Proposed updates to the council's dog policy and bylaw and regional park dog access rules

#10

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, name, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Waitākere Ranges

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Tell us why

Clarify how dog access rules are set:

Tell us why

Clarify Auckland-wide dog access rules (for example, rules at council carparks and camping grounds, for working dogs, dogs in vehicles and private ways):

Tell us why

Clarify or correct errors in Policy Schedule 2: Dog access rules:

Tell us why

Remove outdated information in Policy Schedule 2: Dog access rules (for example, outdated landmarks):

Tell us why

Update dog access rules for Tūpuna Maunga (ancestral mountains):

Tell us why

Remove outdated or duplicate bylaw content:

Tell us why

Do you have comments on any of the above proposed changes?

Do you have any further comments on the proposed policy and bylaw changes?

3. Dog access rules at Regional Parks

Submitters were able to select from the following list to provide feedback on any of the 14 Regional Parks we are proposing to amend or clarify the dog access rules:

1. Ambury Regional Park
2. Auckland Botanic Gardens
3. Hunua Ranges Regional Park
4. Long Bay Regional Park
5. Mahurangi Regional Park
6. Muriwai Regional Park
7. Pākiri Regional Park
8. Shakespear Regional Park
9. Tāpapakanga Regional Park
10. Tāwharanui Regional Park
11. Te Ārai Regional Park
12. Waitawa Regional Park
13. Wenderholm Regional Park
14. Whakanewha Regional Park.

Feedback is only included for the parks chosen to respond to.

Waitawa Regional Park

We are proposing to change the eastern part of Mataitai Beach from off-leash to on-leash (western part of beach to remain off-leash), change Waitawa Beach from off-leash to on-leash, prohibit dogs on single use mountain bike tracks and clarify other areas where dogs are prohibited (such as farm paddocks during lambing season, campground and bach).

What do you think of this proposed change?

Tell us why

Wenderholm Regional Park

We are proposing to clarify the current rules (no change to dog access).

What do you think of this proposed change?

Tell us why

Whakanewha Regional Park

We are proposing to provide on-leash access on tracks from Omiha (Rocky Bay) to the on-leash area of the Park.

What do you think of this proposed change?

Tell us why

Are there any dog access rules at other Regional Parks and associated beaches in Auckland that you think council should change?

Your feedback on this section will inform any future review of dog access rules. A future review has not been scheduled at this time and no changes will be made on any location you identify in this section as part of this proposal.
Only provide feedback on one location at a time.
Space is provided for three locations. If you would like to provide feedback on more than three locations, please copy the following pages or include your comments in the other feedback section.

Location 1:

What is the full name of the location where you want to change the dog access rules?

Titirangi Beach - grassy area between road and hall

What local board area is this location in?

Waitākere Ranges

In general, how would you like dog access at this location to change?

Tell us why

Do you want the change to apply to the entire location or a section of it?

To respond to opportunities for greater dog access without impacting other users (e.g. an area to take a dog under control off a leash). Please specify:The grassy area between the road and Titirangi Beach Hall

What is the main reason you want to change the current dog access rule?

This area is rarely used by people, limited bird life, it's safe, relatively little traffic. Without this area it is a nearly 10km round trip to the nearest off leash area (Crum Park) for residents. (Excluding Davies Bay which is in accessible from here and also 5km from French Bay)

Please explain your issue in more detail:

Please explain why you want to change the dog access rule at this location, and provide any additional information or evidence

We live in Okewa Road above this beach. Access to the beach can be on foot via the Haresnape Stairs which takes around 10 minutes. Access to the nearest off leash areas is Davies Bay (around 20 minutes round trip / 10km) or Crum Park (15 minute round trip / 10km). I believe that dogs can use this area under control off leash with minimal risk to ecological health. It was removed some time ago but no alternatives given for local people.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

Tell us why

I own multiple dogs and it would mean I am unable to take my personal dogs for walks which would be extremely detrimental to their wellbeing. They are active dogs and need many hours of exercise a day which would be impossible to do in groups of 3 as would take up too much time. We enjoy hiking in Riverhead forest and have never encountered any issues.

Do you have any further comments on the proposed policy and bylaw changes?

I want to express my opposition to the proposed restrictions on dog access to public spaces as outlined in the Auckland Council's review of the Dog Policy and Management Bylaw.

While I understand the need to balance the interests of all park and beach users, restricting access for dogs and their owners imposes unnecessary limitations that do not reflect the needs of a significant portion of the community. My concerns are as follows:

1 - Community and Well-being Impact: Dog-friendly spaces play a vital role in fostering community connections and supporting the physical and mental well-being of both dogs and their owners. Limiting access will reduce opportunities for social interaction, exercise, and mental health benefits.

2 - Disproportionate Restrictions: Many responsible dog owners adhere to leash and control rules. Broad restrictions penalize these individuals without addressing the root cause of any specific issues, such as poor compliance by a minority.

3 - Environmental and Safety Concerns: Restricting dog access to certain areas may lead to overcrowding in other locations, increasing the potential for safety issues and environmental degradation in those spaces. Some dogs are overwhelmed at 'dog parks' and this would severely restrict their park access.

4 - Balanced Solutions Are Available: Rather than implementing outright restrictions, the Council should consider alternatives, such as:

- Enhanced public education about responsible dog ownership.

- Clear signage to guide appropriate dog behavior in shared spaces.

The current proposal risks alienating responsible dog owners, limiting their ability to enjoy Auckland’s natural spaces, and detracting from the inclusive community spirit that these areas should foster. I urge the Council to reconsider these changes and focus on balanced, evidence-based solutions that allow fair access for all.

Thank you for considering my feedback.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

#98

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, name, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Waitākere Ranges

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Tell us why

Clarify how dog access rules are set:

Tell us why

Clarify Auckland-wide dog access rules (for example, rules at council carparks and camping grounds, for working dogs, dogs in vehicles and private ways):

Tell us why

Clarify or correct errors in Policy Schedule 2: Dog access rules:

Tell us why

Remove outdated information in Policy Schedule 2: Dog access rules (for example, outdated landmarks):

What do you think of this proposed change?

I do not support the proposed change

Tell us why

With specific reference to amendments 1 and 2- Waitawa is one of very few regional park beached where one expects to see dogs. I believe that confining dogs off leash to the area west of the rocks is an arbitrary punishment of dog owners, reducing their access to the least desirable section of the beach .

Wenderholm Regional Park

We are proposing to clarify the current rules (no change to dog access).

Tell us why

Do you want the change to apply to the entire location or a section of it?

Other - please specify:Change to all but the western end (wharf end)of the beach

What is the main reason you want to change the current dog access rule?

SeRemove restriction to dogs being on the grass, and greatly open up the times that dogs are allowed at the beach .

Please explain your issue in more detail:

SeRemove restriction to dogs being on the grass, and greatly open up the times that dogs are allowed at the beach .

Please explain why you want to change the dog access rule at this location, and provide any additional information or evidence

I believe that culturally, people expect to see dogs at this beach, and enjoy taking their dogs to the beach with the family or for walks. Currently, no dogs are allowed on the grassed area and this feels petty. The hours that dogs are allowed are far too restrictive- specifically the morning hours dan dogs far too early, and many folk must flout the rules if they need to walk their dog/s after dropping children to school for example.

Please explain why you want to change the dog access rule at this location, and provide any additional information or evidence

There is no regard for the current dog rules. There is a dog beach kakamatua right next door. Every time we visit we witness big dogs running at people often with small children playing on the sand. We have a small child and often feel unsafe while playing at the beach.

Tell us why

Instead of limiting pack size, we propose focusing on regulations for professional dog walkers. Currently, there's no legal distinction between trained and untrained walkers. Implementing a licensing program that requires experience, training, and certifications (including pet first aid), along with a yearly registration fee, would ensure public safety and separate responsible professionals like the person who walks my dog from those just looking for a quick profit.

This approach would allow trained and certified professionals to continue walking pack sizes they're experienced with. Currently my dog walker works with each dog individually and as part of the group, strategically selecting which dogs can go in each pack. She will also advise when a dog is unsuitable and recommend individual training. She educates the owners on training techniques and ensure they complete the same types of training at home. Education is absolutely vital to dog ownership, and well-trained dogs are absolutely vital for community safety.

By focusing on qualifications for pack walkers instead of a limit on size, we can improve dog behaviour and public safety for everyone.

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

I know many responsible dog walkers (including myself) that often congregrate and walk their dogs and I know many who walk dogs for a living. The max dog limit would drastically affect those who walk dogs for a living and provide an outlet for dogs whose owners can't walk them every day. These professionals are amazing with dogs and have full control of any and all dogs on or off lead that they walk. They are super respectful of the public and I don't see how this proposed rule would solve any issues perceived by the public as 'irresponsible dog owners' don't usually walk more than 3 dogs anyway.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

1A. What do you think of this proposed change?

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

1. Existing regulation and bylaw already require dog owners to keep their dogs under effective control and ensure that the dog does not cause a nuisance to any other person (see Auckland Council Dog Management Bylaw 2019, clause 8 and the Dog Control Act 1996, section 5).

2. There are not enough Council staff to enforce the existing bylaws meaning that a limit or ban will have no impact on those who already don't follow the law. Also even if the number of dogs are reduced, regardless of the number restriction, unregulated people walking a group of even six dogs still pose a risk to not being able to handle them, so instead of focusing on numbers, we need to regulate in other ways and make sure that the people who are walking groups of dogs are qualified and registered in order to address issues currently.

4. There is no evidence from other local councils who have limits like this that they achieve their objective (for example, Tauranga City Council has a similar limit structure and has not issued any infringement notice since this was put in place in 2018).

5. If this change happens then it will have a substantial impact on all dog owners in Auckland. My clients who send their dogs on walks with me would be faced with huge increases in the price of my services that would be needed for me to comply with the Council's limits, if not that, they will loose this service all together as it will no longer be financially viable.

7. The proposed limits will mean that a large number of residents will not be able to access dog walkers when their dogs need it, leading to more dogs being left at home all day and barking or roaming. Other dog minding services are simply not suitable for all dogs such as daycares, and it is important that dog owners can have access to other services that are appropriate for their dogs to fulfil their needs.

I disagree with a limit on the number of dogs that council are proposing, however, I do believe there needs to be regulations in place. I just wanted to add feedback on what I have already submitted and what I think would be good option to put in place:

• All professional dog walkers must pay a yearly licence to be allowed to operate.

•All professional dog walkers must have a minimum level of qualification and experience with handling dogs.

•If professional dog walkers have reports against them that are proven with evidence, of not having control of their dogs, their licence could be revoked, and they are no longer able to walk up to a certain number of dogs in public.

•Professional dog walkers must ensure that they have enough leads for every dog that they walk.

• All dog walkers must be assessed in order to obtain a licence.

• Professional dog walkers must have public liability insurance, Terms and Conditions signed by their clients, as well as up to date health and safety protocols.

•All vehicles must be sign written and professional dog walkers must have their business displayed on them in public.

2. General policy and bylaw matters

Existing regulation and bylaw already require dog owners to keep their dogs under effective control and ensure that the dog does not cause a nuisance to any other person (see Auckland Council Dog Management Bylaw 2019, clause 8 and the Dog Control Act 1996, section 5).

There are not enough Council staff to enforce the existing bylaws meaning that a limit or ban will have no impact on those who already don't follow the law. There is no evidence from other local councils who have limits like this that they achieve their objective (for example, Tauranga City Council has a similar limit structure and has not issued any infringement notice since this was put in place in 2018).

The proposed limits will mean that a large number of residents will not be able to access dog walkers when their dogs need it, leading to more dogs being left at home all day and barking or roaming. Other dog minding services are simply not suitable for all dogs such as daycares, and it is important that dog owners can have access to other services that are appropriate for their dogs to fulfil their needs.

Alternative recommendations:

• All professional dog walkers must pay a yearly licence to be allowed to operate.

•All professional dog walkers must have a minimum level of qualification and experience with handling dogs.

•If professional dog walkers have reports against them that are proven with evidence, of not having control of their dogs, their licence could be revoked, and they are no longer able to walk up to a certain number of dogs in public.

•Professional dog walkers must ensure that they have enough leads for every dog that they walk.

• All dog walkers must be assessed in order to obtain a licence.

• Professional dog walkers must have public liability insurance, Terms and Conditions signed by their clients, as well as up to date health and safety protocols.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

The public feedback form was separated into four sections:

2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

I do not believe that the number of dogs a person is walking increases the risk to the dogs, the walker and others using the public space. I believe with adequate training and responsible behaviour there need not be a limit on the amount of dogs being walked

If restrictions on numbers are necessary, a limit of 12 dogs per handler seems reasonable. However, in my opinion, even one dog in the hands of an irresponsible handler is far worse than 15 dogs managed by a responsible, qualified handler.

The focus should be on education, establishing industry standards, and ensuring proper care. Limiting the number of dogs per person feels like a superficial quick fix that fails to address the underlying issues.

I don't think limiting the number of dogs walked is the answer. You will still get the same issues with the same people even if they only walk 6.

I think regulations should definitely be looked at but limiting numbers is going to have a huge negative effect and increase the amount of uneducated and nonprofessional walkers

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

There are not enough Council staff to enforce the existing bylaws meaning that a limit or ban will have no impact on those who already don't follow the law. Also even if the number of dogs are reduced, regardless of the number restriction, unregulated people walking a group of even six dogs still pose a risk to not being able to handle them, so instead of focusing on numbers, we need to regulate in other ways and make sure that the people who are walking groups of dogs are qualified and registered in order to address issues currently.

There is no evidence from other local councils who have limits like this that they achieve their objective (for example, Tauranga City Council has a similar limit structure and has not issued any infringement notice since this was put in place in 2018).

If this change happens then it will have a substantial impact on all dog owners in Auckland.

The proposed limits will mean that a large number of residents will not be able to access dog walkers, leading to more dogs being left at home all day and barking or roaming. Other dog minding services are simply not suitable for all dogs such as daycares, and it is important that dog owners can have access to other services that are appropriate for their dogs to fulfil their needs.

Alternative recommendations:

• All professional dog walkers must pay a yearly licence to be allowed to operate.

•All professional dog walkers must have a minimum level of qualification and experience with handling dogs.

•If professional dog walkers have reports against them that are proven with evidence, of not having control of their dogs, their licence could be revoked, and they are no longer able to walk up to a certain number of dogs in public.

•Professional dog walkers must ensure that they have enough leads for every dog that they walk.

• All dog walkers must be assessed in order to obtain a licence.

• Professional dog walkers must have public liability insurance, Terms and Conditions signed by their clients, as well as up to date health and safety protocols.

•All vehicles must be sign written and professional dog walkers must have their business displayed on them in public.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Tell us why

Clarify how dog access rules are set:

Bethells beach

What local board area is this location in?

Waitākere Ranges

In general, how would you like dog access at this location to change?

Tell us why

Do you want the change to apply to the entire location or a section of it?

To respond to opportunities for greater dog access without impacting other users (e.g. an area to take a dog under control off a leash). Please specify:From the access way along the stream

What is the main reason you want to change the current dog access rule?

After Gabriel a track was cut thru the dunes and the majority of beach walkers now use this track over the stream

Bed. Currently the only area that has water that is offlead is Waitākere Bay north of the stream

Which is often unsafe to access in large tides especially if large swell is running allowing dogs to once again be off lead and under control year round in this area would make it safer and not heavily impact other beach goers

Please explain your issue in more detail:

I did my research and my dog goes out with a wonderful and experienced dog trainer/walker. She has multiple dogs off lead and some on long leads if they need a bit more work.

Limiting the numbers is not going to benefit the good, well trained walkers.

The number of dogs being walked at one time is not the problem. I oppose this because it is fixing a problem that doesn't exist.

If regulation for dog walkers is required do that. Don't punish business owners who are capable, qualified, and responsible.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

For 7 years our dog has been going twice a week with a registered and highly experienced pack dog walker Follow the Leda. She is an expert in her field in pack walking and animal management (dogs). If this were to pass these walks would no longer be allowed. These dog daya are vital for the wellbeing of our dog as we work full time and are not able to get them out as much as we like. The entire time our dog is with the pack we know she is well cared for and that safety of the dogs, other people and other people's dogs is of utmost importance for these opertors. I do not support the limit on dog walking and think this penalises the reputable opertors who follow rules and regulations.

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

My dog thrives during his pack walks. They do continuous training with the dogs and have better control over multiple dogs at once than most do with their own dogs. I do not support changing the rules.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Yesterday a stranger drove me home because a roaming pitbull was up ahead on the street and I got scared. The last time I called in about a roaming pitbill, it took your animal team 3 weeks to deal with the case. Literally not enough is being done to prevent dog attacks and to prevent terrible dog owners keeping such violent dogs. Ban pitbull and pitbull mutts. Neuter and slowly eliminate the breed over the next few years. You'll have enough pitbull hating NZers if you need to start a GoFundMe as I'm sure the council can't afford such a radical plan. Do more to punish owners too. My neighbours never registered their pitbull, I know because I had to complain about them. Nothing happened.

12 dog maximum is current dog association guidelines. Most walkers are trained professionals and can cope with up to that amount.

Better to register and train walkers rather than blanket rule everyone to cater for the lowest possible competency.

It's harder to make money at six dogs per walk. Costs associated with the walker would likely mean very little profit line

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Other (please explain below)

Tell us why

The proposal doesn't provide any means for exceptions, there should be a license to be obtained for walking more dogs at the time. For example professional dog walker license.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Clarify rule that all dogs classified as menacing must be to neuter:

Do not support

Tell us why

While I do not like menacing dogs, the classification process should be updated.

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Support

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Support

Tell us why

The current cap on 2 dogs is ridiculously low, and the ability to gain the license is more dependant on neighbors liking or not liking dogs in the first place & general relationship with the neighbors.

Clarify how dog access rules are set:

Support

Tell us why

Most of the rules only punish good dog owners. Those who don't care, don't follow rules and are the cause for antisocial behavior. NZ is really backwards on where you can take your family - yes dogs are family!

Clarify Auckland-wide dog access rules (for example, rules at council carparks and camping grounds, for working dogs, dogs in vehicles and private ways):

Support

Tell us why

Again for all the national parks etc, there should be a license to be obtained for responsible dog owners. The current total bans are unreasonable.

Clarify or correct errors in Policy Schedule 2: Dog access rules:

Do you have comments on any of the above proposed changes?

Do you have any further comments on the proposed policy and bylaw changes?

The new rules limit the already small dog access especially on off leash areas. For example monte cecilia is one of the safest off leash areas where you can take your dog out without having aggressive dogs around. There are already plenty of parks where you cannot take your dogs for those who hate dogs! None of these changes proposed are to make the city any more safer and again is only punishment for those who are responsible. The emphasis must be taken on roaming dogs and unwanted litters and leave/increase the dog accessibility across the city. I am highly against the limitations proposed to the parks and beaches.

There is no way a dog walker can adequately control more than 3 dogs off leash, particularly if they are not even their own dogs. These dogs do damage to vegetation, spread kauri dieback and generally cause a nuisance to other park users (i.e. jumping on people, scaring people, getting into picnics etc).

Tell us why

In fact I think this could be more restrictive, and the rule should take into account the size of the dogs. If someone has three large dogs on leashes, it will be hard for them to deal with an incident occurring with any of the six dogs they may be walking. Obviously this is much easier with 6 small dogs. I would propose 6 with 3 on a leash for small; 4 with 2 on a leash for medium, and 3 with at least 1 on a leash for large. However, the six is a good start.

What is the full name of the location where you want to change the dog access rules?

beach

What local board area is this location in?

I don't know

In general, how would you like dog access at this location to change?

Tell us why

Do you want the change to apply to the entire location or a section of it?

To respond to opportunities for greater dog access without impacting other users (e.g. an area to take a dog under control off a leash). Please specify:

What is the main reason you want to change the current dog access rule?

we a long time residents and have historically always ran our dogs to keep them healthy.i have never heard of an issue in my families life time (generations).we have been actively engaged in the enviroment preservation in this area for generations and have a full understanding of the nesting birds etc and train our dogs accordingly.latley i heard dog contol have been coming here and giving out hefty fines to local dog owners.we live here here to get away from city living and its problems.please dont bring them here.

Please explain your issue in more detail:

Please explain why you want to change the dog access rule at this location, and provide any additional information or evidence

i have lived here all my life and when did my dog not be allowed to run off leach.i live rural so i can own a dog .dogs cannot be chained up all day every day .i need to run and socialise him to have a healthy dog.

Do you have any further comments about dog access rules at Regional Parks?

the fines are out of hand .and once in the past when i got a fine there was no way of desputing it.i wasnt allowed to talk to any one involved. even told i was i had to pay to find out they had proof it was my dog .i did pursue it as i didnt have time and

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

I support this, but would go further and reduce numbers more, controlling 6 onlead large dogs is not feasible for most people. Also watching 3 off leash dogs is not safe. I would reduce to 4 on lead (total) and 2 off lead.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Maximum four dogs, with no more than two off-leash

Tell us why

People walking multiple dogs on or off leash do not routinely stop to pick up faeces as this can be in the "too hard" basket. I have seen walkers with multiple dogs struggle to control them. I have read of instances where dog walkers use enclosed public tennis courts to set the dogs free but fail to clean up faeces when they leave. Use of sports areas for this is banned anyway

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Tell us why

Regulate the industry don't make it impossible for them to do business or for the public to use their service as the pricing will be unaffordable. The big dog problem is not the dog walkers, it's the unresgisteted, roaming, neglected and abused dogs you should be focusing on. They are the problem, the back yard breeders, the dogs that cause fights and scare people. Not the ones under control. It's ridiculous that you can't get the biggest problem sorted so you are tinkering around the edges. Have dog walkers registered and get animal companion register NZ to be the body that overseas it. Not the SPCA. You have put so many dogs down that you should be focusing on animal welfare which then looks after human welfare. Please look at the big problem and fix that and not a problem that's easily fixed. Our animal welfare laws are ********** and we are worried about dog walkers. A city like ours should be showing the country the way and show that we love our animals and are prepared to see the horrible living or surviving conditions some of them have. We need to do better, be better for those that can't speak for themselves.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Dogs need to be under control either on or off leash, as in total recall and not just run up to anyone, and if anyone says call back your off leash dog then that needs to happen.

If something were to go wrong, I believe one dog walker would struggle to control more than 6 dogs. We all hope everything goes well whilst walking but if on the off chance a dog was to get aggressive toward another dog for coming too close etc whether in the same pack or a dog not within the same pack, that is a lot of dogs one person would need to try and get control of. Especially if the rest of the dogs turn aggressive following the lead of the original dog which does happen. Prevention is key to avoiding these situations

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

I am a dog owner and utilise several off leash areas in West Auckland including Kakamatua Inlet. I have witnessed some extraordinarily large “pack walks” of off leash dogs, and many incidents of the dog walker having limited control of dogs that are not their own. It’s really dangerous. If operators want to run pack walks with over 6 dogs they should utilise fenced farm land that they have leased to do so, that is what my dogs daycare does. I walk my neighbours and my dog frequently, they are both well behaved but there is no way I would try to walk more than 2 of them off leash there is no way you can control that many dogs if one starts a fight, especially if they don’t know you well. So limiting to 3 max off leash is the bare minimum from a safety perspective in my opinion. And definitely please stop large pack walks in public spaces, it’s just an accident waiting to happen.

Not sure what current definition of “under control” is, but off leash dogs are rarely in their owners control from my observation. If a dog does not respond easily to recall and runs to approach other dogs or people they are not under control, so many dog owners just ignore the rules for off leash vs on leash and those who let them off leash if they can’t call them back should be limited to fenced dog parks or fined. Can this be added to or clarified in policy

Professional dog walkers should not be restricted in the same way as general public. We got our dog during Covid so socialising her with others was really challenging. 3 years on we were still struggling, through regular pack walks with up to 10 other dogs she ability to socialise with other dogs in a natural environment (not a doggy daycare warehouse) she has improved drastically when out with us.

I do agree there should be regulation on professional dog walkers so that we know our animals are not being walked by Cowboys

Auckland needs to be more friendly for dogs.

At a minimum you should be able to take them on leash to places, with designated off leash parts for animals under control.

With the reduction of places people can take dogs the ability to train and socialise them is decreasing significantly.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

Even 6 dogs together can completely block a footpath so more than that definitely negatively affects the access to and enjoyment of other people using the footpaths. I think when 6 dogs are being walked, they should ALL be on lead as managing unexpected hazards could be problematic. I have a dog who i walk every day so I completely support dogs getting exercise however if people can't make time to walk their dogs then maybe they should consider not having one.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

The changes need to be aimed at the training of the walkers - someone who has no training should not be the reason why experienced dog walkers with years of training in dog psychology and walking. These proposed changes are going to ruin livelihoods.

PDWA are a prime example of many dog walkers who would be effected by this, capable of taking dog packs of 10+, as they do the work before heading out to bring new dogs into walking packs and keeping all undercontrol, versus the walkers who are just trying to add additional dogs to get an extra $ each walk, with no prep on getting themselves and the dogs ready.

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

While I'm not a walker of "multiple" dogs, im of the opinion that individuals having multiple dogs are generally considered "professionals" and as such have more experience in "controlling" and recalling their dogs. I believe changing this law will NOT reduce the number of adverse altercations with dogs and simply goes to penalise responsible people. I remind you of a very recent incident (news bulletin) where 3 dogs (being walked) attacked an elderly couple in Woodside Reserve thus this law would have been ineffective in that instance. Instead penalties should be increased for individuals walking dogs that cause harm.

I pay for a dog license and while i dont object, i maintain as much as i like dogs, ANY dog detained by animal management must NOT be returned unless the dog is not only registered but also microchipped, desexed and a penalty implemented as its far to easy to simply "own" a dog and keep it tethered to a chain in a yard for its life. This is disgraceful and deterrents should be in place for people that seek to disregard a dog's existence.

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Maximum four dogs, with no more than two off-leash

Tell us why

I walk my adopted, well-trained retired greyhound (10yo) twice-daily on local walks. We meet other dog walkers (max 2 dogs) all on leash and usually we acknowledge each other as they see us crossing the road to avoid them. Once a week we go to local parks, but not off-leash parks. I have met dog owners who ignore the Ak Council 'dogs on leash' signs. My dog was attacked (with a previous owner) and as dogs retain memories he is fearful although my training tactics are working and he is less fearful. That may change if we cannot escape from a pack of dogs and inexperienced walkers. I'm too old to fight off dogs and dogs off leash would be terrifying to both of us.

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

I think standardising on- and off-leash dog limits per person won't fix the issue around uncontrolled dogs causing harm to other pets or humans. I have been a dog owner myself for most of my life and although we always ever had one dog at a time in my experience dog owners with more than 2 dogs usually are very experienced and their dogs well behaved and under good off-leash control. Our dog walker walks large packs and she is super experienced and a professional dog walker and trainer. Our dog never had any issues with other dogs, her safety standards are high and she only ever invites one new dog into the pack which then undergoes extensive pack training on leash for a multitude of months before the next dog is allowed in - when there is space that is.

In other words: limiting numbers don't increase safety standards, responsible dog ownership/caregiving does!

We live in West Auckland which has loads of unregistered dogs and many dog owners hold large and powerful dogs such as pitbull cross breeds as a status symbol/sign of power or whatever their motivation. I have seen so often that they are inexperienced and incapable or controlling their dog(s). They usually have no more than two dogs at a time - and much of the time only one, yet they scare me and I know many of my friends and family. The proposed law will not even remotely clamp down on these real dangers and unpredictability to our community. Instead we're putting pressure on people who make a living of dog training with larger groups (dog and their owners) where we need them to educate us and help turn our pets into well behaved and controlled adult dogs.

Why instead not enforce people who lead larger packs to register as such and enforce that they proof they obtain the professional skills needed?

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

Professional dog walkers provide an incredible service to dog owners and to the dogs that they walk. It improves the lives of both the dog owners and the dogs they own. This is a service that is critical to any dog owner who lives and works in Auckland full time. It is very difficult for owners to be able to walk their dogs during all work days. This is due to the fact that travel times in Auckland are very long during peak hours.

In this everyday scenario, dog walkers provide an invaluable service to Aucklanders. If there is a limit put on dogs to be walked on a leash many dog walkers may not be able to make a living and will go out of business. There will be more dogs that end up being neglected as the owners try and balance work hours and dog walking.

I have never seen professional dog walkers in Auckland who do not have control over the dogs they are walking. I am not sure what data is being used to make this into an issue. If there is ever an incident, the individual dog walker should be held responsible, and not the entire dog walking industry.

Rules should be set based on owner responsibility to ensure the safety of their dog, other animals and humans. Dogs are blamed for human's lack or ignorance to train and protect their dogs.

Clarify Auckland-wide dog access rules (for example, rules at council carparks and camping grounds, for working dogs, dogs in vehicles and private ways):

An unsafe environment is created with risk to all when human's are unable to 'control' their dogs due to limited or no training for humans and their dogs. Dogs in vehicles during hot days remain an ongoing issue which is not fair on dogs.

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

I've been to Monte when dog walkers have been there supervising their charges appropriately while their families are out and working or at school. I have NEVER had a problem with them with my dogs and have found that the dogs are under control and have never witnessed an altercation with another dog or human. PLEASE STOP controlling dog walker companies as this is their job and 99% of the time, they are experienced and know what they are doing. It is the single dog walker who is just trying to earn an extra dollar that occasionally MAY experience an issue. I have experienced more issues at Big King with wilful dog owners rather than dogs.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

Depending on size of dogs, even four on leash at a time can be physically challenging to control if behaviour becomes problematic. Off leash numbers should be limited to ensure safety of others, including other dog owners and dogs themselves

I understand the reason behind the limit. I'd find it pretty hard to control 6 on leash dogs, let alone 8. However, I feel professional dog walkers should have some kind of exception or something. The woman who walks my dog can handle eight dogs fine, but I've seen regular dog owners struggle with 2 or 3. So I don't feel that 3rd "Max 8 dogs, 4 off-leash" would work as a blanket option to all people who would be walking large sets of dogs

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

Tell us why

I am a dog owner and support professional dog walkers but have witnessed dog walkers that do not have sufficient control of large groups of dogs. This puts other dogs, their owners and other members of the public at risk. Larger groups of dogs are more likely to not have their waste picked up which can be particularly bad at beaches. I support the proposal but suggest a limit of five dogs., Larger groups of dogs can be accommodated at private doggy daycare businesses in a controlled environment.

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

I support the change but feel that 6 on leash dogs is perhaps too much for one person to safely control. I definitely support having a limit on the number of dogs allowed to be walked. I am particularly concerned about off leash dogs and lack of ability to see where dogs poop to pick it up. I am also concerned about safety and individual owners being able to walk their dogs safely, which may be difficult when there are large groups of dogs being walked off leash.

Do you have any further comments about dog access rules at Regional Parks?

It would be such a shame to lose any of the few off leash atea we still have. As auckland gets more crowded, gardens are getting smaller and smaller and family dogs have less and less space to stretch their legs. We are lucky to have a lifestyle block so

3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

It is about time dog owners were treated more fairly. Most dog owners are responsible and just want what is best for our dogs. We are constantly being restricted on where we can exercise our dogs off leash.

Walking your dog on the lead is not sufficient exercise for most dogs.

I support having only 6 dogs on and off lease, but I do not support only three being off lease at any one time. I have my own dog walked by a fully trained and competent dog walker and she has only walks 6 dogs at a time and they are all totally under her control. It is very unfair that at any one time 3 of the dogs need to be on a lease. What you appear not to have considered is having a registration system that determines whether the companies and dog walkers have the required competency and experience to walk a pack of dogs.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

I don't know

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

I have felt intimidated by large packs of dogs which are not always well-controlled by their handlers, so believe the 'control' aspect of dog handling needs to be policed. The number of dogs is largely irrelevant, with some pack walkers being fully capable of controlling large numbers. Anyone bringing animals into a public place must have them under control or be prosecuted. Perhaps a license could be issued to pack-walkers who have proved their competency.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Other (please explain below)

Tell us why

I would propose limiting the number to two dogs with anything else needing a licence - all it takes is one dog to be compromised and you lose control over all the rest. Far better it be one other dog at least until roaming dogs / dog attacks are reduced more generally. When we have better outcomes then revisit to increase numbers.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

There are not enough Council staff to enforce the existing bylaws meaning that a limit or ban will have no impact on those who already don't follow the law. Also even if the number of dogs are reduced, regardless of the number restriction, unregulated people walking a group of even six dogs still pose a risk to not being able to handle them, so instead of focusing on numbers, we need to regulate in other ways and make sure that the people who are walking groups of dogs are qualified and registered in order to address issues currently. If this change happens then it will have a substantial impact on all dog owners in Auckland.

The proposed limits will mean that a large number of residents will not be able to access dog walkers, leading to more dogs being left at home all day and barking or roaming which is a reposted issue by Auckland Council. Other dog minding services are simply not suitable for all dogs such as daycares, and it is important that dog owners can have access to other services that are appropriate for their dogs to fulfil their needs.

Alternative recommendations:

• All professional dog walkers must pay a yearly licence to be allowed to operate.

•All professional dog walkers must have a minimum level of qualification and experience with handling dogs.

•If professional dog walkers have reports against them that are proven with evidence, of not having control of their dogs, their licence could be revoked, and they are no longer able to walk up to a certain number of dogs in public.

•Professional dog walkers must ensure that they have enough leads for every dog that they walk.

• All dog walkers must be assessed in order to obtain a licence.

• Professional dog walkers must have public liability insurance, Terms and Conditions signed by their clients, as well as up to date health and safety protocols.

•All vehicles must be sign written and professional dog walkers must have their business displayed on them in public.

As a result, I do not support this proposed legislative review by Auckland council.

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

Out of control dogs pose risk to members of public and other animals. I fully support capping numbers to 6, which in my view is still very generous.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Tell us why

Clarify how dog access rules are set:

Tell us why

Clarify Auckland-wide dog access rules (for example, rules at council carparks and camping grounds, for working dogs, dogs in vehicles and private ways):

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

The proposed limit of six dogs (with a maximum of three off-leash) misses the mark in addressing the real challenges within the dog community, such as uncontrolled dogs and roaming animals. Instead, it unfairly targets professional dog walkers who already manage multiple dogs responsibly.

Professional dog walkers are vital in providing dogs with regular exercise, socialisation, and training, helping to reduce behavioural issues that often lead to complaints. Imposing arbitrary number limits disregards the expertise and training these professionals have in managing groups of dogs safely. A more practical and evidence-based solution is needed, including consultation with industry experts, such as the Professional Dog Walkers Association (PDWA), to develop effective and balanced policies.

'Tēnā koe

I am writing to express my opposition to the proposed limit of “6 dogs on-leash and 3 off-leash” at any one time under the updated Dog Policy and Bylaw. I have also submitted online but wanted to follow up with a more detailed response.

While I understand the Council’s intention to address concerns about dog control and public safety, I strongly believe this proposal will have unintended negative consequences for professional dog walkers, the community, and the broader dog-owning population.

Professional dog walking businesses are integral to many dog owners in Auckland, especially those who rely on these services to ensure their pets are well-exercised, trained, and socialised. This proposed restriction will:

Undermine livelihoods: Many professional dog walkers cater to groups larger than six, and restricting group size will drastically reduce the viability of their businesses.

Increase service costs: With fewer dogs allowed per walk, professionals may need to charge more to cover their operational expenses, making their services less accessible.

Worsen service availability: Limiting numbers could force professionals to turn away clients, leaving many dogs without adequate care or exercise.

As a dog owner, I have directly benefited from professional dog walking services. My dog was a “Covid puppy” and missed crucial socialisation during his early years. Regular walks with a trained professional have significantly reduced his anxiety around other dogs. These services also ensure my dog gets sufficient exercise and isn’t left alone for extended periods during human work hours, which could otherwise lead to anti-social behaviours like barking, escaping, or destruction.

Restricting professional dog walkers will make it harder for owners like me to access these essential services, leading to more poorly socialised dogs, less exercise, and potentially more problems in the community.

This proposal risks exacerbating the very issues it seeks to address. Fewer professional dog walkers may result in:

More dogs left at home without exercise or mental stimulation.

Increased instances of poorly socialised and reactive dogs.

Greater strain on animal welfare organisations and councils managing “problem” dogs.

Rather than imposing blanket restrictions that harm professionals and dog owners, I propose the following alternatives:

Licensing for professionals: Introduce a licensing system for professional dog walkers, allowing them to walk larger groups with accountability.

Separate limits for the public and professionals: Different rules should apply to trained professionals versus the general public.

Variable limits based on density: Tailor dog-walking limits to the population density of each area, with fewer restrictions in less crowded spaces.

Strengthen existing rules: Enforce the current requirement for dogs to be “under control” regardless of group size.

Education and support: Provide resources to educate dog owners about responsible pet ownership and the importance of training, exercise, and socialisation.

I urge the Council to reconsider the proposed restrictions and adopt a more nuanced approach that addresses public safety while supporting the professional dog walking industry. Licensing, education, and stronger enforcement of existing rules will be far more effective in achieving these goals without creating unnecessary hardship for dog owners and the professionals that support them.

Thank you for considering my submission.

I have run a non-profit small dog rescue and rehome charity from my home in Titirangi for 20+ years. I am Council approved for up to 14 dogs. I have a Responsible Dog Owners License. I have rehomed at least 200 dogs to approved , wonderful forever homes.

I walk all my dogs together for practical and time management purposes. At present I own 7 and there are 3 others living elsewhere on my property, owned by someone else (also wth a RDO). Almost all of the time we drive together to destinations and walk our dogs together - all 10 are small or very small

dogs.

At times I will have one or two additional dogs with me as well , as I have regular dogs who come to stay for the day or board for several days/weeks.

We go to parks and beaches in West Auckland where the dogs can be off leash.

This proposed change would severely negatively impact upon us both, but particularly me.

Specified off leash dog parks and beaches under the seasonal access rules should be allowed to cater for up to 12 dogs off leash, if under control.

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Other (please explain below)

Tell us why

I don't think limiting the number of dogs is going to help the issues a licensing system and better education is what's needed

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

I think there should be a certification process to put end to cowboy walkers where you have to prove staffing levels, staffing competency and being a registered, well reviewed functioning business - instead of any Joe blog off Facebook. This would ultimately punish hard working companies doing a fantastic job who have dogs wellbeing front of mind and spend time with the animals. A lot of these places use long line leads for a few weeks with new dogs to get them well integrated, and some offer option of gps collar. They also tether dogs to the walkers in on-lead areas already. It's also extremely harmful to dogs who require this type of socialisation. Dogs who are not used to other dogs become more tense to deal with in real world.

Tell us why

Dog walking is not managed by the number of dogs or having them on a lead, it is managed by the walker having control of the dog(s) that they are walking

Walking companies have well trained handlers that are able to manage their packs and do not seem to cause any issues. however, it is people with unruly and poorly trained dogs that are problematic and changing the number of dogs walked will not sort the issue.

Maybe the real issue needs to be addressed instead

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

As someone who works in the animal industry and understands dog behaviour, I have come across multiple dog walkers and companies they have continued to have well socialised and controlled dogs, this is purely based on dog behaviour and training.

Dogs that are part of regular pack walks with experienced dog walkers are accustomed to the routine, they're all well socialised and usually know how to behave in a pack, understand recall etc.

Dog walkers and people that own a larger dog pack will carry around training tools with them, such as treats, training collars, long lines, toys and other items that help their dogs stay under control at all times not to mention they all pick up after their dogs! I have run into more irresponsible dog owners or roaming dogs with issues then pack walkers.

I understand that it can be scary when you have nil or few experience with dogs but as someone who works with animals, understanding behaviour is key.

The dog walking industry as well as a lot of other pet industry's are growing because we are putting our pets first, we want the best for them.

Regular exercise, pack socialisation and small business are needed for both dogs, trainers/walkers and dog owners need the dog walking industry.

People who are responsible and own multiple dogs taking them out to get their enrichment met should not be punished, the dogs should not be punished.

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

As a professional dog walker I match the dogs I walk by temperament and cohesion as a group. With over 6 years walking small groups of dogs I always maintain control over the group at all times - having some of the group on lead and some off lead would potentially lead to frustration in the dogs on lead, making them harder to control and breaking the group cohesion.

Things to consider for professional dog walkers

○ Licensing professionals to walk larger groups

○ Having different limits for the public versus professionals

○ A license for anyone wanting to walk more than 2 dogs

○ Having different limits based on the density of the population in an area

○ Enforcing the rule ‘dogs must be under control’ no matter the number of dogs which is already in place

○ Providing more education and support to the public about what owning a pet actually entails and how they can access training and services to support them.

Any responsible competent dog handler knows their capacity to control the dogs in their care. These restrictions will lump them all under the same competency and restrict their business. They don't want harm to others dogs of humans so can make the call on how comfortable they are with capacity. Perhaps newer handlers can have a review period with a restriction on numbers.

I vehemently oppose the proposed limit as only 0.7% of dog-related complaints to the Council involve multiple dogs, and this figure includes everyday pet owners. The majority of complaints stem from issues such as untrained pets, roaming dogs, and underfunded animal control services. This proposal does not address these core concerns and instead penalises responsible professionals who contribute to safer and more controlled dog management in the community.

Dog walkers (many of whom are also trainers) will have to either:

Change the way they make a living

Raise their prices, leave Auckland or,

Find a new career all together.

This would limit access to good trainers, taking away support many dog owners need. Those that have dedicated their life to learning how to train and walk dogs safely will not be able to continue, leaving a gap in the market for people part time looking to make some quick cash, further increasing the risk to the public and the issues you are trying to prevent.

Clients will suffer from this. As will the community. My main goal when pack walking is teaching the dogs how to be well-behaved and content in this human run world. I support busy families by ensuring their dogs have stimulation, exercise, socialisation and training, I also help owners get a better relationship with their dogs. This makes the dogs we work with much less likely to cause problems, reducing complaints about barking, roaming or worse.

Those who doubt that professional dog walkers can safely manage multiple dogs often base their concerns on personal experiences struggling with just one dog. And that's the real issue, problems can and do arise with under 3 dogs, when either the human or dog is untrained. I agree something needs to change but this band-aid “solution” will make the issues worse down the line. We need a way to make walkers accountable, help them support and train dogs and their owners. I believe Licensing professionals to walk larger groups would be beneficial in many ways. A licensing framework could include:

-Registration and a Council-administered fee to offset costs associated with compliance and complaint handling.

-A set of professional standards that walkers must agree to uphold.

-Certification or assessment from recognised industry bodies (e.g., the Professional Dog Walkers Association) to ensure competency without overburdening Council resources.

Licensing would provide many benefits over restrictive limits such as:

-Council can track and regulate professional walkers more effectively.

-Enforcement powers would allow Council to revoke licences for non-compliance without requiring court action.

-Ensure high industry standards while reducing administrative burdens on Council.

-Skilled walkers can continue operating, and maintaining high-quality services.

-Dog owners retain access to trusted, qualified professionals.

At the very least try to work with the Professional Dog Walkers Association to find the solution that is best for everyone - we want to be collaborative.

I have dedicated my life since 2016 to helping people and dogs have a better life, learning how to do it safely. In turn, I have also made the community safer. Don't take that away from us.

Thank you for your time and consideration.

Feel free to get in contact if you have any further questions.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

#3702

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, name, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

I see many experienced dog walkers with large groups of off-leash dogs and all are well-behaved and under control. They know what they are doing - no need to restrict number of dogs for professional dog walkers.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

To respond to opportunities for greater dog access without impacting other users (e.g. an area to take a dog under control off a leash). Please specify:

What is the main reason you want to change the current dog access rule?

Many countries do not have so many restrictions on dogs. The council needs to have more powers to manage irresponsible owners and protect the community. The vast majority of owners look after their dogs and they should not be punished because of the few that are anti-social. Dogs bring a huge amount of positive affects, joy and comfort to members of the community community

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

I cannot see any good reason to change the rule - why does it need to change? Is it due to a perceived increase in pack walking activities? Why is this a problem?

This rule change proposal unfairly targets dog walking businesses - which are often sole trader businesses and (anecdotally) often women-run businesses that are hybrid working opportunities - very well suited to experienced women dog handlers.

I am not a dog walker but often encounter walkers with their dogs that are at places I regularly walk my own two dogs. Dog walking packs are perhaps the best trained and behaved groups of dogs I see - that is on and off lead. In an urban environment, I have seen pack walkers be very considerate and yield to people on footpaths, including mobility scooters and baby strollers. Every dog pack and walker I encounter (or observe) are exemplary in their conduct (walkers and dogs) and are in fact an example to us all.

Changing dog number limits will increase the numbers of packs in public spaces, surely? Limits will achieve very little in the apparent and perceived control that is behind setting limits. It feels like an artificial control, another dog rule for dog rules' sake.

Auckland doesn't need another rule to demonstrate how much we don't like, value or respect dog pets.

Please reconsider your proposal to set dog number limits for walking dogs under control in public spaces.

Thank you for the opportunity to provide feedback.

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

I think dogs should be on a leash in any public area. Off leash dogs are unpredictable. Even nice ones. Even good ones. Even friendly ones. I have been bitten by an off leash dog. A pack of on leash dogs is intimidating. 6 max in the pack. Walkers need a licence.

What is the main reason you want to change the current dog access rule?

Please explain your issue in more detail:

Please explain why you want to change the dog access rule at this location, and provide any additional information or evidence

Do you have any further comments about dog access rules at Regional Parks?

Wildlife must be the priority. Dogs need to stay on leads in public. Dog walkers dog numbers should be reduced to 6 on lead at all times max. Dog walkers need a licence!

Other (please explain below)

Tell us why

I currently use a professional dog service Paws on Tour that has 8-10 dogs off lead. We chose them over an individual dog walker because of their professionalism and the standards they have in place. We have never had an issue with them and they have never had an issue. Changing this rule would reduce the value of the walk for our dog, increase the cost, and put pressure on this valuable service. I believe a controlled dog walking regime (registration or otherwise) would better address the issue of dog walkers. I believe there's a big difference between some of the companies vs individual dog walkers when it comes to standards and protocols.

I also don't believe, as laid out in the reason for review, that changing the rules to dog walkers is the right answer. There are a lot of bad dog owners out there that don't socialise their dogs (something this service does), don't exercise them, and thus why they escape and roam or are hard to manage in public spaces resulting in attacks. The problem is the individuals (dog owners and walkers) not the professional companies.

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

I have worked with dogs for a lifetime. I accept some people cannot walk one dog let alone 14 or 6. However dont assume everyone is like this- i have known people who can control 14-20 dogs off leash! Yes, it can be done and is to be admired. I cannot and do not wish to but i have seen it. Stop penalising people with skill. I know people right now who can easily control 10-12 dogs. They integrate them and control them well. So no i dont agree with your proposal.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

Overall i think Council is overreaching authority and will not take public with them. Provide more areas for off and on leash walking- you are failing to provide both general public recreational areas and dog areas. How can we socialise and encourage good behaviour and integration if you wont provide the space. For a start open huge areas of the Waitakere ranges for dog walking. Provide a 10km loop and a 20 km loop for example. You have a very poorly thought out policy and quite obviously want to stamp out dog ownership. They need exercising and off leash or you will get poor behaviours which is what you have caused. I fully endorse owners behaving well and i think they should be fined for obviously poor behaviour but i have been training dogs for 50 years and it's getting 'anti' here and oppressive. I need to continually teach children how to behave arround dogs - they dont know! They dont know because Council is reducing the contact and instilling fear. Don't you have enough to do stopping millions of gallons of pollution on the beaches before this nonsense.

Tell us why

I walk my own dog four times a day and am training a support dog for a person who received a major brain injury as a child, and is deaf and mute and has limited into the intellectual ability.

On my walks in many parks around West Auckland I've never seen a problem with dog walkers' dogs,, even those who are walking eight dogs or more. They're always very professional, courteous and have control of the dogs. The only problem dogs I've ever run into have been strays and dogs with their owners that have clearly never been socialised.

I believe dog walkers need to be licensed, but if they are they should be allowed to walk eight dogs. Limiting the number to 6 obviously has an effect on their livelihood which in turn will lead to increased dog walking fees for owners, leading to mini dogs not getting the exercisemental stimulation and socialisation they need.

A. What do you think of this proposed change?

I support the proposed change

B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

This park is a fabulous place to take dogs with a large off lead section. Please keep it as it is.

Hunua Ranges Regional Park

We are proposing to prohibit dogs from tracks and roads that connect to the Kohukohunui track, the Kokako Management Area and Piggott's Habitat and from single-use mountain bike tracks (currently on-leash).

Whakanewha Regional Park

We are proposing to provide on-leash access on tracks from Omiha (Rocky Bay) to the on-leash area of the Park.

What do you think of this proposed change?

Tell us why

Are there any dog access rules at other Regional Parks and associated beaches in Auckland that you think council should change?
Your feedback on this section will inform any future review of dog access rules. A future review has not been scheduled at this time and no changes will be made on any location you identify in this section as part of this proposal.
Only provide feedback on one location at a time.
Space is provided for three locations. If you would like to provide feedback on more than three locations, please copy the following pages or include your comments in the other feedback section.

Location 1:

What is the full name of the location where you want to change the dog access rules?

Bethells Beach

What local board area is this location in?

Waitākere Ranges

In general, how would you like dog access at this location to change?

Tell us why

Do you want the change to apply to the entire location or a section of it?

To respond to opportunities for greater dog access without impacting other users (e.g. an area to take a dog under control off a leash). Please specify:Current lead only section

What is the main reason you want to change the current dog access rule?

Off lead allowed not during breeding season

Please explain your issue in more detail:

Please explain why you want to change the dog access rule at this location, and provide any additional information or evidence

Off lead allowed when breeding season is finished. This happens at other beaches and would be good at this beach.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

Why don't the dog walkers be licensed as a profession.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

This would negatively impact a very specific group: Dog walkers. I have seen experienced dog walkers handle over 10 dogs without issue and I can't see this change as being anything else other than to attack the livelihoods of this necessary service. I would like to see a different approach other than a blanket ban on the number of walked dogs such as licensing to make sure the quality of our dog walkers are preserved instead of eroded.

Tell us why

I strongly oppose the proposed limit, as only 0.7% of dog-related complaints to the Council involve multiple dogs, and this figure includes everyday pet owners. The majority of complaints stem from issues such as untrained pets, roaming dogs, and underfunded animal control services. This proposal does not address these core concerns and instead penalises responsible professionals who contribute to safer and more controlled dog management in the community.

As the owner of a 2 year old boxer cross I consider professional dog walking an essential service that keeps my dog calm, social, and well-trained. These services provide crucial mental, physical, and social stimulation, preventing behavioural issues such as excessive barking and reactivity.

If these restrictions are implemented, many experienced, qualified dog walkers who have dedicated their careers to providing safe and professional services will be forced to leave the industry, relocate, or significantly increase their fees—making professional services accessible only to wealthy owners. This could create a gap in the market, allowing inexperienced individuals to enter the industry without proper training, ultimately worsening the very issues the proposal aims to address.

Without access to the support of professional walkers and trainers there will be a greater strain on busy families and their dogs. Walkers provide biological fulfilment and training to help dogs be well-behaved members of the community. Without this support there will be a rise in misbehaved dogs and issues such as roaming, barking and worse.

If these changes are implemented, my dog would have to stay home alone while I work and increase the chances of him escaping the house and getting stolen or lost. as leading to increased anxiety and a decline in social skills.

I have seen a significant improvement in my dog’s behaviour and socialisation due to regular outings with a professional dog walker. This service is invaluable to dog owners like me and plays a vital role in maintaining a well-balanced, responsible pet-owning community.

A more effective solution would be to implement a licensing system for professional dog walkers, ensuring accountability and high industry standards.

A licensing framework could include:

- Registration and a Council-administered fee to offset costs associated with compliance and complaint handling.

- A set of professional standards that walkers must agree to uphold.

- Certification or assessment from recognised industry bodies (e.g., the Professional Dog Walkers Association) to ensure competency without overburdening Council resources.

Licensing would provide many benefits over restrictive limits such as:

- Council can track and regulate professional walkers more effectively.

- Enforcement powers would allow Council to revoke licences for non-compliance without requiring court action.

- Ensure high industry standards while reducing administrative burdens on Council.

- Skilled walkers can continue operating, maintaining high-quality services.

- Dog owners retain access to trusted, qualified professionals.

I urge the council to reconsider this proposal and instead focus on licensing and regulating professional dog walkers to ensure high standards and accountability. Please consult with I urge the Council to reconsider this proposal and instead focus on a licensing and regulation system that ensures professionalism and accountability within the dog-walking industry. A practical, evidence-based approach—developed in consultation with industry experts such as the Professional Dog Walkers Association—would be a more effective and balanced solution.

Thank you for your time and consideration.

I do not support the proposed limit on walking multiple dogs.

The proposed limit will only penalise responsible dog owners and will not stop irresponsible people who do not follow existing laws. Auckland has a serious issue with roaming dogs and Council should focus on this not multiple dog walkers.

The proposed limit of six dogs (with a maximum of three off-leash) fails to address the real issues affecting the dog community, such as owners/walkers with no control over their dogs, and roaming dogs. Instead, it penalises professional dog walkers who already responsibly handle multiple dogs.

Professional dog walkers play a critical role in ensuring dogs are exercised, socialized, and trained, reducing behavioural issues that might otherwise lead to complaints. Arbitrary number limits overlook the skills and training required to walk multiple dogs safely and responsibly.

We need a practical, evidence-based approach that includes consultation with industry experts, such as the Professional Dog Walkers Association (PDWA), to create effective solutions.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Tell us why

It will severely hamper professional dog walkers from operating and remove a vital support avenue to responsible dog owners who care about their dogs wellbeing. It penalises responsible dog owners and does nothing to stop irresponsible dog owners who don't follow the rules. 1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

Maximum of 10 dogs, with no more than four off-leash. With the reduced number of dogs, dog walking services will make it more expensive to use. This will reduce the number of people using the service, which will result in more dogs with less exercise and socialisation. This will be counterproductive to the objective of reducing the number of incidents of dog attacks and aggressive behaviours.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

I strongly oppose the proposed limit, as only 0.7% of dog-related complaints to the Council involve multiple dogs, and this figure includes everyday pet owners. The majority of complaints stem from issues such as untrained pets, roaming dogs, and underfunded animal control services. This proposal does not address these core concerns and instead penalises responsible professionals who contribute to safer and more controlled dog management in the community.

As the owner of a 3 year-old whippet , I consider professional dog walking an essential service that keeps my dog calm, social, and well-trained. These services provide crucial mental, physical, and social stimulation, preventing behavioural issues such as excessive barking and reactivity.

If these restrictions are implemented, many experienced, qualified dog walkers who have dedicated their careers to providing safe and professional services will be forced to leave the industry, relocate, or significantly increase their fees—making professional services accessible only to wealthy owners. This could create a gap in the market, allowing inexperienced individuals to enter the industry without proper training, ultimately worsening the very issues the proposal aims to address.

Without access to the support of professional walkers and trainers there will be a greater strain on busy families and their dogs. Walkers provide biological fulfilment and training to help dogs be well-behaved members of the community. Without this support there will be a rise in misbehaved dogs and issues such as roaming, barking and worse.

If these changes are implemented, my dog would have to stay home alone while I work, leading to increased anxiety and a decline in social skills.

I have seen a significant improvement in my dog’s behaviour and socialisation due to regular outings with a professional dog walker. This service is invaluable to dog owners like me and plays a vital role in maintaining a well-balanced, responsible pet-owning community.

A more effective solution would be to implement a licensing system for professional dog walkers, ensuring accountability and high industry standards.

A licensing framework could include:

- Registration and a Council-administered fee to offset costs associated with compliance and complaint handling.

- A set of professional standards that walkers must agree to uphold.

- Certification or assessment from recognised industry bodies (e.g., the Professional Dog Walkers Association) to ensure competency without overburdening Council resources.

Licensing would provide many benefits over restrictive limits such as:

- Council can track and regulate professional walkers more effectively.

- Enforcement powers would allow Council to revoke licences for non-compliance without requiring court action.

- Ensure high industry standards while reducing administrative burdens on Council.

- Skilled walkers can continue operating, maintaining high-quality services.

- Dog owners retain access to trusted, qualified professionals.

I urge the council to reconsider this proposal and instead focus on licensing and regulating professional dog walkers to ensure high standards and accountability. Please consult with I urge the Council to reconsider this proposal and instead focus on a licensing and regulation system that ensures professionalism and accountability within the dog-walking industry. A practical, evidence-based approach—developed in consultation with industry experts such as the Professional Dog Walkers Association—would be a more effective and balanced solution.

Thank you for your time and consideration.

I work as a vet nurse and can attest to the care and attentiveness provided by these professional dog walkers. A lot of these pack walkers have multiple dogs of their own and then they also walk their home stay dogs AS WELL so if these ridiculous rules came into play, they either wouldn't be able to look after their own animals to the same degree, leaving them at home for hours alone, or they are risking losing money by taking on fewer homes days and day stay dogs.

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

I realise this is mainly for dogs in public places, however residents living next to owners with dogs in Auckland seem to have very little rights to complain about dogs who are left at home all day alone, never walked, and have multiple dogs in one residence and breed them as they wish!!!

Tighten up the dog laws, I feel so sorry for so many dogs in Auckland. Its disgraceful. As and for the number of dogs not on a lead in our Waitakere Ranges National Park its also a disgrace for our wildlife. Some supervision and fines need to go out ofr those that dont follow the rules. I walk Exhibition drive regularly and basically there is never a day that goes by where people do not have their dogs on leads here!! and they run off into the bush disturbing our wildlife and up to walkers. There are signs and no one follows them. so the dog owners need to be given some well needed education.

Only provide feedback on one location at a time.
Space is provided for three locations. If you would like to provide feedback on more than three locations, please copy the following pages or include your comments in the other feedback section.

Waitakere Ranges Regional Park

What local board area is this location in?

Waitākere Ranges

In general, how would you like dog access at this location to change?

Tell us why

Do you want the change to apply to the entire location or a section of it?

To respond to increased presence of wildlife (e.g. ground nesting birds). Please specify:Exhibition Drive

What is the main reason you want to change the current dog access rule?

Dogs are always running free here when signs clearly say they need to be on a leash. Council needs to send out some rangers so people realise they need to follow the rules if their dog is running off disturbing our wildlife and upsetting parents with youn

Please explain your issue in more detail:

Please explain why you want to change the dog access rule at this location, and provide any additional information or evidence

Basically there are so many places in the Waitakere Ranges where dogs are supposed to be on a leash and they are not. Many people are frightened of dogs. Many dogs do run off from their owners and up to strangers. Dog owners are pretty bad in NZ and they dont care about the rules. if i knew about this survey I could take a dox photos a day of dogs unleashed in the Waitakere Ranges where they are supposed to be leashed!!

Do you have any further comments about dog access rules at Regional Parks?

There does need to be some places available for dogs off leash. Not in public areas of relaxation in picnic spaces and places like the botanic gardens (except that North WEstern large grass area) The other thing is what about fines for not picking up thei

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Other (please explain below)

Tell us why

All dogs should be on leash at all times on any street. It's a fallacy to pretend that any off-leash dogs are "being walked" at all. Any off-leash dog is not under the control of the walker. This is especially the case when there is more than 1 dog being walked.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Tell us why

Clarify how dog access rules are set:

Tell us why

Clarify Auckland-wide dog access rules (for example, rules at council carparks and camping grounds, for working dogs, dogs in vehicles and private ways):

Tell us why

Clarify or correct errors in Policy Schedule 2: Dog access rules:

Tell us why

Remove outdated information in Policy Schedule 2: Dog access rules (for example, outdated landmarks):

Tell us why

Update dog access rules for Tūpuna Maunga (ancestral mountains):

Tell us why

Remove outdated or duplicate bylaw content:

Tell us why

Do you have comments on any of the above proposed changes?

Do you have any further comments on the proposed policy and bylaw changes?

3. Dog access rules at Regional Parks

Are there any dog access rules at other Regional Parks and associated beaches in Auckland that you think council should change?
Your feedback on this section will inform any future review of dog access rules. A future review has not been scheduled at this time and no changes will be made on any location you identify in this section as part of this proposal.
Only provide feedback on one location at a time.
Space is provided for three locations. If you would like to provide feedback on more than three locations, please copy the following pages or include your comments in the other feedback section.

Location 1:

What is the full name of the location where you want to change the dog access rules?

Karekare Beach

What local board area is this location in?

Waitākere Ranges

In general, how would you like dog access at this location to change?

Tell us why

Do you want the change to apply to the entire location or a section of it?

To respond to opportunities for greater dog access without impacting other users (e.g. an area to take a dog under control off a leash). Please specify:Because we have no area where dogs can exercise

What is the main reason you want to change the current dog access rule?

I am older with heart problems and cant exercise my dogs on a lead. The area known as the glades has no endangered species and would provide a safe area for dogs to run around.

Please explain your issue in more detail:

Please explain why you want to change the dog access rule at this location, and provide any additional information or evidence

So dogs can be exercised in an area (the glades) and chase balls etc. There is no area in Karekare to play with your dogs.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Tell us why

Clarify how dog access rules are set:

Tell us why

Clarify Auckland-wide dog access rules (for example, rules at council carparks and camping grounds, for working dogs, dogs in vehicles and private ways):

Tell us why

Clarify or correct errors in Policy Schedule 2: Dog access rules:

Tell us why

Remove outdated information in Policy Schedule 2: Dog access rules (for example, outdated landmarks):

Tell us why

Update dog access rules for Tūpuna Maunga (ancestral mountains):

Tell us why

Remove outdated or duplicate bylaw content:

Tell us why

Do you have comments on any of the above proposed changes?

Do you have any further comments on the proposed policy and bylaw changes?

What do you think of this proposed change?

I do not support the proposed change

Tell us why

The proposed changes are far too restrictive in terms of access and times to areas to walk your dogs

Tāpapakanga Regional Park

We are proposing to provide off-leash access on the beach and on-leash access on areas between the beach and car park at any time (currently prohibited during lambing season) and clarify rules in other areas (such as prohibited at camping areas and bach, and during lambing).

What do you think of this proposed change?

I support the proposed change

Tell us why

Tāwharanui Regional Park

We are proposing to clarify the current rules (no change to dog access).

What do you think of this proposed change?

Other (please explain below)

Maximum four dogs, with no more than two off-leash

Tell us why

Too many negative experiences with irresponsible dog owners. Three off-leash dogs is a LOT when they are untrained. They make walking/hiking/cycling miserable for everyone around them. Two is plenty. None would be better. Same with dogs on leads. Maximum four is to me so many.

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Please explain why you want to change the dog access rule at this location, and provide any additional information or evidence

Currently there is no oppofor dogs and their owners to enjoy the beach off lead. The beach is vast and the area that includes union bay, ending at paratahi island is a good natural boundary. By allowing this area off lead we can keep the native species nesting either side of the boundary safer. The animal control officer then has an area they can refer dog walkers to also. Currently, locals are feeling the early morning visits from animal control are unnecessary and stressful. They are exercising with their dogs on a vast stretch of beach away from dotterel and penguin nesting sites and still being subjected to fines. It is a rural community with many active conservation minded members. We would like to see a balanced approach for all.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

Who are you to determine how many dogs a person is capable of keeping under control? I don't care how many dogs a person has with them as long as they are under control. You are just picking an arbitary number.

To provide opportunities for dog owners to walk with their dogs in this beautiful area of Auckland. It's an absolute disgrace to see the ever decreasing areas that it is possible to walk with dogs off-leash. These numbers are still too many - 3 dogs on a leash and 1 off a leash. My observations are people have difficulty controlling just 1 dog. This is especially noticeable with dog-sitters. Dogs are pack animals and can only be obedient to their owners who they know.

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

I don't know

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

I have previous submitted feedback on the dog rules but have modified my position on walking multiple dogs. While I understand that there have been instances of large groups of dog being walked attacking other dogs in a pack I feel the threat of menancing dogs to other dogs and people is of far greater significance. I have a personal experience with this and found the reponse was pretty average.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Clarity on rules would be good so that people can understand what is expected and not say oh but my dog is different.

Clarify rule that all dogs classified as menacing must be to neuter:

Max 6 dogs, and all can be off leash. Six seems a reasonable amount, but if you are in an off leash area I don't see why they shouldn't all be allowed off at once, particularly as they are likely to be known to each other and so will want to interact together.

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

Pack walking of dogs by professional service providers offers an invaluable service to dog owners. Socialising of dogs in groups is very important for behaviour management, general socialisation and wellbeing of dogs.

Rather than limiting than limiting the number of dogs that can be walked at one time on or off leash, I feel that licensing professional pack walkers would be a better solution. There are many pack dog walkers who are highly trained in dog behaviour and animal management. Their services greatly enhance the enjoyment of many dogs and their owners lives.

Licensed professional dog walkers who have proven they are able to control and effectively manage packs of dogs, should be able to walk them on beaches and in public parks. This license should apply to anyone wanting to walk 2 or more dogs.

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

The majority of dog owners don't know how to train their dogs, so dogs need to be trained by professionals.

Do you have any further comments about dog access rules at Regional Parks?

Dogs can be very friendly if they are properly trained. The problem is dog owners who lack responsibility and don't know how to train their dogs. so the council should change the rules that all dog owners are required to take a course before owning a dog,

Tell us why

A dog owner in Auckland can only have 2 dogs without a specific licence.

Meaning owners or organisations walking more that 2 dogs are dog walking or training facilities.

Regulate the dog walking industry. To prevent random untrained individuals creating businesses to walk dogs and not have a clue how to control them.

NZ is the most dog unfriendly country I have ever lived in.

Surely the controls need to be fining those with unregistered dogs. Those that are continually impounded.

Your policy makes no sence. Limiting the amount of dogs you can walk at one time. Will have no impact on aggressive behaviour.

Do you have any further comments on the proposed policy and bylaw changes?

NZ is the most unfriendly dog environment I have ever lived in.

Dog walking businesses are not regulated enough or effectively

Dog owners that constantly have dogs in the pound or roaming the streets are not effectively managed

More management of animals behaviour or treatment goes by with little to no consequences.

Cats on The other hand. Are free to roam

They can kill our native birds. Yet our dogs can’t go anywhere

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Maximum four dogs, with no more than two off-leash unless licence obtained

Tell us why

My dog is current walked by a professional pack walking company who perform their duties with the utmost professionalism and care ensuring all dogs are well looked after and return happy. The company that I use ensures that all dogs are under control when on or off lead (we know this because our dog was on a lead for the first month and when she changed days). I would support a licencing regime to allow professional companies like this to operate with the current pack sizes.

These proposed changes are not addressing the root of the issue raised by the public (dogs on the loose, aggressive dogs, people not picking up dog poo) and are simply going to drive costs up on people who use the service. Services like these are critical for working people to ensure their dogs get adequate exercise and socialisation. If costs on operators rise many families may have to give up the service and making for less socialised dogs and less educated owners.

Tell us why

I actually think 6 is too many. I walk two dogs together on occasion and it's very very hard to control them and to manage to clean up after them. Anyone dealing with more than two is not going to be in control unless using subversive measures on the dogs, such as choke collars. They would also be unable to effectively pick up after that many dogs. However it is important that dogs are exercised and some people rely heavily on dog walkers to do that for them. 6 is a sensible maximum that would still make it viable for dog walkers to operate.

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

Dont destroy the people who are trying to make a living by walking dogs. they should rather have a license in place.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

I think the key here is that dogs must be under control at all times and if they are, then they should be allowed some freedom. It also depends entirely on where the dogs are - there are open spaces (not smaller local parks) where more dogs can be safety off leash and controlled i.e. where there is plenty of open space for them to have enough exercise, where they are not around crowds of people, not near road etc. As long as the dogs are safe and well controlled. I have not seen any recent (in the last few years) issues with dog walkers and off leash dogs.

Dogs need leash free areas to run that are accessible for a wide range of people. I strongly disagree with making all of Monte Cecelia on leash - the large green areas should stay as leash free because they are safe spaces for dogs to be properly exercised without being near a road. Dogs in these areas cause no problems, the area is left clean and I have never seen an issue with an unleashed dog there. People have plenty of other spaces - right around the area on the paths to walk. Leave some area for dogs to be able to run free. My dog is an older dog and she enjoys wandering off at her own pace sniffing trees, foliage etc. If she was on a leash her enjoyment of the area would be very negatively affected. Monte Cecelia is a wonderful place for us to be able to exercise our dogs.

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Maximum eight dogs, with no more than four off-leash

Tell us why

8 is a reasonable number for a pack walk

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

Limiting the number of dogs a person can walk at one time will have no impact to public safety. What will make a difference is if dog handlers are ensured as qualified to manage dogs. You can have an owner walk the streets with their unhinged, untrained dog which is a risk to public safety. Ensure that people follow leash rules in public areas and dog walkers are professional, qualified and committed to continuous improvement.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

#6027

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, name, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Waitākere Ranges

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

Do you have any further comments about dog access rules at Regional Parks?

Dogs are family members and need the opportunity to run freely and exercise. Majority of dog owners are responsible and shouldn't be excluded from public areas unless there is good reason for it.

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

I don't believe that all dog owners and or commercial dog walkers can have more than three dogs off lead and be confident that they are "under control". I do believe that there are dog owners that do have this kind of control, however you can't have different rules for different people. For the safety off all dogs I would like to see this limit apply mostly to commercial dog walkers.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Tell us why

Clarify how dog access rules are set:

Tell us why

Clarify Auckland-wide dog access rules (for example, rules at council carparks and camping grounds, for working dogs, dogs in vehicles and private ways):

Tell us why

Remove outdated or duplicate bylaw content:

Tell us why

Do you have comments on any of the above proposed changes?

Do you have any further comments on the proposed policy and bylaw changes?

3. Dog access rules at Regional Parks

Submitters were able to select from the following list to provide feedback on any of the 14 Regional Parks we are proposing to amend or clarify the dog access rules:

1. Ambury Regional Park
2. Auckland Botanic Gardens
3. Hunua Ranges Regional Park

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

The main target here is clearly dog walking businesses. You're going to negatively impact the accessibility to these services by changing these rules so drastically with such a huge limit to off leash dogs. Reputable companies have processes and checks in place to ensure dogs are safe off leash and under control of their professional handlers. The cost will exponentially increase with proposed changes to limits, making the service unaccessible for most. This will negatively impact the wellbeing of dogs. There is so clearly no support or backing for this bylaw change, how it's gotten this far is absolutely ridiculous.

Maximum eight dogs, with no more than four off-leash

Tell us why

I think that professionally trained dog walkers are able to handle more dogs and provide a great socialising service for those busy folk who have dogs but not the time for a big social outing. The real problem comes with individuals and families who have dogs and don't spend time training them or socialising them and then let them of lead in public spaces. We often meet professional dog walkers out walking in Waikumete cemetery or at mount Albert Domain and have had no problems. But have seen many roaming single dogs around our streets getting into trouble because they are bored.

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

There is a huge demand for professional dog walkers who provide a much needed service for dog owners who are not able to be with their pets during the work day. Considering that the increase in the cost of living now requires most households to be double income it would be unfair to take away a utilised service that ensures their very loved fur children are happy and taken care of while they work. The increase in demand for childcare reflects this same position and would never be scrutinised in the way this industry is. As an avid animal lover who continually helps and rescues animals

it is obvious to see that the bulk of issues caused by dog aggression (the reason for this potential change to dog walking bylaws) are not the result of the households who utilise dog walking services, but rather those who provide no stimulation for their pets and have them roaming free instead of secured on their properties. These particular households are not the market that uses professional dog walking services.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

The erosion of dog access to life is precipitous and predatory. Dog access to anything is being eroded daily and it does nothing to assist humans cope with and be tolerant of anything that looks 'other'. This is a slippery slope

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Do not support

Tell us why

This is just more erosion of dog and dog owner basic rights to exist peacefully

Clarify rule that all dogs classified as menacing must be to neuter:

Do not support

Tell us why

Eugenics is discredited as a science long ago. This is just ignorant. Humans are the problem not dogs

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Do not support

Tell us why

'Experts' are purchased to say whatever the council thinks will grab votes.

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Do not support

Tell us why

Private property rights should not be eroded

Beef up legal consequences for welfare transgressions instead

Clarify how dog access rules are set:

Do not support

Tell us why

More likely to be erosion of dog owners rights

Clarify Auckland-wide dog access rules (for example, rules at council carparks and camping grounds, for working dogs, dogs in vehicles and private ways):

The Waitakere Ranges is an area of significance for Auckland. As such it needs to be protected. Rules around dogs and dog walking for urban areas don't necessarily translate to an area where there is critically endangered wildlife, and there should be special recognition of this within the dog bylaws. The current dog rules are not adequate for our area and need to be urgently updated to address the threat that dogs (and cats) pose.

2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

I don't know

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Tell us why

I think it is wrong to restrict the number of dogs if led by a professional dog trainer, as I believe their livelihoods are at stake. I know particularly of one dog trainer/walker who is absolutely capable of leading more than 6 dogs at a time - and is a registered dog trainer, is incredibly professional and responsible. It is the 'cowboy' kind of dog walkers that are the problem, they should not be able to walk multiple dogs - and all dog walkers should be properly registered.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

support limiting off leash dogs to 1pp to ensure the dog can be effectively monitored. Treat leashed dogs differently: no upper limit for leashed dogs so long as the person is a licensed dog walker and has clearly visible ID; with no ID, a max of 3 leashed dogs per person (again so dogs can be effectively managed and attended to).

To Auckland Council,

I am concerned about how this policy could unintentionally create more issues than it solves.

One of my main concerns is the poor quality of data used to justify this change. The proposal acknowledges that incidents involving multiple dogs are relatively rare and have a low impact. It also admits that the data is challenging to interpret, with no clear evidence linking the number of dogs to safety issues. Making significant policy changes based on inconclusive and incomplete data is reckless and undermines public confidence in the decision-making process.

Even more worrying are the unintended consequences this rule could create. By making it harder for professional dog walkers to operate, the bylaw could drive experienced, responsible professionals out of the industry, or raise their prices beyond what the people who really need the service can afford, especially at this time of financial difficulty for so many. This would leave dog owners with fewer trusted options and could lead to inexperienced individuals filling the gap. In turn, this might increase the very risks the Council aims to reduce.

Additionally, dogs that don't receive regular socialisation and exercise are more likely to develop behavioural issues. Limiting access to professional walkers could lead to an increase in poorly behaved dogs, ultimately making public spaces and even people's own homes less safe and enjoyable for everyone. If this happens, the Council will be responsible for introducing a policy that worsens the problem it set out to solve.

Before moving forward with this proposal, I strongly urge the Council to consider alternatives that address genuine concerns without creating new problems. Implementing a licensing system for professional dog walkers would be a more balanced approach, ensuring high standards and accountability while still allowing this essential service to continue.

This would be a far more effective and fair way to address community concerns. I ask that the Council rethink this proposal and take the time needed to make an evidence-based decision.

Thank you for considering my perspective.

Frank Warby

Having previously worked in the industry in Auckland myself 2014-2019 I went through rigorous learning and training to have a safe and successful business as a preference I preferred to have 8-10 dogs at one time, I could definitely handle more but the number was a nice one to be able to navigate foot paths or trails any more and it a bit excessive. I believe there shouldn't be a rule around how many as a total and only a portion of those being off leash. It doesn't make sense. I believe a total Number of 10 with all being allowed off lead IF reliably trained and under control (which is the law of any off lead dog- however most pet dog owners don't have control of their 1 dog let alone more)

I know of plenty of dog owner within Auckland region who own upwards of 5 dogs with great control it would be a shame that they may have to limit how they were to exercise their family dogs.

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

Maximum four dogs, with no more than two off-leash unless licence obtained

Tell us why

Professional dog walkers are well trained able to control multiple dogs.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Tell us why

Clarify how dog access rules are set:

Tell us why

Clarify Auckland-wide dog access rules (for example, rules at council carparks and camping grounds, for working dogs, dogs in vehicles and private ways):

Tell us why

Clarify or correct errors in Policy Schedule 2: Dog access rules:

Tell us why

I strongly oppose limiting the number of dogs that can be walked at one time. In my opinion, it makes much more sense to require professional dog-walkers with large groups of dogs to be licensed. Regulate the industry, rather than apply blanket restrictions that will prevent highly-trained professionals from doing their jobs (or requiring them to raise prices beyond that which an average NZ household can afford).

As the owner of a Swiss Shepherd, professional dog walking is an essential service for our family. Our daughter - the younger of our two children - died unexpectedly in 2022. Our dog is a crucial member of our family, a hugely important source of support for our older daughter who has been through the enormous trauma of losing her sister.

However, as grieving parents and dog owners, my husband and I are now faced with often being mentally or physically incapable of giving our dog the stimulation she requires. In order to keep her, we rely on a regular pack-walking service. Our pack walker is highly trained and professional. She is able to keep her prices at an affordable level because of the number of dogs she can walk at one time. We have seen the way she handles our dog and the other pack members at pick-up and drop-off. She is fully in control, compassionate and is constantly training the dogs while she works with them in a pack-walking capacity. Our dog is overall far less reactive and more engaged with us at other times because of the time she spends as part of the pack.

I am acutely aware that there are many so-called 'professional' pack walkers operating without the necessary skills to handle a large number of dogs safely. However, they should not be the reason that families like ours lose access to the crucial support that pack walking provides.

I'm a professional dog walker who walks a maximum of 6 dogs (usually 4-5), however I put a lot of work into all the dogs in my care. I have dog training and professional dog walking qualifications. I do believe there needs to be change and think a cap on numbers is a good start, but not on how many can be off leash. However it doesn't solve the real issue which is people with no idea thinking it's going to be an easy job, as well as general members of public who don't control there own dogs or understand them well.

I don't believe setting a limit to dogs allowed off leash is the right approach. Whenever I see anyone every dog goes back on leash unless they're very trustworthy to hold a stay command. Which is how any good professional or pet owner does things so you can see if its a good idea for the dogs to mingle or not. However if there was tension with a strange dog who came into the group I would drop the leashes of certain dogs and tell the dogs to follow me (a comand everyone knows well). Some dogs are far more tense on leash so it deescalates the situation much faster. I would hate to have this very important option removed for fear of prosecution as it's basic k9 understand/behavior that leashes can create more tension in some dogs.

I think a cap on numbers, maybe 6-8 dogs, and compulsory course to show you understand k9 training, behavior, first aid etc, and/or maybe license would be far more effective. At the end of the day with the proposed laws anyone could still walk multiple dogs and have no idea what they're doing. On another note I've been a dog owner for over 10 years and a dog walker for 4. I've only ever had bad situations with other dog owners who shouldn't have dogs off leash, not with any dog walkers. I believe the statistics don't reflect there's a major issue with professional dog walkers just a few bad eggs ruining it for the lot as usual.

Thanks

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

I believe we should be following other cities by licensing the industry. This means working with the dog walking community. Having a range of different people in the industry helping work the council to regulate our industry.

I don't think the limit should be 6 or 8 dogs. I think 10-12 dogs should be the limit if you know what your doing. But it should be licensed and tested with different distractions and how you react to them. Just like when passing a drivers test.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

I believe this is to put control and regulations on the dog walking community. There needs to be a separation between person people who do not have the skills and knowledge to control a handful of dogs vs highly trained businesses and individuals who have done the mahi to know how to deal with individual dog personalities and have them trained and integrated into a controlled pack walk.

This is going to seriously restrict great pack walking and dog homestay businesses that are great assets to our community. Do not restrict the number of dogs they have but regulate and ensure that the individuals running these pack have an agreed level of training and skill to handle their packs.

Only provide feedback on one location at a time.
Space is provided for three locations. If you would like to provide feedback on more than three locations, please copy the following pages or include your comments in the other feedback section.

Location 1:

What is the full name of the location where you want to change the dog access rules?

Titirangi Beach

What local board area is this location in?

Waitākere Ranges

In general, how would you like dog access at this location to change?

Tell us why

Do you want the change to apply to the entire location or a section of it?

To respond to opportunities for greater dog access without impacting other users (e.g. an area to take a dog under control off a leash). Please specify:Titirangi Beach below high tide line

What is the main reason you want to change the current dog access rule?

Titirangi Beach is extremely tidal, with a large expanse of firm mud flat revealed when the tide is not high. The flats are covered in stones and shells and aren't really suitable for the usual 'beach' activities. Allowing dogs off leash here would not affect people on the sandy area above the high tide line or the reserve.

Please explain your issue in more detail:

Please explain why you want to change the dog access rule at this location, and provide any additional information or evidence

Allowing dogs off leash below the high tide mark would not affect people on the sandy area above the high tide line or on the reserve. Dogs and people interact well at this beach with minimal conflict and very few people other than dog walkers utilise the mud flats.

Do you have any further comments about dog access rules at Regional Parks?

Dog access rules should reflect local community preferences and not be standardised on the basis of the most restrictive rules.

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

This is a very basic summary of my opinion- Professional dog walkers are known to allow socialization with dogs in a controlled manner. The inability of allowing dog walkers to continue working and having dogs off lead will lead to a path of more unsocialized/untrained dogs. As a dog behaviorist and a dog professional for the past 15 years (in the USA & New Zealand), my opinion is you will do more harm to dogs and more incidents will occur. Owners who do not have enough time to exercise/train their dogs often seek professionals to help, dog walkers. Limiting the number of dogs on a pack walk will cause prices to go up, and owners to leave their dogs at home. Dogs who stay at home will lead to unsocializing & not enough exercise which can turn energy into anxiety, which takes a dog to the path of reactivity. Reactive dogs can cause incidents whether they are on lead or not. More dogs on lead could create incidents for people being pulled over and getting hurt... The price demand on dog walking goes up, and people who cannot afford dog walking any longer causes more dogs to be surrendered. The cycle will continue. If there were strict laws on people who are allowed to own a dog, and professional dog walkers could hold a license to guarantee a controlled dog walk, or that there are designated areas in parks for dogs and their dog walker, we should be able to continue on as is. With this law, you will create a bigger problem, and more incidents.

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

Comments on – Proposed updates to Auckland Council's dog policy and bylaw

by Titirangi Residents & Ratepayers Association

21st February 2025

From: Titirangi Residents & Ratepayers Association

Contact: [redacted], Chair;

PO Box [redacted] Titirangi, Auckland 0642;

[redacted]

Thank you for the opportunity to present the Titirangi Residents & Ratepayers Association (TRRA)'s comments on the **Proposed updates to Auckland Council's Dog Policy and Bylaw**.

This submission is made by The Titirangi Residents and Ratepayers Association, a non-profit incorporated society formed in 1987 to promote and represent the interests of ratepayers and residents in the Titirangi area. The Association can be traced back to the 1920s when an unincorporated society is recorded as lobbying Council regarding roads.

We note that based on the information provided council are proposing three small amendments proposed to the Council Dog Policy and Bylaws:

- Limiting the number of dogs a person can walk at one time
- Changing the dog access rules at Regional and Local Parks
- Making the policy and bylaw clearer and easier to read

Whilst we will address these three areas, our comments also address broader concerns we have relating to details within the Dog Policy and Bylaw.

Key Concerns:

1. **Setting a limit on the number of dogs a person can walk at one time**
   We do not support the proposal to restrict the walking of multiple numbers of dogs.

   - We are not aware of any evidence to support the view that the walking of multiple numbers of dogs is a particular issue that requires alteration of the policy or bylaw.
   - In our experience professional dog walkers appear to have greater control over the dogs in their care than is often demonstrated by private dog owners with a single dog.
   - We consider that the bylaw should focus on dog behaviour, dog owner control of their dog(s), location and boundaries of permitted off leash areas rather than the number of dogs being walked by one person.

2. **Professional Dog Walkers**
   We support suggestions for the investigation into the feasibility of a licensing system for professional dog walkers.

3. **Clarify and update dog access rules for 14 regional parks.**
   We understand that changes in the ecology and/or conservation values within a particular local or regional park may necessitate the update of dog bylaws. We do not understand why it appears that the Waitakere Ranges Regional Park has been excluded from the list of 14.

   - Given the known presence of endangered shore birds breeding on many of the West Coast and Manukau Harbour beaches, the Waitakere Ranges Regional Park should be added to the list of 14 regional parks.
   - Any proposed changes to dog access rules should take into account the presence and movement of shore birds and penguins.

4. **Update 64 local park and beach dog access rules**
   We support updating dog access rules, however as with the previous point we do not understand why none of the local parks or beaches within the Waitakere Ranges are included in this list.

   - Given the known presence of endangered shore birds breeding on many of the West Coast beaches, local parks and beaches within the Waitakere Ranges should be added to the list of 64 local parks.
   - It is essential to protect vulnerable wildlife/birds, some native birds are flightless (penguins), some are ground-nesting (petrels, dotterels) and live/nest on beaches and parkland where dogs access includes off-leash areas.
   - This bylaw review should take the opportunity to incorporate changes to the bylaws to protect wildlife in such areas.
   - Input should be sought from environmental groups caring for wildlife on the coast, in particular, dotterel minders, kororā monitoring groups and pest management groups protecting ground-nesting birds.

5. Resourcing the role of a Dog Ranger at Kakamatua

We consider that there would be a huge benefit in having a dog ranger present at Kakamatua at the weekends given the huge popularity with dog owners from across the region of the off leash status of this inlet and beach.

- A dog ranger at Kakamatua would be able to engage with dog owners from all over the region delivering both education & enforcement.

6. Improve signage to clearly indicate relevant Policy and bylaw to dog owners

Clear, visible and coherent signage is essential in order to effectively communicate the relevant constraints which apply to dog owners at any particular public space whether a beach or a park.

Current signage is often poorly located and so small as to be easily missed or misunderstood by dog owners.

7. Giving effect to the desired outcomes of the Policy and bylaw

The desired outcomes from the policy and bylaw are (as stated in the council documentation) to keep dogs as a positive part of the life of Aucklanders by:

- maintaining opportunities for owners to take their dogs into public places
- adopting measures to minimise the problems caused by dogs
- protecting dogs from harm and ensuring their welfare

To achieve these outcomes Auckland Council states that it expects dog owners to:

- Register their dog(s)
- Obtain a licence to keep multiple dogs on a premise (other than working dogs
- Owners of dogs classified as dangerous or menacing must meet the expectations under the Dog Control Act 1996 (section 32 and section 33E)
- Owners classified as probationary or disqualified must meet the requirements under the Dog Control Act 1996 (section 21 and section 25)

These measures are, at best, remedial and do very little to actively promote, encourage, reward, or enable dog control beyond registration, and 'last-resort' safety measures for a dangerous dog.

We note that the 1996 Dog Control Act contains greater detail with respect to the obligations of dog owners:

Obligations of dog owners

(1) The obligations imposed on dog owners by this Act require every owner of a dog—

(a) to ensure that the dog is registered in accordance with this Act, and that all relevant territorial authorities are promptly notified of any change of address or ownership of the dog:

(b) <u>to ensure that the dog is kept under control at all times</u>

(c) to ensure that the dog receives proper care and attention and is supplied with proper and sufficient food, water and shelter:

(d) to ensure that the dog receives adequate exercise
(e) to take all reasonable steps to ensure that the dog does not cause a nuisance to any other person, whether by persistent and loud barking or howling or by any other means
(f) to take all reasonable steps to ensure that the dog does not injure, endanger, intimidate, or otherwise cause distress to any person
(g) to take all reasonable steps to ensure that the dog does not injure, endanger, or cause distress to any stock, poultry, domestic animal, or protected wildlife
(h) to take all reasonable steps to ensure that the dog does not damage or endanger any property belonging to any other person
(i) to comply with the requirements of this Act and of all regulations and bylaws made under this Act.

We think that as a bare minimum Auckland Council should draw on the information within the 1996 Dog Control Act to expand the bylaw to include the above details as to what is expected of dog owners.

Further to this we consider that the policy and bylaws should clearly define what is meant by 'keeping a dog under control at all times' beyond physical restraint through the use of a leash or equivalent, or locking the dog up.

It is evident to us that effective control of a dog relies on training of both the dog and the dog owner.

Nowhere in the policy or the bylaws is the training of dogs to respond to commands mentioned.

We consider it essential that the policy and bylaws clearly state that:

- There is an obligation on dog owners to train a dog to obey simple commands to ensure effective control of that dog before it can be allowed off-leash anywhere that it may come into contact with other people, wildlife, domestic animals or other people's property.
- The owner of any dog which causes a nuisance while off-leash in a public space, be required to: demonstrate that their dog responds to simple commands which will ensure control; face penalties if this cannot be demonstrated; be prohibited from running their dog off leash until they can meet this basic criterion; potentially be banned from keeping a dog for multiple offences.

Dog owners could be further encouraged to undertake effective training with their dogs by council offering a discounted registration fee for dogs and owners which have successfully completed a certified training programme under professional supervision.

8. Examples from other jurisdictions.

The problem of regulating dog behaviour is not unique to Auckland, or New Zealand. Other authorities do provide greater detail to assist dog owners in understanding how they can avoid potential behavioural problems.

Here is the stipulation from the government of Tasmania:
https://www.dpac.tas.gov.au/divisions/local_government/legislation/current_legislation/dog_control/dog_control_faqs

What does it mean to have a dog under effective control?
You must have control of your dog at all times. The law calls this 'effective control'.
How should I control my dog in public?
If you are on a road or footpath your dog must be on a lead that is not longer than 2 metres. Your dog must be held by someone who can keep control of the dog.
You must still have control of your dog in an off-lead area. Your dog must be close to you and in your sight at all times. **Your dog must be able to respond to your commands.**
For example if you call your dog to come back to you, it should come back. If your dog isn't good with responding to your commands then you should keep your dog on a lead.

Dogs in public places
(https://cdn.dogandcatboard.com.au/dogandcatboard/docs/Dogs/YourDogAndTheLaw21-L.pdf **)**
You are legally responsible for your dog's behaviour. In public, you must keep your dog under 'effective control' which means:

- Keeping your dog on a leash no longer than two metres or keeping your dog in sight and responsive to your commands.
- Respecting your local council's on/off leash areas.
- Not taking your dog into a school, kindergarten, childcare centre or shop without appropriate permission.
- Not letting your dog chase or harass other people, dogs, animals or birds.
- Clean up after your dog. Dog droppings can create health problems for people and dogs. The nutrients and pathogens they contain are also harmful to the environment.

We strongly suggest that Auckland Council revises the Dog Policy and Bylaws to come up to these basic standards.
The safety of people, wildlife, domestic animals and property are at stake, and also potentially the lives of dogs themselves.
Currently our dog control policy framework is deficient by missing the simple matter of owners training their dogs and having them under control at all times.
We cannot understand why Council omits this in its Policy and Bylaws framework, and believe that Council needs to take responsibility for addressing this, rather than focusing on measures that may make very little difference at all, like penalising professional dog walkers.

Proposed updates to the council's dog policy and bylaw and regional park dog access rules

Your feedback (all questions are optional)

The public feedback form was separated into four sections:

1. Walking multiple dogs
2. General policy and bylaw matters (for example clarifying existing rules and reformatting to make the documents more user-friendly)
3. Changes to dog access rules at Regional Parks
4. Changes to dog access rules at local parks and beaches.

This submission only contains submission content for sections 1-3 (regional elements).

1. Walking multiple dogs

We are proposing to set a limit on the number of dogs that a person may walk in a council-controlled public place at one time. The proposed number of dogs a person has in their possession in a council-controlled public place must not exceed the following limits:

Maximum number of dogs (both on-leash or off-leash): 6

Maximum number of on-leash dogs: 6

Maximum number of off-leash dogs: 3

1A. What do you think of this proposed change?

Do not support

1B. If you do not support the proposed change, would you support one of the alternative options presented to decision-makers in December 2024?

No change to current rules (no limit on the number of dogs and all dogs must be under control at all times)

Tell us why

see attached

Summary of Attachment:

Opposition to Dog Walking Limits:

No evidence supports restricting the number of dogs a person can walk.

Professional dog walkers often have better control than private owners.

Support for Licensing Professional Dog Walkers:

Suggests investigating a licensing system for professional dog walkers

2. General policy and bylaw matters

To improve our approach to dog management and the bylaw rules, we are proposing to reorganise, simplify and clarify the policy and bylaw content.

2A. What do you think of the following proposed changes?

Restructure the policy to more clearly show its goal, focus areas, council actions, and rules:

Tell us why

Clarify rule that all dogs classified as menacing must be to neuter:

Tell us why

Clarify who can provide behavioural assessments in relation to menacing dog classifications:

Tell us why

Clarify what areas in Auckland require a licence to keep multiple dogs on a property:

Tell us why

Clarify how dog access rules are set:
