

Te Ara Tukutuku concept designs for Wynyard Point

Feedback must be received by **31 August 2024**

Over the next 15 years, the northern end of Wynyard Point will be transformed as part of Te Ara Tukutuku Plan. The aspiration of this Eke Panuku project is to create one of the most beautiful open spaces and waterfront destinations in Tāmaki Makaurau. It will be a space for everyone.

We are co-designing the space alongside our Mana Whenua partners, bringing together mātauranga Māori (traditional Māori knowledge and practice) and specialists in landscape design, marine ecology, plant ecology and engineering.

In November 2023, we shared the vision and asked how you would like to experience the space.

Your feedback showed that you are most interested in:

- places to swim and be close to the sea
- walking and cycling paths
- spaces for quiet reflection, being in nature
- a diverse range of educational and research programmes
- opportunities to care for the space
- an improved marine environment
- native trees to support bird life.

We would like your feedback on the draft concept designs for this unique space.

We would like to know:

- What aspects are you most excited about
- How do the concept designs reflect the vision for a thriving foreshore and reconnecting land and sea
- What are you interested in learning more about
- How might you get involved to help lift the mauri (life essence) of this area

Your feedback will help us develop the next stage of design.

We encourage you to give feedback online at [akhaveyoursay.nz](https://www.akhaveyoursay.nz), or you can:

Scan and email your completed form to:
tearatukutuku@ekepanuku.co.nz

Post your completed form to:
Te Ara Tukutuku concept design
Eke Panuku
PO Box 90343, Victoria Street West
Auckland, 1142

Your feedback (all questions are optional)

We strongly encourage you to read the concept design summary report and accompanying information available on [akhaveyoursay.nz](https://www.akhaveyoursay.nz) before answering the following questions.

1. What aspects are you most excited about?

2. How do the concept designs reflect the vision for a thriving foreshore and reconnecting land and sea?

3. What are you interested in learning more about?

4. How might you get involved to help lift the mauri of this area?

5. Do you have any other feedback on the concept designs?
