## PLATINUMPLAY – JT862 MODULE

Bring adventure, excitement and imaginative play together with the CT832 V2, an impressive timber playground designed to keep children active, challenged and engaged. Featuring elevated play towers, a 2m Spiral Tube Slide, 1.2m Double Slide and a variety of climbing and balancing activities, this module offers endless opportunities for exploration. Children can test their strength and coordination on the 3m Horizontal Ladder, Scramble Net, Hand & Eye Climbing Wall and Log Stepper, while the Slatted Crawl Tunnel and Wobble Safety Panels add further challenges along the way. The Shop Front Panel encourages imaginative role play and social interaction, creating opportunities for children to play and explore together. With multiple access points and varied play experiences, this versatile structure promotes physical development, confidence, problem-solving and cooperative play, making it a fantastic centre piece for schools, parks and community playgrounds.

## TRIANGLE PLAYSTATION - INTERACTIVE PLAY PANELS

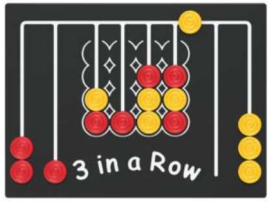

The Triangle PlayStation brings hands-on discovery and shared play together in a compact, three-sided design. Interactive panels invite children to explore textures, colours and games while developing fine motor skills, coordination and problem-solving. With activities on each side, children can play alongside friends or enjoy moments of independent exploration. A welcoming addition to any playground, encouraging curiosity, conversation and learning through play.

*Panels are selected by the client, with final pricing subject to the options chosen.*

## MUD KITCHEN PLAY PANEL

Bring out your wild side in the Mud Kitchen Play Panel. Create a new generation of gardeners with this fun play panel. Constructed from HDPE, this panel features a stainless-steel mixing bowl and an integrated countertop.

## PLATINUMPLAY – 2 BAY FOREST SWING

### 2.4H WITH 1 BELT, 1 BASKET and YOU AND ME SWING SEAT

Bring natural character and timeless swinging fun to your playground with the 2 Bay Forest Swing. Robust H5-treated timber posts and stainless-steel bolts provide a durable structure that blends beautifully into outdoor surroundings. Choose a 2.4 m height for junior play areas or a 3 m option for older children to enjoy a longer swing arc, with a range of seat options to suit your community. Keep the natural timber look or personalise it with a stain or colour to complement your playground.

## YOU & ME SEAT

### KOMPAN - SW990121

The easy-entry seat the You and Me swing invites the child and adult to swing together, additionally the height of the seats is such, that adult and child can be at eye level when swinging . The child-parent connection in play is important for the child-parent bonding in social activities.
