Clevedon Village Playground Upgrade

Feedback must be received by 2 November 2026.

We're planning to make the community space on the corner of Twilight Road and Papakura-Clevedon Road in Clevedon better for everyone to enjoy.

This includes building a new playground, and improving the area for the community to use.

This is the first project we're working on to bring the Clevedon Village Heart Concept Plan to life.

The project will create a safer and more welcoming space for everyone to enjoy.

It will also make the village more pedestrian and cycle friendly.

We are working in partnership with The Clevedon Association on the temporary play space currently on the site to help gather community ideas and feedback.

We are also working with Ngai Tai Ki Tāmaki to make sure the design reflects their culture, history, and identity.

We are proposing a design that that reflects Clevedon's rural character, and includes:

- play equipment for children of all ages, including a fenced area for younger children
- spaces for rangatahi (young people)
- a new bike hub with public toilets and a shower
- an open community space/activation area
- carparking off Twilight Road
- lawn and picnic areas
- planting.

The following has already been decided and is not included for feedback. This includes:

- the overall layout of the space
- a bike hub, public toilets and a shower
- the overall budget for the project and the timing of construction
- anything to do with roading, traffic and parking.

We know that finding a car park in Clevedon can be difficult. This project will remove four car parks, but later parts of the Clevedon Village Heart Concept Plan are expected to add more parking. There could be four new parks near the hall and six new parks near the Clevedon District Centre. These changes still need to be approved and may change as the design is finalised.

We will share your feedback with the Franklin Local Board and take their recommendations to create a final design for the playground.

The local board will consider community feedback alongside budget, safety, accessibility and technical advice before making a final decision.
