Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Protecting birds and other specifies against introduced predators like domestic and feral cats may be humanely and effectively achieved by mandatory de-sexing. Pet owners have responsibilities as well as rights, and the commons 'trumps' individuals in this case.

Let's Protect Our Environment

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Essentially the same rationale about responsibilities accompanying rights. Plus pet owners can be reunited with their animals, should they become separated. This is the 21st Century.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Require declawing of cats.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Let’s not inadvertently introduce any more predators to vulnerable ecosystems.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Unsure of the total $ required but let’s get on with the bigger picture. Check out and learn from Aussie’s Feral Cat Eradication Programs on Offshore Islands and Hawaiin Islands Seabirds Conservation programmes.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Keep up the good work.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Have the courage of your convictions.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Makes eminent sense but desired outcomes may require positive reinforcement as much as negative enforcement (fines). I’m not sure what the former would be- offering a tool to easily remove critters from chains?

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

It's self-evident: Public agencies best address these tragedies of the commons.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

I don't see any differences in benefits between the protection and enhancement of fresh vs saltwater ecosystems.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

Don't understand enough about the practicalities of such a ban.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Of course.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Communicate your ‘wins’ in positive terms that point to benefits to all, including upcoming generations. Appeal to older people’s sense of responsibility for their grandchildren - especially those communities that do not have a strong multigenerational view of stewardship.

Let's protect our environment: early consultation #20

Let's protect our environment: early consultation #44

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats are a major threat for indigenous fauna. All domestic cats should be desexed on offshore islands. On the mainland it should be mandatory within a radius wider than 1km of a known threatened species habitat as cats can travel further than this in a night. Only exception if if the person is a registered breeder and outside of the threatened species habitat buffer. There should also be a discount for cat registration if they are desexed to further incentivise responsible cat ownership.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Fully support all cats being microchipped and registered. Microchipping should be a requirement for all kittens purchased from a breeder. The breeder can then register the kitten against the new owner, similar to how a car registration works when buying a new car.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Other

Tell us why

Support containment, this not only protects wildlife but also cats from being a nuisance to neighbours. This would be impossible to enforce across all of Auckland so a suggested compromise is that it should be a minimum that cats are contained from sunset to sunrise each day in all of Auckland outside of the islands and threatened species habitat buffers.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Other
Rakino Island	Do not support
Waiheke Island	Other

Tell us why

If an island resident lives permanently on the island then they can take their cat, if it is a holiday home then they cannot bring their cat.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

I support this as those who cannot afford it are where there will be ongoing issues.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Cat curfews between sunset and sunrise. There should also be a 3 strikes type rule were if a cat is caught outside of a person's property where they are required to keep cats contained then the owner should be fined each time at an increasing amount and on the third time the cat should either be rehomed or euthanised.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Following islands, for the next 10 years we should be focusing on peninsulas, starting with smaller ones, Whangaparaoa, Takatu, Mahurangi, Bucklands Beach, Te Atatu, Herald Island, Okahukura. We can then look to expand these inland while also starting to look at the two largest less populated peninsulas being South Head and Awhitu.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

This seems to be an expansion of check clean dry which should be rolled out.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Should contribute to controlling invasive species but the marine environment is complex and it would cost a huge amount to control these species. This should also feed into research to control these invasive species.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Lakes are key ecosystems in Auckland and we need to be protecting the ones that we have.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Best way to control invasive species is to shut down pathways for invasion.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, however this should be limited in scope to aspects we can control, e.g. creating additional species populations to safeguard the species in the region, collecting seed/cuttings from threatened plants where they are under threat of regional extinction.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Community advocacy and engagement goes a long way to getting things done. Backyard trapping, working with schools etc.

Let's protect our environment: early consultation #56

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Neighbourhood cats pooing in our vegetable garden is disgusting and a health issue. They also scare / chase birds in our property in the native plantings we have done. I don't let our pet dog roam the streets so cats shouldn't be able to either.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure

Tell us why

I don't think any cats should be allowed on off shore islands

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

I imagine it might be cheaper than dealing with all the 'down stream' issues from ferral and domestic cats on our environment.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Start to create 'cat free' rules for all new residential developments.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

This makes sense in trying to stop boats spreading pest species.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

ABSOLUTELY!! YES!!! We also need to incentivise, amplify climate change mitigation initiatives at a household and community level.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #84

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Ensuring there is good advice and guidance on approaches landowners can take to keep their cat/s within their property boundary.

Ensure SPCA are involved in messaging to ensure fair discussion of the merits/ethics of confining cats to a property, especially in an apartment context

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

With the warming climate, managing both the risks and spread of new and existing invasive pests will become a greater challenge. Starting to ended essential individual behaviors and expectations early is essential for helping manage biosecurity risk and impacts.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

It is necessary to be able to identify cats that are entering parks, etc.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

It does not seem practical to take cats on a lead like dogs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

There appears to be no justifiable reason for cats belonging to non-residents being taken to islands.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

If they can't afford it why should they have a cat which involves costs to support.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

No

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

As the countries biggest population we should set the standard.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

As likely carriers of sea bottom pests, etc. marine gear should be clean when moving location.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Invasive species do the most damage if allowed into these ecosystems.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why
If pests aren't controlled everywhere they are likely to spread from place to place.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

It would still allow non-motorised boats to provide access for those desparate for such access.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Encouragement of education and voluntary work on the protection of our natural environment should be a high priority.

Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Support

Tell us why

Cats should be kept contained throughout NZ 1km is too close. Responsible ownership can sometimes see cats escape

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

But this should be part of ownership and regulations made to support this - no ownership if your cat is not desexed

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Cat enclosures for ownership - regulatory checks like dogs

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Putting in controlled traps - I have one for rats and it is brilliant because it is free and I do not have to do anything to it

Education Education Education starting at our younger generation too

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

After watching Seasick documentary - definitely

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Absolutely and education stakeholders

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

More reforestation initiations

More education across schools and businesses

Sponsorship of certain NZ species

Cull animals like magpies who are taking over native species nests (any other animals)

Bees need some urgent protection too

The abuse of kittens in the community outweighs the benefits of having some home breeding. Provided official breeders are licensed and there is enough competition to ensure the market makes new cats affordable for those who need the comfort they provide there is no excuse to have a community over-supply of cats.

Rakino Island	Support
Waiheke Island	Other
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Other

Tell us why

Should be able to take cats for walks when tethered as we do for dogs. Free roaming cats should not be allowed. Personally I don't think free roaming dogs are acceptable either as they create more mess and are typically more aggressive.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Absolutely! There is no need to take your household pet to these beautiful natural areas. In unfamiliar areas cats can easily get lost and do a terrific amount of natural damage to wildlife.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Other

Tell us why

Maybe a one-off amnesty when the rules are first brought in. But once in place there shouldn't be any feral breeding and all cat breeders will desex cats for sale so it shouldn't be an issue. For those that can't be bothered with their community obligations - live elsewhere.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Hopefully the SPCA role can change from protecting feral cats to providing low cost desexed cats to people in need of one. They should have more capacity once the rules bite.

Personally, although a past cat lover, I am really enjoying the new birds that are being attracted by local native planting initiatives. A kaka is a new welcome resident in the area but it remains sad to see other birdlife still being caught by the few roaming cats. More publicity about the benefits would be welcome.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

The current direction is good: we probably can't currently afford additional expenditure but keep enough to maintain the current progress. Continue helping local groups like Kaipatiki Project, Restore Hibiscus etc: the leverage we get from these volunteer group is fantastic. Not only "free" labour but also helping to spread the word around the communities. It is such groups that can extend the protection areas from current predator controlled (like the end of Whangaparoa Peninsular) back up through the residential areas.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

The privilege of enjoying our marine environment has to be matched by the obligations to keep it desirable for future generations. We seem to have developed a bit of a selfish / entitled streak without understanding it is our behaviour that makes the rules necessary (ie shouldn't need draconian rules but apparently, we do...)

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

The community should at least try to control invasive species because we can't feasibly stop international shipping. However costs should be mainly shared by those that use the waterways even though it means imports will be more expensive. That is, it shouldn't be on all ratepayers. All boaties should be licensed & certified. The annual licence levy should be the main domestic funder, after all why should the marine areas be free to access and ruin?

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Other

Tell us why

Local communities and especially all users of these lakes should be the main funders. The council needs to leverage volunteers because otherwise the costs will be prohibitive, and general ratepayers shouldn't be asked to fund.

I would like to see a society where we take more personal responsibility for outcomes without unnecessary council costs. For example the costs of enforcing swimming pool fencing requirements, when really people should be responsible to manage all of life's risks, could be better spent on controlling pests that really are beyond the control of residents. Must be lots of examples!

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Again, wouldn't have been unnecessary if boaties had of been more careful. Maybe if eradicated and everyone is educated then they could be allowed again.

Just not sure if kayak and other small boat owners are not inadvertently spreading pests.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

There needs to be more published research from our universities about what could be feasible.

Ratepayers will need to see what could be done and at what cost. Picking a fight with nature isn't an obvious choice.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Reduce paper mail outs to residents and replace where possible by online invoicing and with every communication add a summary of the good works being done by the various environmental groups like Restore Hibiscus, Pest Free Kaipatiki, Kaipatiki Project. But ask those groups to supply the material. Hopefully if all residents understand what makes Auckland so liveable they'll be more supportive. Encourage even more volunteers from high rise flats in the CBD to get a life! Make enforced "community service" count - it can offer a

new path to those affected. Maybe groups like Gumboot Friday may have some ideas to make their clients more productive.

good enough for dog ownwes to contain dogs on their properties, i have no cats and by natural means flowers instead of sugar water we encouarage the bird life as a safety zone but forever chasing neighbours cats away

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

these are areas that have a nui natural wildlife and need to ensure any animals there are controlled at all times

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

if you cannot pay for the expense of having a pet , then you should not have one.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

one cat per household under new controls

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

all bush , reserves,waterways should have predator control

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

its for the benefit of all who use our moana to also protect it from pests, visible dirt, seaweed and animals that will harm the environment of our moana

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

some one needs to take charge, apportion costs of inforcement, not just boaties but all seacraft including the likes of paddle boards

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

is this not watercare's brief to look after our waterways.who checks waterways, should include pollution as well and including litter such as road cones

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

as said it prevents certain people using the lake when there are should be controls put in place. surely there are ways to disinfect boats when they come out like we were doing for kauri die back disease with our footwear

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

No. nature will claim back what is hers that us humans try to beat it at. beachfronts having retainer walls built just change tide patterns, building creates movements and runoff from building sites

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

need more help for those working to get rid of our pestweeds etc from our reserves. this should also be part of contractos brief where dealing with areas next to bush in reserve including taking litter away

Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Desexing cats not only prevents overbreeding and the spread of feral cats, but it is healthier for most pet cats, as going into heat can sometimes be dangerous for female cats.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This seems like a no-brainer, not only does it help with pest control, it allows the owners to easily locate their cats if they get lost.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Perhaps provide resources and information on how to contain cats (while ensuring mental stimulation) since they are quite independent and hard to control

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Keep up the protection of islands and peninsulas, but perhaps the focus can be shifted to protecting key areas for wildlife on the mainland of Auckland from pests. This is obviously much harder but necessary for a predator free 2050.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

I understand if the local community is against this change, but as an outsider, I still believe the protection of freshwater enviornments is more important.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, absolutely. Climate change is accelerating more than we have predicted and extreme weather events will only become more frequent and worse. Increasing resilience against these events will not only protect our land, but also our people.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Tell us why

Leave cats behind!

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

There are a number of vets who provide a free service already. Expand it with AC support and promotion.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

An obligation to contain within property boundaries protects wildlife and cats.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Support to Umbrella Environmental groups such as RHB, F & B.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

I don't know how safe or practical this requirement would be. Like to see more information on how this could be achieved particularly in small craft.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Eliminate is better but control is better than nothing.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

Not familiar with the issues.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

Again not familiar with the local issues.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Of course but financially prudent actions.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #305

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats are an invisible threat to our native species as they are left to roam and play to kill. Cat owners need to be more responsible and should really keep their cats within their own boundary

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

As in other comment

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

explained in other comment, although they not only are a threat to native biodiversity they also

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Any way to support more cats to be desexed is a good outcome

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

people need to take more responsibility for their capital. they have these boats to enjoy the sea and they need to also be responsible for its protection.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

These lakes are very important ecosystems like our individual forests and opportunities for us to restore these to provide safe maximum native habitat for our freshwater species and the native birds that feed from them

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

I do not think there is a reason for having motorised boats on the lakes. these places are tranquil offers for well being and need to be protected for our native species habitat

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, Saline inundation, erosion, pathogens and pests are all a real risk with temperature change

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #319

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats are the number one apex predator destroying at risk native birds. Also all the unwanted kittens every year that get dumped. And they breed like rabbits

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

So they can be returned safely home and can be document bad cat ownership

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Because they are destructive pooing and killing machines.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Because irresponsible owners think there be no come back on them.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

Why should the tax payer pay for irresponsible owners who shouldn't have a cat if they cant afford to look after it properly

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

To make the public more aware of the cost to themselves but to people and the environment

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

More public awareness

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

To try and stop the spread

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

If you dont who will

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Pollution and the risk of spreading invasive weeds etc.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Think more urgent things should take priority. But climate change seems to win brownie points

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

More policing and consequences to repeat offenders

Let's protect our environment: early consultation #332

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Far too many strays/rejected cats being released in to the wild. Far easier to control feral cats, and reduce predation on indigenous biodiveristy

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats that are microchipped are far easier to return home to owners; monitoring of movement of cats that are not kept at home.

With potential fines for [continued] non-compliance.

Cost of microchipping may help reduce the number of cats

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Too many stray and wild cats. Cats are considered to be companion animals, not much of a companion if it's out 70% of the time.

Too much indigenous biodiversity being predated.

Much easier to manage feral cats if companion animals are kept indoors, with significant decrease in companion cats potentially being subject to bi-kill.

As previous comment, microchipping would be used to return those animals that are caught, with potential fines for continued non-compliance.

Cost of a catio/cat-proofing fence may help reduce the number of cats overall

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

I agree, as long as the same conditions, as previous comments apply (keep cats indoors, microchipping etc.)

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Council should help with the cost of microchipping for cats for those that cannot afford it.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Increased monitoring and compliance for covenant owners - they have obligations and most covenants are generally poorly managed and have low compliance rates.

Ensure those that have made $$$ from subdivision, and those that have bought into the responsibility, to keep those areas pest free.

That said, if there are regional priorities, for some species, then Council support might be appropriate, but landowners must grant access to contractors.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Noting the previous comment about covenant owners. That said, if there are regional priorities, for some species, then Council support might be appropriate.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

It's not just about freshwater clams; threatened avifauna use this lake too; just keep the boats away

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

I would support this measure for the whole of Auckand (and for the whole country), not just the locations listed. Feral cats can breed prolifically, increasing the pressure on vulnerable native wildlife. It is important to prevent domestic cats from adding to this pressure.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

I would support this measure, again for the whole of Auckland. It would enable lost cats to be returned to their owners, which would benefit both parties. It would help in identifying owners who are not keeping their cats under control.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Again, I would support this measure throughout the region. Cats do not suffer if they are not allowed to wander (especially if they have been desexed), they are safer on their owner's property and any wildlife outside that property is safe from them – everybody wins.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

I agree with this proposal for all the listed islands, indeed for any offshore island where people live. There have been incidents of cats falling overboard from boats and swimming to islands where their only food source is the resident wildlife. Months can pass before this is discovered (for instance in the Bay of Islands a few years ago), during which time a great deal of damage can be done. People working to make or keep islands free of invading pests should not have their efforts compromised by cats being brought in from elsewhere.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

I would support this measure. It needs to be made as easy as possible for people to abide by these rules, otherwise they are more likely to break them. I would extend financial support to other necessary measures, like registration and making property boundaries cat proof. I know council has limited funds, but I would willingly pay higher rates to cover effective cat management and other measures to protect the environment.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I think the practical measures are more or less covered by the proposals above.

I think the council is taking the right approach in addressing cat management, because feral cats are a major predator of wildlife alongside rats, stoats and possums. Bringing domestic/pet cats under control would enable the feral cat problem to be addressed. Cats were left out of the picture in 2016, when the predator-free initiative was announced, perhaps because they were too sensitive a subject, but cat management is now a matter of public debate and there may be more support for it, especially given the argument that it is much safer for the cats as well as the wildlife.

There are other invasive species that need attention – other mustelids, besides stoats. The point about eradicating alien predators is that it cannot be done piecemeal. If rats are removed without tackling the feral cat problem, those cats will eat more birds and reptiles, including native species.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

We need to spread effective pest control measures throughout the region. Pest monitoring and control on the islands and peninsulas need to be maintained to ensure pest numbers stay as low as possible. Meanwhile, entry points to the peninsulas need to be guarded by effective pest control.

Of course, the logical step is to spread intensive pest control from these sites to the surrounding areas. But it might be more effective to have pockets of intensive pest control throughout the region, centred on suburban bush areas and urban parks, some of which may already have community groups actively involved in protecting them. I think people are more likely to practise and support pest control if they can see its effects in their immediate area, and a scattered approach will reach more areas more quickly than trying to move outwards from existing pest-controlled sites. Council's role should be to encourage and support local groups in these efforts with practical help and advice and financial support, and leadership where necessary.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

I would support such a rule. Tikapa Moana / The Hauraki Gulf is in a bad state as a result of marine pests and overfishing. Measures like this are common sense, but probably need to be mandatory because people will not follow them otherwise. I would support this measure whether or not it is an effective way to control Caulerpa, because it would restrict the spread of other pests.

Is it known for certain that Caulerpa is spread mainly through marine traffic? Is it not possible / likely that it is spread through currents? If so, I don't know what would be an effective means of control.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

I think this needs to be done at council level because central government is not only failing to do it, but introducing measures that are counterproductive (such as allowing some commercial fishing in high protection areas). It makes sense to protect the areas of highest value first, but it should be a first step towards more extensive protection within the Gulf. The aim should be to reverse the damage done in recent decades and make the whole of the Gulf an area of high ecological value.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Of course, I would support such an initiative. There is no reason to stop at two lakes, even if they are the most ecologically important and/or the most threatened. All our freshwater bodies have the potential to become high-quality habitat for native species if the damage done over many years can be reversed. I understand that council has to do what is practical and feasible, but we should aspire to more than that.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, absolutely. We have been told many times over several decades that climate change is the most serious threat to life on Earth and a global effort is required to avoid its most damaging consequences. Despite this, international efforts have been unable to hold off the juggernaut of political and commercial interests that continue to exacerbate the damage, while leadership at the national level oscillates between well-intentioned but ineffective and downright counterproductive, depending on who holds power.

In this context, local councils need to grasp this issue and show strong leadership by encouraging and enabling local communities to care for the natural environment, as well as making a direct contribution themselves.

In referring to 'increased climate change resistance', we are not talking so much about pest control and biodiversity conservation (though it will include some such measures), but things like emissions reduction, increasing the popularity (and provision) of public transport and ensuring that it meets the highest environmental standards, reducing the need to travel, encouraging wider use of electric vehicles, creating more local forests, etc. If local councils took the lead on increasing climate change resilience, and remained steadfast in their efforts, our environment would be less vulnerable to the whims of national governments and damaging international influences.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I would just like to stress the point I alluded to in my answer to question 5. It is not just a matter of building climate change resilience. We also need political resilience. National governments are too fleeting to have a meaningful impact on environmental protection – even if they introduce the right measures, the chances are the next government will repeal them. International measures can be admirable (such as the process that has flowed from the Paris Agreement), but the number and nature of vested interests that get in the way of implementing them acts against their effectiveness.

Local authorities and communities, including, in Aotearoa's case, mana whenua, are more stable and more closely connected to their natural environments. This is where the main thrust of environmental protection needs to be – acting locally (while thinking globally) has never been more urgent. Councils can and must be a part of this effort, and do everything within their power to encourage, lead and support it.

Ideally they would be cat free, pet or otherwise.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

If needed absolutely, takes away a convenient excuse and benefits everyone.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Cats are just a domesticated pest and their impact on the native environment must be minimised. I'd support cat free zones close to native parks which will allow a offensive cat control measures (trapping / eradication). Providing suitable notice period (no new registered cats to the area) then after a certain period start trapping. Especially for cats off owners property

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Take it to the next level and target key areas on the mainland.

3. Protecting our moana from Caulerpa seaweed and other marine pests

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Common sense and well communicated steps to pest control, with appropriate time opportunity (ie in 3 years this will happen, then 6 years this) for residence must be undertaken to ensure the outcomes are achieved while ensuring residence support it/are onboard.

As above cats on a harness under control of their owner or trusted friend could enjoy a variety of different environments and they would need to to be crated to attend the vets offices.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure

Waiheke Island Unsure

Tell us why

Difficult to say that if you are living in one place and want to move your family pet to another area why can’t you take your pet - providing the environment was made safe for the cat and the wildlife is protected. Free ranging cats should be restricted.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

This action would ensure more cats were desexed

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

At the moment it seems like it is an impossible dream but the majority of domestic cat owners do act in a responsible manner re desexing. Stopping their cats from wandering and killing bird life and other small animals and insects is another story.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Awareness of rats, mice and various insects, and people making it into various areas is very difficult. $

Without a full quarantine process for all people, boats and aircraft moving on and off the islands.

The â€œhands off approachâ€™ is not working and the cost of installing a fully policed protection policy would be prohibitive.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It would help create a barrier and increase the resistance to the spreading of spores etc.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

These invasions are hard to stop as the movement of tides and currents are not able to be regulated.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

Again there are issues concerning how this control can happen - all reasonable measures should be undertaken bout how can we legislate or monitor all potential issues e.g. wind born spores

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

Again very difficult as recreational activities are much enjoyed and claimed as a right. Where has this invasive pest come from? Is it climate change that is part of this chain of events? I am not a boat owner and if I do travel on the water it is via commercial vessels. However I am

a car owner who walks their dog and I am constantly amazed at the number of parked cars in my area that are unregistered and unwarranted, my point being that whatever processes are put in place, resourcing (money, legislation and monitoring people will be required to be undertaken).

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes however it will be difficult to ring fence all the areas that will be affected by rises in water temperature, lowering or rising of water levels, the ability to store water fro droughts, the ability to catch water and store so that massive flooding is avoided etc.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

It is very important we protect our native species - we are blessed with so many distinct insects and birds.

Priority must be given to protecting the native flora and fauna before more species are killed off.

However budgets are finite and I am assuming there is no new funding available to kick start this new project. Decisions and consensus will need to be carefully incorporated into the next 2 years and 5 years plan to ensure that this process becomes a reality.

Each cat must have its owner who will responsible for the expenses.Cats without problems are controlled cats,other than that it is better not to existe on the islands.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Help those who need financial support to adapt to new standards to maintain the total balance of the species.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Yes. Cats should be treated like dogs,be closed place with their owner and when leaving the house wear a collar with a chip,if they can be located.There is no way to predict a cats reaction,it is necessary to keep it under surveillance and not let it go loose,disturbing the neighbors by acting as as bathroom in the backyard and killing the birds.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Thogher rules with people and channels on post and stores through which we can report illegal practices.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Every type of hygiene avoids future problems.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

The greatest wealth of people is their habitat with the presevation of species.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Encourage scientific research within universities with annual programs and international conferences on the subject and thus exchange ideas and suggestions for the balance of nature with awards.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Limit the places for this type of vessel and a solution.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Prioritizing everything that invloves climate change is to protect the population and avoid the destruction of cities.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Establish strict rules and train the enviromental police to circulate in the reserves and teach everyone how protect nature, as well as instructions for all companies that invlove cutting trees, duilding houses and gardens, landscape, as well veterinarians.

Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

As a past cat owner I became really concerned when our cats brought home baby birds that they had killed and proudly showed them to us. It really hurt to see this, particularly when we had been feeding the adult birds.

On the Waiheke peninsula where we lived at the time there were feral cats and we were really concerned that they would spread the population. We decided that the our cats died we would never replace them eve though we really loved them.

Now we live at Gulf Harbour and are feeding Tui, Waxeyes, Fantails, Blackbirds and thrushes and we are really wary of cats attacking our beloved birds at the numerous feeding stations we have set up in our garden.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

All of Auckland Support

Tell us why

I have a catch-em-alive trap that I would love to set in our garden because I have spotted the odd cat. However, I would find it difficult to despatch any that I caught, mainly because I used to be a cat lover. It means I would have to take it to a vet and that is costly for a superannuitant. I would prefer to call the owner and get them to deal with it if it has a collar with their contact details.

1C. All domestic/pet cats must be contained to their owner's property

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Support

Tell us why

I don't want to have to deal with other people's problems

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Cats shouldn't be allowed to be transported to offshore islands, particularly when most of them have bird sanctuaries

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

The ratepayers will end up wearing the cost. If a cat owner can't afford desex costs the they should nit own a cat.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Desexing them will eventually mean that there will be no cats in the future. However, many if the native bird kills are due to dogs that have been allowed to roam. So why aren't dog owners being targeted and treated the same as cat owners?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I wish you would stick to English when writing these questions. Our city is called AUCKLAND.

One of the joys of living at Gulf Harbour and having some bush areas on our property is the opportunity to attract bird life to our garden. We have built a number of bird feeders and water features that attract mainly native birds and we love watching them, particularly just after the breeding season is finished.

The Tui and waxeyes, as well as the ducks and swans, love water so Council's protection and maintenance of waterways is really important. The Sports Oval and Coastal ponds at Gulf Harbour were supposed to be maintained by Gulf Harbour Country Club but the new owner has reneged on his responsibilities there and those waterways are degenerating. Those ponds and the Regency Lake are home to ducks and swans and it wonderful to see the baby birds grow from infancy to adulthood (when the vicious pukeko don't kill them first).

Council needs to be committed to making sure that waterways like ours at Gulf Harbour are properly maintained. Forest & Bird are setting traps to eradicate rats and possums and I have managed to eradicate those critters on my property. But Council needs to be committed to a predetermined trapping and poisoning regime.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Responsible boat owners won't have a problem. However there will always be miscreants who don't give a toss. Bev prepared to ensure there is a process in place to police this rule.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

If Council doesn't do this who will?

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region’s lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Local residents around the lakes need to be involved because Council can't do it on its own and hasn't got the funding for that. There needs to be a lot more effort put into working with local communities through the various wards.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

Don't know enough about the lake

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

No, climate change adaptation is worth considering but there is too much emphasis on climate change without the input from scientists - lay people are having too much influence.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Stop planting pine trees. They ruin the soil and spoil the natural look of the environment, They're really hard to get rid of and spread like wildfire. Just look at the damage that wilding pines are doing in the South Island. Auckland doesn't need or want that problem.

Let's protect our environment: early consultation #929

Tell us why

holiday makers do not keep their cats under control, they may well roam

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

necessary to make the programme actually work

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Keep up the responsible pet ownership scheme, ensure community groups are supported to manage stray/ feral cat populations

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Keep funding community groups who do a great job carrying out pest control in the most effective way possible. Community groups have better relationships with local people than the council and more likely to get results with pest control.

Keep funding the regional park sanctuaries that inspire visitors to protect their own backyards

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Got to protect the little we have left in the Auckland area

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes people need to understand the importance of climate resilience and benefit form Council action. Great education work going on for children in this space

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #956

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Unsure

Tell us why

Very difficult to achieve, hence management must be put in place.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Unsure

Tell us why

Why do we need cats in these places??

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Get it done - reduce number of cat births over time. Probably cheaper than trapping / killing them?

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Owners must be responsible for their animals. No different to what dog owners have to do.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Bylaws and enforcement of those to achieve the goal. Hold people accountable.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

The consequences are too great to not have individuals take responsibility.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Is this a Council function? Probably not. More a national one.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Organise volunteers to help with this. There are many interested individuals who will help out if provided with training, tolls and some co-ordination.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

Not something I fully understand

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

No

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

More education as to what plants are considered a pest and how individuals can safely remove them.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

People allow their cats to run free, so the risk of developing feral cat populations is much higher than for pets like dogs. Uncontrolled wild cat populations threaten our native animals and feral cats do not live happy, comfortable lives.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

If a domestic cat is found in a sensitive/protected area, it must be chipped for return to owners. If cats in protected areas are not chipped they must go to shelters or be destroyed.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Domestic house cats who live inside live much longer than 'outside' cats. In addition, cats are one of the biggest threats to our native birds, which should be our top priority always.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure

Waiheke Island Unsure

Tell us why

I’m not so sure that cats should be allowed to be brought to offshore islands at all, unless owners commit to keeping their cats indoors/strictly under control. They can prove it with property inspections like with having a pool. The genie is out of the bottle on the mainland so to speak, but we can still protect the wildlife on the islands.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

All cats must be desexed and as a taxpayer Iâ€™d be happy for Auckland to help out

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

We should gradually be moving towards keeping all cats contained as dogs are. Owners should be strongly encouraged to keep their cats at home. Uncontrolled cats, feral and domestic, are pests and must be managed.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Letâ€™s continue making all of our islands pest free!

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1031

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

On many islands, bird safety is threatened by cats, making it necessary to implement strict control measures on cat numbers. However, citywide control would consume excessive resources, increasing the financial burden on taxpayers, and would be unfair to those who do not own cats.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats have extensive roaming ranges, high mobility, and rapid reproduction rates, making it difficult to track their identities. Implementing microchipping is both challenging and inefficient.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Roaming and social interaction with other cats are essential aspects of feline behavior and natural instincts. Restricting cats solely to indoor environments may not align with their inherent behavioral needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Implementing manageable control measures is essential to help reduce the environmental impact of cats.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should bear the responsibility for caring for their cats without relying on subsidies from taxes paid by residents who do not own cats.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Communities should actively promote educational programs starting from a young generation.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support creating mammal-free conservation zones on uninhabited islands. For inhabited islands, measures should be taken to control the pathways through which invasive predators are introduced.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Measures should be taken to isolate ecological invasions to prevent further spread of these harmful impacts.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Management approaches that work for land environments cannot be automatically transferred to marine systems, as these ecosystems have distinct characteristics. Any ocean management strategies should be developed with input from marine ecology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling harmful invasive species is essential, but it is important to minimize the impact on residents' recreational areas during the management process. Funding for pest control should not be prioritized over more pressing issues, such as wastewater treatment and other environmental concerns.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1034

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

While protecting bird populations through cat management is essential in island ecosystems, expanding such controls across an entire city would require considerable public funding. This would not only strain municipal resources but also raise questions of fairness, as all taxpayers, including those without pets, would bear the financial burden.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats have large roaming areas, high mobility, and reproduce quickly, making it difficult to track their identity. Microchipping them is challenging and inefficient.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Roaming and social interaction with other cats are essential aspects of feline behavior and natural instincts. Restricting cats solely to indoor environments may not align with their inherent behavioral needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support

Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, This approach would also help protect cats by ensuring better oversight and care.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

The financial responsibilities of cat ownership should rest with pet owners themselves, rather than drawing from public funds contributed by the broader taxpayer base, including those who don't have cats.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Communities can take on the role of organizing educational workshops and lectures.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support creating mammal-free conservation zones on uninhabited islands. For inhabited islands, measures should be taken to control the pathways through which invasive predators are introduced.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Implementing containment strategies is essential to limit the expansion of ecological disruptions and minimize their continued environmental effects.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling invasive species is necessary, but efforts should be made to minimize the impact on recreational waters used by the public.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1035

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Tell us why

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Domestic cats need to roam and socialize with other cats.Keeping them confined indoors goes against their natural instincts.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Implementing manageable control measures is essential to help reduce the environmental impact of cats.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

This issue goes beyond just financial responsibility; some irresponsible cat owners may come up with various excuses to avoid fulfilling their obligations, and the government often struggles to address this problem.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

The city government has many projects that require funding more urgently than this one.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free environmental sanctuaries on uninhabited islands.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Measures should be taken to isolate ecological invasions to prevent further spread of these harmful impacts.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary, and it is important to establish a budget for pest management that does not affect the funding for other urgent environmental management projects.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Considering the high costs of establishing and maintaining clean facilities, implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1043

Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats have a high reproductive capacity and a wide range of movement, so microchipping them would facilitate identification and management efforts.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Domestic cats need to roam and socialize with other cats, as it is part of their nature. Keeping them confined indoors is not a suitable approach.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats are familiar with the local environment, and with the care of their owners, this will help reduce the damage cats may cause to the ecosystem.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should take on the responsibility of caring for their pets, including the costs associated with keeping cats in Auckland.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term improvement effort that requires early education to be effective.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation areas on uninhabited islands.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Measures should be taken to isolate ecological invasions to prevent further spread of these harmful impacts.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary, and it is hoped that the budget for pest management will not adversely affect the funding for other essential management projects.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

Waiheke Island	Support

Tell us why

Reduce the damage cats may cause to the surrounding environment,control the number of cats.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Since cat owners choose to have cats, they should be prepared to cover the associated costs. The government should establish regulations for cat owners on pet management and related responsibilities.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation areas on uninhabited islands.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Auckland faces significant challenges, including wastewater discharge management and residue processing, both of which require effective solutions. Addressing these issues is essential for environmental sustainability and public health in the city.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Considering the need to establish and maintain clean facilities, it would be practical to restrict recreational motorboats from entering lakes. These boats can potentially introduce invasive species, so implementing a ban on their entry could be an effective preventive measure.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats have a natural instinct to hunt birds, making it necessary to control cat ownership to protect bird populations. Given Auckland's large area, high population, and many households, offering unrestricted support for cat ownership could place financial pressure on the government and taxpayers, which would be unfair to households without cats.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Implementing citywide microchipping for cats is a challenging task that is costly and yields low effectiveness.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Exploring their environment, engaging in natural hunting behaviors, and socializing with other cats are fundamental aspects of feline nature. Restricting cats to indoor-only environments may not align with these inherent behavioral needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support

Rakino Island	Support
Waiheke Island	Support

Tell us why

Domestic cats need to roam and socialize with other cats, as it is part of their nature. Keeping them confined indoors is not a suitable approach.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term improvement effort that should start with educating young people about the relationship between cats and other wildlife. More of this work should be carried out through community initiatives. While the city government has many projects, this one particularly requires funding support.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation areas on uninhabited islands.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It's essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Given the distinct characteristics of land and ocean environments, management approaches that work for terrestrial ecosystems should not be automatically transferred to marine settings without input from marine ecology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary, and it is hoped that the budget for pest management will not adversely affect the funding for other essential management projects.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

On islands and in certain areas, it is necessary to control the cat population, as cats can harm bird species. Auckland, being the largest city, has an uncertain number of cat owners, and if there are too many, it could place a financial burden on the government.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats are highly mobile, with wide roaming areas, making it challenging and unsanitary to capture a stray cat and identify its owner. Cats reproduce quickly, so implementing microchipping citywide would be extremely difficult, costly, and a waste of resources.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Cats are highly mobile, so keeping them confined indoors is not ideal.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Support

Tell us why

Island residents' domestic cats are familiar with the local environment, and with the care of their owners, this will help reduce the damage cats may cause to the ecosystem.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If you decide to have a cat, you should take responsibility for it. You should understand the costs of owning a cat from the beginning. Since you enjoy the joy that a cat brings, it’s only fair that you bear the cost of its care. It would be unfair to use public funds from residents who don’t own cats to cover these expenses.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term effort that requires everyone’s participation.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents. Measures could include modifying packaging, transportation, and inspection methods to block these introductions effectively.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

The distinct characteristics of land and ocean environments require different management approaches. Strategies effective for terrestrial ecosystems should be adapted for marine settings with guidance from marine ecology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region’s lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Implementing a ban on boat access is a more feasible method for protecting the lakes.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1071

Tell us why

Keeping cats confined indoors goes against their natural instincts.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats are familiar with the local environment, and with the care of their owners, this will help reduce the damage cats may cause to the ecosystem.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should cover all expenses related to pet ownership

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

The city government has many projects that require funding more urgently than this one.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation areas on uninhabited islands.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of invasive species risks, combined with swift containment actions, is crucial for minimizing their potential impact on ecosystem health.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

It's essential to consult and consider the advice of experts. Their guidance can ensure that strategies are effective, scientifically sound, and tailored to address the complexities of ecological challenges.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Implementing a ban on boat access is a more feasible method for protecting the lakes.

Tell us why

In some areas, households with many cats pose a serious threat to bird populations. Therefore, it is essential for the government to control the number of cats. Unified regulations by the municipal government can effectively address this issue. Additionally, the large size of Auckland's urban area means that managing a large number of cats would inevitably increase municipal expenses, thereby placing a greater financial burden on taxpayers.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling invasive species is crucial, particularly in popular recreational areas for Auckland residents. Efforts should aim to minimize disruption to public enjoyment while addressing the serious threat that invasive species pose to the region's delicate ecosystems and native wildlife. The unchecked spread of non-native species can disrupt biodiversity and degrade natural habitats, endangering our environmental heritage. Immediate action is essential to protect and preserve our ecosystems for future generations.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Implementing a ban on boat access is a more feasible method for protecting the lakes.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Tell us why

Keeping pets at home not only follows regulations but also provides peace of mind, ensuring they're safe and secure.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

The government should establish regulations for cat owners on pet management and related responsibilities.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it's essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of invasive species risks, combined with timely intervention strategies, is crucial for containing their spread and minimizing environmental impacts.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

I am not familiar with the relevant industries and information, and I am uncertain about the pros and cons.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

The government should strengthen the management and treatment of waste and sewage.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

The most direct and effective way to protect Tomorata is to prohibit the entry of contaminants.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1081

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats can cause serious harm to bird populations and may carry viruses.Cats on the island should be spayed or neutered.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats are highly mobile, with wide roaming areas, making it challenging and unsanitary to capture a stray cat and identify its owner. Cats reproduce quickly, so implementing microchipping citywide would be extremely difficult, costly, and a waste of resources.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Exploring their environment, engaging in natural hunting behaviors, and socializing with other cats are fundamental aspects of feline nature. Restricting cats to indoor-only environments may not adequately support these innate behavioral needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Support

Tell us why

Keeping pets at home not only follows regulations but also provides peace of mind, ensuring they’re safe and secure.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

The city government has many projects that require funding more urgently than this one.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of invasive species risks, combined with timely intervention strategies, is crucial for containing their spread and minimizing environmental impacts.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

I am not familiar with the relevant industries and information, and I am uncertain about the pros and cons.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling invasive species is crucial, particularly in popular recreational areas for Auckland residents. Efforts should aim to minimize disruption to public enjoyment while addressing the serious threat that invasive species pose to the region's delicate ecosystems and native wildlife. The unchecked spread of non-native species can disrupt biodiversity and degrade natural habitats, endangering our environmental heritage. Immediate action is essential to protect and preserve our ecosystems for future generations.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

The most direct and effective way to protect Tomorata is to prohibit the entry of contaminants.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1082

All of Auckland	Do not support

Tell us why

Exploring their environment, engaging in natural hunting behaviors, and socializing with other cats are fundamental aspects of feline nature. Restricting cats to indoor-only environments may not adequately accommodate these essential instinctual needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Whoever owns a pet should take full responsibility;Cat owners should cover all expenses related to pet ownership

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Reducing the number of pet cats or opting not to have them at all could help minimize their impact on local wildlife and reduce environmental strain.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling invasive species is essential, especially in areas where Auckland residents go for leisure. It's important to minimize the impact of these efforts on public enjoyment while also addressing the significant threat that invasive species pose to the region's delicate ecosystems and native species. The unchecked spread and reproduction of non-native organisms can severely harm local habitats, disrupting biodiversity and damaging our natural heritage. Taking action now is vital to protect and preserve our environment for future generations.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1083

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats are highly mobile and roam widely, so microchipping can make locating them more manageable.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Cats need to roam, hunt for mice, and play with companions—these are part of their nature. Keeping them confined indoors is not an appropriate approach.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

It is necessary to control the number of cats, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Since internships are often essential, it's important for the government to provide financial support to families in need. Ensuring access to such assistance would make policy implementation fairer and more inclusive.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

I am not familiar with the relevant industries and information, and I am uncertain about the pros and cons.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

The most direct and effective way to protect Tomorata is to prohibit the entry of contaminants.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Waiheke Island Support

Tell us why

It is necessary to control the number of cats, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Whoever owns a pet should take full responsibility; if unable to care for it, one should not adopt.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

The government should establish regulations for cat owners on pet management and related responsibilities.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Adapt conservation efforts to local conditions by establishing protected areas for wildlife and plant life.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of invasive species risks, combined with swift containment strategies, is crucial for minimizing their potential impact on ecosystem health.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

The distinct characteristics of land and ocean environments require different management approaches. Strategies effective for terrestrial ecosystems should not be automatically applied to marine areas without guidance from marine ecology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats have large roaming areas, high mobility, and reproduce quickly

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Domestic cats need to roam and socialize with other cats, as it is part of their nature. Keeping them confined indoors is not a suitable approach.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

It is necessary to control the number of cats, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Reducing the number of pet cats or opting not to have them at all could help minimize their impact on local wildlife and reduce environmental strain.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Given the distinct characteristics of land and ocean environments, management approaches that work for terrestrial ecosystems should not be automatically applied to marine areas without input from marine ecology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling invasive species is essential

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1091

Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should take full responsibility

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Reducing the number of pet cats or opting not to have them at all could help minimize their impact on local wildlife and reduce environmental strain.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of invasive species risks, combined with swift containment strategies, is crucial for minimizing their potential impact on ecosystem health.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

While cat population control is essential in specific regions, particularly islands, where birds are vulnerable to predation, implementing similar measures in a metropolis like Auckland presents unique challenges. The city's scale and undefined number of cat owners means that comprehensive regulation could impose significant costs on municipal resources.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats are highly mobile, with extensive roaming areas, making it difficult and potentially unsanitary to capture strays and verify ownership. Their rapid reproduction also means that implementing citywide microchipping would be extremely challenging, costly, and an inefficient use of resources.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Cats are highly mobile, so keeping them confined indoors is not ideal.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support

Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Reducing the number of pet cats or opting not to have them at all could help minimize their impact on local wildlife and reduce environmental strain.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of invasive species risks, combined with swift containment strategies, is crucial for minimizing their potential impact on ecosystem health.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling invasive species is crucial, particularly in popular recreational areas for Auckland residents. Efforts should aim to minimize disruption to public enjoyment while addressing the serious threat that invasive species pose to the region's delicate ecosystems and native wildlife. The unchecked spread of non-native species can disrupt biodiversity and degrade natural habitats, endangering our environmental heritage. Immediate action is essential to protect and preserve our ecosystems for future generations.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term improvement effort that should start with educating young people about the relationship between cats and other wildlife. More of this work should be carried out through community initiatives. While the city government has many projects, this one particularly requires funding support.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

It’s essential to consult and consider the advice of experts.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region’s lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Whoever owns a pet should take full responsibility; if unable to care for it, one should not adopt.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

The government should establish regulations for cat owners on pet management and related responsibilities.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Adapt conservation efforts to local conditions by establishing protected areas for wildlife and plant life.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Given the distinct characteristics of land and ocean environments, management approaches that work for terrestrial systems should not be automatically transferred to marine settings without input from marine ecology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Do not support

Tell us why

Cat owners should unconditionally bear all the burdens of cat ownership, and all costs and responsibilities should be resolved by themselves.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Cat owners should take responsibility for managing their cats. Improving these issues is a long-term task that requires discussion and management by experts and the government regarding the relationship between cats and other wildlife.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Adapt conservation efforts to local conditions by establishing protected areas for wildlife and plant life.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Given the distinct characteristics of land and ocean environments, management approaches that work for terrestrial systems should not be automatically transferred to marine settings without input from marine ecology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling invasive species is essential, especially in areas where Auckland residents go for leisure. It's important to minimize the impact of these efforts on public enjoyment while also addressing the significant threat that invasive species pose to the region's delicate ecosystems and native species. The unchecked spread and reproduction of non-native organisms can severely harm local habitats, disrupting biodiversity and damaging our natural heritage. Taking action now is vital to protect and preserve our environment for future generations.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1100

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats can cause serious harm to bird populations and may carry viruses. Strict management and control are necessary

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats roam widely and are highly mobile, making it both challenging and unsanitary to capture strays and identify their owners. Due to their fast reproduction, a citywide microchipping program would be complex, expensive, and an inefficient use of resources.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Cats are highly mobile, so keeping them confined indoors is not ideal.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

The costs associated with cat ownership should be the responsibility of pet owners themselves, as it raises questions of equity to use general tax revenue to support individual pet care expenses.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Reducing the number of pet cats or opting not to have them at all could help minimize their impact on local wildlife and reduce environmental strain.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of invasive species risks, combined with swift containment strategies, is crucial for minimizing their potential impact on ecosystem health.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is essential; however, these areas are also popular holiday spots for residents, so minimizing any impact on recreational use is important. Auckland also faces pressing environmental challenges, including the urgent need to manage wastewater treatment residue disposal. It is hoped that funding for pest control will not compromise resources for other critical environmental projects that require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1101

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

While cat population control is essential in specific regions, particularly islands, where birds are vulnerable to predation, implementing similar measures in a metropolis like Auckland presents unique challenges. The city's scale and undefined number of cat owners means that comprehensive regulation could impose significant costs on municipal resources.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

The free-roaming nature of cats and their large territories make it logistically complex to safely contain and scan strays for owner identification. Given cats' rapid breeding cycles, a city-wide microchipping program would face significant practical and financial hurdles that may outweigh its potential benefits.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Exploring their environment, engaging in natural hunting behaviors, and socializing with other cats are fundamental aspects of feline nature. Restricting cats to indoor-only environments may not adequately support these innate behavioral needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term effort that ,The city government has many projects that require funding more urgently than this one.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Adapt conservation efforts to local conditions by establishing protected areas for wildlife and plant life.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of invasive species risks, combined with swift containment strategies, is crucial for minimizing their potential impact on ecosystem health.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

Tell us why

This can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term effort that ,The city government has many projects that require funding more urgently than this one.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Removing pests and contaminants is crucial for protecting the ocean and preventing the disruption of marine ecological balance.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

I am not familiar with the relevant industries and information, and I am uncertain about the pros and cons.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling invasive species is essential, especially in areas where Auckland residents go for leisure. It's important to minimize the impact of these efforts on public enjoyment while also addressing the significant threat that invasive species pose to the region's delicate ecosystems and native species. The unchecked spread and reproduction of non-native organisms can severely harm local habitats, disrupting biodiversity and damaging our natural heritage. Taking action now is vital to protect and preserve our environment for future generations.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

The costs associated with cat ownership should be the responsibility of pet owners themselves, as it raises questions of equity to use general tax revenue to support individual pet care expenses.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Reducing the number of pet cats or opting not to have them at all could help minimize their impact on local wildlife and reduce environmental strain.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Identify the entry pathways for mammals and rats and implement measures to control their access.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of invasive species risks, combined with swift containment strategies, is crucial for minimizing environmental impact and protecting ecosystem health.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

The distinct characteristics of land and ocean environments require different management approaches. Strategies effective for terrestrial ecosystems should not be transferred to marine settings without proper consultation with marine ecology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1109

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats can cause serious harm to bird populations and may carry viruses. Strict management and control are necessary

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Given cats' extensive roaming behaviors and large territories, tracking and catching stray cats to check for owner identification poses significant practical challenges. Additionally, cats' rapid breeding cycles would make it difficult to achieve comprehensive microchipping coverage across the city, raising concerns about both implementation feasibility and cost-effectiveness.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Exploring their environment, engaging in natural hunting behaviors, and socializing with other cats are fundamental aspects of feline nature. Restricting cats solely to indoor spaces may not align with these inherent behavioral needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support

Rakino Island	Support
Waiheke Island	Support

Tell us why

This can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

The costs associated with cat ownership should be the responsibility of pet owners themselves, as it raises questions of equity to use general tax revenue to support individual pet care expenses.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Reducing the number of pet cats or opting not to have them at all could help minimize their impact on local wildlife and reduce environmental strain.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

It's essential to strengthen inspections before entering islands, as this is crucial. Strict enforcement is necessary.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Eliminating pests and contaminants is a necessary measure for protecting the ocean and preventing the disruption of its ecological balance.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

I am not familiar with the relevant industries and information, and I am uncertain about the pros and cons.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1110

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Unsure

Tell us why

The scope is too broad and not applicable; it should only be implemented around the habitats of threatened species.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats are highly mobile, with wide roaming areas,microchipping makes locating easier

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Other
Kawau Island	Other
Rakino Island	Other
Waiheke Island	Other
Within 1km of known threatened species habitat (see map 1)	Other
All of Auckland	Do not support

Tell us why

Cats are highly mobile, so keeping them confined indoors is not ideal.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Identify the entry pathways for mammals and rats and implement measures to control their access.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of potential invasive threats, combined with swift preventive actions, is crucial for containing spread and minimizing environmental impact.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling invasive species is essential, especially in areas where Auckland residents go for leisure. It's important to minimize the impact of these efforts on public enjoyment while also addressing the significant threat that invasive species pose to the region's delicate ecosystems and native species. The unchecked spread and reproduction of non-native organisms can severely harm local habitats, disrupting biodiversity and damaging our natural heritage. Taking action now is vital to protect and preserve our environment for future generations.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

The most direct and effective way to protect Tomorata is to prohibit boats from entering.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1111

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

On islands and in certain areas, it is necessary to control the cat population, as cats can harm bird species. Auckland, being the largest city, has an uncertain number of cat owners, and if there are too many, it could place a financial burden on the government.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Due to cats' natural roaming behaviors and expansive territories, implementing a system to safely intercept and scan stray cats for ownership presents considerable operational challenges. The rapid reproduction rate of cats further complicates matters, as a mandatory microchipping initiative across the city would require substantial resources while potentially yielding limited returns.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should take on the responsibility of caring for their pets, including the costs associated with keeping cats in Auckland. This issue goes beyond just financial responsibility; some irresponsible cat owners may come up with various excuses to avoid fulfilling their obligations, and the government often struggles to address this problem.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Adapt conservation efforts to local conditions by establishing protected areas for wildlife and plant life.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

The distinct characteristics of land and ocean environments require different management approaches. Strategies effective for terrestrial ecosystems should not be transferred to marine settings without proper consultation with marine ecology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region’s lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Due to cats' independent wandering habits and extensive territorial ranges, it presents considerable operational challenges to humanely intercept and identify owned strays. Additionally, considering the speed at which cat populations can grow, implementing mandatory microchipping across the entire city would require substantial resources and may not deliver sufficient value to justify such an investment.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Hunting, roaming, and social interaction are fundamental aspects of feline behavior and instincts. Restricting cats to an indoor-only environment may not adequately support these natural behavioral needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Adapt conservation efforts to local conditions by establishing protected areas for wildlife and plant life.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Early identification of potential invasive threats, combined with swift preventive actions, is crucial for containing spread and minimizing environmental impact.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

The natural roaming behavior and extensive territories of cats create significant practical and hygiene challenges when attempting to catch and identify stray cats' owners. Furthermore, given cats' rapid reproduction rates, a citywide microchipping initiative would face substantial logistical hurdles and require considerable financial investment, potentially making it an inefficient use of municipal resources.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Domestic cats need to roam and socialize with other cats, as it is part of their nature. Keeping them confined indoors is not a suitable approach.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Adapt conservation efforts to local conditions by establishing protected areas for wildlife and plant life.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1178

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats can cause serious harm to bird populations and may carry viruses. Strict management and control are necessary

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

The large number of cats and their difficulty in being caught can lead to a waste of funds, increasing the burden on taxpayers.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Support

Tell us why

Domestic cats need to roam and socialize with other cats, as it is part of their nature. Keeping them confined indoors is not a suitable approach.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Spaying and neutering pets is the responsibility and duty of the pet owner.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Their numbers should be managed and controlled to prevent further increase.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Strengthen entry inspections, conduct surveys and manage existing invasive predators, and establish relevant legislation.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

The key is to ensure that this measure is truly implemented, so relevant regulations should be established.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

It is necessary to conduct expert research and regulation to control the invasion of harmful species and to introduce beneficial foreign species in a regulated manner.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

I hope the government will strengthen management, invest the necessary human resources, materials, and funds to ensure a good living environment for residents.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Motorized boats entering lakes can indeed introduce harmful species into the water, leading to the pollution of freshwater resources and damage to the ecosystem.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1179

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should take on the responsibility of caring for their pets, including the costs associated with keeping cats in Auckland. This issue goes beyond just financial responsibility; some irresponsible cat owners may come up with various excuses to avoid fulfilling their obligations, and the government often struggles to address this problem.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term improvement effort that should start with educating young people about the relationship between cats and other wildlife. More of this work should be carried out through community initiatives. While the city government has many projects, this one particularly requires funding support.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Certainly, it's a good thing, but it could have a significant impact on the production of seafood and potentially affect the tourism industry.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1185

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

While cat population control is essential in island environments to protect bird species, extending such measures across an entire city would require significant public funding. This would not only strain municipal resources but also raise equity concerns, as the costs would be shared by all taxpayers, including those without pets.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Due to cats' independent nature and extensive roaming territories, it presents significant logistical and health challenges to safely intercept and identify owned strays. Additionally, considering how rapidly cats breed, implementing mandatory microchipping across the entire city would require substantial resources that may not deliver sufficient value to justify such an investment.

1C. All domestic/pet cats must be contained to their owner's property

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

It is essential that pet cat owners should not bring their cats to sensitive islands in order to protect the islands and other endangered species.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term improvement effort that should start with educating young people about the relationship between cats and other wildlife. More of this work should be carried out through community initiatives. While the city government has many projects, this one particularly requires funding support.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Given the distinct characteristics of land and ocean environments, management approaches that work for terrestrial ecosystems should not be automatically transferred to marine settings without input from marine biology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region’s lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Protecting islands and other endangered animals can be effectively achieved by controlling the number of cats through unified regulations by the city government.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Unsure

Tell us why

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Given the distinct characteristics of land and ocean environments, management approaches that work for terrestrial ecosystems should not be automatically transferred to marine settings without input from marine biology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1197

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

On islands and in certain areas, it is necessary to control the cat population, as cats can harm bird species. Auckland, being the largest city, has an uncertain number of cat owners, and if there are too many, it could place a financial burden on the government.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

The extensive mobility and roaming patterns of cats create significant practical challenges for safely identifying and checking stray cats for ownership. Given their rapid reproduction rates, implementing a comprehensive microchipping program across the city would require substantial resources that may not justify the investment and operational complexities involved.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Exploring their environment, engaging in natural hunting behaviors, and socializing with other cats are fundamental aspects of feline nature. Restricting cats solely to indoor spaces may not align with these inherent behavioral needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Effective cat ownership demands knowledge and capability in providing essential care, from ensuring proper nutrition and regular health maintenance to establishing a secure and nurturing home environment.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term improvement effort that should start with educating young people about the relationship between cats and other wildlife. More of this work should be carried out through community initiatives. While the city government has many projects, this one particularly requires funding support.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Measures should be taken to isolate ecological invasions to prevent further spread of these harmful impacts.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

While cat population management is essential in specific locations such as islands to protect native birds, implementing similar measures in a large metropolitan area like Auckland presents distinct challenges. The city's scale and undefined number of cat owners means comprehensive regulations could result in significant administrative costs for municipal authorities.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

The natural roaming behavior and extensive territories of cats create significant practical barriers to safely intercepting and checking strays for ownership identification. Given their rapid breeding patterns, attempting to implement mandatory microchipping across the city would require substantial resources while facing major logistical hurdles that may not justify the investment.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Exploring their environment, engaging in natural hunting behaviors, and socializing with other cats are fundamental to feline wellbeing. Restricting cats to indoor-only environments may not adequately support these innate behavioral needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Pet owners should have good skills in caring for their cats. This includes providing proper nutrition, medical care, and creating a safe and comfortable environment for the cat.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term improvement effort that should start with educating young people about the relationship between cats and other wildlife. More of this work should be carried out through community initiatives. While the city government has many projects, this one particularly requires funding support.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Measures should be taken to isolate ecological invasions to prevent further spread of these harmful impacts.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

The distinct characteristics of land and ocean environments require different management approaches. Land-based strategies should not be transferred to marine ecosystems without expert guidance from marine ecologists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

Tell us why

It's difficult to enforce regulations in urban areas, and vigilantism may occur, potentially harming pet cats (e.g., neighbors harming other cats/reporting on incorrect people about there cat/neighbours turning on neighbours (like in covid?). A potential solution is to ease into restrictions by instituting a cat curfew, limiting cats to properties at night. However, more focus should be placed on Auckland's wandering dog issue, both in urban and rural areas. If dogs are caught wandering, they should be immediately taken to the pound, with records maintained. Repeated offenses could result in banning the owner from keeping dogs for a set period or indefinitely. Additionally, dogs harassing livestock or other pets should be euthanized with no warning.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island	Support

Rakino Island	Support
Waiheke Island	Other

Tell us why

Visitors and bach users shouldn't bring their cats (or dogs) to islands. It would be tough telling Waiheke bach owners and visitors they can't bring their labradoodles or cavoodles for a wine weekend. I've seen plenty of dogs running loose on Waiheke beaches so prehaps starting with better local enforcment of dog control is a start.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Support for a limited time frame e.g. ex amount of years or until 2030 - really if pet owners cant afford to de-sex there pet, they shouldnt own one.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Pet cats have their place, especially for companionship with the elderly, disabled, those in retirement homes, or simply for the joy of having a pet to cuddle and reduce stress. It all comes down to responsible pet ownership: microchipping, de-sexing, and keeping cats contained to properties at night when theyâ€™re most likely to wander.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Regarding the Predator Free Kaipara project. There is risk losing support from local farmers and landowners if it continues to be perceived as iwi-led without sufficient landowner or community involvement. Local landowners will feel excluded, with no clear way to learn about activities happening next door to their properties (not from what i've seen on the PF Kaiapra maori led project articles i.e. no key people to contact to get involved, map of project area, whats happening on the ground). If it wants to eventually extend beyound the boundaries of DOC reserves and Council land, a more inclusive approach should be considered early on in the game (not just the usual Iwi/DoC/local Govt approach). To build

goodwill and long-term success, the project should reframe as community-led, fostering stronger collaboration with landowners who manage large areas, as well as Iwi. This grassroots approach has proven effective for initiatives like the Forest Bridge Trust, which prioritizes farmer involvement as well as iwi. Clear contact points for landowners interested in contributing to Poipoia Te KÄ kano are essential for engagement and transparency.

3. Protecting our moana from Caulerpa seaweed and other marine pests

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Big picture: If avian flu or foot and mouth disease were to appear on an island (any island, Nth, Sth, Chattams, GBI), immediate and swift biosecurity measures should be put in place, such as restricting stock movement across the Cook Strait (e.g. if foot and mouth disease were found first in the North Island). Similarly, if avian flu is detected in the mainland North Island, strict biosecurity measures should be implemented to protect offshore islands and the South Island. If Caulerpa is found in a new location, there shouldnâ€™t be months of meetings before action is taken. A quick response is essential before itâ€™s too late. On GBI, there was a small window to better control Caulerpa, but too many meetings and iwi consultations (plus the challenges of COVID) slowed the response, and by then, it was too late and the horse had bolted.

Let's protect our environment: early consultation #1292

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Unsure

Tell us why

Need to protect wildlife, but in urban areas cats also serve a purpose of keeping mice and rats down.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

I think this is more an issue for cat owners if they want their cats back, but in its own right wouldn't achieve much.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

Just not viable - if it is needed, then should consider an outright ban on cats in the specific areas.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Aim to make the islands cat free over the next 1years (no new cats to be taken out, and those on the island to be desexed and then die out over time)

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

Generally in favour of the outcome, but not sure if the right people (those who cant afford it) will make use of it.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

All the islands should be pest free.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

One of the few locations across the region for water skiing. Should close the lake for 12months, dredge all the excessive weeds, plant a buffer of suitable species (flaxes?) for 20m around the lake etc. When I was young (40 odd years ago, I grew up near the lake) there was so much more sandy beach areas to enjoy the lake, but now it has largely being lost to reeds.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Stop approving housing in known flood zones. Ensure there are viable open paths for stormwater to get to the sea. For a city that is built on the ocean, there shouldn't be issues of flooding.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Make it far easier for landowners and community groups to remove exotic species, including from within recreational reserves. At present it only takes one Council arborist to say they like

a tree and nothing can be done, even if all other groups agree they should be removed. Each park should clearly have a plan/table of trees that are to be eliminated, and then if anyone comes along with funding the approval should be given immediately.

Actively remove pine trees from in amongst otherwise native stands of trees and from in river/streams.

Let's protect our environment: early consultation #2320

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Support

Tell us why

To prevent unwanted cats which are at risk of going feral. Also to reduce the overall cat population.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	
All of Auckland	Support

Tell us why

To enable ownership of roaming cats.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	
All of Auckland	Support

Tell us why

To prioritise native species over domestic.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

All offshore islands should be predator-free.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

It is far more expensive to try and catch feral cats than it is to prevent their birth.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

1. It should be legal to trap and dispose of cats caught on private property. Just like possum, rats, stoats etc.

2. Educate people of the value and importance of a native environment.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

We need to include cats as apex predator pests. Also dogs need categorisation as a small number of dog owners do not manage their animals responsibly in protected environments. For these owners greater penalties need to be available to authorities to impose and the regulations need to be enforced more. Uncontrolled dogs are also a threat to children in an urban situation. It is pure luck that a child has not been killed by an unsocialised dog in Auckland, but I fear that it is only a matter of time.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

I support this but here has to be material penalties to those ignoring rules and the rules have to be enforced. Enforcement will probably have to be funded by a boat license of some sort. But it is not fair for non boat owners to subsidise this.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Very important that these species do not get established or we lose too much. Again, this work probably needs to be funded via a boat license. I say this as a fizz-boat owner.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Again we need to protect what little that still remains. Most of Auckland is a degraded mess, the small pristine areas that are left need protecting.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Even on a temporary basis.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes of course. Everything, including where and what we build, must have climate change considerations. It has only just begun but most of my reading indicates that we are heading for 2.8c-3.0c warming by the end of this century and the impacts of this are significant. A healthy natural environment will help but it won't solve the problem. It will take a lot of expensive adaption to do that. I say this as one who experienced a major slip in the Feb storms and am facing the requirement of a retaining wall costing well into 6 figures.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Community engagement is the only way to do this. People taking pride in their environment and providing volunteer labour. Also the way people engage with their neighbourhoods. We are overusing cars and not walking through our communities. People do not see that the little reserves and parks in their communities are a mess of climbing asparagus, monkey apple, monstera etc. and fly tipping. Make our suburbs less bleak lonely deserts that people are reluctant to engage with and want to escape in their cars at every opportunity.

Let's protect our environment: early consultation #2329

Rakino Island	Support
Waiheke Island	Support

Tell us why

So they are under control and not scared in a new environment

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

The effort to be predator free requires de-sexing to avoid feral populations from increasing and spreading disease among domestic cats

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Keep the cats at home

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Education in schools and communities about why and how.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

To prevent uncontrolled dissemination

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Support if they are invasive and therefore a threat. Not if a cabbage tree is preferred over a liquid amber.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why
Because they interfere with water quality.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

A sail or row boat can be just as enjoyable and has little impact by comparison

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

As far as posssible this should be managed to protect what we have from severe effects

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Dispense with concrete drains leading straight to the sea. Make marshlands to absorb excess rainfall.

Re-enforce beachfronts with rock and encourage dune vegetation

Cats, both domestic and feral, kill huge numbers of our bird population. For this reason alone it should be mandatory to desex all cats and keep them within a domestic setting (Indoors, 'catios', leashed, etc) Other reasons include cat faeces throughout neighbourhood gardens, cat fights brawling and Caterwauling at night etc. Finally, it should be the same regulations for ALL domestic animals- cats should NOT be given freedoms denied to dogs.

Tell us why

There is a growing problem with overbreeding of all domestic animals. Cats are among the animals with the most freedom to roam, and also pose the highest threat to our native wildlife which they prey on and kill in large numbers. There is no need for pets to be kept intact, unless they are specifically meant for breeding by a reputable breeder.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats, both feral and domesticated, kill huge numbers of native birds. They should not be allowed to roam outside of their owner's property for this reason alone, although there are other reasons including, but not limited to, cat feces in public spaces, destruction of property, and cat fights/caterwauling. The same laws should apply to all domestic animals, cats should not be exempt from the same rules that dogs must abide by.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support

Rakino Island	Support
Waiheke Island	Support

Tell us why

I don't know why feral cats would be taken offshore, especially with the pest control initiatvies that exist on our islands. There is no reason to intentionally take pests on boats to offshore islands, and cats, especially feral cats, are pests.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If you cannot afford to desex an animal, you should not own one. Pets are not a right, they are a privilege and one that comes with a high cost. A responsible pet owner knows and accepts this, and is prepared to pay for the various requirements that come with owning an animal.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

All pets need to abide by the same set of rules, and cats should be no exception especialy due to the threat they pose to our native wildlife. Cats, like dogs, should be required to be under control at all times, and confined to owner's property so they cannot roam freely and out of control.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Pests and invasive species can just as easily survive on anchor chains and other marine gear as they can on boat hulls. If we are already taking time to clean our boat hulls, why should we not also be taking the time to clean the rest of our vessels and equipment.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Marine species and ecosystems are just as important as land species and ecosystems, so we should be working just as hard to eradicate marine pests and invasive species as we are on land.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

There are plenty of other locations, both fresh and saltwater that motor boating can take place in. If it poses a direct risk to the species within Lake Tomarata, then the priority should be to protect these species. There are also plenty of other recreational activities that can still take place on this lake that use equipment that be fully dried.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

The extreme weather events like cyclone Gabriel have a detrimental impact on more than just the natural environment. Introducing increased resilience to these events has widespread benefits that extend past just the protection of our native species, although that should be reason enough.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2350

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

More resources and support for volunteers.

Not granting consents for private homeowners to cut down mature trees as they are an ecosystem that supports natural pest predators.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Peopleâ€™s recreation cannot always come first.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2360

Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

to protect native wildlife, particularly birds

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

It would be good if as a society we came to the understanding that cat ownership requires the same responsibilities as dog ownership.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Unsure

Tell us why

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

To minimise the risk of escapes and cross breeding

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

this is crucial to make it happen

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

It would be good if we could step up our efforts in Auckland. I wonder what lessons we can take from Wellington's successes. I think many of us wouldn't even know how to start or who to turn to.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

A rule clarifies expectations. This would be helpful as not everybody understands the implications of not doing the cleaning. It's a matter of helping people to be responsible citizens or visitors.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

It's a small enough lake to be navigated by non-motorised boats. Less noise will be good for other users and wildlife.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

yes, absolutely

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2368

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

For easy identification and management

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Like dogs, there should be laws of containment, if you expect them to stop hunting and killing.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Same reason cats should be contained.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If you can afford to keep an animal, then you should be able to pay for desexing.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Owners should have the responsibility to keep their cats on their own property.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

To prevent spread of introduced pests

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

If that is the only way to stop the introduction of pests to prevent spread, then so be it.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes...it is an important issue affecting everyone.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2380

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

To differentiate between domestic and feral animals.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

To prevent domestic cats from roaming and killing the native birds and reptiles that are slowly starting to return to greater Auckland thanks to predator trapping, etc.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Ultimately to help our native wildlife no cats is the best outcome.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

It is not the responsibility of the council or ratepayers to fund this.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

The only solution to protect our native wildlife and cats is to keep cats contained indoors.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Every little thing will help to control pests.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Motorized boats are more likely to transport pest species.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Only if really needed to be managed.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2397

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

We must protect our wildlife, including insects, skinks and birds from increasing cat populations. Domestic Tomcats can mate with feral cats this can be stopped.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

It's high time for cat owners to take responsibility for their pets. A registration fee could be used to assist conservation efforts to reduce all predator damage.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

It is very difficult to restrict a cat. At least the cat can be kept indoors during the hours of darkness. Also, cats should be restricted during nesting times.

Most owners of pedigree cats seem to be able to control their show cats, so it's not impossible

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure

Waiheke Island Unsure

Tell us why

Unsure of what this question means. I would phase out cat ownership in the offshore islands or restrict numbers.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

As a rate payer, I think we need to face the cat problem as a community. However, there are some who keep multiple cats - this is not appropriate.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I would make a limit on cat ownership to (say) 2, with exceptions for Breeders and those who show cats.

There should be a system similar to dog registration, maybe $50/year registration fee with a "responsible owner" discount

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Stop people feeding feral cat populations. Round up and euthanise, feral cat colonies.

Refer to Wellington's methods.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

I gather from people working on ship inspections, that cruise ship hulls can be extremely dirty.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

It's obvious we need to control invasive species

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

We need to look to the future, and keep waterways pristine

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

I support any reasoned banns, if they achieve what is intended

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, within limits of finance.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2403

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Submitter details:

Organisation (if applicable):

Local Board: Hibiscus and Bays

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Other
Kawau Island	Other
Rakino Island	Other
Waiheke Island	Other
Within 1km of known threatened species habitat (see map 1)	Other
All of Auckland	Other

Tell us why

Some people may want to breed Cats (in a controlled environment). Also, a lot of people like to allow their Cats' to at least have a Litter first before they are desexed, i.e. allowing their Cats to indulge in their natural behaviours.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

For the Cats' own Safety, so that if they are lost or injured, then their Owners can be contacted in order to collect them. If a Cat has gone missing, then it can be traced through it's microchip. Also, if a Cat is microchipped and registered then it can be differentiated from a feral Cat.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

Good Luck with trying to contain a cat within it's owners property!! However, there should be a rule that all domestic/pet Cats are kept in at night (say, for example after 9.pm all Cats must be inside their Owner's homes).

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support

Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

The above offshore Islands would be an ideal place for Feral Cat Colonies. If Feral Cats were sent to the above offshore Islands then it will decrease the risk of unwanted Kittens being born on the mainland.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

If the Auckland Council are intent on pushing for the desexing of Cats, then they can foot the bill.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Absolutely!! Cat Owners should get their domestic/pet Cats in by 9.00pm at night. Measures can be put in place, by getting Cat owners to lock their Cat-doors from the outside, so that once the Cat has come indoors for it's dinner, it won't be able to go outside for the rest of the evening.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Predators are needed in order to cull the lower population - it's called the 'chain of ecology'. Leave the Predators alone!! As they fit into the Chain of Ecology in order for the culling of lower populations, which can get out-of-hand (over breeding) if not culled.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

This process stops the spreading of contamination onto other new locations, which may have different creatures in the new location, which may be effected by this contamination from a different location.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Do not support

Tell us why

This should be "monitored" appropriately, instead of being "controlled". Some Species are needed to deal with the culling of other species in order to "control" large and random pregnancies, etc.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Do not support

Tell us why

I would state "Monitor" this situation, as opposed to actually "controlling" it.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

If motorised boats are going to increase the spread of pests, then YES ban them! In order to protect native species and shoreline vegetation.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes definitely, we need to keep our natural environment restored.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

MONITOR this situation, and do NOT allow any exotic species through customs in the first place if they are going to be a threat to NZ's native species.

Let's protect our environment: early consultation #2418

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Tell us why

Cruel. Stops natural behaviour of cats.They are not responsible for killing all wildlife. Humans do more damage with destruction of trees for views. They can also keep down rat and mice numbers. Also impossible to enforce. Unnecessary expense for older people with companion animals. If you keep cats inside the house, are you going to keep the aircon on all day in Summer? Or keep you windows shut all day?

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Do not support

Tell us why

Might be tricky if you have to visit and have no option but to take your cat

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Itâ€™s important to help stop unwanted feline pregnancies

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Stop irresponsible owners who treat cats (and dogs) as toys. Make it a requirement to microchip and desex but donâ€™t condemn a whole species to prison because itâ€™s more convenient to put an unenforceable bylaw in place. We need to consider the mental health of our companion animals which also has an affect on our own mental health.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Cats are not just predators. They also control keeping down the rodent population without poisons. Probably a good idea to stop people cutting down all their trees so birds have somewhere to nest. Quite a few large trees which are home to kererÅ« seem to disappear in my neighbourhood when developers move in. Developers are some of the biggest predators on the Shore.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

A good idea to stop the spread of pests

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Not sure what you classify as invasive marine species

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Seems sensible

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

Unfair for me to comment as not my area and have no boat

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Unsure. Depends what else should be prioritised

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2422

Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

Do not agree with this as it would be impossible for cat owners to implement and for authorities to enforce. How would you confine a cat to your property without expensive measures such as high fencing with overhangs etc? And this won't necessarily protect birds as they can still fly into the property. Furthermore, I currently don't have a cat, but my Neighbours' cats visit me regularly. I enjoy their company and have the added benefit that they keep rats and mice away from my property. I do not want to live in a society where cats are confined to their owners' properties, at great expense to the owners, and we are overrun by vermin as a consequence.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

There is no reason to take a cat to an offshore island unless you are living there.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If you cannot afford to desex your cat, then you can't afford to own a cat. Owning a cat comes with costs, such as food, vaccinations, vet bills, etc. I've always seen desexing as part of the cost of cat ownership. If people can't afford to desex their cats, then how can they justify being able to meet all the other costs of cat ownership for the life of the cat, approx. 15+ years. Council should not be using ratepayer dollars to support irresponsible pet owners.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

It isn't about managing the cats; it is about making sure that the people who own them are acting responsibly, including microchipping and desexing them, and ensuring there is adequate enforcement against irresponsible owners. I have houses with cats all around me and there is an abundance of bird life that is thriving, including fantails, swallows, kingfisher, tui, sparrows, myna, thrush, and blackbirds. At the same time, I haven't seen a rat or mouse in years. Cats are great for keeping unwanted pests like rats and mice away.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

No comment.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Desexing cats allow us to control breeding as per dogs and reduce roaming and hunting. We owe it to our natural wildlife to be responsible pet owners bith for their own safety and to preserve our wonderful environment for those that come after us

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Microchipping allow us to manage cat populations and control pets vs pests. Let's bring cat owners into the same category as dog owners, and start a 'responsible cat owner' option which enable people to reap the benefit of lower annual fees if you keep your side if the bargain. Pet ownership is a priveledge and not a right.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Containing cats to yards will enable birds to thrive in their own environment. Let's bring all pets in line with the same rules

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support

Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

I think all cats need to banned from islands. These are small fragile ecosystems where cats are not welcome.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

I think anyone who is willing to be a responsible per owner should be allowed/enabled/supported to be one. But letâ€™s do a proper means test please!

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

N/A

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

N/A

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

This has been long suspected of creating a challenge re invasive species. I am however uncertain how this will be enforced?

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

I believe we have a responsibilitt to look after our marine environment and treat it as we do our national parks.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Agree although I think we should choose our battles - I think this is important but keen to look for the most cost effective and responsible ways of doing so

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

I donâ€™t have an opinion about this

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Depends on the cost. I think for inatance responsible waste management is a higher priority than controlling weeds. If the above does not have a measurable outcome that justifies the investment this should be deprioritised or the public asked to contribute via volunteering.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

N/A

Let's protect our environment: early consultation #2457

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Tell us why

This gives more reasons for cats to be hurt and killed. There's enough of that instigated by this type of activity now. A better option is do de-sexing campaigns and public education including anti dumping. What anti dumping education has Auckland Council ever done?

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland — Do not support

Tell us why

That is ineffective in what you are trying to achieve. How much budget and resources would you put into this when you could be spent de-sexing and educating people. What about the unfair competitive advantage you are giving to one organization, the Animal Companion Register. That gives them such an unfair advantage that its irresponsible, they can charge what they like and inflict all sorts of demands on cat cat owners and leave cat owners with no choice. It's commercially unacceptable business conduct! They can hold cat owners to ransom with what you are proposing and that is not fair.

1C. All domestic/pet cats must be contained to their owner's property

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland — Do not support

Tell us why

What actual unbias proof/research does Auckland Council have that this is going to achieve what you want here. I'm talking about owned cats only. Its going to be big upheaval for Auckland. Owned cats are not the issue! Could you imagine opening your door to get a courier package and your cat gets out and that becomes a death sentence for your cat. Is that what you are trying to achieve here? Cats are family members and for some people the only support/ companion they have in thier life. Its already stressful when a cat goes missing this would be horrendous. The amount of stress this would put on cat owners is unreasonable.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Do not support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

You are actually doing something here to reduce the stray cat population but please also add education and anti-dumping campaigns. People dump cats and even worse pregnant cats and they never get told its wrong, let alone its illegal. They never, never get told the result of thier actions that it increases stray cat population as well as being very cruel.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I am very concerned with the misinformation (your instructions) that you provide to cat trapping pest controllers. I urge you to revisit that document so you can actually work within the Animal Welfare Act and Best Practice Guidelines that rest of the industry works under. That is a court case waiting to happen. I am happy to be contacted to discuss this with you. What you are proposing is a cat owners worst nightmare. Iâ€™m sure a lot of Aucklanders would be interested to see your proof/ research on 100% predation for OWNED cats only and the effects on wildlife. This is only about owned cats and not stray or feral cats. You are going to put high STRESS on all cat owners mental health and for what?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

With what Auckland Council have already spent on these islands surely they are pest free and would require less money to maintain. If that is not the case then questions need to be asked.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I would like a balanced and sensible approach to cats from Auckland Council. Owned cats naturally roam as that is part of there normal natural behavior. That is recognized in the Animal welfare act. This is about OWNED cats and Auckland's lifestyle. Some cats can't cope with being contained as it is unnatural behavior and the stress this would cause within the household is huge. Auckland Council should actually get more facts on how this would affect cat owners of Aucklanders. Auckland Cat Owners are ratepayers to and they deserve equal consideration. I've included a link of what we DON"T want in Auckland. If the link doesn't work please take the time to look this up. https://www.nzherald.co.nz/northern-advocate/news/pet-cat-caught-up-in-predator-control-work-on-whangarei-heads/2I7LA3VWEBAQXHB4UVTZT6NSEI/

Tell us why

My son lives in Berlin and has an indoor cat which is doing very well. And, we are sick of cat poo in the garden. We have a well fenced garden for our dogs but the council told us that if a cat got in, and our dog attacked it, it would be our fault. How can that be right. Our neighbours cat adopted us and lived with us for around 8 years. We kept it in the property and indoors at night. We live in suburban Auckland.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support

Waiheke Island | Do not support

Tell us why

NO CAT should be taken to offshore islands. Waiheke has worked tirelessly to control stoats and then you suggest allowing the cat population to be maintained???? Where stoats/weasels/ferrets aren't pesent cats would be the main predator. More powerful than rats. This is a stupid policy.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

People need help, it is why we pay rates.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

See above. I would support trapping and humanely destroying any non-micro chipped cats or micro chipped cats caught 3 times. Start now and there would be no excuse by 2030.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Stoats. They are killing machines and I saw one in my garden in Torbay recently. Kaka are just starting to visit Torbay, we want them to stay.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

They will only get worse without. Educate and enforce. And ban the sale and planting of selected plants. We looked to buy a building plot recently and the covenant regarding trees included Sycamore - such an invasive tree. Just visit the South Island. But this had been recommended by an arborist! When I pointed this out we heard nothing more! Make it an offence not to control moth plant on your property.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Shoals of koi carp in Albany lake.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes. But allowing building on the entire building plot as is happening in Long Bay, Torbay, Northcross etc. isn't helping!!!

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Just do it, there is no need to wait until 2030.

Just as dogs must be. Cats are just as much a hazard, although in slightly different ways.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Same as above.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Someone has to pay for what is the greater good, and, for many people, it would be a serious financial burden. That is unfair, and such people should be supported by those, like me, who can afford it.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Nothing to add.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Providing education and assistance for local trapping (possums and rats, mostly) would be helpful, I think. I already trap possums and rats on my property, but I wish my neighbours would do the same. Some encouragement to them would be a good thing.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

I don't think I know enough about this problem to comment.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Excellent idea in general.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control anywhere is a good thing.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Motorised boats (and jetskis) on small lakes should be totally banned. They are pernicious things. OK, fine, that's a bit radical, but I still hate them.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

I don't know what is meant by increased climate change resilience, or what that would entail, so I hesitate to comment.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

It'll cost a lot of money, and that's fine. I strongly encourage local government to take the necessary steps, even if it means that my rates increase.

While my concerns re funding and authoritarianism remain, this is good for cats if they go missing etc so I support it

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	
All of Auckland	Do not support

Tell us why

Nobody can stop a cat wandering. It is insane overreach. An extremist policy - honestly, what is more extreme. I challenge you to create a spectrum of options - this is clearly an extremist option and not a moderate one

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Encourage people to desex, microchip and keep cats in at night. Provide educational material and funding where appropriate. It is not possible to make all areas bird havens and an attempt to force it is extremist. Some areas will naturally be more likely to take the necessary steps with education - focus on these areas with encouragement and education not enforcement

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

Again - banning is an extremist position to achieve an ideal. Practical moderation is better. Competing uses balanced vs one banned for the other. People value BOTH.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

What do you mean? I can't possibly comment when you don't detail what you mean by 'climate change resilience'. More control and extremism? Balanced drain clearing to stop flooding?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

#2659

I'm a greenie. I love animals and nature. I'm also practical and understand humans are part of this ecosystem. By focusing on enforcing authoritarian ideals such as banning cats you will undermine all goodwill and stop people valuing the environment at all. You are forcing your values over people and there will be a backlash that will be bad for all environmental efforts going forward. Please focus on moderation and practical steps instead of visionary ideals and zealotry. Create a spectrum of extremism of proposed tactics and choose the balanced middle or you will lose social license and the environment will suffer.

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Guava and loquat fruit need to be removed from the banned list of plants. They provide food for people. No evidence (proper scientific studies)has been provided to suggest they are a problem. All that was reported in the last PMP was a cost/benefit analysis by the then current council members.

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

(1) Cats are an apex predator. (2) Observations from my predator control work. (3) The decrease in the number of birds in our locality (We have lived in Okura for 44 yrs)

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

As for Q1A above

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

As for 1A above. We had a cat until she died. She was kept inside at night.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

I would prefer that there were no pet cats on any of the islands. However I understand the desire of people to have their cats. - We had one but controlled her, particularly, at night

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

I think most people will meet the cost of desexing

Sadly some will never will

This (desexing) will be a long term project so we are better to get started asap

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

(1) Stray cats should be trapped and destroyed not fed as some people do

(2) All cats should be de sexed

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

(1) We need to continue to make all people aware of their responsibility for control of these pests

(2) Could pest awareness be included in the school curriculums?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It will be a long term project to get boaties to accept and understand their responsibility for this. But the sooner we start the better, Most booaties will not care, I believe

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Please proceed with this as quickly as you can. Predator control groups like the one I belong to are already doing this (I belong to Pest Free Okura)

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Please do!

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

In the end we are all going to have to modify our behaviour to protect our environment. Remember we haven't inherited the world from our parents. We have borrowed it from our children

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes I do. We have already seen Papatuanuku take her revenge on us. She will continue to do so

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Thanks for preparing this survey. Please do whatever it takes- Along with those of as who care to get your plans underway

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Phoenix Palm must be eradicated. They canâ€™t be maintained properly to prevent spines falling. Do not spend money on maintenance and grooming of this menace pest plant. Instead of maintenance costs; poison all (male and female) Phoenix Palm. The fronds will fall within a period of time. The Palm will rot away. Cut down any trunks that may pose a danger. Help landowners poison and remove Phoenix Palm. Have a task group dedicated to eradication of Phoenix Palm. Ban the Palm completely. Ban and eradicate all other palms apart from the NZ native Nikau Palm. Remove any protection status of Phoenix Palm. Itâ€™s time to change our culture; change our history. Currently, not a single Phoenix Palm can be touched without the property owner approval; this has to change.

Tell us why

This will simplify the 'what to do with a roaming cat'. If chipped, return to owner (with warning/fine?) and if not chipped, destroy.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

I am not a cat owner but I am a gardener and a bird lover. I am no end frustrated by the number of neighborhood cats that wander through our property, poop in our garden beds and in general keep the birds away. I am not sure why the mentality seems to be broadly accepted that cats are the property of an entire neighborhood. Although in some areas dogs DO cruise around uncontrolled, for the most part people understand dogs need to be contained. We need that same mentality for cats. Perhaps there could be an incentive/subsidy for catios?

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

I am not sure I understand this one. Is this saying only residents of these islands can own cats, and no one visiting can bring their cats?

If so I agree - too many stories of people's cats escaping and they go home without it because they can't find it. Unlike a dog which can be easily contained in a fenced yard/house, cats more difficult.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

Not sure how you determine 'cannot afford'. Purely income level?

Licensing cats as you do dogs is a step in the right direction. Responsible cat ownership = desexing/microchipping and being able to afford vet care. We need to shift the mentality behind cats.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Limit the number of cats per household, all domestic cats must be microchipped and desexed, and registered (as per dogs). But also if there can be some sort of ''responsible cat ownership programme'' (as per dogs) that reduces those fees or subsidizes them that would be great. Might be more admin than it is worth...?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Protect what we already have as a priority.

Continue to support community-led conservation initiatives. That is fantastic bang for buck. Support them with strategic oversight/planning to ensure they are focusing on high priorities and with the most efficient control methods possible.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Logical! Same as we clean our footwear when hiking in different regions.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

I am basically going to support every proposed initiative to get this under control. :-)

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

I support BUT I support ocean initiatives more. At least lakes have a hope of benefiting from landowners/community group efforts but the ocean won't...

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

I don't know this lake or its use so can't comment.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes. This fits in so logically with the work to control pest species (particularly browsers) and subsidies/incentives for land-owners to plant riparian areas etc.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I like that you work to provide a list of invasive plant species so they aren't sold in garden centres. How do we more to prevent rather than control once they are here?

Let's protect our environment: early consultation #3096

Tell us why

Because SPCA and other organisations are overun by unwanted kittens who are often dumped and then become feral cats.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Support

Tell us why

So that owners can be contacted. Compulsory Desexing and microchipping may make people aware of pet responsibilities before they undertake getting a cat.

1C. All domestic/pet cats must be contained to their owner's property

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Support

Tell us why

Most cats like roaming as seen on cameras that have been set up - especially at night.

This will be hard to monitor (police) but at least owners should keep cats inside at night even in rural areas that are close to native bush areas. There are ways other than using cats to reduce numbers of rats and mice.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Tell us why

I agree with this as these islands are mostly predator free and cats are one of the main predators of our wildlife. There are places holiday makers can leave their cats on the mainland.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

Perhaps give financial support to those on community cards.

Some pensioners have cats as pets for social contact. It would be useful to support such people.

Otherwise if people can't afford to desex perhaps they should not have a cat?

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

There is a lot of good work being done already - often using volunteer groups to help. i.e. Predator free Hibiscus Coast.

Continue providing funding to these groups for promotion, education and materials like free traps for people to use in their properties.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

This would also help ensure other perhaps invasive organisms do not invade our sea and waterways. Perhaps the Council would need to provide washing down facilities at boat ramps.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Very important as there is a flow on effect through food chains if species are killed through invasive species i.e. spawning areas for fish.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pests can be transferred from water way to water way, so the more lakes restricted the better.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Perhaps ban for a set number of years until the pest has been eradicated. A bit along the line so how the Kauri dieback has been managed by closing tracks for a period of time.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Definitely should increase resilience as it is very costly to try and manage the damage caused by slips etc. 'A stitch in time, saves nine' approach.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

There should be more invasive weed bins in our communities so that people can be encouraged to dispose of invasive weeds rather than putting into landfill/ garden weed bins. i.e. Restore Hibiscus and Bays has only one bin for the whole area and it is not well known about. The Council could sponsor/provide more bins and their disposal. Money well spent.

Let's protect our environment: early consultation #3101

where there is opportunity (on an island) or where there is a threatened species nearby cats should be contained to support the efforts to keep them pest free

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support

Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Preferably not - no cats allowed to be taken to offshore islands

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

We need to fix the problem and reduce the cat population

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Cats owners should be required to put collars and bells on their pets at the bare minimum. If their cat does hunt birds then consider keeping them inside or on their property.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

We do need to protect these islands and so need to surveil visitors and their need to be stiff penalties for those who do not abide the rules - no wet bus tickets and no excuses

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

it is necessary to protect our environment and is the responsibility of each boat owner to avoid contaminating our waters/shores

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

It is part of honouring the Treaty of Waitangi

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

all freshwater should be protected against invasive species

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

motorised boats are a risk for spreading golden clams etc and also endanger and annoy swimmers and other non-motorised craft

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

yes - it is inevitable that we will have more storm events

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

control unowned cats, trap pests and modify boat owner behavior

Let's protect our environment: early consultation #3121

Tell us why

With proper enrichment, domestic cats can live a full, healthy and long life indoors. Contained outside spaces should be available, should the cat want it. Keeping animals confined to your property prevents destruction and unwanted visitors to neighbours, animals are easy to locate in an emergency (see recent floods) and they are owned pets and should be the owners responsibility, not someone else's.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

To prevent the killing of our native birds, reptiles, insects, etc.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Other
Kawau Island	Other
Rakino Island	Other
Waiheke Island	Other

Tell us why

Only residents cats on islands is still too many. Cat free islands would be a much better outcome.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

It is not the ratepayers responsibility to provide this service. Most ratepayers themselves are suffering increased financial burden to pay their rates for necessary infrastructure.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

The logical solution for our native wildlife, and to also make our own backyards and gardens free of disease carrying cat defecation, is to ban cats completely. This would negate the need for any cat management.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Continue or ramp up current pest eradication programmes, which needs to include cats whether domestic or feral. The bottom line is that cats are potential predators to all our native fauna so control or eradication is definitely needed.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

We need to control the movement of pest species in our waters as much as possible.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

We need to control or eradicate invasive species in any of our marine ecosystems.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

The less introduced pests in our freshwater lakes the better, so the can be returned to their natural state.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

We need to protect our lakes. Plenty of recreational pursuits can be enjoyed at a lake without the need for a noisy, motorised boat.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

I do not think climate change should be a priority, but it needs to be monitored.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Continual monitoring needs to be done and measures introduced when needed to control unwanted exotic species.

Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Support

Tell us why

I support the proposal that pet cats should be contained within the bounds of their owners property in all of Auckland. A 1km radius is inadequate. As a companion animal veterinarian of 11 years I can attest that my clients are typically very resistant when I have recommended that their cat be kept indoors, for medical reasons. I observe that culturally New Zealanders consider an indoor only lifestyle to be cruel. Keeping a cat entirely indoors requires a different approach to husbandry (the management of an animal) to meet the needs of the cat however in many countries this is the norm. I believe this is a necessary cultural shift that needs to occur in NZ.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

As a veterinarian I support this, when offered to responsible owners. Studies show that pet ownership does infer significant human health benefits to their owners, so I would want to see those who cannot afford desexing being provided some support. Improved utilization of existing charity options could be considered.

However, meeting the life-long health care needs of a pet does not begin and end with a desexing + microchipping bill. Additionally, anecdotally speaking, owners who accumulate numerous pets often can only afford to do so because they invest little to no money in veterinary healthcare. I would not want to see funding of desexing and microchipping by the council facilitate accumulation of pets, so would propose limits per household.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Increase funds to support these measures.

Tell us why

I feel this needs to be brought in to protect our bird and wild life. Do feel it can not be brought in over night though as a lot of people whom have cats would not be able to afford an outdoor enclosure which I feel is important for a cat. BUT I do feel that cats could be keep inside within certain hours at night time and that this could be be brought in straight away. Our cat is locked in every night.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support

Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

There is more bird life and wild life to protect in an island less populated by people. Those whom have cats should be allowed to keep them of course but not replace them.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Canâ€™t afford it donâ€™t have a pet itâ€™s quite straightforward. Why should we pay for other people who canâ€™t. A bit like having a child really. But donâ€™t start me on that one.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Restrict how many cats a person may have. We have seen a motor home with 5 cats. I think 1 is nice for the cat also special and affordable. We have had 2 cats at one stage but one was a dumped cat left behind by its owner.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Feel itâ€™s a long way out but also where there are people rats and mice abound. In saying that cats help with this around the household. We have purchased a rat bait trap. This gets eaten each month we also have a council provided wooden box from forest and bird.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

I think thatâ€™s fair enough and everyone responsibly.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Donâ€™t really understand the question

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

If itâ€™s need it should be done

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Why do people need to have boats at the lake plenty of beaches in Auckland

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Again donâ€™t really understand the question

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

An impossible one BUT control our population

Less impact on the natural environment

Itâ€™s simple

Let's protect our environment: early consultation #3283

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

The area within 1km of known threatened species habitat is the minimum area is which cat management interventions should apply. Many important native species travel beyond these immediate areas, for example pāteke which are part of a much larger population.

While the supplied map showing known threatened species habitat shows all of the Whangaparaoa Peninsula which is out primary concern, it excludes other locally significant ecosystems such as Orewa estuary and Alice Eaves/Nukumea BFA/SEA areas north of Orewa. Is also excludes DOC land and islands such as Rangitoto and Motutapu which need to be included.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

For ecologically sensitive areas chipping should not automatically give immunity from euthanasia. Further discussion is needed about the consequences of what happens if cats are found in these areas. We think that the role of Animal Management needs to be extended to cats and community groups and organisations should be supported to trap cats in ecologically sensitive areas.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Whilst we support these options, we suggest that an option should be added for owners to be able to take their cats outside under control, eg on a leash or in a carrier, or to be able to take it to a cattery or other home.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Clearer definition of what is meant by resident, for example are bach owners included in this. We would also suggest that if cats are taken to these islands that cats are kept under control and owners put in reasonable controls to prevent wandering.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Other

Tell us why

Support only if other listed management interventions are in place.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

1. Rules in place to prevent the creation of stray / feral cat colonies. We are aware that maintenance of these colonies happens locally and across Auckland without regulation.

2. There should be sufficient resource allocated for public education and enforcement of cat control regulations, increasing the remit of Animal Management.

3. Removal of stray / feral cats from all areas with high biodiversity values.

4. If cat management controls area not able to extend to the scale recommended by our responses above, we would like to see progressive cat-free areas around high value ecological sites, in particular Open Sanctuaries like Shakespear and Tawharanui. There are many examples whereby cat exclusion areas have been established for new developments and knowledge around the range required for this to be effective.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Firstly we recommend that in future consultation documents that the headings for these sections reflect the inclusion of peninsulas, and also recognise Sanctuaries specifically, alongside pest-free islands. Peninsula sanctuaries such as Shakespear and Tawharanui should be considered in the same way as pest-free islands.

We strongly recommend that a prioritization framework be used by Auckland Council to focus what is limited predator free funding towards areas where there is the highest likelihood of successful biodiversity recovery and outcomes for nature, and where gains can most effectively be defended, namely sanctuaries, islands and peninsulas connected to sanctuaries, such as Whangaparaoa. This prevents funding being too thinly spread to have an impact, and provides a rationalised approach in the event of funding reductions.

We recommend that PF2050 target species extend to all mustelids and feral cats.

There should be strong alignment between Aucklandâ€™s approach to predator free 2050 and dog control policies.

Where good quality pest mammal control is happening, this also needs to include pest invertebrates, plague skinks and pest birds.

It should be noted that where there are less mammalian predators there will be more frugivorous birds, which consequently increases the risk of pest plants spreading, therefore we recommend that predator control is carried out alongside pest plant control.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Whilst out of our immediate remit, we support this approach where priorities are aligned geographically with terrestrial protections.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Support, although outside of our immediate remit we support this specifically in light of waterfowl movements and the need for extensive high quality habitat.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Support, although outside of our immediate remit we support this specifically in light of waterfowl movements and the need for extensive high quality habitat.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, however we think the approach to pest control in this context should be strategic, using a risk-based approach to pest plants in particular.

Possum control is particularly relevant here due to their impact on the canopy and the regeneration of both urban and rural forest habitats.

Overall we recognise that increasing the space threatened species and ecosystems occupy increases their resilience to both current and future threats.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

1. At present the â€œGood Neighbourâ€ approach to pest plant control is not effective and does not reflect the science of wind and bird dispersal. Likewise residents should be held accountable for both actions and inactions, for example change in land use shouldnâ€™t result in uncontrolled weed problems. At present the large land area of Gulf Harbour Country Club, just outside of the RPMP buffer zone for Shakespear, but easily within wind / avian seed dispersal distance has become increasingly infested with high threat pest plants since itâ€™s closure in July 2023. However Auckland Council is not able to invoke any regulations requesting the land owner to control these.

2. Hedgehogs â€“ regulations relating to rescue and release need be enforced. At present it is commonplace for individuals to rescue and rehabilitate hedgehogs for release, undermining the work of predator control groups across Auckland. As a result, in urban areas residents often assume that this is acceptable. Greater resources need to be allocated to education and regulation around this animal.

3. In relation to low incidence pest plants, we recommend that a sliding scale and risk assessment approach is used when these plants change categories to ensure they are not automatically relegated to unsuitably low levels of monitoring / control.

4. If light recommendations for cat control are implemented, and cats are not able to be sufficiently controlled to significantly reduce risk to native species, then mechanisms for influencing owner behaviour need to be introduced. This might include fines / invoices to owners for time spent by community groups or Council staff for dealing with cat incursions into ecologically sensitive areas.

To stop breeding and the dumping of unwanted cats leading to more feral cats.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Unsure

Tell us why

I think desexing and microchipping should come first. As an ex cat owner who will never own another cat I understand how hard it will be for people to accept the requirement to keep their cats inside. I think this should be the aim but we need to move towards that goal at a reasonable pace that brings most of the public with us.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island are precious habitats because they can potentially become pest free. Ideally no cats on islands would be the medium to long term goal.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Other

Tell us why

Offer one free desexing per household over the next 15 years. If after the cat dies they get another cat they should be required to pay for desexing themselves.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Long term goal is no feral cats and domestic cats kept indoors.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I have read the consultation materials. The task is enormous but the rewards are great. I had a kaka visit my deck which was incredibly exciting in Murrays Bay on the North Shore. I have spent years helping on Tiritiri and know the value of protected offshore islands. I would love the Council to continue to prioritise and fund environmental initiatives to restore and protect our native species so we can see more in our own backyards.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Critically important. I saw on TV documentary on Aotea and the impact of caulerpa which was distressing.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Shouldn't need to say why - it should be obvious.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

It should be obvious that it's the right thing to do.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Absolutely. Of course.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Increased vigilance at the border, more education, increase financial penalties for those attempting to bring new species in. More work and funding on the invasive species already here. The amount of local invasive weeds on the North Shore is frightening and a little overwhelming.

Let's protect our environment: early consultation #3347

To protect wildlife. So they don't poop on neighbours property. Protect dolphins and pregnant(immunocompromised) people from toxoplasmosis. All cats should be desexed across all Auckland unless registered as a breeder

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Support

Tell us why

To reduce stray cats and protect wildlife and ecosystem

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

Would rather see all cats come from registered breeders or charities and the cost of desexing MUST (with national law) be included in price and be booked or new pet owner prove its desexing done, or already be desexed at sale.

Support only to reduce barriers and so it does not get done. But also think people should only have pets if they have financial ability to be responsible pet/cat owners which included paying for desexing and microchipping. But I also think people have those pets anyway, then better that it gets done than pay for it later in reduced wildlife

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

All Auckland. Any stray cats found must have microchip and be desexed. If not microchipped then should go to charity such as SPCA if no owner found and be de sexed if not already done so and have microchipped before being adopted out and if not then be put down humanly. If it is microchipped but not desexed then owner should be fined $1000 and if the owner can prove it is desexed within 1 month then fine can be lifted like if you were caught driving on restricted license with passengers .

Cats should be inside only or fully restrained on property like rabbits/guinea pigs don't have to get cat poo and to protect birds

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

There should be a lot more education and awareness on effects of cats and pets on native wildlife and how to be a responsible pet owner. And more regulation and rules (ideally nationally but also locally in Auckland). And fines for not following rules (but if owner can remedy problem then fine can be lifted or recued)

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

We need to protect our environment as prevention is better than cure

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Protect mussels from waste and storm water and farm run off as they are filter feeders and easily contaminated which can make people sick

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Other

Tell us why

I don't know much about Tomorata Lake, but I also agree boating is a valued recreational activity and wonder if a boat cleaning and motor rinsing station(s)could be installed (with a fee per use/ gold coin donation) as I am sure would be expensive as assume that water used to rinse/disinfect would need to be contained prevented from running off back into lake

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

All cats must be registered, microchipped, and desexed as a by law ASAP, unless registered as a breeder then exempt from desexing. More education and awareness needed for punic on effect of roaming owned cats on wildlifeand encourage them to be indoors/ on property 24/7 and eventually in next decade or so should be a by law (or national law) that they stay indoors/ on property only 24/7

Let's protect our environment: early consultation #26

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

This is relevant for the islands, however a larger problem than pet cats is the ample feral population that should ultimately be focused on here.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

I think it is most practical for the islands due to small populations. But Auckland is so massive, with so many people.

I would also question what the conservation goal of goal of chipping and registering the cats is?

Are we gonna kill the cats that go into protected areas?

Are we gonna fine people who's cats go out at night?

Like I just want to know what the point of all that data collection and mandated cost is if there isn't reasonably going to be any enforcement for it.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

This is reasonable again for small islands without many people or cats. You can make the clear argument that if you choose to live on an isolated small protected island, then you've gotta adhere to the contract. But that argument is going to be very difficult to make for mainland residents if there are not incremental steps made towards that.

Additionally, the urban design of most Auckland areas simply is not conducive to this. in order to keep cats on property it will require quite a lot of modification to yards, homes and drives. It will result in a lot of half-assed jobs that will end up likely making cats even more likely to roam

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I think your argumentation needs to be shifted from pets and pet owners and instead needs to focus on the MASSIVE feral cat populations.

It's unpleasant but I think an extermination drive or at the very least a massive control/spaying regime will be more effective than mandating pet owners take on the burden here. Especially because the majority of pet cat pregnancies come from feral fathers.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

This is a fairly low effort thing that does a lot, similar to the Kauri dieback trigene stations. I would recommend providing the supplies for this at the site as well or on shore, to be returned upon completion.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

I agree with this, but I think AK needs to be a bit more rigorous in what it classes as "invasive" rather than just being introduced.

A number of new species like the Painted apple moth were construed as invasive despite there being little actual evidence of an ability to cause harm. And certain other species like gorse are actively good for the damaged ecology because they facilitate our native species.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes. especially relevant is climate resilience to the floral ecostructures and their threats. I notice a lot of emphasis is being made in the concrete actions around marine environments and bird species, but very little is being done to address issues unique to plant ecology.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I think the emphasis on biosecurity and invasion in this advisory document is socially constructed.

The authors of this document have made a value statement and a framing decision to emphasize foreign invasive species risk almost entirely.

And there's nothing wrong with that inherently. We know invasives can be bad.

But you have to ask what's being left out of the frame here.

And what sticks out to me is that they have chosen not to really recommend any actual solutions to 3 of the other largest pressure factors on NZ biodiversity. Namely, fragmentation of habitat, land use change pressure(e.g. farming or urban runoff), and pathogens; namely Myrtle rust.

Let's protect our environment: early consultation #90

I don't think it is appropriate to contain cats.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure

Tell us why

I don't understand wy this would be necessary.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Money should not be a barrier to preventing unwanted kittens. Also people who may have taken ownership of stray kittens should not be expected to pay for their care.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I have a two cats and I love them dearly but I also acknowledge they are a threat to native species. The positive is that they are also good rat catchers.

We live in a suburban area but we are close to wildlife and there should be protection for the rarest species or areas of colonisation.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

There seems to be an exodus of vermin in areas where building has taken place. Rats are also having their homes disturbed. Perhaps there needs to be more thoughts to this or pest levels managed post construction. Whose responsibility would this be also?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

If it is a problem then it seems you have answered the question. Yes it needs to be introduced.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Marine ecology equal if not greater value than land - we must do everything possible to protect this vital resource.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Again we must do everything we can. Not all people share te same cultural values so there must be strict rules and protocols around this in order to protect our resources.

Also needs to be more awareness around what is permitted or to be looked out for and why. If people understand the impact they have then they are more likely to cooperate.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

IS it possible to have fallow periods to allow the lake to restore or is a complete ban the only option? What if people could hire boats so that all vessels were monitored. No cross contamination.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes but by introducing native species. There should be legislation around moving native species that have a fundamental role in stabilizing or providing effective resistance to flooding.

Too many people (especially landlord) remove all vegetation so that properties are easy to maintain. This of course has a disastrous impact when paired with increase water and spontaneous flooding.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Encourage and protect native planting. Make the mainstream - particularly new migrants aware of the value of these species to our wildlife and cultural identity.

Let's protect our environment: early consultation #109

Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

My understanding is that cats kill on average 14 birds a year. Unlike dog owners, cat owners take no responsibility for thier animals. However, enforcement is going to be problematic, in my experience it is the people that can least afford to desex pets are responsible for abandoning cats and not getting them desexed.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

why not, its been done for dogs. When you get a stray cat you can immediately identify if its wild and destroy it instead of farting about waiting to see if someone claims it.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

Thats ridiculous, its impossible to contain a cat without thousands of dollars of predator proof cages. You may as well just make all cat owner criminals by default.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support

Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Potentially some animals are lost, but in general, most pets owners are responsible and the alternative is that animals are not properly cared for when left at home. Fees to house pets over the holidays are well above the normal costs that an average family can afford and pets do add value to our society, teaching children responsibility, empathy and being a friend to elderly and otherwise lonely singles.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

its pretty plain from successive governments that the more responsibility you take from people the less they will pick up on their own. YOu would be better off taking the money and using it for deral cat control where you would pick up other pests as well like stoats.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

no

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Some islands are too big and have too many visitors to make this realistic. I think the islands that are lagely isolated, its possible. Aucklanders doent want to pay to sweep sand from beaches. we pay a lot in rates, cost of living is in crisis. Make the most use of money and dont piss it all away on a pipe dream.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Do not support

Tell us why

its not definable and not enforceable. Focus in, require anchor chains and fishing line to be clean from seaweed before moving. (Dirt?? Pests?) Go and anchor in islingbay, put out 60 meters of chain and then retrieve it. Tell me that is free of visible dirt. Clearly, whoever proposed this has never been boating.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Do not support

Tell us why

this is a joke, we just tried to get a marine reserve on kawau and then last minute, oh suddenly its not a reserve if you are from an "elite" culture where rules dont apply anymore. You know what, gathering food from the sea is central to EVERY CULTURE. WHat a giant joke.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Do not support

Tell us why

You have presented zero evidence that you can do this effectively. Sound like another council excuse to hire people to count eels and spend 10 years wasting money for no actual benefit. Look at the reaction to cuplepra, You have no effective plan, you are just putting in bans and throwing money with out any perceivable outcome. the culepra map is spreading like covid and no amount of money can solve that problem. Yet, just like the govt of the day you persist in keeping people locked down. Is there a vacine coming? SO whats you game plan? IS there even a plan.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

why are motorised boats worse than kayaks? If there is particular activity on a boat, then sure ban that. But otherwise, you are just ruining peoples recreation for no reason. If its oil pollution from 2 strokes, than ban 2 stroke.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

No I dont, because I dont think you can do it. Climate resilience has got sweet fa to do with pest control and biodiversity, its about bringing back wetlands and replanting steep slopes. eradicating rats doesnt clear 1500 houses from a flood plain.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Privatise the work. COUncil is a joke. You can tell a council job, 3 guys on cell phones sitting in trucks while one guy digs with a shovel and 3 guys control traffic. Work should be aggregated, then put out for qoute with minimal buaracracy.

Tell us why

Some cats travel with owners

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Cats breed quickly to create collonies. Even the reduced fee amount through SPCA is beyond many household budgets, let alone time off work and transport costs.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Stop using 1080 as it kills the birds that we want to save and pollutes the waterways.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Boat users should protect the area for future users

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

The method must not destroy the environment. Consult Iwi as to best method for that location.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

The method must not destroy the environment. Consult Iwi as to best method for that location.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

It is too small and sensitive an area to cope with boats. There are plenty of other places to take boats that do not impact on wildlife and the required safe space around swimmers.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Plan for rising water levels around the coast and water shed in the streams and rivers. Better maintainance of water collection points.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Making AT responsible for weed spraying Auckland is a horrible joke given their track record of lack of accountability, arrogance in not reffering to local knowledge and Iwi and the total lack of contact for the public. The sprays are unnecessary and poison our environment around

our homes and every stream to the sea. Whoever did this handover hates Auckland and Aucklanders.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Only way to achieve goal

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Support free traps and encourage community trapping programs

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Common sense

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

The only way to protect our environment

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Do not support

Tell us why

Burden on Auckland rate payers

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Why not

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Support local community groups with funding and guidance to eradicate pest plants

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Although cats are regarded as domestic animals, they are difficult to control and have them obey their owners - unlike dogs. If left to breed, a pair can have as many as 50,000+ offspring in 5 years' time.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats have a tendency to wander, especially if a female cat is on heat, then the males have the ability to sense her situation. Cats are very independent and can live off the environment and hence, have a major impact on native animal numbers.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Unsure

Tell us why

This owuld be the ideal situation, but it is very difficult to enforce due to the nature of cats.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Support

Tell us why

That makes good sense and ensure the owners take responsibility and accountability for their pets.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Pass a moratorium that all cats need to be desexed by a certain date. Thereafter, the same rules and principles should apply as with dogs, but need to be strictly enforce. Even with dogs, officials are not following up with owners, hence the SPCA and shelters are crowded with certain breeds.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Their movement (range) has to be controlled by their owners and they have to be desexed.

Owners and the public have to be educated as to the thinking behind this initiative.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Whatever has been working until now and use the research data to substantiate, roll it out in greater numbers with greater emphasis.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Whatever item can be a possible vessel for the transport of the seaweed must be scrutinised and cleaning of it must be enforeced. Education as to implications of this seaweed must be communicated to the public.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

We have to do our utmost to protect all ecosystems that have high ecological and cultural value.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

The members of the council will have the knowledge and experience and can continue with the momentum. To start with new people and having to train them from scratch could end up being costly and losing the initial advantage gained.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

Not sure what the research has concluded and if banning of motorised boats will help prevent the spread of freshwater pests.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, definitely. Look at more native water resilient plants when planting areas, trees that grow fast to create forest canopies and remove exotic pest plants. The highways are littered with invasive plants.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Yes, I see no mention is made of any control plan of exotic bird species. It is obvious and very visible how social species of exotic birds like rock (feral) pigeons, Indian mynahs, starlings and sparrows have increased drastically in numbers. Due to their social behaviour and nature of being in pairs and more, their breeding is prolific while competing for the same food sources as our native bird species. Our native bird species generally lead solitary lives, except at mating season.

Let's protect our environment: early consultation #325

Tell us why

As much as it would be great not having cats moving around very hard to stop without caging them and that's is not appropriate

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Will need vet checks at time and need to move off/on island

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

With in reasonable amount and volume of cat limits per household to be adhered too.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

No cats on island that get to pest free status. Community's on these island should lead this call.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Free traps and tools to targeted areas for residents to manage and grow the areas when successful

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

As a boat owner I'm keen to see the weed spread reduced as this is an easy start all can do with no cost.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

So far the controls are to enforce CAN or close down access to areas for now a number of years with the weed still growing so it would suggest the boats anchoring if clean before moving are not the problem. I get that the first stage needed to be a close down but we need a more practical options or as it's spreads in the current we will have the whole gulf shut down to boats

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

I'm not a user of this lake so unfair to comment

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

I don't believe we can stop natural events from spreading caulerpa as it reproduces by stolons and fragments when broken up in heavy seas etc. and then carried in tidal flow. Climate change doesn't have any real effect on this in my opinion apart from frequency speeding up the spread.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Water spread invasive pests come global shipping and there bilge water / ballast etc, more controls on discharge could help.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Too many

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

They come to the neighborhood and pee

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

It's better not to reapply for a personal pet cat

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Keep them at home

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

That way, we can protect our nature

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Because protecting nature is much more important than leisure

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I need constant enlightenment because I don't know exactly what I'm going to do to protect the environment

Let's protect our environment: early consultation #540

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

We need to replace the fast-changing ideal climate

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

The camper van used in New Zealand is said to be unavailable in Australia. The New Zealand camper van is said to be high because the entrance location is low, so it is easy for rats to enter, but Australia is easy for lizards to enter. As such, it is thought that various sanctions will be needed to protect our clean natural environment.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Because that's how we can protect the sea

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #550

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Support

Tell us why

Pregnancy is so short that there are so many cats

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	
All of Auckland	Support

Tell us why

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	
All of Auckland	Support

Tell us why

When I go out for a walk at night, a cat on the street catches me. It's very scary

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If the cost of surgery is not fair, you should not raise it

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Keep the cat out of the house as much as possible. Cats are required to pay taxes like dogs, and cats that have been neutered can only be raised by introducing a tax exemption system.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

When you go to an island where there are no harmful animals, you should check the car carefully to prevent the inflow of harmful animals.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

That way, New Zealand's nature is preserved

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Because our conservation is more important than recreational activities

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

When you go to the mountain, you will clean the bottom of your shoes more, and if you have a private ship, you should pay more attention to cleaning and cleanliness on a regular basis.

Tell us why

It would be nice to take care of the cats in all areas at home

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

People who can't afford neutering surgery want to give up raising their cats

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Keep a cat only in the house and in the garden

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

When searching for an island without harmful animals, thoroughly inspect whether the harmful animals are in the luggage or car before loading. Observe the necessary rules on the island

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

The ecosystem on an island contaminated from harmful marine species is completely devastating our lives, so we actively support the introduction of regulations on the elimination of marine life

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why
You have to prevent certainties.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

For those who enjoy motorboats, it would be nice to do it in a different way or in a different place. I think biodiversity protection is more important than recreation

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Protecting our natural environment is not only the current Sademann's job, but also a problem that must be solved for the next generation, so I hope it will be well followed by an efficient system

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

To protect the ocean environment

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

That way, the nature of New Zealand is preserved

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

This is because environmental protection is much more important than leisure

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I know, but I keep forgetting, so I need constant enlightenment

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Support

Tell us why

I encourage birdlife into my property to nest and feed, with all of my garden areas and rear yard paths constructed only in mulch and bark. I have a cat trap which regularly catches neighbourhood cats, which I douse with water and release. This often results in the cat deciding against hunting in my yard in the future, but not always!

Any intervention that stops the destruction caused by 'domestic' cats as well as feral (which we do not encounter) is a step in the right direction.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

The problem is too important not to do the job properly, once and for all.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

My comments must show that I support the council's thinking in getting to grips with this nationwide problem. All too often, when in remote locations, where I am often, I see feral cats and, when legally allowed, I eliminate the problem.

I believe that cats have now become the number one preditor of native birdlife, and this must be reversed.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Way above my pay-scale!

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It is such a small task to do, with large consequences. Yes, I know that there are large numbers of lazy/entitled people who will ignore any directive that may help save what we have, but that should not stop authorities from highlighting the problems to those who will listen - then enforcement is the key.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

I think that my previous answer covered this.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region’s lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

No brainer!

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

Unfamiliar with the lake, so not qualified to comment.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

I do not like the term 'prioritise' as this often means people neglect to look at the broader picture, especially when it comes to funding.

This can be seen happening in other council functions now, where staff with a particular philosophy override the will of the population, resulting in people turning against the council, instead of working with them.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

No.

Let's protect our environment: early consultation #641

Fence off native habitats.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Cats should be left at home to protect native habitats.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Poverty in parts of Auckland is seeing many unwanted pets dumped at local parks or dairy stores.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Desex. Microchip. Register.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Ban humans other than DOC from native habitats for 10 years.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

All boats should be banned from protected marine reserves and areas to anchor should be restricted.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Protection from humans is needed.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why
So many lakes are polluted.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Motorised boats damage the native habitat.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

No

This feels like an easy win to promote responsible pet ownership and for council to know about cats across the region

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Other

Tell us why

This is a hard one. I have 2 cats and I wish I had contained them right from the start, because it's so much harder to implement now (they are 5). I think there should be support and resources on how to contain cats on the property while still promoting their wellbeing. Also things like catios are expensive and hard to do when you live in a townhouse. I don't know where I could put one.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

So there are no unwanted/unneeded feral or pet cat population explosions. Cats are prolific breeders. Only breeders should be allowed to have special licenses. There should be no cat breeders on any of these islands though apart from Auckland. Just no breeders on the smaller islands. None.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

So they can be returned to where they should be - on their own property. So the owners can be responsible for any damages or carnage that their pet has caused. So people cannot steal or lure them from their residence and break the owners hearts. This happens on the mainland.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

So they can poo or pee on their own property. So they do not hurt other cats or wildlife or spread diseases. So they do not get hit by vehicles or be used as dog fight lures or other cruelty such as target practice. Cats are really difficult to contain to a property at the best of times so this will be challenging anyway.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Why take cats to other islands? There should be bans on introducing any cats to any islands now or later. No more cats on these islands at all. This is where we have failed. Unless there are catios or enclosures for cats, they shouldn't be allowed on any islands. None! Never. Sorry but are these smaller island people not caring or something?

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Apart from not affording the operation, maybe if you cannot afford that you cannot afford to keep a cat. Why prop up people who don't seem to respect the natural environment anyway. Have an amnesty for the first year for free desexing then it's on the owner. Big fines.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

All cat owners should register and desex their cats in the first instance and report any feral cats seen. More education on how to build cat enclosures or catio's. It is really hard to keep cats contained on a section anyway. Fines would possibly be a deterrent for irresponsible owners too. Birds and bees are pollinators and need to be respected. Not keen on magpies, mynahs or overpopulation of pukekoes or domestic racing pigeons. I have seen pukekoes take native species chick's and eat them too.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

More public education and awareness. Maybe more rangers/cameras on these islands to monitor these areas. Pet enclosure plans widely available online or from retailers.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

So we do not encourage pests, visible dirt, seaweed and animals before moving to a new location. Going to a new destination maybe a new check and paperwork needed for entry. Vtnz can impose a new money maker on this area? Should also include canoes and kayaks and jet ski's. Jet ski's could harbor invasive species due to their propulsion units not being properly cleaned.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

We pay enough taxes and our ecosystems need to be protected as there are some really really thick and selfish people out there who do not care about pollution and environmental issues. Some are not aware and some don't care. If you are serious then all vessels need registering and owners too.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

By education, patrolling and caring for these areas we can all enjoy a better experience at these spots now and in the future. Register vessels and owners.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

Is it just motorised boats? Surely any vessel like jet ski's (probably the biggest culprit too. Jet ski's could harbor invasive species due to their propulsion units not being properly cleaned), canoes and kayaks could very well also be a catalyst for invasive spread of pests? Can there not be a dipping/washdown area with decontaminatant made for entry before and after being in the water? Once again maybe a check at vtnz before going to a new water source. Paperwork to prove. Sorry but it should be a privilege to use our lakes and waterways if we are serious about keeping waterways clean and unpolluted.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

There needs to be an awareness for all involved. Education and having sensible plans in place would be helpful. Careful monitoring by cameras?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

God forbid we ever get snakes here that are from any overseas destinations. I know we can get some sea snakes. Ban exotic species except for zoos. That means parrots or tortoises. People need special licenses like only the zoo should be allowed.

Let's protect our environment: early consultation #701

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Responsible ownership is beneficial for cats as well. This helps reduce the likelihood of cats being abandoned.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Same as above.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Unsure

Tell us why

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

If they cannot afford to desex their cats, they should not have pets, as they may also struggle to provide proper care for food and health-related needs due to a lack of money.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I believe responsible ownership is the solution.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Continue with the rest of the islands in the region.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #805

Cats to have chips that keep them from roaming and marking their territory..and cat night fights are common around here!

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure

Tell us why

Why take cats to any island?

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If they can afford to feed and maintain a cat then they can desert them too.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Stray cats (if caught) that are unregistered or not chipped should be put down after 2-3 days.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Besides stotes and cats, wild dogs may also need to be limited by areas, with â€œradar chippingâ€ .Our farm had packs of city dogs come and devour sheep!

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

Overseas vessels may need to be bottom cleaned, but local boats, nah!

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Skip the â€œculturalâ€ side, we all need to own the issues on the shoreline.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

Why all the effort to â€œcontrolâ€ for these issues? Just 10 years ago the local beaches were raped of all pippi and cockles! No one stopped the buckets loads taken by new immigrants, not a fisheries officer in sight!

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

Make the cleaning of the bottoms a mandatory before entering these lakes, with a â€œwash sightâ€ at the boat ramps.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Nah, the climate is not the issue, itâ€™s the mess man leaves in pillaging the places.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

The ocean currents could be the first line of clean up, aerial spray the sea currents that bring these pests to NZ waters.

Topic Cat Management Proposal 2.11.24

Firstly I wish to state that for the last ten years I have spent $4 per week on feeding my local seagull population with my vets advice .

I live beside the sea and for many years watched dog walkers setting or rather running there dogs on the gulls spread out across the wide expanse of the beach.

This constant cycle of one dog owner after another for hours on end interfering with the birds feeding drove me to take action.

Many gulls black backs,red bill and black bill are missing feet and a leg etc due to fish strike and are often trying to raise chicks.

I replace the energy loses by the constant dog harassment.

Oddly, the problem has almost dissappeared as the dog owners realize they are being watched .

Secondly Ive been a cat owner for 55 years, and a responsible one with desexed and chipped cats.

lastly, I worked ten years in a virus laboratory as a medical technologist after completeing a BSc in Science graduating in Chemistry, Biochemistry and molecular Biology .

So I feel qualified to put forward my views on your cat proposals.

It wont work.

Personally I dont care what you do in 95% of the rural or conservation areas but even I draw the line on you telling me how to live with my family members and cats are my family.

Given thousands of people who already dont do the right thing will continue to do so why should I make an effort to cage my animals on my land?

My greatest fear is the mindless teaching of our children that its ok to trap and kill so long as it fits the woke narrative.

Cats are active hunters from about 2 to 4 years of age and in my experience they take mice ,rats and non indigenous birds such as sparrows this could be because in the city we have few natives.

My first hand experience with native bird deaths is seeing them kill themselves on glass windows in holiday resorts where there is a large population of native birds.

I note following the Australian cat cull that they had a mouse plague!

Bad science,done by people with vested interests ?

I could tell you stories about the characters of the science professors I met in my time as a student but that would make the 6pm news!

Auckland is a cosmopolitan city full of concrete and glass and traffic.

Cats that wander are invaribly run over.

Birds freeze in the winter due to cold frosts brought on by concrete temperature extremes and microclimates and a lack of forest coverage providing any shelter ,in short citys are for people and there pets.

Cats and dogs have co habitated with humans for thousands of years and for our natives to do so without substantial loses is rediculous.

As stated, protect your conservation areas but leave my city alone!

I will not change my lifestyle and im a bird lover!!!!!

What chance for the average punter to barricade their homes?

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Tell us why

Conservation or rural forestry etc go ahead slaughter /torture/poison but leave cities and suburbs out of it.

If you want to see a tui go to 95% of NZ where the environment is contusive to life .

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Yeah ,print some more money! oh increase rates.

People need to take reponsibilty for there own actions and lifestyles and stop asking others or the govt to fix everything.

see my first reponse! I saw a problem, and I fixed it!!! I walk the talk!!!!

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Put a bell on your cat as John Keyes use to say!!!!

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Where did this number come from2050?, who suggested it?; just keep going and do your best but you need to bring everyone along with you including people like me and Im actually a proven member of the bird lover pact!!!

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Already wash the family boat .

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Other

Tell us why

Need more information on what your talking about regaring this policy and as above I have my fears with mission creep!

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Other

Tell us why

Need more policy data to comment.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Other

Tell us why

Need policy data and possible mission creep eventualities!

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Need more policy information to comment and potential mission creep.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

My feedback today is largely concerned with the statement below.

"We are also seeking your feedback on whether

we should use rules to require responsible cat

ownership measures in certain circumstances,

in addition to our current approach to

promoting responsible cat ownership."

I already do everything and have always done things that would come under the guise of "good cat ownership"

In protected areas for sure as this prevents damage to wildlife populations

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Don't really understand the purpose of this question

why would you take a cat away from it environment or travel with a cat

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Impact of not doing so on the environment is a greater cost

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Provide more rodent traps to more domestic households more often e.g. be present at Local markets more often

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

The only way to help eradicate the problem and prevent the spread of noxious pests and plant life

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Many households do not know what to do or do not recognise what a noxious species is. It should be handed over to the specialists

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why
No reason not to as we are trying to be pest free so there definitely needs to be more widespread controls

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Oh the problem is under control rules must be put in place to get to that point

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes that goes without saying. Not doing anything or create larger and more costly issues.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

More education n schools and community groups so people are more aware of what to do. Education provides awareness on what the average person can do to help. Empowering people to act will help to manage these problems

Let's protect our environment: early consultation #974

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

With the exception of registered and licenced cat breeders.

They should be allowed to keep desexed cats if they are licenced. They are usually reponsible and these cats are enclosed in Catio's and are not allowed outisde.

Have registered and licenced breeders only will stop back door/back yard breeders selling cats that are desexed. (All registered cat breeders will only sell their cats once they are desexed).

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

So that if a cat is accidently trapped and it looks domestic it can be returned to it's owner

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

It's just not practicable. They are cats. It's like trying to stop pigeons or birds coming onto your property. You just can't..!

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support

Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

For years we have visited islands and taken our cat(s) with us.

I really don't think who ever is thinking of these ideas really has though this through...

It's not like hundreds of cats descend on the islands at holiday periods!

On occasion you might see a cat on board a boat -we have been boating with cats on board for 35 years and never lost a cat over the side. Boats are also bigger than they used to be years ago...less likely to lose a cat over the side...

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

It generally the people who can't afford it that don't bother...

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Yes. Get rid of the birds and wildlife.

Where I live - I see more harm done to local bird and wildlife by dogs not on leads or roaming than cats.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Make all dogs be put on leads unless in a designated dog walking area.

Dogs not on leads are often hindering the beach and birds in our local area - not to mention them chasing people and defacting on the beaches and in parks (and owners not picking it up)

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

We are boaties and this is just something you always do anyway when practical (and if weather allows).

However if it's howling 30 knots and you have to move your boat, you are not going to hang over the side to wash you anchor - as that would just be stupid and dangerous..

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

The problem you have is overseas cruise ship/passener liners and overseas fishing vessels.

It is not small overseas crafts such as yachts causing the problem - as we cannot practically sail with a hull full of seaweed/barnicales.

No-one would leave say Australia or Fiji as an example to sail to NZ with a dirty hull - it is just too slow. We (and I could safely speak for all offshore sailors here) would always do a hull clean before leaving for an offshore ports.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Introduced carp and other fish - definately need to be controlled in their numbers

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

Again a stupid idea.

Maybe the council could supply wash down station. These are often seen at jetty's overseas. Then the boats are washed down prior to leaving the area.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

I'm not sure it should be prioritized by it needs to be taken into consideration.

I do note the effect on home exteriors by the storms and 10 months of driving rain.

Council should also push home maintenance and exterior house washing - we have personally seen environmental damage to weatherboards due to lack of maintenance over winter, with the appearance of mould/pollens on the exterior of houses causing significant damage.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

As above - if airbourne mould and pollens can damage the weatherboards on a house - it can also damage surrounding properties and foliage.

Council should publicly encourage more regular exterior cleaning of homes, especially during winter months.

Let's protect our environment: early consultation #978

Tell us why

It is the best way to manage and control their population

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Support

Tell us why

In urban areas yes, for easier way if tracking them in case they are lost

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Other
Kawau Island	Other
Rakino Island	Other
Waiheke Island	Other
Within 1km of known threatened species habitat (see map 1)	Other
All of Auckland	Other

Tell us why

It's impractical to restrict certain species of domestic animals within owners boundaries or fences.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Rules should be applied equally to all regardless of residency otherwise it becomes difficult to enforce and can create unnecessary consequences and confusion

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Not everyone with pets have readily available money to pay such an added cost

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Funds should be set aside to euthanise all ferral cats

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

too many things on the go at moment so I am not supportive of this

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1119

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

On islands and in certain areas, it is necessary to control the cat population, as cats can harm bird species.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Hunting, roaming, and social interaction are fundamental aspects of feline behavior and instincts. Restricting cats to an indoor-only environment may not adequately support these natural behavioral needs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats adapt to the local conditions, and with the care of their owners, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Controlling the invasion of non-native species is crucial, as inadequate control can lead to catastrophic consequences. Examples include the introduction of bighead carp and mosquitoes from the United States to China, and the impact of Chinese carp in the U.S.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Invasive species disrupt the local ecological balance and can cause significant damage. It's essential to prioritize timely detection and management to prevent potential disasters.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1135

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why
To protect the lake cleanly

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1242

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

It's the only way to get cat numbers down to a manageable number.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This way feral cats can be targeted and the domestic family cat will be safe

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

If a dog wanders onto your property you can call dog control but at the moment cats can go anywhere and kill any wildlife on your property. They can also use your vegetable garden as a toilet which is so wrong

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Too often a cat visiting any of these islands can go missing and then kill any wildlife that has managed against all the odds to survive.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Better to do this and actually get on top of this problem of unwanted litters of cats.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Restrict the number of cats that anyone person can keep in their home. You are only allowed to keep a couple of dogs and the same restrictions should apply to cats.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Employ more people to help eradicate pest species. Keep using 1080 in appropriate areas such as the Hunua Ranges

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It's going to be the only way to stop the spread of this seaweed

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

If we don't we will end up losing the few native species we still have left.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

To help stop the spread of invasive species to more of our lakes

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

If you don't it is inevitable that unwanted species will invade more of our precious places

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1288

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Tell us why

No cats should be taken to offshore Islands

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

If cats are caught and have no registration then they should be taken to SPCA and not released until the owner is prepared to register them.

I love the birdlife around our place and want to encourage more.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

All cats should be contained on the property, so any cats found outside the property the owners should be fined.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

I think Auckland council needs to be more flexible rather than just blanket bans. In some circumstances people shouldn't have to desex their animals. For examples breeders. I just feel Auckland council is using its size to continuously take away rights of the people who live in its catchment. Cats are also just a small part of the problem. Loss of habitat is the number one issue and going after cats is not going to bring wildlife back if there is no food or space for birds to live.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

If animals are lost or hurt important. Also helps ensures not accidentally mistaken as feral cat.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

Cats should not be punished for having poor owners and having a life where you have always gone outside to now being restricted to only indoors will be quite harmful. I'd be more open to banning cats going outside at night.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support

Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Who is going to monitor and enforce this!?

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

I paid for my cats to be desexed, why should I have to pay for others?

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I get very annoyed with the council constantly taking away rights from the people who live in its area. New Zealandâ€™s native wildlife is so fragile any predator was always going to cause issues. I support desexing but not making it compulsory, I also think cats wondering out at night is not good but unreasonable to make a complete ban.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Itâ€™s never going to happen

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

Impossible to keep all cats on small properties. By their very nature they roam. If cats are registered, desexed and vaccinated, the majority of problems are already minimized. Domesticated, fed and homed cats are less likely to go out chasing protected birds.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure

Tell us why

Agree in principal to not allowing unregistered cats on the island. However, there may be isolated incidents where domesticated cats on leash who pose no threat should not be denied access. This may be on an individual permit request basis.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

It's a cost that should decline over the years if done correctly. Partner with local vets and subsidize them to do an x amount of pro-bono desexing a month. Get the local version and spca to collect data on these numbers to monitor stats.

Over a 5 year period, there should be a notable decline in desexing required. And then eventually settled to a 'normal' number.

If at any point the number spikes or starts rising, especially in a particular area, you could proactively focus on that area (educational mail drops, spca visits to catch/mark and desex, etc) to find the root cause (a new group of wild unregistered cats, etc) and limit a potential epidemic.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Other countries have the spca and local vets team up to desex all cats in an area. Then they mark/clip the ear of any feral/unregistered cat to show it has been desexed and no longer poses a threat of having more litters.

Plenty more ideas and we are passionate about this topic. But not sure they are even read or if anyone will do something about it.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1544

Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

People who can't afford the cost of neutering should give up raising cats.

I'm absolutely against using tax money.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Cats are kept in the house and in the garden.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

When looking for an island free of pests, we take great care to prevent pests from entering your luggage or vehicle by thoroughly managing your luggage before loading it.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Controlling invasive alien species in marine ecosystems is essential for us and future generations.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

There is a need to actively promote the spread and prevention of freshwater species. In particular, careful consideration is needed for those who use marine sports.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

1. Prohibit the use of motorboats on Lake Tomarata and encourage non-motorized recreational activities.

2. Protecting biodiversity is important

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, climate resilience - I absolutely support it.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

It is important to inform the community about various measures to protect our natural environment from the influence of alien species and help them put them into practice.

1. School

2. Community organizations - each ethnic group's NGO

3. Library, swimming pool, local board newsletter

Knowing government policies and putting them into practice by individuals is important!

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Desexing cats is essential for their welfare, preventing overpopulation, neglect, and hazards like traffic accidents, while also protecting local wildlife

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

If microchipping cats- were made mandatory, only those who genuinely want to care for them responsibly would keep them. This could help control the cat population.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

To protect threatened birds and wildlife from cats

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If owners cannot afford to desex, they must give up keeping a cat.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Whenever possible, keep cats indoors or within their garden.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

When visiting pest-free islands, it is essential to follow the required rules set by the island.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Protecting our Moana-- it is so important!

The ship owner must comply with regulations to safeguard our oceans.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

It's crucial to protect our Moana for us and our future generations.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Preserving freshwater marine species is invaluable; therefore, motorboats would be prohibited on Lake Tomarata.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, prioritizing increased climate change resilience in managing the natural environment is essential.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Every individual must take a part in protecting the environment.

Not use plastic - single-use containers.

Practice proper recycling and waste separation.

Reduce excessive packaging, especially plastic, when producing goods.

3Rs: Reuse, Reduce, Recycle.

It is important to raise awareness about the significance of protecting our environment and to educate people on practical actions they can take and implement in their daily lives.

Let's protect our environment: early consultation #2296

Tell us why

Let's contain the people who wrote this ridiculous proposal to their own property and see how they go. Anyone who has ever owned a cat in a house in Auckland knows that doors and sliders are open and left open at some point during the day 9 months out of 12. So, how are you planning to containing a cat indoors exactly? And if the cat is out, how do you explain property boundaries to a cat? Anyone responsible for this ridiculous proposal should be fired effective immediately.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

This makes little sense. Cats usually stay at home when their owners travel, but on the rare occasion you need to travel with your cat, why should your freedom of choice to travel with your pet to be restricted?

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

If you mandate something that wasnâ€™t required before, you should be the one to pay for it. And if you try to raise rates because of it, we will vote you out!

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

no

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

You canâ€™t control rats and mice without cats, let alone eradicate them. Encourage cat ownership!

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

not my area of expertise

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

not my area of expertise

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

not my area of expertise

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

not my area of expertise, but in general I do not support banning something that is perfectly normal now.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

NO - stop wasteful spending

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Exotic means rare, and rare means infrequent, therefore, not worth spending money on since the occurrence is uncommon. If you increase rates under this banner, we will vote you out!

Tell us why

Cats are currently free to roam where ever they like and their owners have no idea where they are going and what they are doing. This is especially true at night. These roaming cats are breading uncontrollably and increasing in unwanted numbers as shown by the amount of unwanted cats dumped at places like SPCA. If all these roaming cats are prevented from freely breading we will quickly keep the numbers down to wanted cats only and thus save millions of our birds life and small reptilians annually.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location

Tell us why

Cats are currently free to roam where ever they like and their owners have no idea where they are going and what they are doing. This is especially true at night. These roaming cats are breading uncontrollably and increasing in unwanted numbers as shown by the amount of unwanted cats dumped at places like SPCA. If all these roaming cats are known they can be returned to their owners and kept out of our natural bush and we will quickly keep the numbers down to wanted cats only and thus save millions of our birds life and small reptilians annually. The cost of registration and microchipping will help to pay for the control of cats that are currently killing millions of birds every year.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats are an introduced predator that is reeking havoc on our native bird life and small reptilians. The only way to protect these creatures is to keep peoples pets on their own properties and under control just like we do with pet dogs.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

We do not need more cats on our beautiful islands that will pose a risk to our native bird life and small reptilians.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If you cannot afford to desex your cat, you should not own a cat.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Cats need to be policed just as dogs are in Auckland and the rest of NZ.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

No.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

A good way to reduce the spread of unwanted species being introduced to other areas of our waterways.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

Those boats that use that lake are not all going to be using other lakes and should not be penalised.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

No. Climate change comes and goes and has done for thousands of years. Nothing man is doing or can do will change this fact. Climate change is a TAX and money making lie.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

No.

Let's protect our environment: early consultation #2348

Tell us why

Causes lots f behavioural problems for cats. Cats catch rats and mice and kill them. At least mine do!

I'm not an avid fan of all cats inside as that comes with so many behavioural problems. I wouldn't own cats if they were inside only.

A positive side to my cats going out is that they catch rats and mice and ultimately kill them. Not a pleasant experience for us to wake up to a dead rat in our kitchen but that's one less rat. And there are rats around as our neighbours have chickens.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

I don't see tax and rate payers who like me who pay for their cat to be microchipped and desexed have to pay for the other people. My opinion is these people should not have cats, dogs or any animal if they can't afford to look after it properly. If they did, you wouldn't have this problem. Its like road deaths, you never get rid of idiots or stupid doing dumb things.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Have a means test to ensure the people can afford to look after the pet properly.

To say everyone must lock their cats inside after this animal is used to being free to be outdoors. Imagine the cruelty to over heating animals locked inside on hot summer days as people can't afford to running air conditioning due to high power costs.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

There are enough cats already. Every cat that is not part of a registered breeding facility should be desexed. This should be enforced NZ wide.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Because that's part of responsible ownership. Having to do this makes owning a 'pet' something that needs thought and not something to do on a whim.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

To protect the cat as well as the wildlife. Cats can live perfectly good lives when contained to their properties, just as dogs can.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure

Tell us why

I'm not sure why any cats should be taken to offshore islands at all?

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

This will enable the enforcement of desexing.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I think working with rescues and community groups to TNR cat colonies and feed those desexed colonies will help to reduce the devestation on wildlife.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

No

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

To stop the spread of unwanted pests.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

No

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2431

Tell us why

Cats can produce multiple litters and this should stop out of control breeding which could lead to kittens being released into the wild.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This is a requirement for dog owners so cat owners can now be accountable.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats roam, they fight with other cats, they poo in other people's gardens. Cat owners have a poor disregard for others in their neighbourhood.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Cats stay at their one residence, how can wildlife be protected in other places.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Happy to support as this small cost will have major benefits down the track to reducing feral cat management costs.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Make a catio a legal requirement. All cats to remain within the boundary of their residence.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Use genetic engineering to make all pests infertile.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It's about being a decent member of society. Boat owners have a duty if they want to use the water.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, we need to move to more electric options. Remove diesel powered vehicles and equipment as much as possible. Wilding of some park areas would be good.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2435

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

it is the easiest way to ensure no unwanted population growth and allows pet ownership at the same time, also it puts the onus into owners court be encouraging responsible pet ownership

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

as above, these messures encourage responsible cat ownership without further restrictions

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

it makes sense close to a vulnerable habitat but not as a blanket rule as it would put unpracticable restrictions on responsible cat owners with desexing and microchipping rolled out at the same time

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Support

Tell us why

why would you move a non resident cat to these islands? get a house sitter or take them to a cattery

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

generally i would say no to this, if you cannot afford a pet simply do not have one, but then again if it helps reducing the non desexed population as well as let people have their companion animals maybe in would help in cases of extreme hardship

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

desexing and microchipping should be a rule but no further than that except restrictions of movement on reserve islands or close to native wildlife

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

keep up the trapping and education efforts, i think education is key, the results will speak for themselves

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

is easy to do and works in reducing the spread of weeds

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

as above

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

do not like the idea of banning activities too much

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

absolutely, climate change is here and we need to be ready

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2441

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Support

Tell us why

If responsible cat owners all desexed their domestic cats there would be less kittens and a more manageable responsible ownership of well fed, trained domestic cats. Breeders of cats should be licensed but not all domestic cat owners.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Support

Tell us why

Microchipping is a responsible way of identifying troubled, trapped, injured or lost pets.

1C. All domestic/pet cats must be contained to their owner's property

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Do not support

Tell us why

Cats natural habit is to have the enjoyment of the outdoors. Well fed cats don`t wander. At any time of day I pretty much know where I could look and there are my cats.

I feed my cats 3 times a day and like people we only scavenge in the fridge when we are hungry. My cats don`t stray and wander because their bellys are full and they are content to roll around in the sun.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island Do not support

Tell us why

Cats should be allowed to travel about freely no matter where we live across NZ

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

User pays like everything else. If you can`t afford to desex a cat how can you afford to feed and care for it in the first place. If you cannot take care of its health responsibly then don`t consider having a cat until you have a good job to feed and support it.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Yes. Cats will kill birds etc if their natural food sources are removed. Look at a flower. You cannot create this. Everything with a heart beat was put here for good reason. Unset and smash these disgraceful traps and remove the poisons such as 1080 being spread wide and far even with drones now. With the issuing of more and more building consents urban sprawl is the cause of less birdlife and wildlife around areas of NZ. We can`t stop progress. For every balcony given a Building Consent, issue a potted flax or a potted pohutukawa. They will only grow to the size of the pot anyway. Tui and native birds will stick around anywhere if the FOOD SOURCE is there in abundance. Even in a built up area alive with natural habitats of pests. Nature always will take care of itself. When you unbalance the wildlife that live here of course they will upsticks and move to the country or food source. They haven`t gone because of the cats. I live in an area where they pride themselves on trapping and poisoning. Its not the answer. My cats sit happily on my deck and watch the abundance of tuis in the flax. They don`t race out and scoff them because they are fed. Let the cats take care of the mice and rats, and the hawks take care of them too. Start to understand what is happening here. Council bought in food waste bins and hard rubbish bins, so the gannets around Auckland headed for the spoutings and trees and plucked chicks from their nests instead. Why because they were hungry. Trap and poison all this wonderful abundance of natural food and you will cause disaster. For one a march of snails out in force because all the dear little hedgehogs are gone. My Dad and Popa, always went shooting and bought home an abundance of pheasants, rabbits and ducks. Nothing was wasted and we had the best home made feather eiderdowns and pillows. Best food on the table and carcasses for ground bait to go fishing. There was no waste. Dad would feed the stray cats that hung around the fish smoker all night a fish or two that had dropped in the bottom over night. There has always

been lots of cats about and getting Claws out for them is hideous so is locking them up in houses. They are not the problem. It is time to rethink, replant and release. My Uncle had a massive farm he always encouraged the stray cats. They hung around spying towards the cow shed. My uncle would give them a big bucket of cream off the milking vat every milking. That was the stray cats reward for keeping down the number of rats, mice, rabbit burrows and vermin pee getting in the hay barn. Doing things the natural way was rewarding. We can share with all these animals they are just hungry and going about their natural business of finding food the natural way.

I heard 1080 was coloured green to deter birds from eating it. I had a cockateil about 30 years who loved greens and thistles. If pests pick at the 1080 why believe birds wont. Just a thought.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

The thought of an empty predator-free place saddens me. How empty and silent it will be. So sad indeed.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Other

Tell us why

I feel all fishing folk try to avoid contaminating our vessels or sea.

My greater concern is poison run off into the sea from sprays and in stormwater.

If we don`t mess with the sea eggs and natures balance on the sea floor it will take care of itself as always. Start careless farming beneath the water and removal of this natural species and that natural species you will create one hell of an unbalance as on the land.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Do not support

Tell us why

The only species that is so invasive it needs control in my mind would be mangroves. These prevent water flow and cause smelly stagnation and build up on contaminants.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Do not support

Tell us why

Come on if you abuse it you lose it. Common sense. We should ALL be responsible for our beautiful streams, lakes and rivers not the Council It takes more than a council to take care of our beautiful natural places. New Zealanders should all care for it.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

Lakes should be enjoyed responsibly by all.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Deal with events when they happen and we can see the pests and diseases there at the time. It may never happen.

Improve stormwater collection and run off responsibly

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let nature take care of itself. Less interference.

Put the Claws away for Cats Sake. There are so many elderly folk out there living lonely this Christmas. thankyou to all those warm hearted purring moggies on their knees keeping them company. Think about it. It is not all about killing and changing its about taking time to enjoy the little things. Look at the positives and work with the negatives for a natural result.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

We have to get serious about cats. They are apex predators and do enormous damage to our native species -- birds and skinks especially. They also spread toxoplasmosis. Pet cats should be kept indoors -- they do so happily in places like New York City. People should be able to own only one, max two cats. "Cat people" will protest any restrictions on their pets, but I believe there are more New Zealanders who support strict controls on cats. NZ has one of the highest cats-per-capita rates in the world, which is shameful, considering the vulnerability of our native birds.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

See above. I believe cats should be banned altogether on Aotea, Kawau, Rakino and within 1km of known threatened species habitat.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

See above.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

As above, I'd go further and have cats banned from most offshore islands.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

It's a good investment in nature. And people should not be allowed to own more than one or two cats.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I understand people's attachment to their cats, but they'll often say their cat doesn't catch birds. Yes, it does. And it doesn't catch mynah and magpies! New Zealanders have to understand there are responsibilities as well as rights in having pets that are also predators. The council suggestions re desexing, microchipping etc are more than reasonable.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support all efforts that get us closer to being predator-free. We can all do something -- have a rat-trap in the yard; plant native trees that feed native species; sign up to Forest & Bird, etc.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It's a fair and reasonable rule.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

In Howick Pakuranga there were notices a few years ago about how to identify invasive species such as moth plant -- and I think you could take them to collection sites. We can all do something to knock back invasive plants and pests.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Desexing will eliminate the current overpopulation of cats. However any cat that is not desexed should not be destroyed because its owner has failed to do so.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

In an ideal world this would apply. The cost of microchipped/registration is often beyond the reach of owners and currently being used as an indication of the cats status...so called owned/unowned. This may cost the cat its life again because of human failure.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

This is ridiculous! It is not in the cats nature to be contained and is a pet owners choice. Cats pose not danger to people and the onus is on the owner to provide an environment they are comfortable with and can afford. Cats have lived in NZ for years being indoor/outdoor companions. I still see birds everywhere...and people benefitting by feline interaction. This stupid leaning is causing a total lack of empathy to felines.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support

Rakino Island	Support
Waiheke Island	Support

Tell us why

I agree but would add if people are holidaying with a provision to take their cats and have them with them their family it should be allowed. Cat need time to adjust and it would be to the detriment of owners and the animals to just open the door in an unfamiliar environment. This should apply to dogs as well.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Absolutely!!! This is the key to decreasing the current situation. There is definitely not enough support for desexing or microchipping. I would also suggest funding for microchipping and compulsory registration with NZCAR by council at the same time as desex.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I have commented as above with the suggestions I feel will humanely help. I also feel mobile desexing units, funded, will encourage spay/neuter as many people cannot transport their animals safely or obtain/pay for vet appointments. Support rescues. support TNR which is know and proven to work, support owners. Increase education and funding for desexing - please do not follow Australia's heavy handed, inhumane approach. Cats are an important and established pet that are beneficial to people and have recently suffered at the hands of uneducated feline haters. Recently reports of wandering dogs killing cats in the Auckland region, which is very much on the increase, have received hideous comments that the sad loss of pet cats is a good thing. This is unacceptable and shows a sad turn in society.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I feel ideally the "protected" islands should be predator free but cats should be taken with humane removal only. Live trapping when and if necessary. Not euthanasia because cats are not microchipped or act our in fear when they are trapped. This is not a time judgement can be made through behavour.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Proven to eliminate the spread.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

Recreation can be enjoyed if managed.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

I think climate change is highly exaggerated and cycles are what we have to learn to live with.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Be sensible rather than reactive.

Tell us why

Why would this be allowed, it doesn't make sense. Protect everywhere and make the laws for everyone

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

this shows that council are helping those with cats

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I would ban cats from being outside - if you have a cat it must stay inside your boundry at all times. if it means staying inside, so be it.

Regulating cat breeders may be useful

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

help the community to trap possums and rats in their areas. Rat bait is expensive, rat traps can be too.

Difficulties arise on where to put a possums dead body once you kill it in a trap, sometimes i can trap and kill 5 a week. it is hard to dispose of unless i only trap on Wednesday night and hopefully catch over night and stick it in the rubbish

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Anything that helps with the control of these pests the better

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Anything that helps with the control these invasive speicies the better.

Go hard and get it done

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Make sense - go hard and get it done, no matter what

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Yes do it - show that it works by taking a stand and banning the boats. if this stops the problem, show the community that it works and just do it

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes i do - and i feel Auckland counicl need to start getting rid of these plant speices and animal pests on their propteries too. Council needs to set an example one we can all follow and will follow

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Yes, Remove them from you properties, sides of roads, reserves, walkways - SEt an exmaple coucnil and then we might all follow

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Desexing is the most effective way of controlling cat over population, unwanted strays and the overall health of cats.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

It is the responsible thing to do.

It will assist animal rescue centres and the Council determine if a cat is stray or not.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

It is the most effective way of looking after your cat and preventing them from being harmed, injured or poisoned.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

If a cat does not have an owner, it should not be taken to an island - who would feed them or look after them?

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

This is an essential service! I cannot emphasize this enough!

One of the reasons we have such a issue with cat over population and stray cats is because vets charge so much to desex the animals.

Many people want to do the right thing, but cant afford it.

Like I said above, desexing is the most effective way to control unwanted/stray cats.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

DESEX! DESEX! DESEX!

People cant just ignore stray cats in the community. They need to step up and help trap/desex the animals so that the colonies can be controlled.

I am a cat fanatic myself. I do not want to see the strays suffer and lead such horrible lives.

The only way to get on top of the cat problem is to desex them.

In some cases I also think humane euthanasia is needed. So many strays live pitiful lives and are sick/injured. As much as I love cats, I would rather see these poor animals being put down gently than live in the dreadful circumstances they exist in now.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Nothing other than what I have said above.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

People need to take responsibility for their boats and equipment.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Someone has to do it.

I dont even know what species are there - so if the Council can step up to make it happen, it will be a good thing.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

As above.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

We need to do what we need to do.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Not sure.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Not sure.

Let's protect our environment: early consultation #2689

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Taxes are high

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Inspect and manage the entrance thoroughly

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

The introduced marine species are difficult to control, so in order to reduce the risk of being moved to new areas

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

To protect ecosystems and endangered species

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Collective control and management are required for protection restoration

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Environmental protection is more important than recreation

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Anti-damage measures from climate change are more urgent and need to be devised

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

How to reduce disposable items and collect waste

Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

Freedom is required and cannot force the cats

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Cannot restrict the freedom at cats

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

They should not afford to look after cats

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Do not support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

If we are going to control pest, we should not have any loopholes

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

To have strong prevention regulations rather than fixing the issues from the weather events strict preventure measures

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Have smart technology in controlling pests.

Let's protect our environment: early consultation #2809

To prevent unwanted cat breeding.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

You can accompany the owner of the cat anywhere

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

If you can not pay for it, do not raise a cat either.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

First of all, clean the environment and useful possums and weasels, captured and commercialised.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

We can protect he sea from marine pollution by making strict regulations and complying with them.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Of course I think we should control our cultural values to protect and preserve them.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why
We need to control all of NZ

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

There should be adequate control that is flexible rather than full control.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, of course, the impact of climate warning on us in the future is too great.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Early education is needed from an early age and educates the whole nation through public service advertisements in various scalper media. It is important to make it a natural lifestyle.

Free neutering surgery recommended

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

There should be a lot of cats who are natural enemies

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

To prevent the inflow of outpatients

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

In order for existing marine life to survive

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

To prevent inflow to other places

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

Recommended to maintain cleanliness (boat)

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

New Zealand seems to be a culture too slowly.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I believe that the port, port, etc. are sufficiently supervised

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Keeping pets is a personal choice, but the city government needs to provide appropriate and constructive advice to animal experts to manage

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

very good

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2893

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Of course we must stop indiscriminate breeding. Many will not bother and there is no way to point at a cat and say you own this. Therefore this also means the only way to identify unowned non-complying cats is to keep them at home. So that any not at home can be legitimately picked up.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

I witness native birds mauled by cats on an almost daily basis, sometimes I witness live and can intervene. Unfortunately, cat ownership seems to be the most impactful on wildlife but also greeted by a shrug from cat owners. This is not responsible pet ownership. If you have a pet, you should be responsible for its actions and cat have been allowed free range for too long and in New Zealand this is crazy and conflicts with our predator free attempts for our mostly ground living birds.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

If you have a pet, you should be responsible for its actions and cat have been allowed free range for too long and in New Zealand this is crazy and conflicts with our predator free efforts for our mostly ground living birds - but also tree living birds. If you can't contain a cat, you should not have a cat, because you are just not bothered enough or you think your cat is more entitled then the wildlife.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

This seems obvious - I would even say they should not be allowed to visit any offshore islands where they might escape and cause havoc.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Other

Tell us why

It needs to be done but it also needs to be enforced. Large parts of the community - even those who have the means, choose not to bother. Provide financial support for those on benefits or pensions only.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

We are trying to protect our native species whilst ignoring a major contributor to their demise. That makes no sense at all. We have to stop ignoring this problem for fear of upsetting people. Pet ownership is a choice and a privilege. If you are not prepared to ensure your cat lives in harmony with our native wildlife, then you are not entitled to have one. The keep your pets on your property needs to be brought in sooner - otherwise the rest will not be as effective.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Desexing/microchipping is A priority - but keeping them on their own property is THE no.1 and only realistic way you could identify and pick up cat that do not comply. Whilst they are allowed to roam anywhere - anyone can deny they own the cat etc. So priority is keep them at home. Any cat not at home is easy to identify.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

This seems too obvious! A responsible boat owner likely already does this, and if you are too lazy, don't have a boat.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

This is New Zealand - it's our brand. It's time we lived by our brand.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

Ensure people comply with cleaning regulations to use the lake. If it is not actually possible practically to prevent the spread in this way, then perhaps we need to ban.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

We probably should consider it - but we have so much other work to do for problems that impact NOW - like restriction on cats roaming(!) we need to keep it in mind, but it will be fruitless if we don't even control what we need to control now.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

The above seem a good start. The cat issue is such a big issue and such an obvious issue we can likely get ahead of - even before we worry about exotic species - you have to knock a free big issues off - then you can focus on the other issues.

Let's protect our environment: early consultation #3081

Tell us why

Desexing prevents overpopulation, prevents dumped cat ending up in the wild and putting pressure on overcrowded rescues.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

If you are a responsible owner - you would of course want your cat to be found and returned. Owners who do not wish to do this, obviously don't care given the roaming nature of cats. Too long cat owners have been 'lazy' pet owners with no responsiblity involved in cat ownership.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Protect cats from accidents and causing accident, from becoming lost, attacked by other cats and adding to the large number of feral cat.

Protects wildlife and other land owners from the negative impacts of cats.

It needs to be NZ wide or very difficult to establish where a cat has come from. Cats roam over large areas (greater than 1km) and generally at night when their prey is most vulnerable.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Yes if it lives there (and on some island probably should not) no other cats to be introduced to islands

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Other

Tell us why

Only where appropriate e.g person is on certain benefits or pensioner. Other owners should be able to afford these things or they should not undertake pet ownership.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Bring in the 'stay on property' as soon as possible - our wildlife cannot wait until 2030

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Bring in the 'stay on property' as soon as possible - our wildlife cannot wait until 2030

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Works well in Brisbane, increase in bird life dramatic

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

These islands are even more important to protect

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Vet fees will increase as a result, as with housing subsidies.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Is common sense, rules would deal to habitual offenders

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

In our 2km walkway We have serious problems with black taro, taiwan cherry, privet, â€¦ and doves and rosellas. 5 years of 40hrs/week labour is getting under control, many native species had all but disappeared and now needing council to fund new plants

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Absolutely, sedimentation and fertilisers and invasive species rapidly degrading these

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Naive not to

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #3120

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Other
All of Auckland	Other

Tell us why

Fully support cats on the islands being desexed to help prevent any growth in stray cat populations there. I generally support the idea elsewhere - it would be nice to allow some limited leeway, e.g. perhaps introducing a 'responsible cat owner' license allowing those owners to breed kittens, even if limited to one litter. I understand that may be hard to monitor and enforce, but the alternative might see registered breeders increasing charges due to a shortage of supply in the market.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

RE: Waiheke - it depends on the islands potentially competing goals to be pest free, but given it has a reasonable population, it seems unrealistic to consider it the same as the other islands.

RE: proximity to threatened species habitat - again it seems unrealistic and/or hard to monitor/enforce differently to the rest of mainland Auckland. Assuming desexing, microchipping and registration are enforced, it might be better to rely on traps in those areas, and if registered domestic cats are caught causing harm in those areas, issue warnings then fines to the owners.

For the rest of Auckland, i think it is just impractical as it goes against cats nature to roam their neighbourhoods.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Other
Kawau Island	Other
Rakino Island	Other
Waiheke Island	Support

Tell us why

If GB, Kawau and Rakino, they should probably have no domestic cats, or at the least, enforce containment.

But i agree no-one should be taking cats to Waiheke unless they own a home there.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

I get the environmental benefit of it, but it should be an understood responsibility of owning a cat to have it desexed and microchipped.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

I can see some merit but depends on the cost/benefit analysis - can't continue to sink money into a losing battle. At that point, if it's important enough, it should become govt responsibility.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Other

Tell us why

I agree for those that have high value and usage. Again, need to consider the costs and I'd assume some seldom visited/used lakes would not be worth the investment.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Probably... yeah

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #3123

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

There is a problem with cats breeding out off control and thoughtless people letting this happen, often leading to cats being abandoned.

There might need to be some exceptions where an exemption is given in a particular circumstance.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This is very useful in recovering lost pets and also ensuring that they are safely returned if found in a trap. It is important for all cats to be identifiable as someone's pet.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

It is unnatural for a cat to be kept confined to an indoor area. To make a section cat proof would be impossible for many people, impractical and too expensive. Cats are important companion animals and ownership should not be made impossible for many by this rule.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support

Rakino Island	Support
Waiheke Island	Support

Tell us why

Any other cats might too readily escape and endanger the bird life.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

There are people who would more readily desex their pets if financial help was provided.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

People are the cause of the problem, not cats. The stray cat population is caused entirely by people who do not desex their pets, readily abandon them when they move on or dump them to be rid of the problem. Education on the care and respect of animals is needed from a very young age, so that people are responsible and caring in their treatment of animals. Then the problem would diminish greatly or even disappear. The constant publishing of a file photo of a cat with a bird, does not help. It gives people licence to treat cats badly in the name of helping birds. People kill far more birds than cats do, including the wanton destruction of endangered birdsâ€™ nests and chicks. Older cats rarely hunt birds anyway and some cats never do.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Education is the key, not more rules that many will ignore.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Would help prevent the spread of unwanted organisms.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Depends how it is going to be done. I donâ€™t support indiscriminate use of sprays and toxins.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

Donâ€™t know enough about the situation or the intentions behind the control.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

People canâ€™t be trusted to act responsibly.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Depends how this would be done. Donâ€™t know what this prioritising would involve.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Again, education is vital and keeping our borders secure.

Let's protect our environment: early consultation #3124

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Desexing is important to protect the cat from having kittens too early in their lives as well as protect them from being abandoned by neglectful owners.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

I support this because it will be easier for families to find their pets if they get stolen or lost, but also protect family pets from being mistakenly put down by the council or conservation teams, provided that those teams can be bothered to check for a microchip (something that they weren't bothered about recently when they shot an elderly man's cat down south.) On the same note, if it's required for pet owners to have their cats microchipped and registered, it should be required for conservation etc to have scanners for those chips otherwise they're the neglectful ones in this scenario.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Other
Kawau Island	Other
Rakino Island	Other
Waiheke Island	Other
Within 1km of known threatened species habitat (see map 1)	Other
All of Auckland	Other

Tell us why

I support this for the benefit of the cat living a long, healthy, safe life. HOWEVER, the issue is a complex one. If cats have to be contained to the owners property then the council needs to provide a significant subsidy to the owner to purchase and install a cat patio (catio) around their home so cats can still get fresh air and time outside in a safe environment, while also allowing owners to open their windows and doors especially during the summer time and not have to risk their cat running outside and potentially running away. It is entirely unreasonable for the council to expect home owners to keep their doors and windows shut and keep their cat inside during the summer months especially without some sort of alternative provided for them and subsided by the council such as a catio. The council would also need to keep in

mind that 9 times out of 1 it is not responsible cat owners that are the problem, but those who don't care about their pets and consider them "just an animal" and don't go to the same measures to protect them, and responsible cat owners shouldn't by punished for the actions of those who don't care.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

There's really no reason why pet cats should be taken to offshore islands unless they live there.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

The council should provide it to everyone, period, to desex their cats. It's not an expensive practice but if it was free or highly subsidised when cats were adopted more people would likely get it done, especially if they had to choose between feeding their family or desexing their cat.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

As I have said above, if the council wants pet owners to keep their cats on their property they need to provide a large subsidy for those owners to install a catio at their homes so they don't have to keep the house shut up all summer. When I say a large subsidy I mean to every cat owner - not just some people, or low income families, it needs to be for EVERYONE so that all cats are protected and safe. The same goes for desexing, it needs to be subsidised for everyone, not just a select few.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

I don't think all domestic cats in Auckland should all be desexed as I think people should have the option to breed cats if they want to, though cats in ecologically significant mainland areas and offshore islands should be desexed to minimise the potential for feral cat populations establishing or growing.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Pet cats should absolutely be microchipped and registered for both their own safety and for monitoring purposes. This will make it much easier to differentiate between strays and pet cats.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

I think ideally all cats on islands should stay indoors to protect native wildlife, though I'm unsure about the feasibility of enforcing this. However, cats in more urbanised areas on the mainland may potentially be exempt if the habitat is so degraded that the cats may do more good than harm. After all, cats will catch plague skinks, rodents and introduced birds.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

There is no reasonable motivation for people to bring cats to offshore islands unless they are their pets.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Financial constraints are the major reason for people not desexing their cats and financial support would significantly increase the uptake of desexing.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Some PSAs about local volunteering programmes could be good for raising public awareness to support these goals.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

We must apply these regulations to minimise the slow of Caulerpa and other marine pests.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

This is vital work and will go a long way toward protecting native ecosystems and fisheries.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

This is important for protecting freshwater and riparian ecoystems.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

This is important for stopping the spread of golden clam and other freshwater pests. The ocean is available for motorised boating instead if boaties want a place to use their boats.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Absolutely. I'm pretty concerned about how climate change will affect our environment. It seriously feels like not enough is being done.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

There may be some invasive species that we could improve public awareness of in suburban areas. For example, invasive ants such as Argentine ants may be widely established in surburban areas. Improving awareness may get people to use baits to control or report them, thus reducing their impacts.

Let's protect our environment: early consultation #3312

Waiheke Island Support

Tell us why

Absolutely no need to travel your cat. Cats are happy in their isn company for several days providing food, drink and shelter is provided. Otherwise it's an acknowledged expensive of pet ownership - chattery/kennel.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Oh goodness what a can of worms …. Yes it's an option but the administrative costs of determining "can afford" label will be huge. I would suggest a fine for those who haven't but again the policing of this??? Perhaps limit one cat per household who cannot afford to desex. It sadly makes me think, can they really afford an animal in spite of the good feelings they can bring into a family.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

All desexed, registered, microchipped and vet registered - no negotiations except for registered and well monitored breeders. This should apply to dogs, horses and any pet kept domestically.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I work nearby a large public park that over recent years council decided to heavily plant. Unfortunately the pest eradication of the unwanted animals planting attracts is mostly monitored by volunteers. This will become unsustainable. I am unsure if you are aware of current volunteer tendencies - dwindling.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Little knowledge on this pest but common sense is always a strong response.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Policing vulnerable areas should be mandatory. Boat owners need to respect that not all sea opportunities are available for their pleasures.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Again it just makes sense. We have a diverse population in NZ and we all use our waterways for a variety of different reasons - some more favourable to the health of the water than others. Protection is the key. Protection has rules. Obey them.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Fortunately this will not affect me so my comments are somewhat inappropriate. However surely a clean waterway is more important to everyone rather than providing short pleasure for a few. Perhaps a timed rather than permanent ban on boats to see if this helps.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Absolutely - take our lessons from past experiences as well as current world disasters snd loss of lives.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Please consider all domestic animals registered, desexed (male horses are), vet registered and a requirement to keep the register update - like a car rego!! Most people adhere to that legislation or have the car removed. Cars are not toys nor are animals.

Let's protect our environment: early consultation #3483

Auckland some are house pets - under jurisprudence of owner's rights

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Native protect species should not be under threat by predators/pest such as cats. But cats under Auckland are under owner's rights

1C. All domestic/pet cats must be contained to their owner’s property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Same reason

1D. Only island residents’ domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Do not support

Tell us why

Same reason

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Some people should not be present under circumstances to not be able to afford de-sex

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Hector's Dolphin under danger for fishing zone

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Do not harm bio/wildlife

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

The balance of ecosystem is important

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

unsure

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Chip the predators/pest

Tell us why

Prevention and reduction of uncontrolled numbers

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	
All of Auckland	Support

Tell us why

Ideally control of numbers or locate lost animals and eradication of those gone feral

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	

Tell us why

Would be impossible to expect all cats would be contained - however if they were chippes?

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

If they are contained. These islands wild populations are too vulnerable otherwise

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If you can't afford to desex your animal, how can you afford to keep them, what about future vet bills?

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

As per questions 1a, 1c, 1b and limit number of cats per household

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

maintain existing processes at the very least. keep up a lobby on the government for more to DOC. Institute a volunteer scheme to assist

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Seems that it is spread by marine activities therefore marine causes e.g boats contributed and be responsible.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

But it needs to be in conjunction with existing maritime authorities again where possible get up an outlet for volunteers

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Ideally control all, but because of the spread concentrate on the most likely + monitor others for contamination again volunteers will be necessary

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

For a set period. This plus more responsible boat ownership may lead to future boating if the lake becomes free of contamination

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

This should not be optional, it must be prioritised, there will be more weather events it cannot be ignored

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

On top of current council activities tap into volunteers - you already do this with your parks + planting operations. Have one of your executives design a volunteers plan to use volunteer on a large scale - we're going to need them, there will never be enough money to use contractors for everything

Let's protect our environment: early consultation #54

Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Unsure

Tell us why

This makes sense for sensitive areas for tracking purposes but less sense in urban environments

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

This is borderline impossible to do unless kept inside. There is no way to contain a cat , they will inevitably get out.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure

Waiheke Island Unsure

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

Catch 22. An owner should pay for their own pets in all aspects and it is not fair for taxpayers to pay for their neighbors decisions that are optional, however, paying for desexing may be less overall than paying for containment and other issues that can come from not desexing cats. (Depends on what is the lesser burden to taxpayers)

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

We border on a bush area and are always looking to find ways to prevent our adopted cats from harming wildlife. The best method found so far in our situation is by collars with bells. While unpleasant for the cats, this has almost completely stopped them from harming birds.

A belled collar with an integrated identifier (like used from microchips) would be a much cheaper alternative to council-funded microchipping, helping to both reduce harm to wildlife and provide identification. (also not overwhelming the already strained vets which often have waiting times)

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

This is an easy check for a responsible skipper to do and only costs a few minutes of time.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Other

Tell us why

This makes sense for areas of high ecological value as these are geographically unarguable and limited.

This does not make as much sense for areas of cultural value as these only apply to a limited audience and any area could be deemed to have "cultural value" - Resources should be spread to help the largest audience fairly.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

The Waikato River and Lake Tomarata are very far apart and it is extremely unlikely that a boat would travel between these locations on the same day, and extremely unlikely that a boat traveling between these locations would not dry out given the prolonged high speed travel. Banning motorized boats seems an extreme over reaction given the low baseline risk.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

It does not make sense to prioritise climate change resilience in the management of the natural environment, given there is an endless list of other immediate issues that are always needed. A balance would be to have effort for consideration for better future proofing when these short term tasks are being undertaken.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Incentivize spotting and reporting of invasive species in a non-financial manner (as this can create the opposite effect) such as an app/game

Might as well have aspirations. But it may be the only effective thing to do.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Too much risk of others escaping.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Hadn't thought of this, but why not, if it reduces the overall cat numbers.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Just get on with it.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

How else can the spread be controlled?

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Someone has to do it.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

If not done, pests will slip through and spread.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

How else to achieve this?

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

The absolute top priority. Has been for fifty years.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #155

Tell us why

Wholeheartedly agree but not sure how this would work in practice.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Keep cat problems contained as much as possible

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Other

Tell us why

Ideally people should pay their own way but if this support isn't offered then some people may not do it.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Other

Tell us why

Support this but not sure how this would work in practice. Maybe it would be better to install a bunch of fixed moorings in popular locations as an alternative to dropping anchor

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Marine ecosystems are suffering enough at the hands of commercial fisheries so whereever there is an opportunity to protect / control invasive species we should do so

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

I'm not a local and this wouldn't affect me so in theory I support but I guess it comes down the trade-off

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

100% yes.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #164

Cats a expert hunters. A single cat will kill thousands of birds, lizards, rodents and bugs in it's life time... Can be very useful to a house in the suburbs to keep rodents under control, but you don't want too many of them around. Especially starved wild/feral cats. De-sexing them is a good option to keep their numbers in check.

Other - Rakino has a total cat ban and Motutapu has Takahe which are expensive flightless birds that wouldn't stand a chance against a hungry feral cat. Best to kill any cats on those islands or near protected habitats before they get established.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Other - Rakino has a total cat ban and Motutapu has Takahe which are expensive flightless birds that wouldn't stand a chance against a hungry feral cat. Best to kill any cats on those islands or near protected habitats before they get established.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Dogs are ok but no cats, there's too much birdlife that could be devastated by an escaped cat... Pet rats and ferrets are also best kept away from the gulf islands too.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Imagine council spending it's money on something worthwhile instead of giving it away to multinational corporate raiders like Ventia $100M (Australia), Northern Environmental $27M (USA), Overdrive Inc $5M (USA), Programmed Facility Management $53M (Japan), Recreational Services Limited $32M (Australia) , Trident Plastics $6M (Australia), Tree Scape $22M (Australia), Visy Recycling $18M (Australia), Waste Diposal Services $19M (Multinational Shareholding), Waste Management Ltd $38M (Multinational Shareholding; mostly USA), WSP $9M (USA).

A program to fund the de-sexing pets would directly benefit all vet clinics in the Auckland region as long as you don't get an over seas consultant in to milk more rate payer money out of the idea.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Compulsory de-sexing. An annual wild cat hunt extravaganza on the gulf islands!

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Do it like it was done on Rakino, swift, bloody effective carnage. 1080 is a good option where there is a goal to kill all mammals and there is no fresh water catchment.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Caulerpa spreads fast and kills the seafloor. Adequate cleaning facilities need to be provided... Auckland council has been doing the opposite by closing boatyards; both Council run (The Landing), Commercial (Pier 21) and Club (Little Shoal Bay Boatyard) across Auckland for several years now... Auckland Council policy is to provide "leadership" and "awareness" to keep boats clean... I haven't tried to clean my boat with either of those... I guess I'll have to try them out if the boatyards keep closing.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Auckland Council has acted most irresponsibly by shutting boatyards to keep the nearby gentry happy. Boatyards are offensive to the gentry y'know... Perhaps actually taking the marine environment more seriously than worrying about the next local election would be a good change to make.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

It'd be amazing if Auckland Council did more than "leadership" and "awareness"... Something tangible like providing cleaning facilities to enable responsible boating.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

Kiwi's love boating for many reasons. A ban is a cheap option but council spends millions on overseas consultants... Perhaps spend less on thinking about doing stuff and "leadership"... Just do something that provides a service where it is required.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

No, it's waffle.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Install new reclamations along the inner harbour as haulout areas for boats. These can be club run facilities with strict environmental controls that'll cost Auckland Council nothing beyond the reclamation. In areas where the public might want to use the space in Summer, the hardstands can be for winter only. This is an off -peak time for hauling out which is what Auckland Council is trying to promote per the Auckland Council 27 March Hardstands memo.

Let's protect our environment: early consultation #249

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This will reduce the exploding cat population considerably.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This will make it easy to identify the owner of any 'wandering' cat and fine them accordingly.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Unsure

Tell us why

This is an extremely difficult task to complete with regards to a cat. A dog is a reasonable animal that can be easily trained and controlled, not so cats.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

This lessens the risk of a Domestic cat going AWOL whilst visiting the island in question.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Not just those that cannot aford it but those who are totally irresponsible regarding all aspects of life.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Everything possible must be done to protect wildlife in Auckland.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Keep up the good work.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Most vessels of a certain size have an anchor wash system installed on board. This washes the chain and anchor as it comes back into the vessel. Smaller vessels of course do not have this system which makes the cleaning of anchor chains and anchor more difficult. These small vessels may not even have any means of providing a jet of water via a hose in order to wash the equipment. There would therefore have to be in place an unpopular requirement that manual cleaning of the anchoring equipment take place every time it is used. Very difficult to police that it is being done.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Makes sense, but does this mean that invasive species would be allowed to thrive in none high ecological and or cultural value marine ecosystems?

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Do not support

Tell us why

Need to know the name and location and how many. This could be very expensive.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

How many motorised boats use this lake and where do they come from? How many other lakes do they use? Maybe they are mostly local. More info is needed. Maybe only local boats are permitted by the issuance of a permit and are not permitted to use any other lake. Blanket bans are very unpopular and almost never work.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Weeds: Not only take advantage of climate chaos. I have noted that areas harvested of Trees at Woodhill Forest rapidly become invested with Noxious weeds and the owners or Harvesters do nothing about it. This allows the weeds to spread on the wind and by forest animals and birds. Second point re weeds and noxious plants. Rental properties where the Landlord does nothing to maintain the land that a property sits upon allowing noxious weeds and plants to become established and spread. Privet, moth plant and wandering dew are three examples. Where the lease does not require tenants to maintain the land that the property sits upon then the landlord should be forced by law to do it, ensuring that they remove any noxious weeds and plants in the process.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

More education of the general public. We quite often hear about exotic species and noxious plants and weeds being mentioned by name only with a request that the public notify or destroy if they see any. Problem is joe public has no idea what they look like. We quite often hear about old mans beard as if everyone is familiar with it and can identify it. I do not have a clue what it looks like. Pictures must accompany the names.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

I support the notion of a 'sinking lid' for domestic cats. I understand that they are companion animals, and I have owned cats, but they are just too destructive to have a significant place in our environment.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

If cats are roaming they need to be identified as a companion animal and returned to their owners, as opposed to an unchipped feral cat which needs to be euthanised.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

I have a property on Rakino Island. There is only one permanent cat on the island, and it roams. During holiday periods bach owners bring their cats to the island, and they roam also. I and others have worked hard planting regenerative habitat for the many bird species that are self introducing to our pest free island, and as a consequence we now have ground dwelling birds like spotless crakes on our property, and moko skinks, as well as bellbirds which are frequently within cat reach. I don't want the species that make my property home threatened by other people's cats.

Cats are a constant source of conflict and feuds on Rakino, and ideally I would ban them completely, because they have no place on a predator free island, but I'm prepared to compromise IF cat owners can fullfil their obligations to keep them constrained to their own properties, and NOT leave them behind when they decamp.

Regretfully, there is a strong sense of entitlement with regard to some owners and a great deal of gentle education is needed around the damage their pets can do. This includes DOGS, which also roam.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Other
Kawau Island	Other
Rakino Island	Other
Waiheke Island	Other

Tell us why

I would prefer bach owners to NOT bring their cats with them, and only permanent residents to have their cats on island if they feel they must. I certainly don't want holiday makers who aren't property owners bringing their cats to Rakino.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

The 'sinking lid' policy I support won't be achieved if people can't afford to get their pets desexed.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I understand that cats are a contentious subject, and that it will be impossible to achieve the goal of 'pest free' if cats are included in with the rodents/mustelids/possums etc because people will dig their heels in, but they need to be subject to the same ownership responsibilities as dogs. If you make it hard and restrictive for people to own cats then more people won't bother with cat ownership. I certainly will never own a cat again.

Currently I feel let down by council with regard to cat ownership on Rakino as I have been banging on about this for years now. It really is absurd that cats are allowed to roam free on a predator free island.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I would like to see the bio-security dogs in evidence down at Pier 6 before the Rakino ferries run. I seldom see them now, though I used to frequently when our ferry ran from Pier 14.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It was not unexpected, but still incredibly disappointing to learn that caulerpa had been discovered around the Rakino coast. It seems an obvious requirement for boaties in order to try and stop the widespread movement of invasive pests around our moana.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

The Hauraki Gulf is at breaking point, due to decades of inadequate protections and care.

I want the marine habitat protected for the species that are meant to be living there, in order to try and retain what vestiges of a functioning ecosystem currently remain.

Can we please start listening to expert opinion on this?

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region’s lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

For the same reason I want control/eradication of pest species in the Hauraki Gulf.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

The freshwater lakes are not something I know much about.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

There are many documented cases of cats on holiday escaping, cats are an at-home species that should be kept at home or safe in a cattery

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

To get on top of the cat explosion this just has to be done

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Safecats catio facebook page, cat fences, changing rules for cat rescue organisations so that all cats are kept at home, desexed before being adopted out etc

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

introduce cat free subdivisions, especially near threatened species locations

use the new pet safe bait that has just come out

Record cat complaints so you get data on how many nuisance reports you get

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

If this means throwing hundreds of thousands at an uncontrollable weed that has taken over in other parts of the world with unsuccessfull attempts to kill it, then I would not support it.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, BUT I also think council should be creating pre-emptive policies protecting Auckland from climate geo-engineering / cloud seeding that is happening overseas and messing with weather patterns.

"About 50 countries including the US, China, Australia, UAE, Germany, India, Malaysia, Russia and Mexico employ cloud seeding. The US Bureau of Reclamation spent $2.4m last year on cloud seeding along the over-tapped Colorado River. Utah recently increased its seeding budget by tenfold."

"While we don't know specifically if cloud seeding poses a threat, some experts believe that it could lead to silver toxicity and environmental concerns if the practice becomes common on a much larger scale. Similarly, people worry that cloud seeding could throw off earth's natural balance of moisture."

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #304

Waiheke Island	Other

Tell us why

I believe the Hauraki Gulf islands should be cat-free to protect growing populations of native wildlife. No cats should be taken to the islands.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

The cat population shoud be reduced to protect native wildlife.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

A hard-hitting media campaign to educate cat owners about desexing, microchipping, and preventing cats from roaming at night. Allowing domestic cats to threaten native wildlife populations needs to become socially unacceptable.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Increase work to make peninsulas on the Auckland mainland pest-free, such as Devonport.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It is more efficient to stop the spread of marine pests by boats as soon as they are identified than dealing with a widespread invasion caused by boats moving to various locations. It would have to be rigoorously enforced, though.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

I support this approach if 3A is deemed impossible. However, I would prefer a fast, intensive response as soon as marine pests are found wherever they are with the goal of complete eradication. 3B would require endless action, with no possibility of eradication.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

It would reduce the spread of pests between lakes by contaminated gear.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Motorised boats can use other lakes and it is important to reduce the risk of another pest invasion.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes. It is important to control the spread of pests as quickly as possible.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I feel that action when invasive exotic species such as caulerpa are identified is too slow, allowing problems to escalate. Even if the action eventually needs to be altered after more information becomes available, it is better to act early so there is a chance of eradicating the exotic species.

Let's protect our environment: early consultation #328

Waiheke Island	Do not support

Tell us why

No one should have more or less rights than anyone else.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Not a council obligation, stick to the bloody basics public services of infrastructure and services that benefit all ratepayers. If someone cannot afford the basic costs of owning a pet they shouldn't have one.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Fines for cats entering other peoples property. Higher fines for cats killing birdlife.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Small price to pay to stop these invasive species.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

Shouldn't stop ratepayers enjoying our environment. Instead use boat ramp fees to meet the costs of pest control.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

No. You should stop allowing the high density housing being built until the basic infrastructure is updated to cope.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #482

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Other
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Other

Tell us why

I believe cats located on islands with that have ecological significance or within 1 km of known threatened species habitat should be desexed to ensure they don't unintentionally breed and threaten native species and wildlife. I also support this in all of Auckland with option to apply for exemptions for the likes of breeders or for medical reasons.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Just like dogs, all cats should be microchipped and registered on the Companion Animal Register. This allows for the speedy return of lost or injured cats and also allows authorities to identify owners of problem animals.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

It would be difficult for everyone to contain every cat in Auckland to their own property. It could also be expensive. A cat's general nature is to roam and explore and unlike a dog you can't always put on a leash to take for a walk or take it to a park to have a run around to stimulate and exercise it. Enforcement of this rule would also be difficult and costly.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

There is reason to bring a cat which does not normally reside on an island to an island. The potential risk of the cat escaping or running away would be high as would be the potential for owners to abandon an escaped/runaway cat if they are unable to retrieve it.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

I have mixed views on Council providing increased financial support for those who cannot afford to desex their cats. On one hand I think it's a good incentive to ensure more cats are desexed but on the other hand people shouldn't own a cat if they cannot afford to desex it.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Limiting the number of cats per households. Require all cats to be microchipped so if they are caught/trapped in protected areas they can be returned to their owner, plus the owner can be educated.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

I think everyone should play their part to help stop/decrease the spread pests but sometimes you just have to introduce rules to encourage to play their part. If these rules were to be introduced, then I also think the council should also make sure they make it easy for people to do it. For example providing contained wash areas at boat ramps.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

The council should do everything in its power to protect high ecological and/or cultural value marine ecosystems with the priority on eliminating invasive species to avoid the overwhelming the natural environment or spreading to other areas.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

In my opinion the council should be working towards controlling all pests in all lakes. There is potential for pests from non-controlled lakes to make its way to lakes that are controlled, respreading and making work done at controlled lakes worthless. Although I also can see that controlling pests at all lakes may be cost prohibitive.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

I think everyone should be able to enjoy the lake whether that is in it, on it or beside it. Banning banning motorised boats from Lake Tomorata in my opinion is a step to far.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes as long as it doesn't come at a substantial cost to Aucklanders.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #557

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

I believe desexing cats will help reduce the feral cat colonies plus reduce cat fights however, I do believe the council should either fully fund this or offer heavily reduced desexing to ensure full uptake

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Microchipping AND updated registration allows cats to be safely returned to the owners when required however, they do fail so don't believe cats should be euthanised if they dont have a chip.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Cats cannot be contained as they are free roaming by nature. If need be then a night time curfew where they need to be kept in, from say 9pm would suffice.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Support

Tell us why

There is no need to take cats to the islands unless you live there. If they take cats there to dump them, they should be prosecuted for abandoning an animal

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Desexing is a huge cost and if the council gave funds towards helping more people wiuld do it. It also helps prevent cat colonies from growing and would reduce these in a humane way

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Desexing, microchipping and registration should be a basic requirement of good cat ownership and should be mandated. But this is useless unless it is actually enforced. TNR is a great way of humanely handling cat colonies as it mea s the numbers will reduce gradually via natural death.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Dont treat animals as the only predators. Humans do greater damage to the environment so we need to ensure we include ways of minimizing or removing human predator damage.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Our oceans are taking the brunt of climate change at the moment but they heavily influence our way of life so every little thing we can do to help restore balance is good.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

There is sometimes too much governmental overreach but do think the council needs to actively get out there and do something

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, obviously. We only have one world and share it with many species so need to protect it and be prepared.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Litter is a major problem in this city so would be awesome to see more public bins, litterers being fined and workers out collecting litter

Let's desex human first ? Before taking it to cats?

Human activities far outweigh cats in terms of causing bird deaths globally. Here's a breakdown:

Human Activities

1. Habitat Destruction:

- Deforestation, urbanization, and agriculture destroy millions of hectares of bird habitat annually, leading to massive population declines. Birds lose their nesting and feeding grounds, making survival harder.

- Impact: Permanent loss for entire species.

2. Pollution:

- Chemicals, plastics, and air pollution harm birds directly (poisoning) and indirectly (destroying food sources).

- Climate change, driven by human activities, alters ecosystems, pushing many bird species beyond their tolerance limits.

3. Collisions:

- Windows, vehicles, and power lines kill hundreds of millions of birds each year. For example, an estimated 365–988 million birds die annually in the U.S. alone from window collisions.

4. Hunting:

- Poaching and hunting for food, sport, or trade significantly reduce bird populations, especially in biodiverse regions.

Cats

- Domestic and feral cats collectively kill an estimated 1.3–4 billion birds annually in the U.S., according to studies. While this is a significant number, it primarily affects smaller, localized populations rather than global ecosystems.

- Cats disproportionately affect ground-nesting and urban birds, especially in areas with already limited bird populations due to human activity.

Conclusion

Humans are by far the greater cause of bird deaths due to the scale and permanence of our activities. Cats, while a notable factor, are a secondary issue primarily exacerbated by human-led urbanization and habitat fragmentation.

Tell us why

cats rarely cause problems in reality they are not a danger to humans like a roaming dog. What's next confining birds to a certain area.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I don't believe cats ste as bad for the environment as sensationalists like the Morgan foundation like to make out.

Cats do belong in NZ and shouldn't be just in a prison cell aka indoors only.

Infill housing by developers would be causing more wild life extinction than cats.

any controls are imperfect for example I had two cats both had a faulty batch of microchips I started having issues with a sure flap microchip door speaking with sure flap went back to the vet told it wasn't faulty found the serial numbers online were part of a bad batch so asked the vet again and they scanned found one chip wasn't working the other was weak on its way out so both cats needed the chip replaced.

Many people wouldn't be aware they even can have a faulty microchip so I would be worried about trapping domestic cats being marked as ferals simply due to no microchip being detected.

Our two cats prove it's possible. fortunately after getting a second microchip we haven't had a problem.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes. We need multiple strategies includingofe green areas that can serve to capture water and hold it in a high floor event to protect homes.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

We need better border controls to stop more invasive things not introduced yet from coming into the country. We need a much stronger response nationally to eradicate newly introduced invasive pets e.g. myrtle rust.

Let's protect our environment: early consultation #672

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats do enormous damage to our native bird population. We do not need any more stray kittens being born when our native birds are already in decline.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

1. On our pest free islands its imperative to know where cats are going at all times.

2. It encourages good cat ownership to have these things be mandatory.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

I believe the social standing of residents would be greatly reduced in the wider area if this was to be mandated.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Frankly there should be no cats on these islands.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

Financial support in the form of free or subsidised desexing and registration as well as compensation for the responsible cat owners that have already done so.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Responsible cat ownership is at the root. We need to address this before trying to come down hard on cats themselves.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Having halo areas predator halos in place on the mainland to limit the chance of pests swimming across the harbour. Also more rigid systems in place on ferries and boats when people go out to these islands. I know there are supposedly people that are at the ferry terminals, but I have never seen one.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It is a requirement for people coming into the country on planes to have clean gear, it should be no different to marine vehicles.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Marine ecosystems have long been neglected as they are put into the 'too hard basket' but they should have the same control programs as our land areas.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

All bodies of freshwater should be pest free.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Do not support

Tell us why

We need to keep people on side for environmental mahi to succeed, such an extreme measure would only seek to alienate a part of the population.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Absolutely, let's get ahead of the problem rather than trying to keep up with it.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #707

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Tell us why

cats are lovely if kept and controlled as pets, but can easily become feral

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	

Tell us why

to protect species

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	

Tell us why

to keep cats under control

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

If they can't afford to desex their cats, can they afford to own and feed and care for a cat e.g. vets' bills

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I know this sounds harsh, but I wish the SPCA would stop encouraging people to adopt kittens for Christmas - they will be dumped in many cases when Christmas holiday period comes.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

What has been achieved is a good start. I think more of the same, and programmes to keep reminding the public of the dangers of a stoat, cat, dog etc getting loose on any of these islands.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It's a basic precaution - this is a frightening weed.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Once invasive species get away on us, it is much harder to get back control. We need to attack all these problems as soon as they are found.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

to prevent spread

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

We should do everything we can to prevent the spread of pests and vegetation.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Absolutely!!!!

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

From reading these reports, it seems that good work is being done. I support more of it and more education for the public - and an awareness of the damage that cats and dogs can do to our natural environment

Let's protect our environment: early consultation #914

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

There is almost no good reason to keep a domestic / pet cat intact anywhere. Intact cat s are a nuisance in a neighborhood, spraying, fighting, killing wildlife and producing kittens that need to be cared for appropriately. Unwanted kittens put a pressure on animal welfare organisations who often end up having to care and find homes for them. Perhaps some exception could be made for responsible cat breeders but even then having conditions that they to sell their kittens desexed

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This is a matter of safety for the cat. If they go missing and are found their owner can be identified. Common sense really!

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

It's not okay for dogs to roam freely around neighborhoods, so why do we make an exception for cats? I have two cats who are safely contained on our property. We've built structures like catios to give them outdoor access while keeping them secure, and we spend time playing with them and giving them affection indoors.

By keeping our cats contained, they stay healthy because we know exactly what they're eating and can quickly detect any signs of illness. They're safe we don't have to worry about them being hit by cars, attacked by dogs, fighting with other cats, or harmed by humans who dislike cats. Our vet costs are lower because they don't get fleas, and they require vaccinations less often. Importantly, they can't harm wildlife.

We rent and have moved several times over the years, yet we've been able to keep our cats indoors. While it takes some planning, it’s entirely doable. I believe it’s time to shift perceptions about what responsible cat ownership looks like.

1D. Only island residents’ domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

It seems strange to me that people would want to move their cats to offshore islands. Cats prefer to stay in their home territory so moving them around when you are travelling doesn't seem very responsible.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

I think this needs to happen otherwise the issues related to cats are not going to go away.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

There needs to be more education to shift public perception on the damage caused by pet cats. This can be a very emotionally loaded issue but getting people invested in their environment may help with this.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Keep working to eradicate predators on these islands. But maybe having more opportunities for people to in wider Auckland to visit could be beneficial as the cost to visit and see the progress and stay invested in this is prohibitive.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

I'm not very well versed in boating but to me it sounds like basic maintenance t that people who can afford to own boats and anchor them should be able to do. It may be difficult to police though

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

A big part of Auckland is our coastal and marine environments. We should be doing more to protect them

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Again agree that we need to be doing more to protect our waterways

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Of course

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #949

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

As well as protecting wildlife, it reduces the number of unwanted kittens.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	
All of Auckland	Other

Tell us why

Believe in micro chips but having a register is a bit over the top.

There will be a large percentage of the population who will ignore this policy and it will be expensive to manage.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

Good in theory but unless you have owned a cat you dont understand that cats are natural roamers.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Support

Tell us why

Why would anyone but a resident take a cat to one of these islands.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Animal welfare groups get no Government support and rely on donations. If council help financially then in time there will be a lot less unwanted animals to deal with. This problem should decline over time.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Dont over regulate - there are many responsible pet owners in the community.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Continue.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Will be hard to administer for local boats. Most of the damage is caused by international vessels.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Makes sense.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Do it now before the problem esculates.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

There has to be some inconvenience if the problem is to be controlled. Plenty of other options for boaties.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Do it sensibly. Abolish the Tupuna Authority board - they are vandals.

Let's protect our environment: early consultation #1078

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Areas with high density of household cats can significantly impact local bird populations, suggesting a need for government oversight. While unified municipal regulations could provide an effective management approach, implementing such controls across Auckland's vast urban territory would require considerable public funding. The scale of such a program would inevitably increase administrative costs, resulting in additional financial obligations for the taxpayer base.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

In certain areas, households with multiple cats significantly threaten bird populations, making it crucial for the government to regulate cat numbers. Consistent regulations implemented by the municipal government could effectively address this issue. Additionally, Auckland's expansive urban area means that managing a large cat population would inevitably raise municipal costs, increasing the financial burden on taxpayers.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Cats are highly mobile, so keeping them confined indoors is not ideal.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Island residents' domestic cats are familiar with the local environment, and with the care of their owners, this will help reduce the damage cats may cause to the ecosystem.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

The obligations of cat ownership, including associated costs, should be borne by the pet owners themselves in Auckland. While financial accountability is important, there's also the challenge of ensuring owner compliance, as some may seek to avoid their responsibilities despite government efforts to enforce proper pet care standards.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term improvement effort that should start with educating young people about the relationship between cats and other wildlife. More of this work should be carried out through community initiatives. While the city government has many projects, this one particularly requires funding support.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I support establishing mammal-free conservation zones on uninhabited islands. On inhabited islands, it’s essential to identify and control the pathways for introducing mammals and rodents. Measures could include modifying packaging, transportation, and inspection methods to block these introductions effectively.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

The distinct characteristics of land and ocean environments require different management approaches. Strategies effective for terrestrial ecosystems should be adapted for marine settings with guidance from marine ecology specialists.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region’s lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Controlling invasive species is essential, especially in areas where Auckland residents go for leisure. It's important to minimize the impact of these efforts on public enjoyment while also addressing the significant threat that invasive species pose to the region’s delicate ecosystems and native species. The unchecked spread and reproduction of non-native organisms can severely harm local habitats, disrupting biodiversity and damaging our natural heritage. Taking action now is vital to protect and preserve our environment for future generations.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

These recreational motorboats can indeed introduce harmful species into the lakes, so implementing a ban on boat access is a feasible and effective approach.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1088

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Tell us why

Cats can cause serious harm to bird populations and may carry viruses. Strict management and control are necessary

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats are highly mobile, with extensive roaming areas, making it challenging and potentially unsanitary to capture strays and identify their owners. Given their rapid reproduction, implementing citywide microchipping would be extremely difficult, costly, and an inefficient use of resources.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

Cats need to roam, hunt for mice, and play with companions—these are part of their nature. Keeping them confined indoors is not an appropriate approach.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Support

Tell us why

It is necessary to control the number of cats, this can help reduce the damage cats may cause to the surrounding environment.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Cat owners should cover all expenses related to pet ownership, rather than relying on taxpayer subsidies for cat owners. This is fundamentally unfair

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

This is a long-term effort that ,The city government has many projects that require funding more urgently than this one.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Adapt conservation efforts to local conditions by establishing protected areas for wildlife and plant life.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It’s essential to detect invasive species threats promptly and implement measures to prevent further spread, limiting potential ecological damage.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

Terrestrial and marine ecosystems are different, and methods for managing land should not be directly applied to the ocean without consulting experts in marine ecology.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Pest control is necessary; however, these areas are also popular recreational spots for residents during holidays, so it is important to minimize the impact on them. Auckland faces other significant challenges, such as the urgent need to address wastewater treatment residue disposal. It is hoped that the budget for pest control will not affect the funding for other critical environmental management projects that also require immediate attention.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

The most direct and effective way to protect Tomorata is to prohibit the boats from entering

◦

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Kawau Island	Do not support

Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Cat owners must take responsibility and manage their pets properly. Letting house cats roam freely on the streets and parks poses a threat to both the animals and the community.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

For some households with financial difficulties, it would be appropriate to provide partial support based on their specific circumstances.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Support strengthening management, with schools, communities, and the city government working together. If the whole community pays attention, it will lead to very positive outcomes.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

It is essential to continuously promote and educate, encouraging those in charge to consciously comply with regulations. In addition, transportation tools used for entry should be thoroughly inspected by vehicle owners to prevent harmful species from being smuggled onto the island.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Ecological invasions require regular inspections to detect problems early, allowing for timely action to isolate and prevent the spread of the disaster.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Conduct research and investigation to understand the situation, and develop effective measures to address the existing problems and prevent further damage.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

New Zealand is one of the most beautiful countries in the world, and each one of us must take care of its natural environment. I fully support the government's efforts in managing and controlling harmful species.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

The entry of motorized boats into lakes may introduce harmful species, which could negatively affect the lake's ecosystem. To prevent the spread of invasive species and protect

lakeside vegetation, I support the decision to prohibit motorized boats from entering Amber Lake.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

Many domestic cats do not hunt birds but spend significant amounts of their days outside. It's crucial to their welfare. Focussing on eliminating other predators is more important. It's also impractical to enforce as generally a cat owner would have very little ability to allow a cat to go outside but stop it from leaving their property.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Not a job for council. People should consider it a cost of owning a cat and council should stick to its core functions

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Easy step for boaties to take and would help

Tell us why

Tired of my garden being used as a toilet by neighborhood cats - unable to eat the veggies that I grew at home due to cat faeces in my garden beds. Owners need to take more responsibility (they should have exactly the same rules as dog owners)

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

Why? They don't do this for dig owners?

To be a pet owner you should be responsible and understand that there are financial obligations.

Maybe to start with give discounts for neutering, but not a permanent thing. Use the money from cat registrations for this.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Common sense - make sure all water equipment is visible free before moving to another lication

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes for council controlled areas.

Householder should take care of their land / area

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2425

Tell us why

Pretty obvious really. Will mean only breeders can sell cats which will reduce unwanted cat numbers and also deter irresponsible people from purchasing cats due to cost.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Again will help to deter cat numbers purchased by irresponsible people.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

A bit unnecessary for most areas and you would need a staff of thousands to police it. Concentrate on the important areas so it is policed properly.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Reduce chances of cats escaping and becoming wild.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

But only for people who own cats that arenâ€™t desexed when the bylaw comes in. After that if people canâ€™t afford the cost of desexing they shouldnâ€™t buy a cat.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

No.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

We should be looking at what they are doing in Wellington, that seems to be the blueprint. It will require Aucklanders to got off their backsides and help which may or may not be a problem.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Well, it will be the best option to isolate the incursions so hopefully they can be eradicated.

And fines for dirty marine gear need to be substantial and for repeat offences confiscation of boats.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Itâ€™s absolutely essential.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Again, because itâ€™s essential.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Itâ€™s not necessary that people should be able to hoon around every lake in a boat.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

It would be good for our environment if you Parks staff would stop wiping out native plants when they spray, line trim or mow on the edge of areas of native bush. I have seen this happen in Marlborough Park, McFetridge Park as well as Holland and Linley Reserves. They are either careless, incompetent or both.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

I support the efforts to maintain a healthy ecosystem. I do not recognize and increase in extreme weather events compared with the historic record. The greater damage appears driven by the council(s) allowing ever more intensive housing, which through development has removed huge areas of open land which previously helped to absorb excess surface water. From the 2023 flooding, the news reported also housing which was flooded due to council(s) decisions to have allowed building on land which was already historically known to be flood prone.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Desexing solves so many problems. Roaming, unwanted litters and reduces the risks of some cancer.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This would ensure cats can be reunited

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Unsure

Tell us why

I personally believe in indoor only cats but I'm not sure how you'd police it.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

For the birds.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Cost is a huge barrier for desexing

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

More funding for rescue groups who trap and rehome wild cats or control community colonies. Feeding colonies protects wildlife

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #2681

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

No one is normally allowed on to someone else's property without permission. Why should someone's pet be excempt. They are not wild animals, so should not be treated as such. They are someone's responsibility and therefore should be held responsible

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Other

Tell us why

There will always be people who make choices to do things they want but can't afford to look after. So some form of support should be provided, but an alternative appropriate response should be provided if the risk of ongoing support is required

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

The issue will be that people's lives change and situations change all the time which means the risks will be forever present that cats and other pets are let loose, as new pets continue to be. A management plan has to consider reality and that we will forever be managing escaped animals, or there is a long term plan to strategise the end of the acceptance of people's wants and promote the future New Zealand deserves

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Use natural and man-made boundaries as part of the strategy to control reinvasion, even placing pest free fences to cover gaps on the mainland. Onshore locations in the city will help provide invigoration and encouragement to people that wouldn't normally see or go to nature

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Fishers and boaties will be the first to complain about the declining ocean environment. Acknowledgement of all contributors would be a start, development, waste water systems etc

taking ownership of the contribution and showing what the strategy is to resolve the problem, while showing how everyone can help and even identify the seaweed

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

They provide an example of what could/should be, but also show a healthy ecosystem requires a lot less assistance from us, we just need to get out of the way and invasives would find it much harder to get a foothold

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

The uniqueness should be celebrated and promoted, so people can enjoy the world around them for what it is. Connecting people with their surroundings builds community and respect

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Other

Tell us why

Not aware of the effects and implications of this approach, nor thr likelihood of conforming

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

They are one and the same thing. Putting in climate change resilience like reestablishing natural environments reduces run off, storm water volumes, heat and urban heating, etc. To have a stable environment, the environment needs the plant and animal species diversity to support each other, which will increase resilience

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Limit what plants can be sold at plant stores. Encourage volunteer groups and Council to engage with private property owners to increase the halo effect around nature reserves. Discourage leaving food out for wild animals, which only help Mina Birds, sparrows, starlings, rats, mice etc. All food waste in compost box or bins. Focus plant eradication in places not owned privately such as road, rail corridors and water courses. Farmers and most private properties are kept relatively free of pest plants, it's areas in-between. Allowing or even encouraging people to take responsibility for these areas, where appropriate would help

Let's protect our environment: early consultation #2685

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Aoatearoa has a significant population of geckos, skinks, birds and other creatures some which haven't even be described as yet. We also have a feral cat population that needs to be eradicated

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

It should be universal for all domestic animals so that owners can be tracked if they are abandoned.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	

Tell us why

As stated above

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

As stated above

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

It would get the job done

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Make it mandatory to only have one cat per household. Is would be a start in reducing the cat population

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

There should be greater information to households on what they could do to get involved and community groups need greater funding to assist those who can't physically use traps etc on their properties

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

We all have a responsibility to ensure that all equipment including shoes are kept free of invasive organisms

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

as above

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

It is important that all our waterways are cleaned up and protected from invasive species

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

as above

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes. I am concerned that as the earth heats up we are going to be inundated with invasive species. It is important that we put a huge emphasis on biosecurity and do all we can to reduce all the factors involved in climate change, not just with emissions.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I am concerned about the import and sale of exotic species which if accidentally or purposefully released could do enormous damage. My neighbour has recently given his son a reptile which is not a native to this country. I am not sure who vets these imports and who ensures that they are only sold to people who will be responsible.

Let's protect our environment: early consultation #2694

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Too many unwanted kittens and cats roaming - a burden on urban areas, our native bush areas, native wildlife. Pet Tom cats also tend to attack other pet cats.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Roaming cats can be caught and returned to owners - this would make owners more responsible for their pets. Dogs need to be registered, why not cats.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Unsure

Tell us why

If we're trying to create predator free islands then containing so they can't roam is an essential part. Dogs aren't allowed to wander - cats can be contained and managed - many city apartments have indoor cats or build catios for their cats.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Only if they are registered and controlled and contained so they can’t roam and kill wildlife

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

It helps support the long term plan of controlling cats around our streets and bush

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Humane planned pest eradication of stray and wild cats - there are lots of pest eradication programmes for stoats, rats, opossums, and other pests, why not cats?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Keep running education programmes in schools to inform young children - they are our environmentâ€™s future kaitiaki.

Keep advertising for volunteers to help with projects - using social media etc

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

To control these invasive pests strict rules need to be used and enforced.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Itâ€™s negligent to infect other pristine environments and ecosystems with these pests. Both Council leaders and public need to be doing their bit to look after our environment for future generations - Auckland Council have a responsibility to be guardians/kaitiaki.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Freshwater lakes are part of our environment and need protection from pests too - all our fresh waterways need protecting!

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Take away motorised transport and leave the lake for swimmers, kayakers, SUPs and other types of sports and leisure activities.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes - itâ€™s part of the Councilâ€™s responsibility as elected leaders and guardians of our region to lead the way and put in place plans for future climatic changes.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Educate people - programmes in schools. Fund and promote organisations like the Kaipataki Project which is doing amazing work around the North Shore

Tell us why

Microchips are best for locating and identifying them (collars come off) and shows a commitment to looking after them and should go hand-in-hand with desexing.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Do not support

Tell us why

I don't think cats should have ever been allowed on the Islands, so ideally they might need to be contained in properties, with a sinking lid of no more cats and no dogs in the future. Waiheke seems the most built up, so equivalent to Auckland. And a hard "No!" to ever keeping cats 1% contained in suburban properties. Compromise is locking cats in before dusk and keeping them in until after dawn (currently ours are locked in from 5:3pm to 7:3am). I don't know about within 1km of a habitat because that could capture a number of suburban properties. I'm sick of seeing dogs just running loose through our local reserves. Maybe keep them in properties? Only allow walking on footpaths? No more dogs walking through bush and crapping in parks and beaches?

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

I don't really understand this question. Only island residents - living on Aotea, Kawau, Rakino and Waiheke - can take their pet cats to 'other' offshore islands? Hell no! Or is it asking if only rich wankers who own property in Auckland and another property on any one of these four "offshore islands" can take their pets over to the islands? That is another "Hell no!" This is a poorly phrased question, sorry. But I do not support.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

Unintended consequences = people just breed cats and continue being useless owners but are rewarded with free desexing. But then again, this may help the better intentioned people, with no money, to get over the line. Monitoring/tracking/follow-up would need to be part of this approach. Need to factor in the administration costs to make this approach worthwhile and signal there are consequences for underground backyard breeders.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Shutting in cats before bird activity at dusk and letting out after dawn is something we do. I would never want to restrict them to being inside only or only in a courtyard/backyard all the time. That is ridiculous and outdoor spaces are ever-shrinking. Bring back general tree protection for all trees. The most habitat harm is still being done by ignorant people/developers/farmers than any other 'pest' animal. Signalling specific pest management is always dangerous with nasty people feeling entitled to be cruel to animals like cats. I think ring-fencing islands and sealing off peninsulas are the way to go (to dogs too). This Victorian puritanism of "oh no, we have ruined the natural environment - it is no longer virginal - let's kill a bunch of things we deem to be pests, that we foolishly brought over here, and now we need to over-react and protect the native creatures (on our terms)" while still driving, building, cutting-down, sealing over, growing pine, grass, cows and all that stuff that is ok because of the economy and making money and vested interests.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

This was an empty statement from a climate-change denier named John Key. I'm not sure anything of substance will really happen when we still have the economic levers and consumerism that will maintain the status quo of plastic production and extractive industries. Pronouncing we are going 'predator-free' is moving the deck chairs around while the titanic is still sinking.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Well, that marina on Waiheke should never have been approved. Fewer boats will always mean fewer problems. But money talks, unfortunately.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

It is a case of controlling the behaviour of people and distributing information around how Aucklanders use their environments. And then fining heavily those people that infringe.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Is this water weeds pests or includes animal pests? Certain fish species should never be allowed to be sold as pets.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

100% support a total ban on all pleasure boats and jet skis, etc. Sorts out spreading anything overnight.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Well, that goes back to tree protection and limiting infill housing. Pests plants grow in these cheek-to-jowl developments and weird fence lines with 'no man's land' areas between them plus the fact there are so many rentals now that people do not do any upkeep on their green spaces. Weeds flourish. Our local primary school cut down four mature sheoak trees because they could (with nothing stopping them) and followed that stupid "they're not native" mentality although there were nesting Tui and Riroriro in two of the trees and the fact that native bats and Ruru are known to favour these large, wind-resistant trees. I spoke as MÄ ori about all trees being part of TÄ ne's forest. I don't see the Taiwanese Cherry trees as a problem either. If Tui's like them, keep them. We are not removing asphalt... that's not native.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

There is no easy way to say this - the planet is pretty fucked because of right-wing politics and the constant economic growth mentality. There are pest species that are invasive and choking and should be removed, yes, but I also see PÅ hutukawa and Oak trees as equal. The more you bang the drum about 'exotic species' and saving the native species, the more often

we'll get callous and stupid poisoning/cutting of decades old tree, as what happened with the non-native trees in Kerikeri. There is a misguided logic to removing any non-native trees of substance and stature. A trees is a tree is a tree and we need as many as we can get and keep and natives prefer to be in large stands rather than singular trees in heat sinks (the primary school I mentioned previously replaced the four, large non-native shade trees with three native trees - two of which promptly died and the third is heading the same way... utterly clueless ideology to replace the non-native trees. I warned them it would happen, referring to MÄ ori Kaupapa).

Tell us why

Domestic cats are natural killers for fun not food, research is Sydney Australia proved this over 2 years ago. Cat owners need to be accountable for their pets, desexing and microchipping is just the start. Cats should not be allowed to tresspass onto my private property. One of my neighbours has 6 cats and her property backs onto beautiful council owned bushland. Our birds should be protected, why should a cat be more important than a bird or even a dog.... keep cats contained or get a pet fish.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support

as above, also to rehome cats once they are found, alive or dead... is your own cat not special enough that you would want this ?

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

As above, research in Australia has shown domestic cats travel for many kilometers at night and day and kill just for fun.... its not ok... they kill multiple birds and reptiles for nothing but fun..... cat owners need to be accountable for their animals... I dont want my neighbours cats in my property, chasing my daughters pet rabbits or chasing our chickens.... but currently I cant do anything about it.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

No cats should be on our Islands, we need to support the bird life and reptile life.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

In New York many years ago they offered free desexing and is wasnt a succes, but offer it and if people dont comply, then fine them and sieze the cats.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Yes, confine them only to their home and property, they must have an outdoor cat/ avairy if the cat is to be outside. Compulsory registering, desexing and staying inside/ or cat aivery.... and penalties such as fines or seizing the cats if owners do not comply.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Add cats to the predator free eradication list, both domestic and wild cats.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

To stop these from spreading.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

To try and stop invasive species spreading.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

To reduce this happening.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

To support our enviroment, not enough is being done.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

YES!

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Provide easily available info to councils customers, ie the rate payers and renters via e info and libaries.

Let's protect our environment: early consultation #3219

Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This will remove the risk of interbreeding of domestic cats with feral cats - and will reduce the numbers of unwanted kittens that the SPCA tries to deal with every year.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This helps to distinguish stray cats from pet cats.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This is desirable but probably not always achievable, hence the need for microchipping/registering.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Can't imagine why anyone would take cats that are NOT their pets.

Cats that are well managed (as above) should not be a problem.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

People who cannot afford to desex their cat perhaps should not own a cat - but it seems unreasonable to deprive such people of the joys of living with a cat, so for the sake of the environment the best solution is to fund desexing of the cats of genuinely deserving people.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Pet shops should provide clear information about responsible cat (and all other pets) ownership to all customers.

Auckland Council could assist with the disseminating of information. Most urban dwellers are ignorant of the natural world, especially that applicable to New Zealand, but they are usually happy to comply with regulations around cat ownership when they understand the reasons.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Information about the unique New Zealand natural world and how to care for it should be part of the school curriculum, and a mandatory part of the information given to immigrants to New Zealand.

Also people who have unwanted pets like birds or fish, sheep or goats, need to know that they should NEVER be released into the wild, and the reasons why need explaining.

Cats, rats, stoats and possums are not the only undesirable animals in the NZ natural environment.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

When people understand the reasons they usually accept the regulations.

The rules are necessary for compelling those who do not care.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

If it is not done, the high value marine ecosystems will cease to have high value.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

pests need controlling or they simply spread further.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

If that is the best way to prevent invasive pests then boaties should accept the restrictions

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Of course.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I've already said it

Let's protect our environment: early consultation #3237

Easy to identify where a pet lives and is cared for so that others can be eliminated or rehomed. All of Auckland change could be phased in over time.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats do sread diseases that affect pregnant women like toxoplamosis which can affect maui dolphins as well through their faeces. Keeping cats inside reduces infections in vulnerable or immunocompromised people. Pet owners can be responsible about reducing instances of these infections. For me I constantly have other peoples cats on my property and I have no control over this meaning that any birds skinks etc that are thriving from my native plantings are at risk from these unidentified cats. All of Auckland changes could be phased in over time.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support

Rakino Island	Support
Waiheke Island	Support

Tell us why

Reduce population sizes

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If they can't afford to keep a cat then it should be taken off them and destroyed.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Its tricky and education will be part of it as people have been blind to the role cats play for a long time - a bit like hedgehogs as well.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I would love to see our local Devonport peninsula a pest free haven - there are several areas that could be defense lines - we are already stoat free pretty sure and have low numbers of possums. A toll-free number to report pest species and a stronger team to support this would follow up the great work on waiheke.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Seems logical to stop spread of caulerpa which is so invasive. Pretty hard to hold the line in water.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

I believe invasives need to be controlled to prevent habitat degradation and knock on effects to other endemic species even though it is difficult.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

The more lakes we can keep pest free the better for endemic wildlife.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

we don't want freshwater clams there - they will overwhelm our native kakahi that have a complex reproductive cycle relying on multiple species.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, buffers and halos around regional and local parks provide extra support for natives. We need more native trees planted and bigger areas of rotting organic material to turn into soil and absorb more water in bigger rain events. We have lots of pest species but they are not being controlled properly, especially along roadways, in industrial areas and along railway lines - these can be corridors for pest species to travel along.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Supply CAMS weed mapping software to local groups to map weed infestations and update checks.

Let's protect our environment: early consultation #3245

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Kittens are cute but they do grow up to become cats and there are occasions when people no longer want to take responsibility for kittens as they mature. Desexing all domestic cats would prevent the proliferation of litters of unwanted kittens. It would mean that if a person wanted a cat, if it were desexed, then the current cycle of entire cats producing more unwanted kittens would be stopped. A small proportion of these kittens could become feral, and feral cats cause untold damage to our environment.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

If all cats were registered and chipped (like dogs), if they were lost/wandered, they would be able to be returned to their owners, preventing them from possibly becoming feral and causing so much damage to our native fauna.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Unsure

Tell us why

I do think that owners should take responsibility for their cats being contained on their property. This would involve either keeping them indoors, which some people do, or building a catio. What concerns me is that some people, particularly in more urban/suburban areas of Auckland, might not see the necessity for this or not care. Policing this could be extremely difficult and expensive.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

I do not think there should be any domestic cats on our offshore islands. If people choose to live on an offshore island, this should be a consequence. Even domestic cats can catch our native fauna if let outside, particularly if they roam. Cats do wander and there is always the potential of them going feral.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Desexing cats will stop the cycle of unwanted kittens continually being born.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I think that the suggestions of desexing, microchipping/registering and containment are effective management strategies. Being required to desex, register, microchip and contain your pet moggy could make people more hesitant about owning a cat(s) as there as more responsibilities - like there are as a dog owner.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Continue to work on monitoring for pests on islands that are free from introduced mammals and serving as sanctuaries for threatened species.

Continue to run education programmes so that people, particularly those who are new to New Zealand, are aware of their responsibilities to keep our pest-free islands and areas, pest-free.

Target particular, pest-free areas for re-introduction of populations of native fauna so that flourishing populations can be ensured.

Continue to support community groups who help residents in the TÄ maki Makaurau region trap mammalian pests and eradicate pest plants. In this way, as populations of native fauna on off shore islands flourish, they have safer areas that they can move into on the mainland, establishing populations outside of the sanctuaries. I'd like to see kÄ kÄ and other native birds re-establish themselves around TÄ maki Makaurau, just like what has happened in Wellington. That success is what I'd like emulated in TÄ maki Makaurau .

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

We do not need caulerpa seaweed spreading over the Hauraki Gulf. It needs to be contained and destroyed. It is a dangerous threat to our marine environment.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

I think it's very important to preserve high ecological and/or cultural value marine ecosystems. With those systems preserved, there is the possibility of areas close to those preserved able to be regenerated at a later date. It's like creating a bank, not of money, but of the environment for the present and future.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

I have enjoyed swimming and walking round Tomarata Lake. It would be wonderful to have more lakes preserved in that condition. Being able to enjoy our fresh water environments is such a privilege. However, I realise that financial considerations have a major influence and it might be that some bodies of fresh water are prioritised over others.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

I do not want to see fresh water gold clams spread to our fresh water environments so am supporting banning motorised boats from Lake Tomarata. This ban is a consequence of protecting our fresh water lakes. Plus, this ban of motor boats has wider benefits for Tomarata Lake. I would support this ban being taken to other fresh water lakes as well.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes - we need to prioritise increased climate change resilience when managing our natural environment. With the heating of the atmosphere and oceans, increasingly severe weather events, such as the 2023 flood, will only become more common. We need to prioritise the resilience of our environment so we can mitigate the damage caused by flooding, prevent the spread of weeds and pest animals in the aftermath of flooding, and put flood prevention and mitigation strategies and tools in place to protect our unique natural environment.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

I think that given financial constraints, one of the most effective strategies is to support community groups and education programmes so that people can take responsibility for their environment around their 'place' in a collective way and know why it's important. Not only could doing this help people connect with nature and their 'place', they can also build a feeling of community with their neighbours.

Let's protect our environment: early consultation #3267

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats are really special cool pets, and they are a really cool animals how ever they do casue detremientle impacts to the enviroment, and it is our responiblity as pet owners to look after the Pet, which includes the envirmoment in which they live.

Cats are prolific breeders, They have very big Litters, multiple times and year, and can start at a very young age. Females can start breeding at the age of around 5/6 months. This is not only unsafe and sad for these young cats to start having litters so young, but also means that cats can breed very quickly. and our feral cat popluations sky rocket. A lot of cats and kittens get killed and abandoned evryyoear. Alot of these Ferel cats live very hard sad lives. This just isnt fair for both the cats and kittens who didnt ask to get born into that, and the native wildlife severaly impacted by these ferel cat populations. Nutering of male cats is also very vital. Too

many pet owners desex the famales but leave the males becausethey don't (typicly) have to know/think about/ find out about the litters he may be sireing. This is lazy petownership. Unnutered males also are alot more agressive to their owners, other cats, and other animals. Desexing acts to curb these popluations.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Currently in Aotearoa Cat microchipping and registration is not compusory, and I think it should be. Microchiping is good for the cats, if they get lost they can be more easily found and returend home. If we made it compulsory for owners to micorchip all cats we would also get a data base for all the domestic cats in Aotearoa, this might be able to help shape policy and reaserch in the future for how can we live in partnership with nature, incuding with our pets. Keeping cats indoors and microchipping cats is just part of being responible pet owners.

There is a lot of push back to cat ownrs taking more responiblity, I think this is unfounded. It is genreally accepted that for dogs you have to microchip them, register them, keep them undercontrol, ect. This not only protects our dogs, but also our comuntities. It makes it easier to understand, and regulate. Working to ensure better qualities of life for the dogs, and all others in the comuntiy. Why should'nt we adopt the same perspectives, and actions around cats.

Cats get hurt, run over, stolen, lost, and can be public nuisances. This is not the cats fault, its just all apart of living, and living alongside a densly populated and growing city. We need to be looking into the future, how can we best manage and look after our pets, each other, the native wildlife, not stuck in the past with old, ideas about what it means to be a 'cat owner' or 'dog owner'.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats are loved pets, and they are really cool creatures, however a part of that means that they are extreamly talented predators. We are in a biodiversity crises world wide, creatures all Around the world are disapering at a alarming rate, Aotearoa is a prime expample, we have watched as introduced speices in Aotearoa have decimated our native birds, lizerads, skinks, frog, bat, invertebret populations. These invasive pests are not morally evil, they are just in the wrong place, and unfortunatly cats, both ferrel and our pets fall into that catergory. With all the work that is being done across the motu to bring back our native bird popluations, and all of our other flora and fauna, it seems silly if we carry on with pet cats wandering, with free reign to eat all the skinks, birds, and other creatures they see fit. Keeping cats contained to there owners property would hopefully help protect our wildlife.

I would even go one step further and try to keep cats indoors. We know cats can live happy fufilling lives indoors. They are protected from the potential threats of the world, diseas, cars, dogs, other cats, ect.

People need to change their attitudes around cats, They are seen as a low mantiance pet that people can just feed and they will mostly take care of themselves, this is just lazy pet ownership. We know that cats can live very fusfilled lives inddors, they just need more time and work from the owners, but the owners have a responiblity, to the cat, and to others.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure

Tell us why

I feel like our off shore islands should be protecting our native wildlife, we have already driven too much off the mainland. So should'nt we be aiming to get rid of all introduced animals off offshore islands, including our pets. So I defienlty dont think any animals should be allowed on these islands, if anything I think no domesticated/ introduced creatures shouls be taken to offshore islands.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Unfortunatly Vet bills are really expensive, and in our cost of living crises that we are in, this can mean that vet bills (including/ espicialy desexing that people unfortunatly may see as unnercery) can be inaccicible to people. We need to be focusing on solutions, and helping people reach solutions.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I think cats should be kept indoors. This will act to protect our wildlife and also our cats.

Cats roaming free are exposed to a wide range of dangers, including disease, other cats, dogs or other predators, cars, getting stollen, getting lost, and much more. Keeping them indoors will protect our cats from that. Not to mention protecting our Native wildlife from our cats.

Cats can live fufilling lives indoors, it just might require more work from the owners. Enforcing cats to be indoor cats might make people think more carefully about the responiblity of petownership, rather then buying cats willy nilly because they are 'cute' and 'independent' so not too much work.

Having most ctas indoors may also help us understand our ferel cat populations better, and slowly tease apart humane, effective solutions for managing our feral cat populations aswell.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I think we should be encouraging local comunites to be engaing in back yard pest trapping. Empowing comutnities to go out into local bush, reserves, parks, and even there own back yard. We have power in numbers and power in action. Action sparks more action. Empowering comuntities, is cheaper then eradication programs, and if we can get enough people active, really effective as you have a massive potential vollenteer/ worker base. As the old saying

goes many hands make light work. Local scout groups, schools, ect could make realy impacts in a active trapping comuntiy. Teaching connection and respect for the land, each other and the world around.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

We know that invassive species have a massive potential to wreak havvoc. A lot of these speieces get spread around the world by hitch hiking. People know this but unless required to most will probably not. Creating a law that enfources gare like, anchor chains and other marine equipment to be free of pests, visible dirt, seaweed and animals before moving to a new location, menas that people are more likely to follow, and hopefully protects from the spread of new potenial hamrful speices, disease, other polutents and pathogens.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

We know the detremental impacts invasive species have in our eco systems. On econmoic bases, biodiversity bases, aethetic bases, ecological functioning bases. We need to do all we can for contolling invasive species, to help bring back balence to our strugling eco systems. We are so lucky in the hauraki gulf for all the incredible wildlife we have. We need to do our bit and get better at doing our bit to protect it. Our marine ecosystems are stuglling so much. and its really scary. Not only are they important for biodiversity and all the foodsystems, ecology of the mairne world, but also our fisheries. We need to be more sustaible, and proactive, and protective.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

We have a resiponibilty to the enviroment to protect it, be kaitiaki. Defiently not turn a blind eye and keep destroying it, and allowing pests that destroy it to keep on going. We need to take all the steps possible and avaible to us to protect what we have. Preventative action is far better, cheeping, more effective then 'tidy up care'

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

People are adaptable, the enviroment when pushed to its absolute limits such as what we are doing is less so. The Motar boating is a valuable recreational experience, however there are plenty of other valuable recreational experiences that can bring economic and recreational value, through ecotourism and holidays and what not. We should be focusing on adapting that experience to something that is eco freindly. How can we continue to allow motorised boating on Lake Tomorata when we know the terrible impact it is having. That in itself is going to overtime ruin and stop all of boating and all of marine experineces around Lake Tomorata. So we need to take preventable action now while we have the chance. ban motarised boating and adapt the recreational experince to a susatinable and respectful one.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Part of increased climate resliance is focusing on reduction of fossil fuels. Focusing on renewable energy sources, cutting out polutent. Part of this is having a good, sustaible, reliable public transport system, and bike ways. Encourage people to use these systems as well. Make them safer, more effective.

We also need to look after our water ways and biodiversity espically with the increasing threats of climate change. Work with nature to build our resliance, rather then fighting it.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

While I recognise that there are many issues facing council with respect to our environment I would like to submit on the issue of pet cats.

Auckland Council supports responsible cat ownership through education and encouraging owners to try new measures that keep their cats happy and safe. Free desexing and microchipping are great but a drop in the ocean. More needs to be done to protect our native fauna.

Cats are an apex predator and as such need to be controlled just as dogs are. Apart from killing native species roaming cats can disturb fauna causing distress.

I refer to a paper titled: Research Challenges and Conservation Implications for Urban Cat Management in New Zealand 2017 which states that wildlife in close proximity to cities often lead to human–wildlife conflicts. These conflicts can be especially fraught where companion animals are predators, or prey, of wildlife of high conservation value. Other documented impacts of cats include competition for resources, alteration of ecological processes, behavioural changes (e.g. induction of stress or changes in breeding behaviour) and disease transmission.

In 2013, the New Zealand Veterinary Association (NZVA) commissioned a systematic literature review of peer-reviewed cat publications from New Zealand and overseas. The key findings from the report included that cats in New Zealand are likely to prey on millions of small animals (both native and non-native) annually; trap–neuter–return (TNR) is unlikely to provide a long-term solution to cat population management in New Zealand; formal mechanisms to establish cat ownership should be investigated (e.g. compulsory registration and microchipping); more research is needed on cat population management; and the promotion of responsible pet ownership must be a focus of any strategy for cat management. They also found that prey caught in purely urban areas are primarily invertebrates so not necessarily seen by owners. I have a personal anecdote here: my daughter's neighbour told her that their cat catches the native koura. They border a small patch of native bush .

Australian researchers have found that 1 cat can kill 110 native animals in1 year. Most of us want to see native wildlife around towns and cities. But such a vision is being compromised by this extraordinary level of predation, especially as the human population grows and our cities expand.

Many native animals don't have high reproductive rates so they cannot survive this level of predation. The stakes are especially high for threatened wildlife in urban areas.

Various devices, such as bells on collars, are commercially marketed with the promise of preventing hunting. While some of these items may reduce the rate of successful kills, they don't prevent hunting altogether. And they don't prevent cats from disturbing wildlife. When cats prowl and hunt in an area, wildlife have to spend more time hiding or escaping. This reduces the time spent feeding themselves or their young, or resting.

In Mandurah, WA, the disturbance and hunting of just one pet cat and one stray cat caused the total breeding failure of a colony of more than 100 pairs of fairy terns.

Keeping cats indoors protects pet cats from injury, avoids nuisance behaviour and prevents unwanted breeding.

I acknowledge that cats are an important companion animal but for too long their effects on the environment have been ignored. Also they are often a nuisance for non cat owners chasing and killing wildlife, digging and defacating on gardens and lawns, fighting and injury. Many owners believe their cat doesn't hunt as they don't bring home prey. Studies using cat video tracking collars or scat analysis show that on average pet cats bring home only 15% of their prey. Most cat owners just leave their cats to roam as they like.

Therefore there needs to be control of pet cats.

I suggest therefore that there is:

1. Mandatory desexing of cats from the age of 6weeks(before they have a litter)
2. Mandatory collar or microchipping
3. Keeping of cats indoors at night (to begin with)
4. Limit to the number of cats that can kept in one household

It would be safer for our native birdlife and also for the cats themselves, especially in areas where there is a lot of traffic.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support

Rakino Island	Support
Waiheke Island	Support

Tell us why

Some of our precious and threatened species are currently making a comeback on some of these offshore islands, and a runaway domestic pet could easily escape from their owners and become feral, feeding on the birdlife we hope to protect.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

I would support this to some extent, but I feel that it should be contingent on the proviso that people do not accumulate large numbers of cats. There needs to be a limit placed on the number of cats people are allowed to own, particularly when they are depending on Council support to have their animals desexed.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Cats found wandering should be put down if they are diseased or in poor health, especially if owners don't promptly come in to claim them.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

It should be illegal for people to take in stray cats, so that all household pets are guaranteed to be desexed, chipped and disease-free

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Our marine environment is most important to us; it provides a home for all our valued marine species, it provides us with food and it is important to our enjoyment of the beautiful area we live in

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

It might be inadequate to take this approach, as there would always be the possibility that invasive organisms could migrate from uncontrolled areas into the ones chosen for protection, despite any precautions designed to prevent this.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Do not support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

We should do whatever is necessary to protect our environment from destruction, whether by pest species or boats.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, of course we should do whatever we can to protect the environment we live in; it is vital to our quality of life.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

The Council should continue to give substantial support and encouragement to all the community groups who are already working on pest elimination in our many little pockets of native bush and our valuable wetlands.

Let's protect our environment: early consultation #3294

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Support

Tell us why

There must be no grey areas. Its all or nothing. Cats are known to roam more than 1.km - this is setting council up for a difficult compliance problem. Cats are increasingly in the news around the killing of our native species. Cats are an Apex predator and there is plenty of evidence showing cats (domestic and wild) kill skinks, weta's and plenty of birds. Wild cats are a significant problem and eliminating unplanned breeding will help solve the problem in the long run. It should not be legal to feed wild cats.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Support

Tell us why

There must be no grey areas. Its all or nothing. The 1.km radius is a nothing suggestion. Cats are known to roam 5.km or more. Council needs spine to bring in meaningful change and associated penalties for those that don't follow the rules. I have a photo of a sign in the UK indicating 1, pound fine for not cleaning up/picking after dogs defecating in a public place.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Support

Tell us why

There must be no grey areas. The same rules for dogs should apply to cats if we want meaningful change. Cats are observed in night vision cameras roaming far and wide so an alternative could be cats kept on the property at night but once again this would be a grey area for some. If cats are contained on owners properties then this frees council up to allow bait lines in parks as required without being worried about concerned pet owners.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

There must be no grey areas. These Islands could be awesome if cats/possums and other pests removed. Having spent some time on Great Barrier its distressing how degraded the environment is there compared to Tiritiri Island. I wish this submission included dogs!

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

Dont really support as there has to be some responsibility for pet ownership. The supermarket isles are filled with expensive petfood, surely desexing is not much of an added cost. If there is support it may be limited to those with social welfare cards.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Increased compliance on dogs. Its not uncommon for dog owners to take their dogs for early morning walks off their boats.

Limiting dogs to certain beaches and having some critical beaches dog free. This 'off lead' and 'on lead' and time windows are grey areas which just add to more difficulty with compliance. Increased fines for dog owners and cat owners for doing the wrong thing. (note I have had pets in the past but Im now very pro protecting and improving what we have). Controlling cats with no grey areas would be the single biggest thing Council could do to help our native fauna.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

I have a boat and am all for supporting what we can do to limit invasive species. I follow the above already.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

I support what is practical. Unfortunately I'm not sure we can win the battle against caulerpa but if deemed possible by the experts then it should be investigated and followed through on.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

I agree that efforts should be made to protect all lakes - best with local neighbourhood group with council support..

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

There should not be a grey area. Should be blanket ban.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Dogs should be restricted to particular beaches at certain times. Watching dog owners allow their pets to chase birds on the beach is distressing. Western Australia has completely dog free beaches and dedicated dog beaches. This way there is no grey areas and limited compliance issues.

Let's protect our environment: early consultation #3305

Tell us why

For too long

My home is surrounded by cats and it is so obvious that they are killing off bird species in our area. Our home environment is a haven for birds. I regularly witness neighbourhood cats stalking birds, and have witnessed cats with birds in their mouths. Our neighbours even talk about their cats coming home with birds. We've asked neighbours to keep their cats indoors at night, unsuccessfully. We find this very frustrating.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Current numbers of Cat ownership, and the feral cat population are too impactful on the bird population. Numbers need to be reduced. Cats have a long lifespan. Measures need to be taken to halt or reduce cat populations.

The current feral cat program of catch, desex and release does not stop that particular cat from having a long life of killing birds .

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cat owners shy away from responsibility for their cat's actions.

If the council gives a reason as to why their cat has to be microchipped and registered it will increase awareness of the impacts that cats have on the environment.

Should legislation change making it compulsory that cats are locked indoors at night,

or be restricted to the owner's property, having the cat microchipped would ensure that the owners would be traceable and held to account.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Across Auckland - I'd like cats to be shut indoors at night. This is possible as most owners are at home during the night. It would reduce predation while the birds were sleeping.

On smaller islands - Keeping pets contained on their owners property would be a step towards becoming predator free. Increased rodent control would have to accompany this, as cats would no doubt have helped to control rodent populations when left to roam.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Those that could not afford to desex their cat would also be unlikely to control their cat from breeding, or to register them. The development of your program is to reduce the cat population.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Domestic cats clearly have an impact on the wildlife (I consistently see them stalking birds in our garden). Just as dog owners and recreational fishing has limits and rules, so do cat owners.

Feral cats should be put down in a humane way, not desexed and released.

Domestic cats need to be chipped. If not chipped and they are caught roaming, they should be treated as though they are a feral cat and put down in a humane way.

Cats should be kept indoors at night.

Cats need to wear a bell collar or a coloured collar to alert birds.

There should be a limit to the number of cats that a household can have, just as there is with dog owners. (I'm not sure how you can initiate this).

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

National Predator-free by 2050 is a money pit that will never be achievable. New Zealand does not have enough money to completely eradicate all predators.

Focusing on the islands and fenced reserves is possible in order to sustain species diversity.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Invasive species need to be kept in check, because of longer term impacts they can have if left to multiply.

Is this a new role that Auckland council is taking on?

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why
I do not know enough about this topic. What resources are available?

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Until we have some time to assess how to manage and contain the freshwater gold clam it is better to protect other major bodies of freshwater. Lifting a ban could come at another date.

Alternatively, could hire-boats that are restricted and licensed to a specific singular body of water be allowed?

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Cats naturally hunt and kill many bird, lizards and insects. Many of these are native, and all add value to our environment. We have pest control programmes that focus on other introduced mammals, yet there are few controls on one of the damaging predator, cats. Feral cats need to be destroyed and pet cats should be strictly controlled, including deserted, chipped and keeper inside. We must minimise their numbers to reduce the damage they cause.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support

Tell us why

I encourage birds into my property by planting particular trees and plants as well as feeding birds seed and sugar water. Why should I have to put up with stray and neighbours cats attacking these birds at all hours of the day.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

Why would a non pet owner take a cat to an off shore island. We need to restrict cat ownership and ensure cats remain on their owners property or house bound.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Do not support

Tell us why

If you can’t afford to chip and register your cat you probably can’t afford to look after it. The same should apply to dog owners. As a registered dog owner why should I be supporting others who do take proper care of their dogs. It should be a privilege, not a right to have a dog. I have a dog that is fenced in, and regularly walked on a lead. As a pensioner I should not be subsidising the management of irresponsible dog owners. The same for cats.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

All cats should be registered, chipped and desexed. The cost of implementing and managing this policy should be fully funded by cat owners.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Protect birds, lizards and insects by getting rid of cats in Auckland.

Be more proactive in managing other predators such as rats and opossums.

Also be more proactive in managing urban weeds.

These issues should be considered core business and fully funded by reducing Councils social welfare spending. There is so much wastage with Auckland Council.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

NO!

As a retired scientist and close follower of scientific papers on climate change I do not accept the science put forward supporting climate change as proposed by the UN and widely promoted on social media. My understanding is based on scientific papers by the worlds leading physicists, including the physicist awarded 2022 Noble Prize. Not also one of the original founders of Green Peace, a notable ecologist is also of this believe as are thousands of to scientists in relevant sciences. If you read the properly referred scientific papers on this subject you will understand the miss information being pushed largely on social media and political pressure groups.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Simply ban the growing of the worst weeds such as English Ivy

Let's protect our environment: early consultation #3339

Domestic cats that are free to roam are able to kill birds & skinks. They may kill rats & mice. In special areas including islands they should not be free to roam.

It would be difficult to contain cats apart from "catios"

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support

Rakino Island	Support
Waiheke Island	Support

Tell us why

Visitors do not need to take domestic pets to islands. Pets can have a holiday in a cattery

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Lots of people probably allow their cats to breed because they don't have the money for de-sexing operations esp female cats. It is in the interests of the birds, cats themselves, the local neighborhood to provide finance.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Education on information about ways to contain cats.

Information on the harm they cause

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Publicity given about groups that are operating successfully

Continued work on the islands

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

If pests are spread via anchor chains, etc. then these should be cleaned so they don't inadvertently spread

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Invasive species need to be controlled wherever they are but especially if the areas are high value for recreation, fishing

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #3704

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

Pet cats that are well looked after should be desexed by responsible owners unless they are registered breeders.

Protected habitat islands for birds or small animals should have no cats in the vicinity.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Responsible owners look after their pets. Microchipping is part of that responsibility.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

Cats are very difficult to contain. They can climb and are roaming animals. Desexing is the best way to eliminate feral cats

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

By financially supporting desexing of cats the feral cat population will diminish.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Common sense indicates cleaning your boat after removing from the water will help control invasive species

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

Very hard to balance the recreation use of boats with the damage they may cause. We all want to protect the lake but if it gets no use by families it is no longer a social benefit to the community

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Climate change is a naturally occurring phenomenon. Whatever is done might delay severe environmental damage but it won't change it ultimately.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Exotic species have been introduced into New Zealand since humans landed on these shores. We can only work with holding back or eradicating the worst that impact our land and waterways.

Let's protect our environment: early consultation #166

Support

Tell us why

Cats are the biggest predators of native birds and skinks.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Remove wild cats.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Islands and peninsulas are essential.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Do not support

Tell us why

We will never remove it. You will spend enormous amounts of money with no long term benefit. Stop it spreading. Find an alternative use for it, e.g. fertilizer.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Stop providing building resource for buildings within 1m MHWL. It should be considerably more than this.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

The biodiversity on the Hauraki Gulf Islands needs to be clearly specified.

The biodiversity in the Waitakere and Hunua Ranges needs to be clearly specified.

In addition, the boundary for these areas needs to be clearly defined and should include some residential areas (for example Huia and Little Huia, to mention but a few).

The biodiversity for Auckland suburbia can never be controlled. It represents a huge cost with questionable benefits.

Some areas like the regional parks should have their biodiversity defined. However, Wenderholm has the Chilean Flame tree which should be regarded as acceptable. So each area will have different requirements.

It would be great if we could have a fenced off enclosure area for pest exclusion in the same way that Wellington has. This has obviously been a great success.

Stop cutting down trees. In Otahuhu 345 trees are specified for removal on Mount Richmond. Auckland Council approved this. Yet at the same time trees were planted in the city at huge expense

I suggest that if you are cutting down Moreton Bay Fig Trees in Otahuhu, then we also cut Moreton Bay Fig trees in St Heliers and Mission Bay.

You cannot have different rules that you apply in poor areas and rich areas.

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

I do support this, but the messaging needs to be wider, and louder.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Domestic cats are only a part of the problem. More support needs to be given to those who do the mahi with wild, stray, street, and ferrel cats. Stray cats should be considered pests just as rats and stoats are. And controls should be put in place to reduce the wild population over time.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Support

Tell us why

We see far too many cats out & about ... we have also seen the effects of what cats get up to in relation to not only our native birds & reptiles but to birdlife in general.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	
All of Auckland	Support

Tell us why

So they can be controlled & returned to owners as required.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	
Kawau Island	
Rakino Island	
Waiheke Island	
Within 1km of known threatened species habitat (see map 1)	
All of Auckland	Support

Tell us why

If cats are bought up as 'indoor cats' then it's a straight forward process ... access to catico's is a option

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

We trying to make things predator free ... so why continue to introduce pests to our off-shore islands ... have a sinking lid policy on these islands

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

The quicker itâ€™s done the better.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

If mandatory desexing & microchipping comes in â€¦ then the councils also need the ability to control cats, by this I mean if any cat is caught & itâ€™s not deserved & microchipped, then it gets euthanised without any â€˜oh, weâ€™ve got to rehome it nonsenseâ€™ â€¦ sort the problem out, once & for all.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Just get on with it!

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Itâ€™s what needs to be done to stop the spread

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Do you really need us to answer this â€¦ itâ€™s a no-brainer

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

To stop the spread

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

There are others that use these areas â€¦ not just people with motorised boats

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes â€¦ continual work in these areas will bring results â€¦ not just sporadic surges of work.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #662

Waiheke Island	Do not support
Within 1km of known threatened species habitat (see map 1)	Do not support
All of Auckland	Do not support

Tell us why

This is a massive change.

Cats looked after by people are not having a devastating impact on birds. It is feral cats and to a lesser degree stray cats.the key is to prevent these breeding creating more strays or feral cats. If cats are desexed the problem is greatly reduced.

Other pests have a larger impact and are not being controlled such as possums stoats ferrets and rats.

For protection from dogs is a porro reason as dogs are to be kept under control and safely in your property.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support

Kawau Island	Support
Rakino Island	Support
Waiheke Island	Do not support

Tell us why

No reason to take your cats everywhere. They may get lost and become the issue kin a new place.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Prevents a larger more costly issue

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

It is cruel to lock an animal inside after being outside it's whole life. I have taken in a stray desexed and chipped. I could not imagine locking her in. The issue is stays and feral cats in native bush areas. They are a problem and should be dealt with.m

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

More trapping of pests

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, I would also like to see it be easier to protect properties from streams and tides. Whether by native planting or rock walls or both

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Council land is full of pest species. Start leading the city by removing these such as nightshade.

I don't know where to dump pest trees it would be good to have e a few clear locations and maybe have it subsided.

Let's protect our environment: early consultation #686

It would be a very big ask and too much to do I think, if the other requirements came in.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

It won't happen otherwise. These things need public funding and to make it super super easy for people to fit it into their lives, local desexing clinics, advertising etc.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Some honest marketing and discussions, social media ads, clear facts on the impacts, empathy for cat lovers.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Be even more aggressive, be loud and proud about achievements in this, kÄ kÄ growth, kÅ kako recovery etc

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Not a big ask, hopefully encourages people to think about it, even if I wonder about enforcement.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

I want us to continue to improve native recovery.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why
Freshwater and sea life play crucial parts in our ecosystem

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Plenty of other places that motorised boats can be used in.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

100%

It's only going to get worse and we need to factor it seriously in to any plans and hopefully limit the damage

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Be loud and proud about it.

Partner with media personalities, journalists and influencers.

Let's protect our environment: early consultation #691

Cat ownership is a privilege and should be treated as such.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Unsure
Kawau Island	Unsure
Rakino Island	Unsure
Waiheke Island	Unsure
Within 1km of known threatened species habitat (see map 1)	Unsure
All of Auckland	Unsure

Tell us why

My preference would be to ban cats rather than force them to be prisoners in a house.

Cats are meant to roam free and locking them up is tantamount to imprisonment.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

Cats should not be taken on holiday. They should remain at catteries or at home.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

If they are unable to afford desexing, what else cannot be afforded? Healthcare? Food?

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I believe Gareth Morganâ€™s view was valid.

Current cat owners can keep their cats, but once they pass away, they should adopt from a shelter. They should not purchase a new cat as the destructive behaviour or cats will continue for another generation.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

Mangere bridge could become a pest free zone within central Auckland. Given large population of birds in the manukau harbour this could become a beacon for the future. start with puketutu island and expand.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

This is required for hikers and sports enthusiasts already for mud and pests.

Inteoducing it to boats should be relatively easy. especially for anchors and lines which are easily inspected and can be visually checked.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Unsure

Tell us why

I do not understand the question. Someone should be doing this. I am unsure which department should be responsible.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Unsure

Tell us why

Again, I do not understand the question. Someone should be doing this. I am unsure which department should be responsible

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

I do not believe I have sufficient information or opinions in this topic

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes. Stop using fossil fuels and join the future with more regenerative energy.

Recycling and garbage laws should also be updated similar to Europe where rubbish is collected fortnightly and recycling is every week.

An effort should be made to reduce plastic use, general waste and focus on making our environment nice to live in.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

The ocean is the heart of the planet. It is hard to see when something is wrong, but without it we will suffer. Unsustainable practices should be outlawed for citizen but especially commercial interests.

Offshore oil exploration should be prohibited. Weâ€™re living in the 21st century. Why are we continuing with an obviously old way of thinking that has obvious alternatives. Oil is a really narrow minded approach.

Dredging is archaic and destructive.

Waste water being dumped into waterways is insane.

Overfishing is obscene.

We should be fine companies who abuse our waters and help breathe new life into our oceans.

Let's protect our environment: early consultation #703

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

An over run of cats threatens our wildlife, especially our vulnerable birds.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Having good knowledge of the number of pet cats within each region, especially our islands, is important for management.

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Do not support

Tell us why

I think within our islands which have a lot of wildlife it is important to keep cats contained. Whereas in all of Auckland may become a bit excessive and receive backlash from the public.

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Do not support
Kawau Island	Do not support
Rakino Island	Do not support
Waiheke Island	Do not support

Tell us why

I do not see a reason why pet cats should be taken to offshore islands.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Unsure

Tell us why

I understand that increased financial support may help alleviate pet owners financial difficulties for desexing their pet cats, although I feel that this will become an exuberant cost!

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I think understanding which regions are most impacted by cats in terms of threats to wildlife will be the most important. And then focusing on managing cats in these areas.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I think we can host more community events to move towards becoming predator-free. I think building understanding of pest control in the general community will be a great contribution.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It seems like a simple rule to help protect our environment.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

It makes sense to determine which regions have a high biodiversity and high ecological and cultural value, and to place those high on our list of protection.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

This seems like a good idea, our marine spaces and freshwater spaces are both equally important.

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

I think completely banning motorised boats would receive wide backlash from the public. Perhaps placing restrictions on the motorised boats, e.g. ensuring they are clean, and will not introduce freshwater clams will be better.

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

YES. Especially as climate events become more frequent and more pronounced.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1401

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1482

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1535

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1605

Kawau Island

Rakino Island

Waiheke Island

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1747

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1772

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1788

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1825

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1836

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1879

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1890

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland

Tell us why

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland

Tell us why

1C. All domestic/pet cats must be contained to their owner's property

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland Support

Tell us why

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

1C. All domestic/pet cats must be contained to their owner's property

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Within 1km of known threatened species habitat (see map 1)

All of Auckland

Tell us why

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location

Aotea/Great Barrier Island

Kawau Island

Rakino Island

Waiheke Island

Tell us why

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Tell us why

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Tell us why

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Tell us why

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Resilient habitats are less affected by invasive species.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #1963

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

Your feedback

1. Responsible cat ownership

1A. All domestic/pet cats must be desexed

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Significant populations of stray cats in Auckland, my partner has ended up looking after 4 and my neighbours looking after 2, all shelters full. Not good for cat welfare or for native fauna.

1B. All domestic/pet cats must be microchipped and registered on the Companion Animal Register

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

Promotes responsible car ownership

1C. All domestic/pet cats must be contained to their owner's property

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support
Within 1km of known threatened species habitat (see map 1)	Support
All of Auckland	Support

Tell us why

This will be trickier to enforce and may require a cultural shift. However, support on basis that it is supported by most vets, and would be safer for native fauna. Will there be funding to manage stray cats in the same way as strat dogs are managed?

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support

Waiheke Island Support

Tell us why

Support measures that will improve increase of native fauna and ecological improvement

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

This will encourage / enable better compliance, and would be a good use of ratepayers funds as more responsible car ownership brings overall benefits too our communities and surrounding environment.

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Control of stray and feral cat populations should also be considered.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

I'd love to see something similar to Wellington's growth in this space, with birds spreading from Zealandia out into the rest of the city, and predator free mainland areas.

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Seens similar to didymo campaign in rivers - support doable measures, communicated well.

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

We are so lucky to have this unique marine area around Auckland, and so 100% support for measures to protect it. This should include Manukau Harbour as well as WaitematÄ

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

This is a necessary part of management into the future. Will bring benefits to communities as well, as healthy ecosystems support a well functioning society in my opinion.

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Let's protect our environment: early consultation #3355

Note: this version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed and handwritten submissions have been transcribed.

see above

1D. Only island residents' domestic/pet cats can be taken to offshore islands

Location	
Aotea/Great Barrier Island	Support
Kawau Island	Support
Rakino Island	Support
Waiheke Island	Support

Tell us why

There would be more chance of an animal escaping if it is taken to unfamiliar surroundings

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Other

Tell us why

Only if they already have a cat when the laws are introduced, otherwise if they can't afford to desex their cat they can't afford to care for it properly e.g food, catio, vet bills

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

I have never heard any discussions about cats with regard to property owners such as myself not wanting cats trespassing on my property. Why are our rights not part of the discussions. I have to keep my dogs under control and not let them roam and I understand that other people would not want them on their property. Cat "owners" think their cats should be entitled to go anywhere . Cat ownership is for lazy people - all they need to do is feed them. I have planted native vegetation on my property and like all the birds and lizards that use this little haven. They are safe as I have dogs, good fencing and a cat-proof gate but even so I know that cats still come into the property at night. Until cats are contained by their owners our wildlife in the suburbs is under threat and with that any " corridor" effect of our gardens is lost.

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

It is simple basic hygiene

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

We must care for our environment and what little we have left of unique NZ flora and fauna.

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

as above

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Easier to manage if there is a blanket rule

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

More education about what a pest is as a lot of people just assume that the lovely big trees are NZ natives or OK. I walk around the streets here and see examples of pest plants in just about every garden. I have recently reported arum lilies being planted in front of a street fence alongside the footpath and was told the owner would be spoken to. The lilies are still there months later., I think the council is a toothless tiger.

Tell us why

pet care centre can look after pets while away. Allowing to take pets increase unnecessary risks and costs

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

we need to set a new standard, to prevent further uncontrolled reproduction it does not need to be forever

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

Clear regulations and restrictions enforced and supported with education

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

potentially idealistic but great initiative. This could be very expensive, so worth ensuring a systematic approach is taken. Funds could be obtained by selling carbon credits to the voluntary market

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Unsure

Tell us why

Good to be considered. but operationally could be expensive/difficult. I am not knowledgeable enough

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

selected areas should have higher restrictions of all kind

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Protecting freshwater sources is key to protect drinking water too. We can't protect 72 lakes equally nor need the same strategy

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Unsure

Tell us why

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

Yes, focusing on the use of nature based solutions, also, promoting to private landowners and businesses

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

Set an EMS (environment management system), focus on tackling easy wins first (cats) and setting realistic strategies for hard ones(rats). Communication and education is key to get the community's support. Happy to chat not a great writer

Tell us why

they are desexed and registered

1E. What is your opinion on council providing increased financial support for those who cannot afford to desex their cats?

Support

Tell us why

Too expensive now days

1F. Do you have comments or suggestions for managing cats to protect both wildlife and cats in Auckland?

No

2. Pest-free islands

Do you have any priorities or suggestions for our region's contribution towards being predator-free by 2050?

nope

3. Protecting our moana from Caulerpa seaweed and other marine pests

3A. What is your opinion on introducing a rule to require all anchor chains and other marine gear to be free of pests, visible dirt, seaweed and animals before moving to a new location?

Support

Tell us why

Clean waters to drink

3B. What is your opinion on Auckland Council controlling invasive species in high ecological and/or cultural value marine ecosystems?

Support

Tell us why

Get rid of invasive species

4. Our freshwater bodies (including lakes Tomarata and Rototoa)

4A. What is your opinion on Auckland Council controlling pests in more of the region's lakes (beyond Tomarata and Rototoa)?

Support

Tell us why

Good for the environment

4B. What is your opinion on banning motorised boats from Lake Tomorata to help prevent the spread of freshwater pests and to protect shoreline vegetation?

Support

Tell us why

Keep our ecosystems clean

5. Climate resilience

Do you think we should prioritise increased climate change resilience in our management of the natural environment?

yes

6. Other feedback

Do you have any other priorities or suggestions for how we should protect our natural environment from the impacts of exotic species now and into the future?

n/a
