activities that are of interest

3. **How well do you think we captured the needs and priorities of our *Built Environment* in this section?**

Not very well

Tell us why, and if there's anything else you would like us to consider

We do not need any decorative peices of art for the parks or streets, We have enough. like the The big silver O in the glenfield resereve, no interested in paying my rates for things like that

I want my rates to go towards rubbish collection, mowing and maintaining parks, playgrounds, bush areas and pest eradication. Sewage and waste water nothing else.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

NO more licenses for Vape shops ANYWHERE. !!!!

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

I live less 6.5 km from the local hospital at which I work.

I want to bus and not drive.

I would bus there if I could get a bus from my local area . ie. within 10 minutes walk to a bus to from my home) However I can't. I have to either catch two buses (which takes 1 hour in total) or walk for 30 minutes to the nearest a bus stop that take me to Takapuna. I live in a dense urban area of Bayview. I would be happy to bus, but the bus options are not available. Virtually all other areas on the northshore have a bus that goes directly to Takpauna , why not Bayview.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Depends which assets you are talking about.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

The **HAVENDALE HUB**

Some time ago , I developed an idea for the suburbs of Birkdale and Beach Haven to build a connected cycleway in a loop format , that allowed the main streets to provide safe pathways for cyclists and pedestrians to schools and shopping areas.

This was called the HAVENDALE LOOP.

The concept involved major changes to road layouts and significant cooperation of the Auckland Bus operators .

Development of residential units on single or multiple sites has created strip parking on both sides of what was once wide ,uncluttered main roads . Auckland Council actively encourage this sort of development , and because our suburbs are seen as a “low end and affordable “ market for developers there has been a exponential increase in unit numbers . Within maybe 5 years, the usable carriageway on our three main roads , Birkdale Road, Beach Haven Road , and Rangatira Road will become only 6 meters wide along their full length.

Looking at the diagram in the HAVENDALE LOOP concept ,it is clear , 6m is unsafe for cyclists using the road.

While we need to increase living densities , Auckland Council appear to ignore the impact on existing road use, and existing drainage infrastructure , as seen by major drainage upgrades and temporary road blocks , everytime a new development is hooked in . A typical five unit development , while providing on site parking or garaging for cars , generally means five more cars stored streetside.

Bike Auckland , and the Kaipataki Community Board , both supported my HAVENDALE LOOP concept , and while it would involve a massive roading change and infrastructural shift, not to mention a radical change in thinking , it could work.

A throw away comment by Karen Hormann , CEO of Bike Auckland , suggested a bus/transport hub at Verrans Corner could be part of the concept. I thought this was a wonderful idea and felt it offered an exciting opportunity to create an

even more sustainable way of making our suburbs safe and help future proof our transport network.

With my design background , I can see a beautiful new transport centre , revitalising this whole area of Birkdale , and providing a commuting centre to enhance the whole of this end of Birkenhead .

The HAVENDALE HUB would basically be a bus transfer station , similar in size to the Constellation Road bus station. Positioned on the current bus depot and workshops ,

and the neighbouring properties at the Mobil petrol Station and the Post Office telephone exchange building.

The concept illustration shows a major development , including on/off ramps for large AT buses from Waipa Street , to and from the city and North Shore . The intersection of Verrans and Verbena roads , one of the most confusing and dangerous in the area , would become a simple roundabout . Small capacity electric buses (EBs) would circle around the HAVENDALE LOOP continuously during peak hours , and offer FREE lifts to and from the HUB . Off peak the EBs would be recharged . Cars could also park and ride , parking all day at the Hub .

The HUB building would provide all weather transfer of passengers from EBs to the larger AT City buses . The large AT double decker and standard buses would no longer drive the LOOP , which ensures these large buses don't need to clutter up our now very restricted main streets . The terminal building would also provide ticketing and cycle storage , and other obvious commercial opportunities , cafes etc.

This area of Birkenhead affords the most spectacular views over all of Auckland , mainly to the North and West , but also across the harbour and South to the city . A large beautifully designed building would enhance this whole precinct , with pedestrian bridges across to the Burt Sutcliff Village , and the heritage buildings existing at Verrans Corner .

I am an IMAGINEER , not an engineer or urban planner , and this is only a very preliminary concept for what could be a wonderful central Hub to not only serve and enhance our lovely suburbs , but accommodate a big increase in a living

densities , without making our main streets more dangerous than they are .

In future years , Beach Haven Road West , and Verbena roads and others could become part of the EB bus route.

The main streets in the LOOP are progressively becoming more dangerous for pedestrians and cyclists , and the six schools in the area , many churches and shopping centres could have a new network of cycle lanes to encourage our suburbs to become a wonderful area for all families .

The HAVENDALE HUB , as a follow on concept to the HAVENDALE LOOP , would provide a wonderful far thinking strategy to ensure this western side of Birkenhead becomes a viable , safe and vibrant place for many more people .

As every resident in this area would agree, the rapid increase in housing units, along with noticeable upsurge in streetside carparking in the main streets and side streets , is not adding to a a safe environment for schools , pedestrians and everyone living in our lovely suburbs

Your feedback:

1. **How well do you think we captured the needs and priorities of *our Community* in this section?**

Quite well

Tell us why, and if there's anything else you would like us to consider

A community garden for this area would be a very valuable resource and an investment in our local and individual futures.

2. **How well do you think we captured the needs and priorities of our *Natural Environment* in this section?**

Very well

Tell us why, and if there's anything else you would like us to consider

Love the investment into bush walkways and free access to green zones in this part of North Shore

3. **How well do you think we captured the needs and priorities of our *Built Environment* in this section?**

Quite well

Tell us why, and if there's anything else you would like us to consider

Car parking has become scarce in Highbury, opening up more parking in the Rawene Carpark would be appreciated.

4. How well do you think we captured our *Economic Development* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

I can't comment too much on this area. What I do know is that Beach Haven community generally looks after their local businesses. But sadly it's noticeable how many cafes fail in the Beach Haven and Birkdale areas.

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

I'd very much like a community garden to be restarted. There was one at the Cedar Centre on Tramway but contact details have disappeared so it may be discontinued. If a garden could have some local body funding and some leadership I feel sure the community would participate and benefit.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

See above

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

I find your comms are working via Facebook and email

Tell us why, and if there's anything else you would like us to consider

5. How well do you think we captured our *Transport* needs and priorities in this section?

Quite well

Tell us why, and if there's anything else you would like us to consider

Maybe this is an AT matter, but I think maintenance and improvement of bus networks, bus lanes, bus stops etc should also be highlighted.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?

Support most

Tell us why and if there's anything else you would like us to consider, including how we could better meet our climate change goals or Māori outcome aspirations.

7. To ensure our community facilities network is sustainable over the long term, the local board may need to review how assets are used, including whether some may no longer be fit for purpose.

What factors do you think the local board should consider when making decisions about the future of local facilities and assets?

Community spaces are really important, and that even if they are not necessarily economically 'rational,' they provide benefits for community wellbeing.

8. How could the Kaipātiki Local Board improve the way it engages with you about local decisions, projects and priorities?

For example, how should we keep you informed, involve you in decisions, and make it easy for you to have your say?

More visibility is always good. I only just found out about this by chance at the library, so more widespread awareness of what the local board is doing and when decisions are being made.

Submission on the Draft Kaipātiki Local Board Plan 2026

I support the Draft Kaipātiki Local Board Plan's focus on transport safety and its recognition that housing intensification, insufficient off-street parking and road corridor obstructions are creating challenges for local communities. The plan also notes that local boards will have a greater role in responding to local transport issues and opportunities.

As the Local Board assumes greater responsibility for local transport decision-making, I encourage it to use Saffron Street in Birkdale as a case study for developing a methodology to assess and manage the cumulative transport effects of residential intensification on narrow local roads.

Saffron Street is a narrow residential road that is experiencing ongoing intensification. Recent resource consents for 5, 7 and 9 Saffron Street will transform the three existing standalone dwellings currently occupying those sites into 16 new standalone townhouses, while retaining the existing dwelling at 9 Saffron Street. This represents a substantial increase in the number of households, likely vehicle movements and parking demand within a relatively short section of the street.

Council can no longer impose minimum parking requirements. The consented developments provide only one on-site parking space per townhouse. All the material relating to the consent I've reviewed appears to assume that one parking space will adequately meet the needs of each household.

This assumption does not seem consistent with either Auckland-wide vehicle ownership, which equates to approximately 80 light vehicles for every 100 Auckland residents¹, or the findings of Auckland's Life in Medium Density Housing research, which found that many medium-density households continue to own and use private vehicles, including households with multiple vehicles.

As a result, additional household vehicles, visitors, tradespeople and service vehicles are likely to rely on on-street parking. The cumulative effect of multiple medium-density developments on the same street is likely to increase parking demand, reduce available road width, restrict visibility and make access more difficult for pedestrians, emergency services, rubbish collection vehicles and other large vehicles.

I am also concerned that traffic, parking and sightline assessments appear to have focused primarily on the pre-development conditions rather than the likely post-development environment once all consented dwellings are occupied and generating vehicle movements.

These concerns align closely with the Draft Local Board Plan's recognition that:

¹ Figures sourced from Ministry of Transport Fleet Dashboard and 2023 Census results.

- housing intensification is placing increasing pressure on infrastructure;
- lack of off-street parking is creating issues for the wider community;
- insufficient parking contributes to road corridor obstructions and congestion; and
- local transport decisions should better respond to local concerns and opportunities.

I encourage the Local Board to undertake a comprehensive review of Saffron Street and use the findings to develop a wider policy approach for similarly constrained residential streets across Kaipātiki. Such a review could consider available carriageway width, visibility, emergency access, cumulative parking demand and pedestrian safety.

Potential measures could include:

- No Stopping At All Times (NSAAT) restrictions where justified by safety considerations;
- "hockey stick" road markings to better define parking exclusion zones around driveways and improve sightlines;
- extending existing no-stopping restrictions near intersections and driveways;
- targeted time restrictions on parking where appropriate; and
- other parking management measures that maintain sufficient road width for safe two-way traffic movements.

Saffron Street provides a useful opportunity for the Local Board to demonstrate how its new transport decision-making powers can be used to proactively address community concerns about the cumulative effects of intensification before safety and accessibility issues become more severe.

Thank you for considering this submission.

Quite well

Tell us why, and if there's anything else you would like us to consider

I think there needs to be an emphasis on mode shift, as currently nearly all of the Kaipatiki area have to funnel through Onewa Rd, meaning it is always very busy and congested. Focus is therefore needed on improving access to public transport (buses and ferries) and walking and cycling links to town centres and ferry terminals.

6. Overall, what is your opinion of the draft Kaipātiki Local Board Plan 2026?
