Local Board: Ōrākei

Your feedback:

1. **How well do you think our draft Plan reflects the needs and aspirations of our community over the next three years?**

   Tell us why

2. **The draft local board plan focuses on five key outcome areas for our community. The draft plan includes proposals to meet the needs of our community for each of the outcome areas. In the draftplan, these proposals are made up of objectives and initiatives.**

   What do you think of the proposals for each of the key outcome areas?

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

   How well have we captured these considerations?

Māori outcomes	
Climate outcomes	
Equitable outcomes	

Tell us more

4. Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?

Submission on the Ōrākei Local Board Plan 2026

I support many of the aspirations contained within the Draft Ōrākei Local Board Plan 2026.

It speaks of equitable outcomes, thriving communities, public participation, belonging, cultural heritage, environmental stewardship and improving access to the Waitematā Harbour. These are values that I wholeheartedly support.

However, I am deeply concerned by what the Plan does not address.

The Plan commits to equitable outcomes, recognising that different communities require different approaches to participate fully in community life. It adopts the principles of

Ngā Hapori Momoho | Thriving Communities Strategy 2022–2032 is Auckland Council's regional strategy for a fairer and more sustainable Tāmaki Makaurau where every Aucklander should have the opportunity to belong, participate and flourish.

It also commits to:

- implementing The Landing Concept Plan as part of the Pathways to the Sea vision;
- supporting public access to the Waitematā Harbour;
- supporting marine operations, club activities, events and personal recreation at The Landing.

These commitments are significant.

Yet the Plan is silent on how introducing paid parking at Ōkahu Landing aligns with any of these objectives.

For many Aucklanders, parking is not a convenience—it is the practical means by which they access the harbour. Every additional financial barrier affects participation.

People learning about Ōkahu Bay and the Waitematā.

Organisations saving lives through water safety programmes.

Children learning to paddle waka ama.

Young people sailing for the first time.

Whānau gathering on the shoreline.

Older people who are no longer able to walk long distances.

Volunteers who dedicate countless hours to community organisations.

People living through an ongoing cost-of-living crisis who simply want to spend time beside the moana without another expense.

Public access is only truly equitable when it is genuinely accessible.

The Board's own Plan acknowledges that some communities face structural barriers to participation. Introducing an additional financial barrier to accessing one of Tāmaki Makaurau's most treasured public spaces appears inconsistent with that commitment.

The Landing has never been simply a car park.

It is a gateway.

A gateway to the Waitematā Harbour.

A gateway to culture and history.

A gateway to education.

A gateway to recreation.

A gateway to connection.

A gateway to health and wellbeing.

For generations, people have come to Ōkahu to paddle, swim, sail, fish, volunteer, reconnect with whānau and experience the restorative qualities of the moana. These experiences contribute immeasurably to physical health, mental wellbeing and community connection.

The Board's own Plan recognises the importance of creating thriving communities where people belong and can participate.

I respectfully ask the Board to explain how introducing paid parking at Ōkahu Landing advances those objectives.

If the Local Board is committed to equitable outcomes, public participation and improving access to the Waitematā Harbour, then its decisions should clearly demonstrate those commitments in practice.

Plans should not simply articulate values.

They should give effect to them.

I ask the Ōrākei Local Board to ensure that its final Plan and subsequent decisions remain faithful to the principles it has set for itself, so that future generations inherit not only a beautiful harbour, but one that remains welcoming, accessible and open to all.

A pathway to the sea should never become a barrier to reaching it.

Your feedback:

1. **How well do you think our draft Plan reflects the needs and aspirations of our community over the next three years?**

   Quite well

   Tell us why

   Even though the plans are specific, some of the goals about marine and coastal environment should be adjusted to fit with recent situations in the Orakei such as more focus about business but still keep shores.

2. **The draft local board plan focuses on five key outcome areas for our community. The draft plan includes proposals to meet the needs of our community for each of the outcome areas. In the draftplan, these proposals are made up of objectives and initiatives.**

   What do you think of the proposals for each of the key outcome areas?

Community	Do not support most
Natural environment	Do not support most
Built environment	Do not support most
Economy	Do not support most
Transport	Support most

   Tell us why

Even the current community and natural environment but some residents still not able to find and connect with the community. The reason might cause by the moving of folks from suburbs or cities to Orakei. Therefore, maybe easy to connect with newcomers.

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

   How well have we captured these considerations?

Māori outcomes	Very well
Climate outcomes	Very well
Equitable outcomes	Very well

   Tell us more

   If possible could give more specific outcomes for the climate such as maintaining the recent environment.

4. **Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?**

   Please help to plan about youth, education for children and young adults.

Your feedback:

1. **How well do you think our draft Plan reflects the needs and aspirations of our community over the next three years?**

   I don't know

   Tell us why

   I just moved to this area this year.

2. **The draft local board plan focuses on five key outcome areas for our community. The draft plan includes proposals to meet the needs of our community for each of the outcome areas. In the draftplan, these proposals are made up of objectives and initiatives.**

   What do you think of the proposals for each of the key outcome areas?

Community	Support all
Natural environment	Support all
Built environment	Support most
Economy	Support most
Transport	Support all

   Tell us why

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

How well have we captured these considerations?

Māori outcomes	I don't know
Climate outcomes	I don't know
Equitable outcomes	I don't know

Hello

I'm keen to hear what is being done about keeping our footpaths (and middle of our roads & streets) and shopping areas safe from marauding youngsters

cycles. We(@ve under 12 e-bike riders helmetless all over the middle of the road causing a danger to themselves and others. Outside St Heliers library and 4 Square they are seen riding along footpaths with no regard for pedestrians. Where is the zero the zero guidelines. There need to be some leadership around this issue for the safety of all concerned and clear guidelines and consequences for the benefit of all.

Are you having any more Library meetups before 23 July?

Thank you

Liz Marks (Benbow Street) St Heliers

Attention Sarah Powrie

Good morning Sarah,

I saw the bill board on Madills Farm today with the banner heading GREEN SPACES OR PLAY SPACES?.

May I suggest (or request) that some money be allocated to the planting of some specimen trees in the various gaps around the perimeter of Madills Farm Reserve.

Over the last few years some of what are now large specimen trees have either died, or got damaged in various storms, or were removed for the construction of the underground water tank on the Baddeley Ave corner.

In addition the children's playground area fronting onto Allum Street needs re-landscaping as three of the large trees in this area died in the last three years and were removed and not replaced. This part of the park is looking rather scruffy and could well do with a tidy up and replanted with suitable trees & shrubs.

By planting suitable replacement trees now we can then look forward to a more beautiful park in 5 to 10 years time.

One other suggestion is for a short length of concrete or cobbled footpath be installed to connect the access way from Melanesia Road to the footpath which runs around the park perimeter. At present when entering from Melanesia Road pedestrians end up walking over about 3

meters of wet grass.

I hope that my suggestions can be implemented at some stage during the year. I am happy to donate towards the cost of some of the trees if required.

SUBMISSION: Draft Ōrākei Local Board Plan 2026

To: Ōrākei Local Board / Auckland Council

Regarding: Targeted Maintenance of Council Assets at Karaka Bay, Glendowie

1. Focus Area Alignment

This submission primarily relates to the Natural Environment (protecting coastal zones from erosion) and the Built Environment / Transport (maintaining the integrity of public road reserves and pedestrian corridors) pillars within the draft plan.

2. The Issue: Gabion Baskets and Road Reserve Integrity at Karaka Bay

The public road reserve fronting the beach at Karaka Bay is physically retained and protected by council-installed gabion baskets. These wire-mesh rock cages serve as a vital, low-impact erosion barrier.

While the broader Shoreline Adaptation Plan (SAP) generally discourages new hard engineering structures in favor of natural processes, the existing gabion baskets are an established asset. They are the primary defense mechanism preventing the failure, slip, and loss of the public road reserve that ensures vital pedestrian access, public infrastructure corridors, and safety at the beachfront level.

Left unmaintained, corroding wire frameworks risk structural failure. This would lead to catastrophic localized erosion, unravelling rock debris on the public beach, and the undermining of public land.

3. Submission Points & Requested Actions

I submit that the Ōrākei Local Board explicitly include provisions in the final Local Board Plan 2026 to ensure the following:

• Commitment to Sensible Asset Maintenance: The plan must explicitly fund and mandate the "sensible, proactive maintenance" of the existing gabion baskets fronting Karaka Bay beach. This should be prioritized under the Local Board’s operational asset renewal and maintenance budget.

• Rejection of Premature "Managed Retreat" for Vital Access: While long-term adaptation planning is necessary, the existing protection for the road reserve must not be abandoned through passive neglect. Maintaining the existing footprint is the most cost-effective solution to protect public access over the next three-year cycle.

• Routine Structural Monitoring: Implement regular engineering inspections of the wire mesh and rock volume to patch structural weaknesses before full failure occurs, maximizing the asset lifespan. ..

• includes boat ramp

• Safety and Amenity Care: Ensure any maintenance works protect the immediate public beach environment, managing rust or structural failure risks to maintain public recreational safety.

4. Outcome Sought

That the Ōrākei Local Board amends the text of the Natural Environment and/or Built Infrastructure priority sections to ensure that established, existing low-impact coastal assets—specifically the gabion baskets protecting the road reserve at Karaka Bay—are routinely maintained and structurally supported to preserve public land, ensure public safety, and safeguard coastal access.

Local Board Plans 2026
Orakei Local Board – Have Your Say

Feedback: The area that is of most importance to me is: **Transport**

Most Important Focus Area: Transport

A separated cycleway down St Heliers Bay Road and Maskell Street connecting and providing a loop with The Shared Path (Te Ara Ki Uta Ki Tai) at one end, and the shared pedestrian way alongside Glover Park at the other.

Why is this important to me?

It is pleasing to see that the goals of the OLB over the next 3 years are:

- Support the provision of new footpaths and pedestrian facilities, and support to improve spaces shared by pedestrians and cyclists to increase safety and efficiency. And,
- Expand active transport and green networks by increasing stronger walking and cycling links between parks, schools, town centres and connections across the local board area.

I support cycling in St Heliers and believe a cycleway is required down St Heliers Bay Road and Maskell Street. Existing commuters, everyday cyclists, and school children are using this road and we need it to be safe.

We have had two accidents on this road in recent weeks (cyclist vs vehicle) and we need to make sure it is safe for those currently using it. We need to make it safe so that those that would like to cycle feel safe to do so. Safety is known as one of the biggest barriers to regular cycling. It has been communicated to me that people feel this road is too unsafe to ride. **Appendix 1.**

A continuous and connected cycleway would also encourage tourism and casual cyclist business to the Orakei Village and St Heliers Bay Village.

What am I asking for?

To support this under your planned 3-year goals I would ask that the OLB look at ways to support cycling on this corridor through the following three actions:

1. Interim safety measures to include marking existing footpaths along St Heliers Bay Road and Maskell Street with 'Cycling and Pedestrian' access wording/pictures, including 'Share with Care' signage.

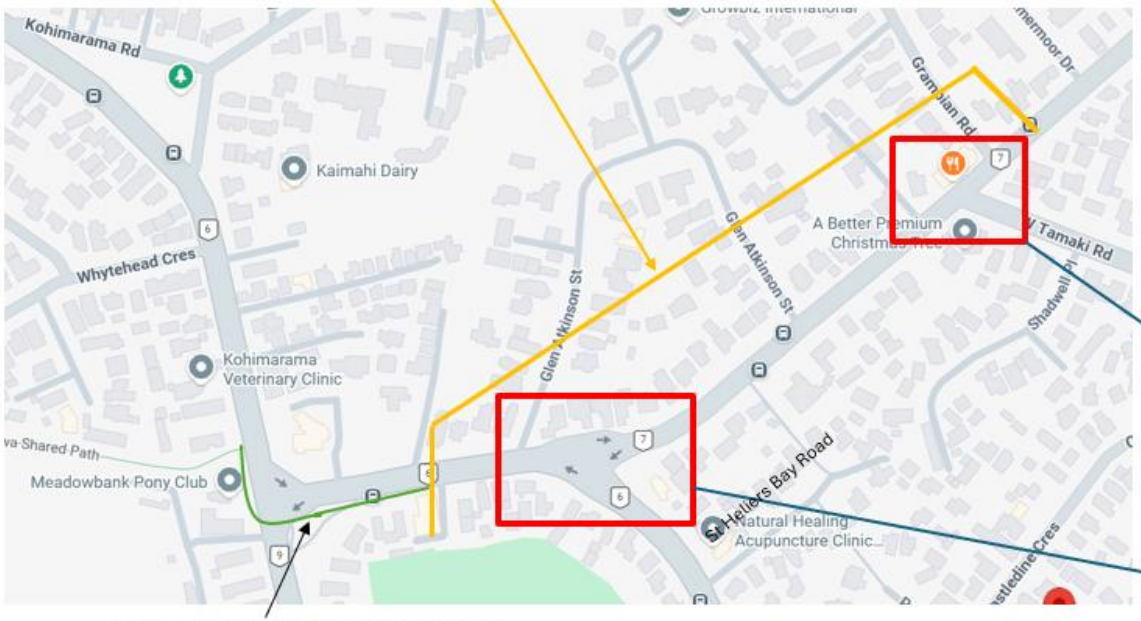

2. Immediate and short term on St Heliers Bay Road between West Tamaki Road, and the end of St Heliers Bay/St Johns/Kohimarama Roads intersection look to better utilise existing berm and footpath space. I would ask that large berm and footpath areas allow for the widening of footpaths. This will provide for better space for 'share with care' cycling and pedestrian use. **Appendix 2**.

3. Within your current plan include advocacy to look at feasibility and design to connect the shared path (at the St Heliers Bay/St Johns/Kohimarama Roads intersection) and Glover Park shared path with safe continuous shared and/or separated cycling. **Appendix 3.**

Further, because St Heliers and Glendowie have a population of approximately 20,000 and only have cycleways to the suburbs borders I would ask that the OLB prioritise safe options for cycling in St Heliers. I would ask that the OLB consider a continuous cycleway down St Heliers Bay Road extending along Maskell Street connecting to Glover Park shared pedestrian/cyclist way. This would provide access to local schools for children, commuters using the road, and support local business that would benefit from a safe cycling loop. **Appendix 4.**

Appendix 1
St Heliers Bay Road – the route that cyclists must ride to reach the shared path, train, and city cycle network.

This section **of St Heliers Bay Road** poses a significant danger to cyclists.
- This is the access route from St Heliers to Shared Path, Train, and wider City Network
- Busy and often congested
- No cycle markings on or off road
- Two intersections of multiple complexity; multiple streets entrances, lights, crossings

Source: Google maps 17.7.2026
St Heliers Bay Road – road of Regional Importance as identified by AT (Future Connect)

Photo:
St Heliers Bay Road, example of traffic that cyclists must ride amongst.

Cyclists have raised concerns that St Heliers Bay Road is too unsafe to cycle.

Site photo 10.9.2025
However this is typical traffic on this road, often heavier and banked up.

Complex intersections for drivers which means cyclists traveling in both directions along St Heliers Bay Road are at higher risk:

St Heliers Bay Road/West Tamaki Road, two pedestrian crossings (St Heliers Bay Road and West Tamaki Road), traffic from Grampian Road, and parking along west side of street outside shops.

St Heliers Bay Road/Apirana Avenue, splitting and narrowing lanes in each direction. Heading west splitting and narrowing lanes with merging traffic from Apirana Avenue.

Appendix 1 continued – **Recent accidents on St Heliers Bay Road**

Note: Facebook screenshot 'Mission Bay – Kohi – St Heliers Community' copied to Bike Eastern Suburbs, event approx. April 2026.

May 2026 – collision between bus and a cyclist

April 2026 – collision vehicle vs cyclist

Appendix 2: Examples of wide berms and footpath areas that would allow for cyclist and pedestrian sharing St Heliers Bay Road and Maskell Street

1

2

3

4

5

Clockwise going right:

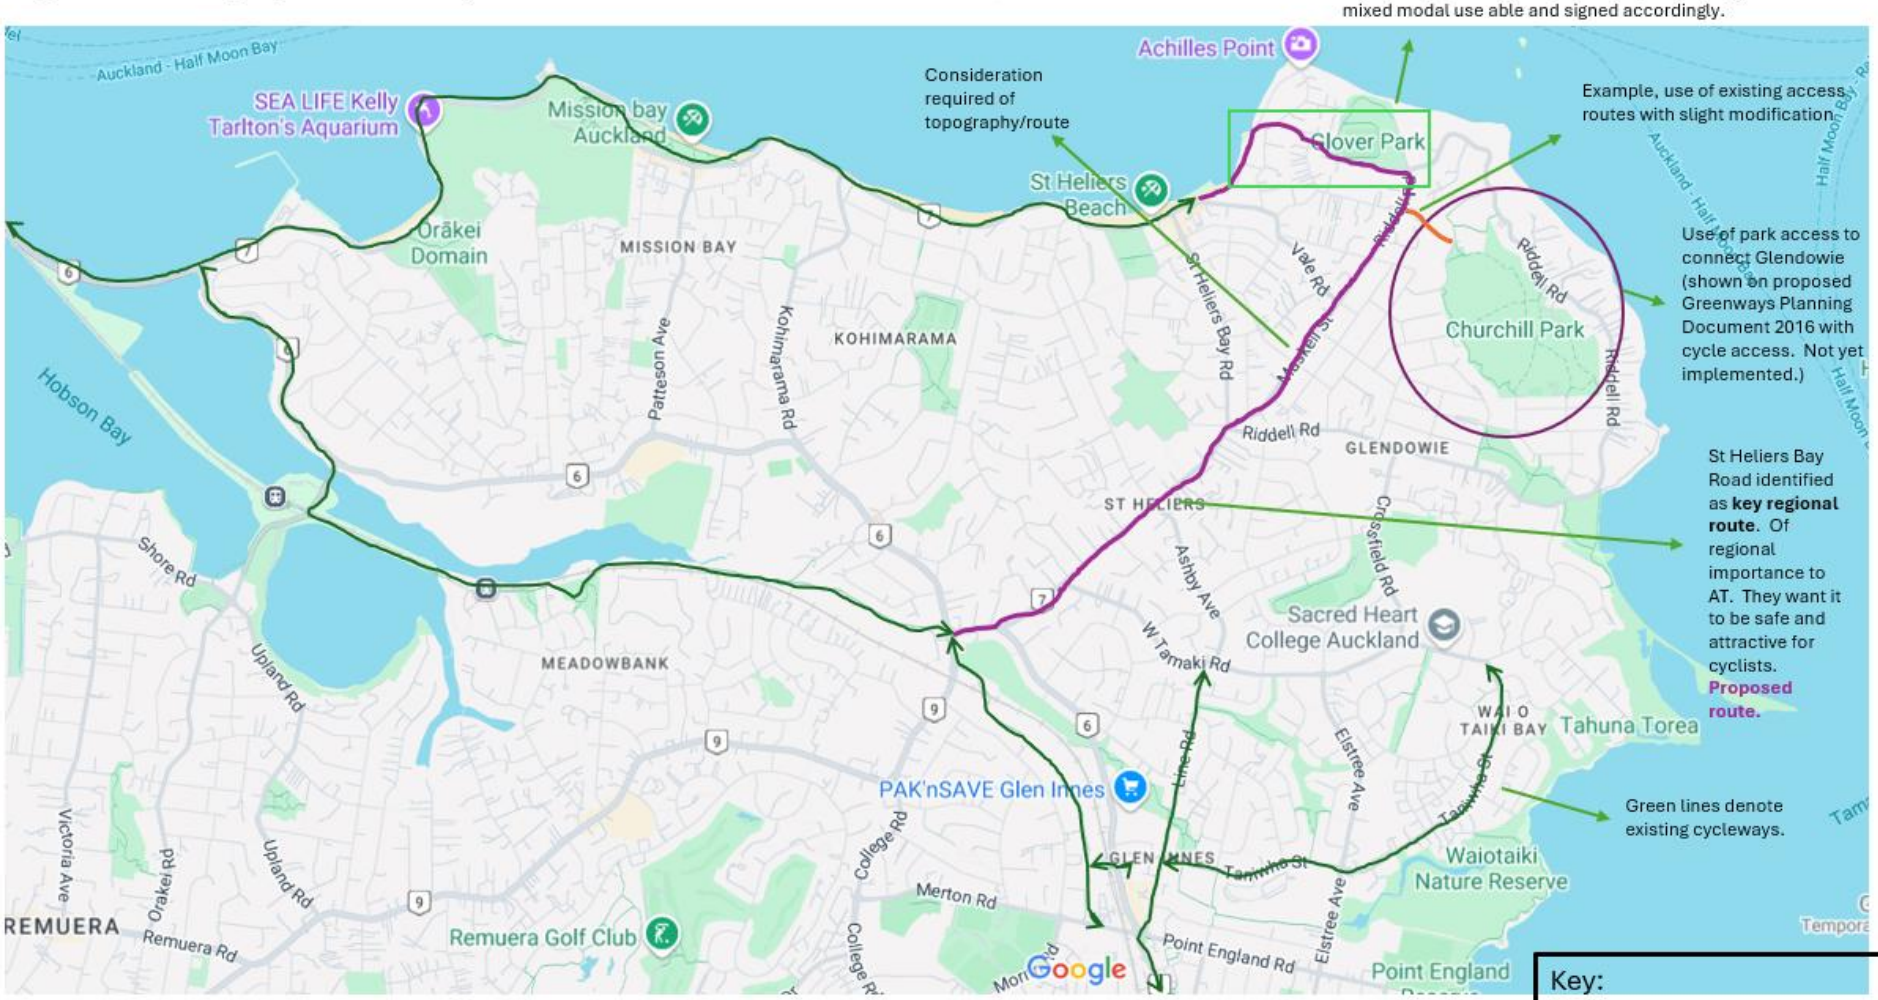

Examples of wide combined berm and footpath areas that can be utilised as 'share with care' paths.

1. Approx 345 **St Heliers Bay Road**, wide combined footpath and berm.
2. Approx 287 **St Heliers Bay Road**; wide combined footpath and berm.
3. Approx 64 **Maskell Street**; wide combined footpath and berm (looking south).
4. Approx 64 **Maskell Street**; wide combined footpath and berm (looking north).

Improvised footpath for pedestrian and cyclists to share.

5. Example of shared pedestrian and cyclist accessible street in east Auckland.

Appendix 3: Draft proposed route. Purpose - discussion document for stakeholders, OLB and AT

The proposed cycle route provides connection to an extensive cycle network. Off road access to the train, city, and wider cycle network. Providing access for commuters, and children to get to school/work, friends, and leisure activities. It also creates a nice "loop" which is attractive to leisure cyclists, bringing business to local business.

Large Unconnected Population
St Heliers and Glendowie have a combined population of approximately 20,000 including 3,000 children. However, cycleways only go to the borders of these two suburbs, and do not provide a safe cycling option within the suburbs or out of them.

Census Data Shows Residents Choose Cycling
The 2023 census data shows that Saint Heliers residents are already using cycling 'as a means of transport' to get to work at a significantly higher rate than the average population.

Arterial Route to Shared Path
St Heliers Bay Road is the major arterial route to enter and exit St Heliers. It is also the only viable route to ride a bike to enter and exit St Heliers from and to The Shared Path (Te Ara Ki Uta Ki Tai). This path connects cyclists with off-road access to the city, train, and wider city cycle network (the network effect).

Intensification
Plan Change 120 options A and B under consideration both allow for increased density on St Heliers Bay Road. This is already a busy arterial corridor and will become more so with allowable intensification.

Identified by AT as Road of Regional Importance
Auckland Transport (AT) have identified St Heliers Bay Road as a road of regional importance for future planning and connectivity for micromobility. As such, it has been identified as a road that must be safe and attractive to cycle going forward.

Route for Access to Schools
St Heliers Bay Road and the proposed route intersects school zones (St Heliers Primary, Churchill Park Primary, St Igneous, and Glendowie College) providing an access route to both local public schools and schools of choice (Selwyn College and St Kentigern Preparatory) outside the suburb. Daily observations show that school children are using the footpath to cycle to school.

Commuters Using this Route and Safety in Question
AT's research for changes currently being implemented on St Heliers Bay Road identified that St Heliers Bay Road is currently being used by cyclists. Within the last few weeks there have been two serious accidents reported on Facebook involving bike vs vehicle. Safety and traffic volumes are a concern on this route. Separated cycling on road, or off-road via footpath alternatives is required for the safety of the community.

Business Opportunities
Completing a loop as proposed in the Map in **Appendix 3** will provide a loop that is attractive to leisure and tourist cyclists to ride. This loop has the ability to attract tourists and be used by cycling groups bringing business to the St Heliers Village, and the Orakei Village. These would be customers who spend money in hospitality and don't need a car park. This would help to meet the Economic Development goal of the OLB, encouraging groups and events that bring business to our area.

A recent study showed that Great Rides of New Zealand delivered $1.28 Billion for regional economies. There is no reason that inner city suburbs such as St Heliers cannot benefit from this type of business given the appropriate infrastructure to bring it to their door.

Have Your Say on the Draft Ōrākei Local Board Plan 2026

#287

Note: This simplified version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed, and handwritten submissions have been transcribed.

Local Board: Ōrākei

Your feedback:

1. **How well do you think our draft Plan reflects the needs and aspirations of our community over the next three years?**

   Not very well

   Tell us why

   There is a major problem with healthy waters infrastructure at St Heliers

2. **The draft local board plan focuses on five key outcome areas for our community. The draft plan includes proposals to meet the needs of our community for each of the outcome areas. In the draftplan, these proposals are made up of objectives and initiatives.**

   What do you think of the proposals for each of the key outcome areas?

Community	Support most
Natural environment	Do not support most
Built environment	Do not support most
Economy	
Transport	Support most

   Tell us why

   Infrastructure deficiency in sewerage

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

   How well have we captured these considerations?

Māori outcomes	Quite well
Climate outcomes	Not very well
Equitable outcomes	

Tell us more

With anticipated increasing rainfall events, in both frequency and magnitude the sewerage and stormwater structures are overwhelmed

4. **Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?**

   Please refer to the attached notes one. copy attached.

St Heliers Waste (Sewerage) Water Reticulation

Actions called For

1 Current Situation

Healthy Waters to lay out the current St Heliers capital expenditure projects allocated

Healthy Waters to lay out the St Heliers network and supporting pumping stations capital expenditure projects allocated, with specific action points, timelines and costs. Not just a bald allocation of budgets over three years, five years and ten years.

2 Review of Badderly Av pumping station,

This should include capacity to meet current planned housing and development projections, planned upgrades costs and capacity to ensure capability to initially drain St Heliers. This should include both pipework, pump capacity and power reticulation. This should then be extended to allow for installation of a pumping station in St Heliers which will be covered separately

3 Review of St Heliers Network and Pumping Station

This should include the current pumping station and the complete absence of a suburb wide pumping station. Development of a suburb wide reticulation plan allowing for a system wide pipework upgrade (polylining vitreous clay pipes or similar). Purchase of land for a pumping station (if there is no current land allocated for this purpose) Reticulation of power, integration or replacement of the small scale pumping station. Review (CCTV) of the main 375, 250 200 sewer pipes both within the suburb and the line to Badderly Av

Over View of Pumping Station Connections

A St Heliers.

There is a small pump station located on the beachfront reserve at the changing sheds in the town center. This drains the town commercial center/shops etc and the lowest part of Cliff Road residential area and also Vale Road. This is a small pump station with a 150 mm vitreous pipe network extending down to the Tamaki Drive where it enlarges to a 225 VC pipe to enter the pump station. The outlet from the pump station is the throttled through a rising 150 clay pipe that tracks though Vellenoweth Green, The

Parade, and through 10A Dingle Road to join the 375 Vitrous Clay which drains the majority of St Heliers and runs through to The Badderly Av Pumping Station.

Please note this well! There is no pumping station on the main sewer line that drains St Heliers, It is entirely dependent on gravity drainage to Kohimarama, Badderley Av. The St Heliers suburban town is drained by a network of vitreous clay pipes ranging from 150mm to 375 vitreous clay where the network crosses The Parade.

B Badderly Av.

The 375 VC sewer flows underground to 37 Long Drive then to 76 Melanesia Road where it becomes a 450 Vitrous clay pipe running through to Speight Road to Sage road where it is then throttled to a 300 concrete pipe which then gives way to a 470 Concrete pipe to entrance Madills Farm, it then transitions to a 750 mm Polythene pipe to run the length of Madills to the Badderly Av Pumping Station. The Badderly Av pump station appears to exit at a throttled size of a rising 280 concrete pipe which the runs along Southern Cross Road to a 2100 concrete pipe which the appears to run to Orakei Domain, the site of the new pumping station and the Polythene relined pipework. This appears to link to the Parnell sewerage sytem.

It has been claimed the work on the Central Interceptor, now through to Herne Bay will increase the sewerage capacity of the Eastern Suburbs through the above mechanism however I would point out the St Heliers situation is caused by aging failing pipeworks combined with a gravity drainage system reliant on the throttled capability of the network and the Badderly Av Pump station.

Comments on St Heliers Pipework based on Direct Observation.

As a resident of St Heliers I have seen frequent discharges of Sewerage to Stormwater which then flows into St Heliers bay and the resulting "Black Flagging" of the beach.

If the Sewerage reticulation map is considered almost the entire St Heliers are is reticulated in aging vitreous pipes that according to field staff from Healthy waters can range from 50 to 80 years. In the area of Dingle Road which I believe lies at the younger age of the suburb, I have viewed the CCTV inspection and seen the pipework with joints being separated and dislodged with tree roots starting the invasion of the pipework, in some cases minor and in other cases requiring reverse hydroblasting to clear the pipework. In other cases requiring hydroblasting to clear the results of peoples stupidity.

In discussion with Healthy Waters field staff the suggestion has been made that the most practical method of improving the system would be to reline the sewerage pipeworks with polythene inner sleeves. It appears this is viable in smaller pipes, such as 150 mm clay pipes, however it is outside the ambit of the field staff to put this in place. It has to be recognized this would be a significant capital expenditure project. There may well be an alternative but this should be disclosed in any announcement of a remediation proposal.

There has been a recent project in Kohi Mission Bay to investigate Sewerage into Stormwater and approx. 420 illegal connections from 4000 connections, were discovered and rectified. I would point out, in my opinion, this is a miminal patch up as it does not account for the degradation in the network.

From direct experience at 22 Dingle Road attempting resolution of sewerage leakage into stormwater where costs have run into 10's of thousands but without success illustrates the completely inefficient and costly attempts to resolve sewerage leaks into St Heliers Bay as a "one of" fault resolution process. In my opinion a system wide infrastructure improvement process is required.

Further work has been undertaken by Orakei Local Board member Troy Churton in an effort to have development constrained to reduce the Sewerage and Stormwater infrastructure overload. Thes efforts are very much appreciated however the representations to Auckland City may be not be accepted or diluted so as to be ineffectual. An example of this is the current development in Goldie Street where it appears the sewage loading will be placed on the small scale pumping station in the changing sheds, which is known to be causing problems in the draining of Cliff road Properties.

Within the Orakei Board draft local board plan Pages 17,18, 19 there is a call for Wastewater overflow, protection of beaches and addressing the aging infrastructure, however there is a woefull complete absence of any plan of how this is to be achieved.

Could you please acoept my thoughts on specific actions the board could call the Healthy Waters and WaterCare Services management could be required to adopt rather that the existing rather nebulous, "wait and see what you get" approach.

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

   Important Focus Areas: Community,Transport

   Most Important Focus Area: Community

   Reason: Because now we have children

Community is important. Before kids I would not have ticked this box.

We spend so much time in the community now, the library down in the bay, the churches and always looking for playgrounds and parks and bush walks with the kids. Free activities are also great. Particularly in the holidays the council pools are highly frequent trip. So many people don't know about them

Second Most Important Focus Area: Transport

Reason: Because travel is time and time is money.

Its important that there is solutions for kids and elderly and commuters, and also we use the new paths for bike ridings and walking. Now they are safe

More pedestrian crossings - one is missing from a key zoned area for Glendowie Primary School. For example going down Riddel Road towards school the children can't get the whole way to school, there is a missing crossing. Need a crossing on Rochdale ave

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

   How well have we captured these considerations?

Māori outcomes	
Climate outcomes	
Equitable outcomes	

Tell us more

4. **Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?**

Need pedestrian crossing on Rochdale ave. So many kids can safely walk to school

All of the children in Sierra/Pennbrooke etc come at alleyway onto Riddell Road and cross Riddel by Rochdale at the pedestrian crossing, but then there is no way to get across Rochdale

Needs to be addressed. It is so unsafe in the mornings

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

   Important Focus Areas: Natural Environment,Transport

   Most Important Focus Area: Natural environment

   Reason: Access to thriving natural environment is critical to why it is special to live in the Eastern Bays suburbs. The beaches, the bus and the wildlife are incredible and need to be

protected and restored. I would love Churchill Park to be restored - perhaps to a fenced eco-sanctuary

Second Most Important Focus Area: Transport

Reason: Getting in and out of Orakei can be difficult at times given it is far from the motorway and restricted by critical roads like Tamaki Drive. It is important to invest in safe cycling infrastructure and reliable and frequent public transport to ease congestion for those that need to drive, and make it enjoyable for those that can't/choose not to drive. Too much heavy trucks come along Kepa Road

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

How well have we captured these considerations?

Māori outcomes	
Climate outcomes	
Equitable outcomes	

Tell us more

4. **Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?**

My kids walk and cycle to school and kindy.

Far too many drivers treat their driveways like roads which makes it dangerous for those on the footpath.

It would be great for driveways with multiple properties to be required to have speed bumps where their driveways meet the footpath

There would also benefit from a pedestrian crossing on Kepa Road in between Thtcher St and Dudley Road as there are often people crossing between bus stops and having to wait long periods on the refuge

There would also benefit from lights or a raised crossing or some safer way for kids to cross the entrance way to Selwyn College.

A number of intersections could be greatly improved by making the less rounded and narrower - potentially also adding refuges in the middle

Eg. Southern Cross Road and Kohimarama

   What do you think of the proposals for each of the key outcome areas?

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

   Important Focus Areas: Natural Environment,Build Environment

   Most Important Focus Area: Build Environment

Reason: There are too many multi story town houses and apartments being built, without any thought or care about the people who are next door. Nobody wants a 3-6 story building next to them. It's an aggressive thing to do.

Also many trees are being cut down and a lot of the land is being concreted over. Which is really bad for the environment. This all impacts on people in an extremely negative way

Second Most Important Focus Area: Natural Environment

Reason: Too many trees are being cut down to allow housing intensification. Move green spaces and trees and plants must be saved to allow for this. We can't afford to lose any more green spaces.

We have to continue planting trees both native and exotic, to beautify the area.

We have to treasure what we have and encourage people to plant shrubs, flowers, and trees that encourage birds, insects and wildlife.

3. Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.

Equitable outcomes	

Tell us more

4. Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?

Please, no more narrowing of roads to make cycle lanes. I am nearly knocked over everyday on the footpaths by inconsiderate people going too fast on e-scooters and e-bikes and ordinary bikes.

Also, I use public transport and the narrowing of the roads slows down the buses and makes life hard for the bus drivers.

I would like the skate park at crossfield reserve to be monitored occasionally because the teenagers using it zoom from the skate area onto the footpath and nearly knock people over. They don't slow down or barely look.

Crossfield Road

Also a lot of kids between the ages of 13-16 race down the road and footpath, some of them at speeds of up to 40kmph.

I feel very unsafe at times on this footpath, they have no consideration for pedestrians, they barely slow down.

It seems that the footpath has been turned into a road. Not good

Someone should see for themselves during term time between 4-6pm. And during school holidays. (4-6 Term time seems to be the worst)

Note: This simplified version of the feedback form has been created for the purpose of publishing submissions. As such, contact and demographic information has been removed, and handwritten submissions have been transcribed.

Submitter details:

Organisation: N/A

Local Board: Ōrākei

Your feedback:

1. **How well do you think our draft Plan reflects the needs and aspirations of our community over the next three years?**

   Tell us why

2. **The draft local board plan focuses on five key outcome areas for our community. The draft plan includes proposals to meet the needs of our community for each of the outcome areas. In the draftplan, these proposals are made up of objectives and initiatives.**

   What do you think of the proposals for each of the key outcome areas?

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

   Important Focus Areas: Community,Natural Environment

   Most Important Focus Area: Natural Environment

   Reason: It is very important to have places where kids can grow up in contact with nature, walking in buses, parks and reserves, learning the importance of preserving and keeping the

environment healthier, and obstructing the kids from computers, screens and other artificial objects

Second Most Important Focus Area: Community

Reason: This is important to have places where community can share, meet each other and interact like parks, playgrounds and libraries but should have more free activities for family like movies in the park that have in summer but during winter and cold season I feel a lack of activities for the community

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

How well have we captured these considerations?

Māori outcomes	
Climate outcomes	
Equitable outcomes	

Tell us more

4. **Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?**

Other ideas should be improved on the build environment, mainly about residential zone. Where council is allowing to have various houses, apartments, townhouses on places and permit these new building to not have enough parking spaces. And not only it, places like Line Road where was allowed these new houses and after, create a cycle lane, removing all park spaces from street for a place/street that it has 10 cyclist/scooter per day is too much.

What means council spend money where community don't use it to commute and make the owners of these buildings lose money or capacity to rent it easer.

   What do you think of the proposals for each of the key outcome areas?

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

   Important Focus Areas: Community,Natural Environment

   Most Important Focus Area: Community

   Reason: Important to have connections with everyone else in your neighbourhood and community spaces play an important role

Second Most Important Focus Area: Natural Environment

Reason: It is important that one native wildlife and plants thrive because without them our eco-system would be thrown out of balance

Other Feedback:

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

   What do you think of the proposals for each of the key outcome areas?

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

   Important Focus Areas: Community,Build Environment

   Most Important Focus Area: Community

   Reason: I enjoy being part of an active inclusive community

Second Most Important Focus Area: Build environment

Reason: The build environment directly impacts on how I live

High density building with insufficient parking directly impacts my life due to increased noise due to increased population living closely. Difficulty navigating roads due to parked cars. Difficulty navigating pavement when walking due to increased driveway traffic, and decreased safety for my kids with increased traffic and poor visibility

   What do you think of the proposals for each of the key outcome areas?

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

   Important Focus Areas: Community,Natural Environment

   Most Important Focus Area: Community

   Reason: My family moved to New Zealand from Turkey, and one of the reasons we chose to live in St Heliers is because it is a safe, welcoming and fairly friendly community. We have two

young children so having well maintained parks, playgrounds, libraries and community facilities is very important to us. We value opportunities for people from different backgrounds to connect, participate in local events and feel included. Investing in strong communities helps families thrive and makes St Heliers an even better place to live for current and future generations.

Second Most Important Focus Area: Natural Environment

Reason: Protecting our beaches, reserves and green spaces is also very important as we enjoy spending time outside. Outdoor activities as a family and want future generations to enjoy the same as us.

Other Feedback:

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

   Important Focus Areas: Build Environment,Transport

   Most Important Focus Area: Build Environment

   Reason: Impact on the area from housing intensification is a concern in particular planning for off street parking on residential roads that are either narrow or already lined with cars

Second Most Important Focus Area: Transport

Reason: higher density living needs to have good public transport links

Other Feedback:

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

2. **The draft local board plan focuses on five key outcome areas for our community. The draft plan includes proposals to meet the needs of our community for each of the outcome areas. In the draftplan, these proposals are made up of objectives and initiatives.**

   What do you think of the proposals for each of the key outcome areas?

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

   Important Focus Areas: Community,Natural Environment

   Most Important Focus Area: Community

   Reason: Community spaces such as beaches, playgrounds, parks, etc are important in creating a strong community who support each other and people want to be a part of.

Keeping these spaces well-maintained is also important for the safety of our young ones, pets and all those in the community

Second Most Important Focus Area: Natural Environment

Reason: The natural environment around us is beautiful and we are very lucky to have so much of it around us. Keeping this well looked after, maintained and protected continuously is very important! This is because they are very easy to degrade and let disappear but very hard to restore and rejuvenate!

These natural spaces in our area are a valuable asset to the community!

3. Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.

How well have we captured these considerations?

Māori outcomes	
Climate outcomes	
Equitable outcomes	

Tell us more

4. Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?

Link transport and economic development by supporting improving public transport town town centres (eg St. Helliers, Remuera) which will encourage people to support local and utilise public transport available.

Also better connections to safe train stations would be good. GI not very safe feeling

In meeting goals around developing community spaces and assets please be careful not to destroy the natural environments we are very privileged to have in our area!

1. **How well do you think our draft Plan reflects the needs and aspirations of our community over the next three years?**

   Tell us why

2. **The draft local board plan focuses on five key outcome areas for our community. The draft plan includes proposals to meet the needs of our community for each of the outcome areas. In the draftplan, these proposals are made up of objectives and initiatives.**

   What do you think of the proposals for each of the key outcome areas?

Community	
Natural environment	
Built environment	
Economy	
Transport	

   Tell us why

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

   How well have we captured these considerations?

Māori outcomes	
Climate outcomes	
Equitable outcomes	

Tell us more

4. Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?

I support the overall direction and aspirations outlined in the Draft Ōrākei Local Board Plan 2026. The commitment to strengthening communities, supporting participation, protecting cultural heritage, caring for the environment, and improving connections to the Waitematā Harbour reflects the kind of future we should be working towards for Tāmaki Makaurau.

However, I wish to raise my concern regarding the proposed introduction of paid parking at Ōkahu Landing and how this aligns with the values and outcomes identified within the Plan.

The Plan acknowledges the importance of equitable outcomes and recognises that not all communities experience access and participation in the same way. The principles of *Ngā Hapori Momoho | Thriving Communities Strategy 2022–2032* highlight the importance of creating communities where people can belong, participate, and flourish.

With this in mind, I question whether introducing a financial barrier at one of the key access points to the Waitematā Harbour reflects these commitments.

Ōkahu Landing is not simply a place where vehicles are parked. It is a place where people connect—with the moana, with each other, and with activities that contribute to the wellbeing of our communities.

It is where tamariki and rangatahi learn water safety skills, waka ama, sailing, and other marine activities. It is where whānau gather, where volunteers contribute their time, where community organisations operate, and where people come to experience the physical, mental, and spiritual benefits of being beside the water.

For many people, parking provides the only practical way they can access this space. This includes kaumātua, people with mobility challenges, families with young children, volunteers transporting equipment, and those who may already be experiencing financial pressures. The introduction of paid parking risks creating a barrier that prevents some members of our community from participating.

Access to public spaces should not only exist in principle—it must be meaningful in practice.

The Board's vision for Ōkahu Landing as part of the Pathways to the Sea concept is an opportunity to enhance connection to the harbour and support recreation, marine activities,

and community use. However, this vision must ensure that the harbour remains accessible to everyone, not only those who are able or willing to pay additional costs.

The moana is a place of connection, wellbeing, learning, and belonging. Spaces like Ōkahu provide opportunities for Aucklanders to strengthen their hauora through movement, recreation, culture, and relationships. These benefits should be protected and encouraged.

I respectfully ask the Ōrākei Local Board to consider whether paid parking at Ōkahu Landing is consistent with its stated commitments to equity, inclusion, and thriving communities.

I encourage the Board to explore alternative approaches that protect access to this important community space while still meeting the objectives of the Local Board Plan.

The success of a pathway to the sea should be measured by how many people it welcomes—not by the barriers that prevent people from reaching it.

I ask the Board to ensure that Ōkahu Landing remains a place where all Aucklanders can connect with the moana, participate in community life, and experience a genuine sense of belonging.

Submission on the Ōrākei Local Board Plan 2026

I support many of the aspirations contained within the Draft Ōrākei Local Board Plan 2026.

It speaks of equitable outcomes, thriving communities, public participation, belonging, cultural heritage, environmental stewardship and improving access to the Waitematā Harbour. These are values that I wholeheartedly support.

However, I am deeply concerned by what the Plan does not address.

The Plan commits to equitable outcomes, recognising that different communities require different approaches to participate fully in community life. It adopts the principles of

Ngā Hapori Momoho | Thriving Communities Strategy 2022–2032 is Auckland Council's regional strategy for a fairer and more sustainable Tāmaki Makaurau where every Aucklander should have the opportunity to belong, participate and flourish.

It also commits to:

- implementing The Landing Concept Plan as part of the Pathways to the Sea vision;
- supporting public access to the Waitematā Harbour;
- supporting marine operations, club activities, events and personal recreation at The Landing.

These commitments are significant.

Yet the Plan is silent on how introducing paid parking at Ōkahu Landing aligns with any of these objectives.

For many Aucklanders, parking is not a convenience—it is the practical means by which they access the harbour. Every additional financial barrier affects participation.

People learning about Ōkahu Bay and the Waitematā.

Organisations saving lives through water safety programmes.

Children learning to paddle waka ama.

Young people sailing for the first time.

Whānau gathering on the shoreline.

Older people who are no longer able to walk long distances.

Volunteers who dedicate countless hours to community organisations.

People living through an ongoing cost-of-living crisis who simply want to spend time beside the moana without another expense.

Public access is only truly equitable when it is genuinely accessible.

The Board's own Plan acknowledges that some communities face structural barriers to participation. Introducing an additional financial barrier to accessing one of Tāmaki Makaurau's most treasured public spaces appears inconsistent with that commitment.

The Landing has never been simply a car park.

It is a gateway.

A gateway to the Waitematā Harbour.

A gateway to culture and history.

A gateway to education.

A gateway to recreation.

A gateway to connection.

A gateway to health and wellbeing.

For generations, people have come to Ōkahu to paddle, swim, sail, fish, volunteer, reconnect with whānau and experience the restorative qualities of the moana. These experiences contribute immeasurably to physical health, mental wellbeing and community connection.

The Board's own Plan recognises the importance of creating thriving communities where people belong and can participate.

I respectfully ask the Board to explain how introducing paid parking at Ōkahu Landing advances those objectives.

If the Local Board is committed to equitable outcomes, public participation and improving access to the Waitematā Harbour, then its decisions should clearly demonstrate those commitments in practice.

Plans should not simply articulate values.

They should give effect to them.

I ask the Ōrākei Local Board to ensure that its final Plan and subsequent decisions remain faithful to the principles it has set for itself, so that future generations inherit not only a beautiful harbour, but one that remains welcoming, accessible and open to all.

A pathway to the sea should never become a barrier to reaching it.

1. **How well do you think our draft Plan reflects the needs and aspirations of our community over the next three years?**

   I don't know

   Tell us why

2. **The draft local board plan focuses on five key outcome areas for our community. The draft plan includes proposals to meet the needs of our community for each of the outcome areas. In the draftplan, these proposals are made up of objectives and initiatives.**

   What do you think of the proposals for each of the key outcome areas?

Community	I don't know
Natural environment	I don't know
Built environment	I don't know
Economy	I don't know
Transport	Do not support most

   Tell us why

   A few red flags stood out to me.

   1) smaller buses for less busy routes is generally not a wise response. Having normal sized buses means operators can deploy them to different parts of the network easily, creating better efficiencies and ultimately reducing costs to the ratepayer of running buses.

2) Park and ride is a more appropriate response for stations towards the fringe of the urban area, I do not support expanding it.

3) I suggest caution about populist responses to speed bumps. People seem to get frustrated at them for slowing them down while driving, when really that's the whole point of them. They can be slightly more problematic along bus or freight routes, however.

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

   Tell us why

The key outcomes are very positive and focused. They are achievable and build on enhancing existing activities and plans.

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

   How well have we captured these considerations?

Māori outcomes	Quite well
Climate outcomes	Quite well
Equitable outcomes	Not well at all

Tell us more

Tell us more:

The intents and objectives are clearly defined. The way these are to be implemented are not as clear. The need for two way communication between council and users will effect the success of these objectives.

The Path Way to the Sea and Landing 2024 plans are mentioned a number of times and the intent of this document along with the agreement with the Auckland Harbor board need to connect with the equitable outcomes and community objectives in it's implementation.

4. **Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?**

   The plan states

   Community / Te Hapori:

   Opportunities: Strong engagement

   Challenges: levels of access and the growing cost of and demands on volunteers.

   Some objectives are :

   -to make it easier and better for people to access and enjoy the moana and waterfront,

   - support the access to the marine environment, club activities and events

   -to ensure community facilities provide opportunities for all users older youth, seniors and those with families

   -for private and business groups to organise events that use our unique assets

The equitable outcomes are being compromised by some of the plans for charges creating access challenges for users:

The 'consultation' process needs to be carried out in good faith and conversations with 'users' as stated in the plan must be ' effective communication with the entire community.

The success of these objectives could be compromised without careful implementation of the stated "advocacy' objective of the ability for local imput in to setting parking requirements; Some of the actions proposed with paid use of facilities and with parking and access are in conflict to the objectives will compromise the outcomes of the community, equity and economic objectives of this plan.

This is essential to ensure that changes and development enhance the use of 'our unique asset' and provides opportunities for increased usage and not create obstacles for youth, seniors, families and volunteers who are the regular users and heart of this vibrant community.

Community	Support most
Natural environment	Support all
Built environment	Support all
Economy	Support all
Transport	Support all

   Tell us why

   It has a thoughtful balance of long and short term objectives and aspirational advocacy.

   A couple of clauses stand out:

"Good planning outcomes and well-planned intensification"

This should avoid gap-tooth development and thus preserve streetscape integrity. The housing crisis will not be solved by demolishing good architecture. Rather than merely "good" planning, we should aspire to "thoughtful" planning.

And under Transport;

"Maximum speed limits for e-bikes, e-scooters and low-poweredvehicles"

Speed limits should NOT be for types of vehicle but for all vehicles in relevant locations. ie not governed motors but speed limits, as on roads for certain locations.

If GPS governors are contemplated, it would be better to advocate for their installation in all cars because do far more damage than small vehicles.

3. Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.

How well have we captured these considerations?

Māori outcomes	Very well
Climate outcomes	Very well
Equitable outcomes	Very well

The lists are ambitious. It will be good progress if only a few of them are realised.

4. Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?

Paid parking at The Landing in Okahu Bay is not compatible with the stated objectives in this document. If this is supposedly a solution to a "problem" then the problem has be wrongly defined given the unanimous opposition by all the stakeholding organisation who are the predomenant users of this Marine Precinct. We look to the Board to adhere to the original intentions for this Marine Precinct before it was transferred through several forms of governance. I invite the Board to consider that there is still a chance to achieve a productive outcome for the many volunteers and businesses operating in this Marine Precinct.

Your feedback:

1. **How well do you think our draft Plan reflects the needs and aspirations of our community over the next three years?**

   Tell us why

2. **The draft local board plan focuses on five key outcome areas for our community. The draft plan includes proposals to meet the needs of our community for each of the outcome areas. In the draftplan, these proposals are made up of objectives and initiatives.**

   What do you think of the proposals for each of the key outcome areas?

Community	Support most
Natural environment	Support most
Built environment	Support most
Economy	Support most
Transport	Support most

   Tell us why

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

   How well have we captured these considerations?

Māori outcomes	Very well
Climate outcomes	Quite well
Equitable outcomes	Quite well

Your feedback:

1. **How well do you think our draft Plan reflects the needs and aspirations of our community over the next three years?**

   Not well at all

   Tell us why

   It is intensification of infill housing as it effects water issues - drainage sewage and stormwater. The lack of planning affects QUALITY OF LIFE!

   ie constant worry of large development (ad hoc)

   How can the streams take? No room for overflow.

   Black flag events in St Heliers

2. **The draft local board plan focuses on five key outcome areas for our community. The draft plan includes proposals to meet the needs of our community for each of the outcome areas. In the draftplan, these proposals are made up of objectives and initiatives.**

   What do you think of the proposals for each of the key outcome areas?

Community	Support most
Natural environment	Do not support most
Built environment	Do not support any
Economy	
Transport	

Tell us why

Natural environment - water quality should be a priority

Built environment - poor planning

See above. We cannot sustain any more development. We want to have a nice place to live and work

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

How well have we captured these considerations?

Māori outcomes	Very well
Climate outcomes	Not well at all
Equitable outcomes	Not well at all

Tell us more

See previous comments

4. **Do you have any other feedback on the draft Ōrākei Local Board Plan 2026?**

Planning - real planning in our area should be a priority! With speed empahsis on infrastructure / Water Quality.

Built environment - I am awake at nights worry about all the above

Public health hazzard - Black Swans. Bird Flu. Health Hazzard! Cull the Swans!

A better policy for allowing dogs at the beach/sand area. As for the moment I feel often the public specially kids are dealing with feral and pee on the sand left by dog owners

   I think heaving the flooding/erosion concerns at the forefront is very important. I also like seeing the focus on partnerships with volunteer org for helping improve our green spaces

3. **Auckland Council's strategic framework identifies three considerations for all decisions and investments: Māori outcomes, climate outcomes and equity outcomes. These are woven throughout the plan.**

   How well have we captured these considerations?

Māori outcomes	Quite well
Climate outcomes	Very well
Equitable outcomes	Very well

   Community events that are open to everyone really makes the community feel welcoming and accesible. Like the carols event on the Green last year

ORAKEI LOCAL BOARD PLAN 2026 Feedback

Community Facilities

I support the Community goal of: **Our people are at the heart of our vibrant and thriving community. The Ōrākei Local Board will invest in quality spaces and activities that enable community connection and enhancement.**

Background

I want to draw attention to the playground at the bottom of Ascot Avenue on the corner with Green Lanes East – Ascot Park, 61 Green Lane East.

This playground desperately needs upgrading. It has inadequate playground equipment for a growing number of children in the community neighbourhood.

It is zoned Open Space – Informal Recreation Zone, right next to Terrace Housing and Apartment Blocks, Mixed Housing Urban and Suburban zones.

Housing intensification is happening rapidly alongside the playground.

The largest is at Simplicity Living's Build to Rent development, Waiatarua, at 130 Ascot Avenue, next to Auckland Thoroughbred Racing's (ATR) land holdings. Waiatarua will have 330 homes for rent.

Three storey housing development is happening next to and opposite Ascot Park.

Also nearby are 3 early childhood education centres:

- Best Start, 44 Ascot Avenue, Remuera
- Little Earth Montessori Daycare, 45 Ascot Avenue, Remuera
- KinderCare at 36 Green Lane East

Conclusion

Ascot Park is surrounded by rapidly growing housing intensification. There is a lack of children's playgrounds in the area.

Recommendation

That the Orakei Local Board upgrade the playground facilities at Ascot Park to meet the needs of growing numbers of children in the area.

We hope to enhance the connectivity of the community bus system, particularly during after school peak hours
